

HERITAGE[®]

U.S. COIN AUCTION

JUNE 8-10, & 12, 2016 | LONG BEACH

U.S. Coins

Featuring: The Rev. Dr. James G. K. McClure Collection • The Soquel Creek Collection • The Eagle One Collection
• Selections From the Eric P. Newman Numismatic Education Society

June 8-10 & 12, 2016 | Long Beach

Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103A
300 E. Ocean Blvd. • Long Beach, CA 90802

Session 1

Wednesday, June 8 • 6:00 PM PT • Lots 3001-3637

Session 2

Thursday, June 9 • 1:00 PM PT • Lots 3638-4239

Session 3 – PREMIER

Thursday, June 9 • 6:00 PM PT • Lots 4250-4921

1235 TOKENS & MEDALS (See Separate Catalog)*

Friday, June 10 • 10:00 AM PT • Lots 98001-98439

Session 4

Friday, June 10 • 3:00 PM PT • Lots 4922-5182

Session 5

Friday, June 10 • 6:00 PM PT • Lots 5183-5597

Signature® Internet Session 6

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 6

Sunday, June 12 • 1:00 PM CT • Lots 7001-8767

1235 TOKENS & MEDALS (See Separate Catalog)*

Monday, June 13 • 5:00 PM CT • Lots 98501-99430

* For a copy of this catalog, call Direct Client Service Line:

BIDDING METHODS

HERITAGE Live!®¹ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Tuesday, June 7, by 12:00 PM CT.

Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.

Live Proxy bidding continues through the session.

HA.com/1236

Fax Bidding

Fax bids must be received on or before Tuesday, June 7, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before Tuesday, June 7.

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Dear Bidder:

Welcome to Heritage's Official Auction of the June, 2016 Long Beach Expo! While we always look forward to the June Long Beach event, we anticipate a truly exceptional event this year with a full bourse floor and exciting Floor Sessions starting on Wednesday evening (June 8) and continuing through Friday evening.

The Premier Session is scheduled for Thursday evening, with 672 high-value lots including an important 1852 proof dollar deemed an Original proof by recent research. It is the finest-known proof 1852 Seated dollar known certified as PR66 NGC (original or restrike), and it is one of only two such Original pieces identified to date. Other notable lots include an 1804 13 Stars Reverse quarter eagle in AU50 PCGS; a high-grade 1856-O double eagle in AU55 PCGS Secure (one of just 23 examples traced); and an 1820 proof quarter – unique as a proof – graded PR64 PCGS Secure CAC, Ex: Earle/Norweb.

Please take a few minutes to read these short descriptions of the Featured Collections and other highlights of our Long Beach offerings:

The Rev. Dr. James G. K. McClure Collection

More than 3,000 U.S. and world coins, medals, and tokens were collected by Reverend Dr. James Gore King McClure between the 1860s and 1930s. It is a remarkable collection in size and scope. Held by the McClure family in its entirety until now, the coins sat virtually undisturbed in a safe deposit box in Illinois (in the original coin cabinet trays) for decades after the death of Dr. McClure in January, 1932. The collection was certified by NGC, about which Scott Schechter, Vice President of NGC, said, "Certainly Rev. Dr. McClure's collection ranks among the most important time-capsules of U.S. coins ever offered. We savored this opportunity to learn so much about numismatics in the late 19th and early 20th centuries. Collectors of all types and levels will experience similar delight exploring the coins and in finding pedigreed pieces to add to their own holdings." A few highlights include:

- 1877-S Quarter Dollar, MS67 Star NGC – Finest S over Horizontal S by Two Points
- 1921-S Walking Liberty Half, MS66 NGC – Tied for the Finest at NGC
- 1794 B-1 Silver Dollar, VG10 NGC – Previously Unknown Example
- 1836 Gobrecht Dollar, PR63 NGC – Judd-60 Restrike, Die Alignment III
- 1838 Gobrecht Dollar, PR64 NGC – Elusive Judd-85
- 1839 Gobrecht Dollar, PR63 NGC CAC – Judd-104, Die Alignment IV
- 1852 Seated Dollar, PR64 Star NGC CAC – Usual Restrike Variant
- 1895 Morgan Dollar, PR64 NGC CAC – Proof-Only Key
- 1895-O Morgan Dollar, MS65+ NGC CAC – Only One Finer NGC Example

We encourage you to read Senior Numismatist/Cataloger Mark Borckardt's introduction to the Rev. Dr. James G. K. McClure Collection that immediately follows this letter.

The Soquel Creek Collection

Perhaps no series captures the essence of Americana to the extent of the Buffalo nickel. Its powerful design images and 25-year run of dates and Mints in the early 20th century makes it one of the most-collected series in all of numismatics. The Soquel Creek Collection includes an amazing set of Buffalo nickels that appear throughout the Premier Session, Floor Session 1, and the Signature® Internet Session in high circulation-strike grades.

The Eagle One Collection

The Eagle One Collection consists of the very definition of "collector-friendly" coins – a carefully assembled set, with appealing examples from several favorite federal series including Draped Bust and Bust half dollars, early dollars, Standing Liberty quarters, plus representative dates and varieties from other series. Every coin in the collection excels in eye appeal and technical quality for the grade.

Selections From the Eric P. Newman Numismatic Education Society

We are pleased to include additional selections from the Eric P. Newman Numismatic Education Society. These are coins not offered in one of our previous Eric P. Newman auctions, as well as a large collection of more than 600 tokens and medals assembled by Mr. Newman as part of his far-reaching numismatic interests.

Special Medals & Tokens Floor Session on Friday, June 10th at 10:00 a.m. (PT)

A separate catalog was required to present such a large and important gathering of tokens and medals, which includes more than 439 Signature lots plus another 930+ lots in a separate Signature® Internet Session on Monday, June 13. Fresh-to-the-market Civil War Patriotic and Merchant tokens, Trade tokens, Hard Times tokens, U.S. Mint medals, Betts medals, Military medals, So-Called dollars, and other tokens and exnumia are offered as part of more than 1,300 lots consigned from the McClure Collection, the Eric P. Newman Numismatic Education Society, and other select consignments.

- Civil War tokens, merchant tokens, and other exnumia from the extraordinary Eric P. Newman Collection are presented on behalf of the Eric P. Newman Numismatic Education Society.
- Lots from the McClure Collection includes a selection of Mint State tokens that make up a large portion of the special Friday morning Floor Session.
- A large collection of Mint medals and other medallic specialties from The Twin Cities Collection of Medals will be of special interest to medal collectors.
- So-Called dollars are well-represented by The Cosmique Collection featuring 130 Hibler-Kappen varieties.

We certainly hope you will attend the Long Beach Expo in person – the venue and opportunities are not to be missed. Please accept our “open invitation” to stop by the Heritage booth on the bourse floor. Attendees can view the Signature and Premier Floor Session lots on-site and experience the thrill of bidding live from the auction floor. If not able to attend in person, please remember that we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® – our proprietary, award-winning online platform that provides real-time, seamless bidding from anywhere in the world.

We look forward to a fun and mutually beneficial event, and as always we wish you good luck with your bids. Please feel free to contact us anytime.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

Items identified as from the Eric P. Newman Numismatic Education Society (a Missouri not-for-profit corporation) are being sold from the extensive collection assembled by Eric P. Newman over a period of 90 years. Proceeds of the sale of all items will be used exclusively for supplementing the Society's museum operations and scholarly research efforts and for the benefit of other not-for-profit institutions selected by Eric P. Newman Numismatic Education Society for public purposes.

THE REV. DR. JAMES GORE KING McCLURE COLLECTION

Many names come to mind when current-day numismatists think of 19th and early 20th century collectors. Names like Garrett, Brand, Green, Newcomer, Stickney, Appleton, and Mitchelson are just a few. Those collectors avidly pursued their numismatic interests from the 1840s through the 1930s. There were many others, such as the Rev. Dr. James Gore King McClure. He was born on November 24, 1848, and apparently began collecting coins about the year 1860. Until now, his collection of over 3,000 pieces had resided for decades in a bank vault.

A sentence that McClure wrote in an 1896 article about silver dollars suggests that he developed an early numismatic interest: "Interest in coins was a large feature of my boyhood days, and that interest, though a very minor part of life now, still exerts its influence, much as the perfume lingers about the vase that once held the flower."

Rev. Dr. James Gore King McClure

McClure was the son of an influential Albany, New York businessman, Archibald McClure. Educated at Phillips Andover Academy, he continued his studies at Yale University, where he graduated in 1870, and at Princeton Theological Seminary, earning his theological degree in 1873. He was ordained in the Presbyterian Ministry in 1874.

After holding church positions in the Albany area for several years, and following his 1879 marriage to Miss Annie Dixon, Rev. McClure answered a call to the pastorate at the First Presbyterian Church of Lake Forest, Illinois in 1881. He received his Doctor of Divinity degree from Lake Forest College in 1888. McClure resided in the Chicago area the rest of his life.

In addition to service at the First Presbyterian Church, Rev. Dr. McClure was president of Lake Forest College for several years at the end of the 19th century, and he was president of Chicago's McCormick Theological Seminary from 1905 to 1928. As a Mayflower descendant, he was a governor of the Society of Mayflower Descendants in the State of Illinois from 1919 to 1930, and a deputy governor of the General Society of Mayflower Descendants in the United States from 1922 to 1930. He died on January 18, 1932.

The Rev. Dr. and Mrs. McClure were the parents of five children, including Harriet, who married R. Douglas Stuart (1886-1975). Stuart's father, Robert Stuart, was a founder of the Quaker Oats Company. His son later served as U.S. Ambassador to Canada. The McClure and Stuart families were acquainted through the First Presbyterian Church in Lake Forest. Harriet and Douglas' son, Robert D. Stuart, Jr. (1916-2014), served as CEO of Quaker Oats from 1966 to 1981, and sat on the board of directors of the First National Bank of Chicago, United Airlines, Deere and Company, and other companies. He was also a trustee of Princeton University, and served for several years as the U.S. ambassador to Norway.

The McClure collection of approximately 3,000 items was varied, showing his diverse interest in all things numismatic. In addition to impressive mainstream U.S. coinage, he included world and ancient coins in his cabinet, as well as exceptional tokens and medals. His U.S. coinage is offered in the main catalog for the June Long Beach sale, and his tokens and medals are offered in a special catalog bringing together spectacular pieces from several consignors.

His collection was housed in a cabinet with several individual trays. Following his death, those trays were tucked away in a bank vault, and remained there for more than 50 years before they were consigned to Heritage Auctions. We are pleased to offer these coins to the present generation of collectors who will cherish each for its numismatic importance and provenance.

Several of the trays of coins from the McClure Collection are seen here.

SESSION ONE

COLONIALS

1652 Pine Tree Threepence, VF25
Noe-34, Salmon 1-A, Pellets at Trunk

- 3001** 1652 Pine Tree Threepence, Pellets at Trunk, VF25 NGC. Noe-34, W-630, Salmon 1-A, R.4. 14.6 gn. The two Boyd/Ford examples weighed 17.6 and 18.7 grains. A walnut-brown representative with generally pleasing surfaces despite small depressions west of the 1 in the date. A few peripheral letters on the upper obverse and left reverse are off the flan. The tree is virtually complete, and the date and denomination are bold. Listed on page 41 of the 2017 *Guide Book*.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5JDS, PCGS# 45365 Base PCGS# 21

1652 Pine Tree Sixpence, XF Details
Noe-33, Originally Toned

- 3002** 1652 Pine Tree Sixpence, Pellets at Trunk — Scratches — NGC Details. XF. Noe-33, W-670, Salmon 3-B, R.3. An evenly defined gunmetal-gray and caramel-gold representative. A small linear flan flaw affects the final S in MASATHVSETS, but the coin is less abraded than the NGC notation suggests. The obverse is misaligned toward 12 o'clock, as usual for Noe-33. Noe-33a is the scarcer normal alignment variety. Listed on page 41 of the 2017 *Guide Book*.
From The Rev. Dr. James G. K. McClure Collection.

1652 Pine Tree Shilling, XF Details
Small Planchet Guide Book Variety, W-930

- 3003** 1652 Pine Tree Shilling, Small Planchet — Obverse Graffiti — NGC Details. XF. Noe-29, W-930, Salmon 11-F, R.3. The top of the tree points to the lower right serif of H and there is a heavy 5 in the date, identifying the popular W-930 variety. This lightly worn specimen is well-centered on the obverse, with all legends legible, but the four pellets at the bottom have been effaced by a grid of light pinscratches. On the reverse, the legends on the left run off the planchet by about 50%. The lightly abraded surfaces show an attractive blend of lavender-gray and golden-brown toning. Listed on page 41 of the 2017 *Guide Book*.
From The Rev. Dr. James G. K. McClure Collection.

- 3004** 1787 Massachusetts Half Cent XF45 NGC. Ryder 3-A, W-5920, Low R.5. The Ryder 3-A Massachusetts half cent ranks among the scarcer die marriages of the nine die pairs known for 1787. Although imperfectly centered, both sides exhibit full borders. The surfaces display pleasing dark chocolate-brown patina with trivial marks. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2B22, PCGS# 296

1787 Massachusetts Half Cent, AU58
Ryder 4-C, Great Eye Appeal

- 3005** 1787 Massachusetts Half Cent AU58 NGC. Ryder 4-C, W-5940, R.2. An olive-green and gunmetal-gray Borderline Uncirculated representative. The coruscating surfaces are remarkably free from abrasions. The centers are inexactly impressed and retain portions of the planchet texture. Superior quality for the designated grade. Census (all varieties included): 12 in 58, 33 finer (1/16). NGC ID# 2B22, PCGS# 296

**1787 Massachusetts Half Cent
MS62 Brown, Very Scarce Ryder 4-B**

- 3006** 1787 Massachusetts Half Cent MS62 Brown NGC. Ryder 4-B, W-5930, R.5. Satiny and unmarked with slight incompleteness of strike at the centers. An impressive medium brown example of the very scarce Ryder 4-B variety. Among 1787 Massachusetts half cents, only Ryder 4-D, Ryder 6-A, and Ryder 6-D are believed rarer. Ryder 4-B is distinctive as the only variety with the eagle's beak repunched west. Listed on page 61 of the 2017 *Guide Book*.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2B22, PCGS# 296

**1787 Massachusetts Cent, MS62 Brown
Horned Eagle, W-6040**

- 3007** 1787 Massachusetts Cent, Horned Eagle MS62 Brown NGC. Ryder 2b-A, W-6040, R.3. The prominent die break at the eagle's head and the position of the lowest leaf opposite the upright of the M in MASSACHUSETTS identifies the popular Horned Eagle variety. The glossy chocolate-brown surfaces of this attractive MS62 example are free of large or distracting abrasions and no planchet flaws are evident, aside from some slight granularity in the lower reverse field. Listed on page 61 of the 2017 *Guide Book*. Census: 1 in 62 Brown, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2B26, PCGS# 305

- 3008** 1787 Massachusetts Cent, Arrows in Left Talon, XF45 NGC. Ryder 3-G, W-6090, R.3. This R.3 die marriage ranks among the more plentiful varieties of 1787 Massachusetts cents. Trivial marks are noted on the pleasing chestnut-brown surfaces of this copper. Slight central weakness is typical of the variety. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2B25, PCGS# 302

- 3009** 1788 Massachusetts Cent, Period, XF40 NGC. Ryder 3-E, W-6220, R.4. This scarce variety is elusive in any grade and especially difficult to locate above VF, with only about a dozen XF or finer examples known, including the present representative. The medium chocolate-brown surfaces exhibit wood-grained tan color with excellent eye appeal. Mild surface granularity is only visible with a glass. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2WNJ, PCGS# 311

- 3010** 1788 Massachusetts Cent, Period, AU50 NGC. Ryder 12-I, W-6330, Low R.4. The design elements are boldly rendered on this important Massachusetts cent. The variety is usually found in lower grades, VF at best, and the present piece is in the Condition Census. A few minor rim nicks and other trivial marks are noted on the pleasing light chocolate-brown surfaces. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2WNJ, PCGS# 311

- 3011** 1788 Massachusetts, No Period, XF40 NGC. Ryder 13-N, W-6380, High R.4. The two No Periods varieties are equally scarce, and the type is elusive in all grades. This chestnut-brown Ryder 13-N example has splashes of olive patina on the obverse. Trivial scattered handling marks are consistent with the grade. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2B28, PCGS# 45419

- 3012** 1785 Connecticut Copper, Bust Right, VF30 NGC. M. 6.3-G.1, W-2400, R.3. A charming midgrade representative of the first-year Connecticut copper. Marks are confined to three hair-thin field lines near the D in INDE. Portions of the coin retain the granular texture of the planchet, as made. A late die state with buckling apparent near Liberty's extended arm. Listed on page 63 of the 2017 *Guide Book*.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3788, PCGS# 316

**1787 Connecticut Copper, AU53
Muttonhead, Miller 1.2-C
Intermediate to Late Die State**

- 3013** 1787 Connecticut Copper, Muttonhead AU53 PCGS. M. 1.2-C, W-2720, R.3. An intermediate to late die state of this famous Connecticut variety. About half of the legends are present, with the missing portions absent due to excessive lapping at the unknown 18th-century private mint. This walnut-brown example is lightly brought up at the centers, where the granular texture of the planchet is retained. Wear from circulation is scant. Unabraded and lightly to moderately granular. Listed on page 63 of the 2017 *Guide Book*.

**1787 Connecticut Copper, AU50
Draped Bust Left, Rare Miller 33.29-Z.7**

- 3014** 1787 Connecticut Copper, Draped Bust Left, AU50 PCGS. M. 33.29-Z.7, W-3780, R.6. An evenly struck and lightly circulated walnut-brown representative of this challenging die pairing. The surfaces are unabraded and microgranular. The usually seen die state with buckling near the U in AUCTORI, and several slender breaks between the nose and the letter C. The obverse has radial cracks at 4:30 and 5 o'clock. Better defined than the Ford:IX example (lot 407), which was described as AU and realized \$11,500 in May 2005. Listed on page 64 of the 2017 *Guide Book*. NGC ID# 2B33, PCGS# 370

**1788 Bust Right Vermont Copper, AU58
Attractive Ryder-16, W-2120 Variety**

- 3015** 1788 Vermont Copper, Bust Right, AU58 PCGS. CAC. RR-16, Bressett 15-S, W-2120, R.1. An exquisite medium-brown example. Traces of faded mint red cling to the letters in AUCTION. Free from marks or spots, although the centers are minutely granular where the strike was incomplete (characteristic of Ryder 16). The top of A is broken, diagnostic of the variety. The reverse displays minor strike-throughs near Liberty's neck, her extended hand, and the L in LIB. The obverse is just slightly misaligned toward 2:30, while the reverse shows ideal centering. Listed on page 74 of the 2017 *Guide Book*. NGC ID# 2B5D, PCGS# 563

**1788 Vermont Copper, MS60 Brown
RR-24, Ex: Norweb, Partrick**

- 3016** 1788 Vermont Copper, Bust Right, MS60 Brown NGC. RR-24, Bressett 16-S, W-2200, R.3. Ex: Norweb, Donald G. Partrick Collection. The only mentionable defects on this lustrous, glossy coin are Mint-related. Struck to resemble circulated coinage, any defects or strike weakness added credibility to the issue as normal "wear and tear." This example shows a cigar-shaped planchet void on the reverse at Liberty's knees. The obverse displays granular weakness on the neck, and the usual RR-24 diagnostic die breaks. The coin is clearly Uncirculated, with a beautifully centered obverse and reverse. Light golden-brown color complements the just-minted appeal. Listed on page 74 of the 2017 *Guide Book*. Ex: Brand Collection; Walter Breen; Richard Picker (1959); Norweb Collection (Bowers and Merena, 10/1987), lot 1290; Jon Hanson (11/1987); Donald Groves Partrick (Heritage, 1/2015), lot 5803. NGC ID# 2B5D, PCGS# 563

- 3017** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU50 PCGS. N. 16-N, W-6925, R.3. A well-defined and minimally marked medium brown example. Struck several degrees off center toward 7:30. The dies were axially misaligned, which led to a sharp strike on the lower obverse and upper reverse, while opposite areas retain the planchet texture. Newman 16-N did not participate in the Bank of New York hoard, and the variety is very rare any finer than the present grade. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

**'1789' Mott Token, MS64 Brown
Breen-1022, 'Very Rare' Cent Weight Variety**

- 3018** 1789 Mott Token, Cent Weight, Plain Edge, MS64 Brown PCGS. Breen-1022. Breen (1988) describes his 1022 variety as "cent weight. Very rare. Apparent standard, 208 grains." PCGS does not record the weight on the insert, but the flan is very thick. The die state is relatively early, without a break from the upper left clock corner. There is no evidence of an undertype. The satiny chocolate-brown surfaces show relatively few marks. Minor flan striations (as made) below the eagle. PCGS# 605

**1794 Talbot, Allum & Lee / Howard Mule
W-8720, MS64 Brown**

- 3019** 1794 Talbot/Howard MS64 Brown PCGS. Breen-1049, W-8720, R.4. The Talbot, Allum & Lee obverse of the W-8580 variety is paired to a reverse showing a left-facing portrait of John Howard, a fellow of the Royal Society (F.R.S.). This muling is known both with and without a lettered edge. The former variant, here offered, is the most often seen. This Choice example displays medium auburn patina with hints of copper-red peaking through in the peripheries. The Howard side is well-struck, although the Talbot central figure is poorly defined, as usual. This piece is the sole finest certified at PCGS (7/15). NGC ID# BT4H, PCGS# 976

HALF CENTS

**1793 Half Cent, VF Details
First Variety Struck, C-1, B-1**

- 3020** 1793 C-1, B-1, High R.3 — Environmental Damage — NGC Details. VF. Manley Die State 3.0. The denomination has faded on the reverse, mostly due to die wear, but the rim cud above F AME is visible on this rare late die state piece. The B-1 was the first half cent variety struck in 1793 and most examples seen are in lower circulated grades. This lightly worn, well-centered example shows minor effects of corrosion on all surfaces, as if the coin had been buried for a relatively short period of time. Our EAC grade VG7. From The Rev. Dr. James G. K. McClure Collection.

**1793 C-2 Half Cent, VF Details
Scarce One-Year Type**

- 3021 1793 C-2, B-2, R.3 — Environmental Damage — PCGS Genuine. VF Details.** A granular sea-green and mahogany-brown representative. All legends are readable, and most are clear to bold, although LIBERTY is somewhat faint. Marks are absent but we note a small rim depression on the obverse near 1:30. First year of the denomination, and a single-year design type. Our EAC grade Good 4. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

- 3022 1793 C-4, B-4, Low R.3 — Environmental Damage — PCGS Genuine. VF Details.** A suitable coin for the collector seeking a single 1793 half cent. This VF-level example is dark and heavily corroded, but the date, LIBERTY, and much of the reverse peripheral legend is readable. The edge inscription is plain. Our EAC grade AG3. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

- 3023 1794 Normal Head, C-3a, B-5b, R.5 — Tooled — NGC Details. VF.** A boldly detailed, chocolate-brown example of this rare Small Edge Letters variety. The obverse shows some faint, hair-thin scratches under a loupe while both sides are finely granular. The budget-conscious type collector will recognize the remaining appeal that this piece possesses. Our EAC grade Fine 12.

- 3024 1795 Lettered Edge, C-1, B-1, R.2, Fine 12 NGC.** Manley Die State 1.0. An ebony-brown Liberty Cap cent with moderately granular surfaces. Marks are essentially absent aside from a slight rim knock on the reverse at 5 o'clock. The die lump within the reverse dentils near 9 o'clock is characteristic of Cohen-1. Our EAC grade VG8. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 2224, PCGS# 35067 Base PCGS# 1009

**1800 C-1, B-1 Half Cent, MS61 Red and Brown
Scarce First-Year Draped Bust Issue**

- 3025 1800 C-1, B-1, R.1, MS61 Red and Brown PCGS.** The only half cent variety for 1800, this example shows generous amounts of mint red luster on both sides merging into blue overtones at the right obverse. The finely granular surfaces show tiny bumps, lumps, and small nicks but all require a lens for viewing. Slight weakness at the dentils and at OF as well as at the lowest obverse curl are noted, but the definition on the motifs is otherwise strong and attractive. Our EAC grade XF45. NGC ID# 222B, PCGS# 35120 Base PCGS# 1052

- 3026 1804 Crosslet 4, Stems, C-10, B-9, R.1, AU58 PCGS. CAC.** Manley Die State 3.0 without dentilation. A pleasing chocolate-brown and mahogany Draped Bust type coin. The surfaces retain significant satin luster and are only lightly abraded. 1804 is a rare date for other denominations, but the half cent mintage surpassed 1 million pieces. Incorrectly designated as C-9 by PCGS. Our EAC grade XF45. NGC ID# 222F, PCGS# 35158 Base PCGS# 1069

**1806 Large 6, Stems Half Cent, MS63+ Brown
C-4, B-4, Perfect for Type Purposes**

- 3027 1806 Large 6, Stems, C-4, B-4, R.1, MS63+ Brown PCGS.** Manley Die State 1.0. Often used for type purposes, many pieces were purchased by the Chapman brothers in a hoard in 1906. Correctly termed a Brown coin, when examined beneath a light faint traces of original red can still be found on each side. Better struck on the obverse than the reverse. Our EAC grade MS60. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

- 3028 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS62 Brown PCGS. CAC.** A mostly chestnut-brown example with a few areas of burgundy toning on the reverse. This Mint State C-5 half cent shows well-struck devices but with mild weakness along the left obverse border. There are no distinctive abrasions. Our EAC grade AU50. NGC ID# 222N, PCGS# 35233 Base PCGS# 1126

- 3029 1811 Close Date, C-2, B-2, Low R.3, VF20 NGC.** Manley Die State 2.0. A medium brown and microgranular representative. Marks are minor save for moderate contact on the field near the profile. Although scudzy examples are obtainable, the 1811 is surprisingly difficult to secure in better circulated grades. Our EAC grade VG10. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

**1825 C-2, B-2 Half Cent, XF45
Struck 40% Off-Center North**

- 3030 1825 Off-Center Strike, C-2, B-2 XF45 PCGS.** Luckily, all of the key diagnostics to identify the C-2 variety, with the 25 of the date centered beneath the lowest curl and star 12 noticeably recut. Remarkably, almost half of Liberty was missing in action yet the coin still circulated enough to show 15 points of wear. This is an exceptional half cent error and a prize for the specialist, the likes of which will not be seen again in all probability. The surfaces are a pleasing medium-brown with no distractions, the captivating off-center strike aside. Our EAC grade VF25. NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

**1828 Half Cent, MS64 Brown
C-2, B-3, 12 Stars Variant**

3031 1828 12 Stars, C-2, B-3, R.2, MS64 Brown PCGS. Manley Die State 3.0. The 12 Stars obverse easily identifies this *Guide Book* variety. It is unknown whether the 13th star was omitted intentionally or not. Marvelous chocolate-brown surfaces display surprisingly few blemishes for the technical assessment. The stars lack full centers and high-point detail is moderately incomplete, but this near-Gem is no less impressive for it. Our EAC grade AU50. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

3032 1835 C-2, B-2, R.1, MS64+ Red and Brown PCGS. CAC. Manley Die State 3, cracked and clashed. This high-end near-Gem Red and Brown 1835 half cent displays well-struck design elements with rich burgundy overtones atop copper-red luster. The reverse is rotated slightly clockwise, as is characteristic of this variety. All varieties included, PCGS lists 25 finer Red and Brown examples. Our EAC grade MS62. CAC: 20 in 64, 15 finer (4/16). NGC ID# 2233, PCGS# 35292 Base PCGS# 1169

3033 1854 C-1, B-1, R.1, MS66 Brown NGC. CAC. A semiprooflike walnut-brown and apple-green example. Marks are absent, and the strike is full aside except on the dentils. A high grade survivor from this later and low mintage date. Our EAC grade MS62.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3040, which realized \$1,265. NGC ID# 26YY, PCGS# 35330 Base PCGS# 1230

3034 1854 C-1, B-1, R.1, MS65 Red and Brown NGC. The Mint employed a single set of dies to strike 55,358 half cents in 1854. Copper-red hues appear mainly in the recesses, complementing attractive shades of steel-blue, mahogany-brown, and violet that grace the surfaces of this lustrous Gem half cent. Boldly struck with minimal ticks. Our EAC grade MS62. NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

3035 1854 C-1, B-1, R.1, MS65 Red and Brown PCGS. A sharp Gem 1854 half cent, showing satiny copper-red luster with soft burgundy overtones over much of each side. There are no prominent carbon spots, and the surfaces are devoid of abrasions. Our EAC grade MS62. Population: 17 in 65 Red and Brown, 1 finer. CAC: 10 in 65, 1 finer (5/16). NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

LARGE CENTS

3036 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — **Planchet Flaw** — NGC Details. VG. Darkly toned planchet flaws are noted on Liberty's chin and the obverse border at 9 o'clock. A deep brown example with moderately granular surfaces and a few minor rim nicks. All legends are readable, and about half of the legends are bold. Our EAC grade Good 5.
From The Rev. Dr. James G. K. McClure Collection.

**1793 Wreath Cent, Fine Details
S-8, Vine and Bars Edge**

3037 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — **Corrosion** — NGC Details. Fine. Thin leaves with stem pointing right and the straight spray of berries below the S in STATES confirm the Sheldon-8 die pair. The major design elements, including all the legends, are clear on each side of this first-year Wreath cent. Only the dentils are incomplete. Light brown high points and dark brown fields color uniformly granular surfaces. Our EAC grade VG8.

3038 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — **Damage** — PCGS Genuine. VG Details. This single-year type coin is toned deep brown. The surfaces are granular, the date area is pinscratched, the obverse rim is beveled at 9 o'clock, and a pair of scratches accompany the obverse border at 4 o'clock. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

**1793 Wreath Cent, VF Details
Lettered Edge, S-11b, B-16b**

3039 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — **Environmental Damage** — NGC Details. VF. Breen Die State II. The edge is lettered, all three leaves in the sprig lean right, and the end of a spike of berries forms a sort of period after the final A in AMERICA, identifying the S-11b variety. This moderately worn example is well-centered and retains significant interior detail on the devices, but the dark brown surfaces are lightly corroded. Our EAC grade VG10.
From The Rev. Dr. James G. K. McClure Collection.

**1794 S-56 Head of '94 Cent, VF30
'Office Boy' Reverse**

- 3040** 1794 Head of 1794, S-56, B-48, R.3, VF30 PCGS. Ex: Jack Conour Collection. Breen Die State II. The A in STATES is repunched, rotated down to the right, and joined at the base with the adjacent first T. The S-56 variety employs the "Office Boy Reverse" according to Sheldon's description of the crude lettering, uneven spacing, unsymmetrical wreath, and other odd die characteristics. Deep toning covers both sides in ebony-brown shades, while a loupe reveals numerous small digs and marks that are less-apparent when viewed in-hand. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35630 Base PCGS# 901374

- 3041** 1795 Plain Edge, S-78, B-8, R.1 — Double Struck — Fine 12 NGC. The planchet shifted several degrees northwest (relative to the obverse) between strikes. The doubling is most prominent on the cap and bust tip, although the top of Liberty's head and her profile is also strongly doubled. Doubling is also apparent on the legends, but in less dramatic fashion. The steel-gray surfaces are attractive save for obverse pitting near 1 o'clock. UNITED and AMERICA are faint. Our EAC grade VG7. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

**1796 Liberty Cap Cent, VF20
Reverse of 1794, S-110, B-16**

- 3042** 1796 Reverse of 1794, S-110, B-16, R.3, VF20 NGC. CAC. Breen Die State VII. The crack joining 9 and 6 in the date and the leaf almost touching the right foot of M in AMERICA identifies the S-110 variety. This pleasing chocolate-brown example is from a later die state, with large die breaks at E in UNITED and E in ONE. A scattering of minor abrasions is evident on both sides, but this coin is well-centered and retains much interior detail in the hair and drapery. Our EAC grade Fine 12. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 223W, PCGS# 35801 Base PCGS# 1404

- 3043** 1801 S-224, B-13, R.1, XF45 NGC. The E in AMERICA is repunched on this collectible Sheldon marriage. A well-defined example that features deep walnut-brown and gunmetal toning. The reverse field appears devoid of contact, and the obverse shows only light marks, along with minor pitting near 4:30. Our EAC grade VF25. NGC ID# 224D, PCGS# 36254 Base PCGS# 1458

- 3044** 1802 S-237, B-10, R.2, AU55 PCGS. Breen Die State VII. A well-defined deep brown example. Luster dominates design elements, and granularity is confined to a small and inconspicuous spot east of the 2 in the date. The reverse is nearly unabraded, and the obverse displays scattered inoffensive marks. Our EAC grade XF40. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

**1803 S-255 Cent, AU53
Small Date, Small Fraction**

- 3045** 1803 Small Date, Small Fraction, S-255, B-14, R.1, AU53 NGC. CAC. An olive-brown representative with obverse ocean-blue undertones. Traces of red outline the portrait. The obverse field displays minor marks and is glossy near Liberty's chin. The reverse shows only trivial contact. Both sides are void of consequential carbon. Struck from a clashed reverse die. Cracked through the M in AMERICA. Our EAC grade XF40. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224G, PCGS# 36380 Base PCGS# 1482

**1804 S-266a Cent, VG10
Early Dies, Key Date**

- 3046** 1804 S-266a, B-1, R.2, VG10 NGC. Breen Die State II. From relatively early dies, prior to the initial break over the RTY in LIBERTY. The deep brown surfaces are mildly glossy and display scattered minor abrasions. Free from spots or mentionable granularity. The legends are bold save for minor fading on the upper portion of STATES. A key date with only a single die marriage, excluding the out-of-mint, altered date "restrike." Our EAC grade VG8. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

- 3047** 1805 S-267, B-1, R.1, XF45 NGC. The leaf tip pointing to the final S in STATES confirms the variety. Mahogany-brown patina dominates this Choice XF Draped Bust cent, accompanied by accents of orange and steel-blue. Boldly impressed with minimal evidence of friction. The denticles are indistinct on each side. Our EAC grade VF30. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

- 3048** 1808 S-278, B-2, R.3, VF30 NGC. A midgrade walnut-brown example of the conditionally challenging Classic type. No marks are remotely relevant, and the sole spot is minor and located on the field near the profile. A very late die state with heavily flowlined fields, as made. Our EAC grade VF20. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224P, PCGS# 36460 Base PCGS# 1543

**1808 S-278 Cent, AU50
First Classic Head Issue**

- 3049** 1808 S-278, B-2, R.3, AU50 NGC. Breen Die State II, with flow lines joining stars 10 through 12 to the rims and crumbling dentils below the date. Struck slightly off center toward 1 o'clock. Chocolate-brown and steel color this About Uncirculated Classic Head cent. A characteristic strike shows incomplete centers on all but stars 1 to 5, and Liberty's hair curls are soft. Smooth and attractive with few signs of contact. Our EAC grade VF35. NGC ID# 224P, PCGS# 36460 Base PCGS# 1543

- 3050** 1809 S-280, B-1, R.2, VF20 NGC. Breen Die State V. The only dies for this conditionally challenging date. A medium brown representative with a surprisingly sharp reverse. A few ticks are scattered across the obverse field, and a small inactive spot is noted on Liberty's neck. Our EAC grade Fine 12.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224R, PCGS# 36466 Base PCGS# 1546

- 3051** 1810/09 S-281, B-1, R.1, VF25 PCGS. CAC. An evenly worn example with consistently deep chocolate-brown patina. This mid-level 1810/09 large cent displays problem-free surfaces, which is a scarce characteristic of any issue in the Classic Head type. The CAC green label confirms the quality. Our EAC grade Fine 12. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

- 3052** 1811/0 S-286, B-2, R.3, VF25 NGC. Breen Die State II. Curves of an underdigit 0 bookend the final 1 in the date. A glossy medium brown representative. Granularity is minimal, and the sole consequential mark is a faint straight line on the portrait. A conditionally challenging type. Our EAC grade Fine 15.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224V, PCGS# 36490 Base PCGS# 1558

- 3053** 1813 S-293, B-1, R.2, XF40 PCGS. A well-detailed XF example, showing deep chocolate-brown surfaces without significant imperfections. A few minor marks on the cheek are the most mentionable abrasions, and faint granularity in portions of the fields is not immediately obvious. The upper obverse and lower reverse borders show slight incompleteness of strike. Our EAC grade VF20. NGC ID# 224X, PCGS# 36514 Base PCGS# 1570

**1814 Crosslet 4 Cent, AU53
S-294, Unmarked Surfaces**

- 3054** 1814 Crosslet 4, S-294, B-1, R.1, AU53 NGC. CAC. A lightly worn deep chocolate-brown cent with pleasing, unabraded surfaces. Luster glimmers throughout the margins. Granularity is confined to the obverse field near the lower ribbon end. A middle to late die state with flowlines throughout the borders and merged upper reverse dentils. Our EAC grade VF35.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

**1814 Plain 4 Cent, AU50
S-295, Final Sheldon Variety**

- 3055** 1814 Plain 4, S-295, B-2, R.1, AU50 NGC. Breen Die State IX. An attractive walnut-brown Classic type coin. The curls and leaves display moderate wear. The upper obverse exhibits a few inconsequential thin marks. Liberty's chin is strike doubled. No cents were struck dated 1815, but cents were likely struck during 1815, from S-295 dies. Our EAC grade VF35.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

**1816 Cent, MS64+ Red and Brown
N-2, Matron Head Type Coin**

- 3056** 1816 N-2, R.1, MS64+ Red and Brown NGC. CAC. Substantial Mint Red illuminates protected areas of the obverse. The remainder of the obverse is medium brown. The reverse is sea-green and golden-brown. Unabraded, though two small obverse field spots are noted near the chin and hairbun. N-2 was among the most prevalent varieties from the Randall Hoard, disbursed circa 1869 to 1879. An intermediate to late die state. Fine cracks connect ST and OF, but rim crumbling is absent between stars 11 and 12. Our EAC grade MS63.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 36527 Base PCGS# 1592

- 3057** 1820 Large Date, N-13, R.1, MS65+ Brown NGC. Die State B, with heavy peripheral die cracks on the obverse. N-13 shows the L in LIBERTY triple punched. This luminous high-end Gem is razor-sharp on the central devices but slightly weak on several peripheral stars. Burgundy-brown surfaces are free of distractions save for a small cluster of specks around the M in AMERICA. Our EAC grade MS63. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

- 3058** 1827 N-8, R.3, MS63 Brown NGC. A fairly late die state with cracks through several stars. A splendid chocolate-brown cent that boasts semiprooflike fields, a good strike, and an absence of abrasions. The grade is limited solely by moderate granularity near AMERICA. Our EAC grade AU55.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 36859 Base PCGS# 1651

- 3059** 1828 Large Narrow Date, N-2, R.2, MS62 Brown PCGS. Die State A. N-2 shows the BER in LIBERTY recut. This Brown Mint State coin displays a bold strike and satiny olive-brown patina. Grade-limiting abrasions are trivial and invisible without a loupe. A pleasing lower-end Mint State Matron Head type coin. Our EAC grade XF45. PCGS# 36877 Base PCGS# 1654

1828 N-3 Cent, MS64 Brown
Large Narrow Date
Condition Census Quality

- 3060** 1828 Large Narrow Date, N-3, R.2, MS64 Brown NGC. CAC. Olive-green toning embraces the obverse. The reverse is mahogany-brown. Both sides are well struck and lustrous. Marks are limited to a faint scuff on the left obverse field. Uncommonly nice for the conditionally rare N-3, and the highest graded example of the variety to appear in a Heritage auction, surpassing the MS63 Brown cent from the Mervis Collection. Our EAC grade AU50. *From The Rev. Dr. James G. K. McClure Collection.* PCGS# 36880 Base PCGS# 1654

- 3061** 1837 Head of 1838, N-10, R.1, MS65 Brown PCGS. Tinges of copper-red luster hug the bases of the stars, wreath, and other relief design elements, although most of each side displays luminous burgundy-brown luster. Several stars are weakly defined, and the fields are heavily flowlined from die wear, but the central devices remain bold. A single tick on Liberty's cheek is all that precludes a finer grade. Our EAC grade MS60. Population (all Head of 1838 varieties included): 42 in 65 (1 in 65+) Brown, 16 finer (5/16). PCGS# 37135 Base PCGS# 1729

- 3062** 1839 Petite Head of 1840, N-8, R.1, MS63 Brown PCGS. The debut Braided Hair large cent issue. This piece is conditionally elusive. The strike is razor-sharp, and the satiny surfaces display rich auburn-brown patina with a slightly glossy hue in the fields. Housed in a green label holder. Our EAC grade AU50. Population: 9 in 63 Brown, 26 finer (5/16). NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

1840 N-10, N-11 Cent, MS65+ Brown
Smooth Mahogany and Steel Surfaces

- 3063** 1840 Large Date, N-10, N-11, R.2, MS65+ Brown NGC. CAC. Grellman die state b. The point of the hair curl over the 4 is blunt, and a line over MERIC seen on early die state examples has disappeared. The 1840 is exceedingly scarce in Gem condition, let alone MS65+ with CAC approval. Such is the case regardless of color designation. Marvelous mahogany-brown and steel combine with coppery-orange hues in the recesses. The devices are well brought-up with complete star centers and bold hair strands. Smooth and satiny with superb eye appeal. Our EAC grade MS62. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 2266, PCGS# 395846 Base PCGS# 1820

- 3064** 1847/47 Large Over Small 7, N-18, R.5, AU58 NGC. CAC. Grellman Die State a. Most cents cataloged as the Large Over Small 7 variety are Newcomb-2. N-18 is considerably scarcer, especially in grades that approach Mint State. This chocolate-brown representative has a microgranular portrait, usual for N-18. A lens reveals minor marks, such as lines on the field near stars 3 to 5. Our EAC grade AU50. *From The Rev. Dr. James G. K. McClure Collection.* PCGS# 405929 Base PCGS# 1880

- 3065** 1847 N-27, R.4, MS65 Brown PCGS. CAC. Die State c, reverse cracked. The repunching on the 18 of the date is plainly visible on this Gem Brown N-27 large cent. Glossy burgundy-brown toning encompasses much of each side, although tinges of original copper-red luster are still seen around the bases of the relief elements. The strike is bold, and eye appeal is excellent. Our EAC grade MS60. NGC ID# 226D, PCGS# 37331 Base PCGS# 1877

- 3066** 1851 N-2, R.1, MS65 Red and Brown NGC. A luminous Gem Red and Brown example, struck from fairly fresh dies that produce sharp central and peripheral detail. The surfaces are unabraded, and substantial coppery-red luster shines through subtle auburn overtones. A few tiny specks do not detract. Housed in a prior generation holder. Our EAC grade MS64. NGC ID# 226H, PCGS# 406651 Base PCGS# 1893

1851/81 N-3 Cent, MS65 Brown
Early Die State

- 3067** 1851/81 N-3, R.1, MS65 Brown PCGS. CAC. Die State a. N-3 shows the 51 in the date punched over an inverted 18, creating this so-called 1851/81 variety. This piece is in the early die state showing numerous die lines in the fields. The strike is bold on the central devices but a trifle weak on select peripheral stars. Lustrous burgundy-brown surfaces display hints of blue toning, giving this Gem Brown coin excellent eye appeal. Our EAC grade MS62. NGC ID# 226H, PCGS# 400138 Base PCGS# 1895

- 3068** 1851 N-10, R.1, MS65 Red and Brown PCGS. CAC. Die State b, both sides flowlined with diagnostics weakened. This Gem Red and Brown coin shows considerable copper-red luster in the fields amid patchy auburn toning. The strike is sharp on the central devices and weak around the peripheries. There are no bothersome carbon specks or abrasions. Our EAC grade MS63. Population (all varieties included): 60 in 65 Red and Brown, 6 finer. CAC: 25 in 65, 4 finer (4/16). NGC ID# 226H, PCGS# 406678 Base PCGS# 1893

**1852 N-22, N-9 Cent, MS67 Brown
Struck from a Late State of the Dies**

- 3069 1852 N-22, N-9, R.1, MS67 Brown NGC.** Grellman Die State d. Die cracks near the coronet tip aid attribution of this late dies large cent. Crisply struck and highly lustrous with mark-free and unspotted olive-green, rose-red, and steel-blue surfaces. Tied for finest at NGC. Our EAC grade MS63. PCGS# 147284 Base PCGS# 1898

**1852 N-9 Cent, MS66+ Red and Brown
Among the Finest at PCGS of Any Variety**

- 3070 1852 N-22, N-9, R.1, MS66+ Red and Brown PCGS. CAC.** Grellman Die State d. Newcomb separately designated the early and late states of this marriage, respectively as N-22 and N-9. This lustrous orange-red late die state cent has a sharp strike and unabraded surfaces. PCGS reports just one finer example. Our EAC grade MS64. PCGS# 147285

- 3071 1853 N-7, R.2, MS65 Red and Brown PCGS.** This Gem N-7 example displays frosty mint luster. Copper-red luminance shines through burgundy overtones that give the coin its well-balanced appearance. The central strike is sharp, but several peripheral stars show weakness. There are no distractions. Our EAC grade MS63. PCGS# 405995 Base PCGS# 1902

- 3072 1855 Upright 55, N-4, R.1, MS65+ Red and Brown NGC. CAC.** Grellman Die State a. Ample orange-red color cedes to brown on the cheek and in the open fields. The major devices are well brought-up, and the obverse is devoid of contact. A splendid Gem of this underappreciated type. Our EAC grade MS64. Ex: *Stamford Coinfest Signature (Heritage, 10/2010), lot 3463.* NGC ID# 226M, PCGS# 46953

- 3073 1855 Slanted 55, Knob Ear, N-9, R.1, MS64 Brown PCGS.** Grellman Die State f with a "knob" break below the T in LIBERTY, and an auxiliary break below the nearby Y. This Guide Book variety commands a significant premium in Uncirculated grades. A medium brown cent with olive-green and lilac-red undertones. Lustrous, well preserved, and undeniably attractive. Our EAC grade MS60. NGC ID# 226M, PCGS# 403958 Base PCGS# 1913

- 3074 1857 Small Date, N-2, R.1, MS63 Red and Brown NGC. CAC.** Grellman Die State a. An unabraded final-year large cent with well-struck motifs and a few softly entered stars. Brick-red is more extensive on the obverse than the reverse, which is predominantly deep olive-brown. The obverse exhibits distributed minor carbon. Our EAC grade MS62. From *The Rev. Dr. James G. K. McClure Collection.* NGC ID# 226P, PCGS# 148731 Base PCGS# 1932

FLYING EAGLE CENTS

- 3075 1857 MS64 NGC.** A satiny Choice Mint State type coin with lavender, olive, and steel-blue hues emerging from the fields amid primarily tan-gold luster. The right branch of the wreath and the eagle's tailfeathers show a touch of the usual weakness, but there are no distracting abrasions. NGC ID# 2276, PCGS# 2016

- 3076 1857 MS64 PCGS. CAC.** A boldly struck, luminous Flying Eagle type coin, showing satiny tan-gold luster and minimal abrasions. The 1857 and 1858 are both popular among type collectors, but the 1857 is the slightly scarcer date in high grade. This CAC-endorsed representative is highly appealing for the grade. NGC ID# 2276, PCGS# 2016

- 3077 1857 MS64+ PCGS.** A sharply struck Flying Eagle cent type coin, showing satiny luster and rich golden-brown color. There are no obvious abrasions, and the eye appeal is excellent for the grade. Although readily available in MS64, only 17 Plus-graded coins are reported at PCGS (4/16). NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Radiant Luster**

- 3078 1857 MS65 PCGS.** This is a pleasantly well-struck Flying Eagle cent type coin, although the ATE in STATES and the first A in AMERICA are slightly weak from die grease filling the cavities of the die. Vibrant coppery-gold luster gives each side notable eye appeal, and there are no distinctive abrasions. PCGS lists 17 numerically finer representatives (4/16). NGC ID# 2276, PCGS# 2016

**1858 Flying Eagle Cent, Sharp MS65
Large Letters, Excellent Eye Appeal**

- 3079 1858 Large Letters MS65 PCGS.** High Leaves, Closed E. Mislabelled by PCGS as Small Letters coin — the AM in AMERICA is touching at the bases, diagnostic of the Large Letters obverse. This sharp, satiny Gem 1858 Flying Eagle cent displays lovely tan-gold luster without any notable abrasions. Even a 10x loupe fails to reveal a single mentionable distraction. Eye appeal is excellent. NGC ID# 2277, PCGS# 2019

- 3080 1858 Small Letters MS64 PCGS.** The Flying Eagle series is a short and easily completable one, the only major challenge being the overdate and the 1856 (if one considers that a legitimate part of the series rather than a pattern). This Small Letters example shows much of the original copper-nickel color with an occasional swath of deeper red patina. The strike is strong throughout, including the eagle's head and tailfeathers. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3081 1859 MS65 PCGS.** A lovely Gem example of this one-year Laurel Wreath type, showing satiny tan-gold luster and sharp design elements. A few small marks are not out of line for the grade, and attractive luster glows in the fields. PCGS lists 28 Premium Gems finer (4/16). NGC ID# 227E, PCGS# 2052
- 3082 1860 Pointed Bust MS64 PCGS. CAC.** A crisply struck apricot and olive-gold near-Gem. The scarce Pointed Bust variety is transitional between the regular issue 1859 cent and the 1860 Rounded Bust variety. Lustrous and lightly abraded with scattered minuscule flecks on the reverse. NGC ID# 227F, PCGS# 2056
- 3083 1860 MS65 PCGS.** An attractive Gem Indian cent, with sharply detailed design elements and lustrous, well-preserved original red surfaces. Visual appeal is quite strong. PCGS has graded 58 numerically finer examples (5/16). NGC ID# 227F, PCGS# 2058

1864 Copper-Nickel Cent, MS66+ Only One Coin Finer

- 3084 1864 Copper-Nickel MS66+ PCGS.** The 1864 is a less often seen copper-nickel Indian cent issue, as the majority of coinage in 1864 was of the new bronze alloy. This high-end Premium Gem example is conditionally rare. Only a single MS67 PCGS coin is finer at both services. The strike is sharp, and the glossy surfaces display well-preserved nickel-gold color. Population: 27 in 66 (2 in 66+), 1 finer (5/16). NGC ID# 227K, PCGS# 2070
- 3085 1866 MS64+ Red PCGS.** The 1866 is a challenge to locate with full red color. This piece has even red luster across both sides. The strike is full on all the design elements. The only grade-limiting element is light flyspecking. Population: 42 in 64 (3 in 64+) Red, 30 finer (5/16). NGC ID# 227P, PCGS# 2087
- 3086 1867 MS65 Red and Brown PCGS. CAC.** This attractive Gem exhibits sharply detailed design elements and well-preserved surfaces that show a mix of original red and light brown patina. Vibrant mint luster radiates from both sides. Population: 69 in 65 (1 in 65+) Red and Brown, 1 finer. CAC: 23 in 65, 2 finer (5/16). NGC ID# 227R, PCGS# 2089
- 3087 1869 MS64 Red and Brown PCGS. CAC.** A well-struck, remarkably attractive 1869 Indian cent, showing well-balanced copper-orange and auburn hues over each side. The strike is bold, and there are no major abrasions or carbon specks. CAC: 29 in 64, 26 finer (4/16). NGC ID# 227T, PCGS# 2095
- 3088 1870 Pick-Axe, FS-303, MS65 Red and Brown PCGS.** This is a highly popular variety showing heavy die damage around Longacre's initial that resembles the shape of a pick-axe, thus the moniker. This is a sharp Gem Red and Brown example with mostly copper-red luster that shows a dusting of toning over each side. There are no significant abrasions. PCGS# 569247 Base PCGS# 2098
- 3089 1871 MS64 Red and Brown NGC. CAC.** This sharp Choice 1871 Indian cent displays satiny copper-orange luster with occasional chestnut-brown overtones that denote the Red and Brown designation. The 1871 is elusive in high grade, and finer Red and Brown coins are especially so. NGC ID# 227V, PCGS# 2101

1873 Indian Cent, MS66 Red and Brown Open 3, None Finer at PCGS

- 3090 1873 Open 3 MS66 Red and Brown PCGS.** This spectacular Premium Gem features the popular Open 3 in the date. The design elements are sharply detailed and the original red surfaces have mellowed to light brown in many areas, with vibrant mint luster under the patina. The well-preserved surfaces show only the most insignificant signs of contact and eye appeal is quite strong. Population: 5 in 66 Red and Brown, 0 finer (5/16). NGC ID# 227Y, PCGS# 2107
- 3091 1877 XF40 PCGS.** Most of LIBERTY remains sharp on this attractive XF specimen, but slight wear shows on the ribbon end. The pleasing medium brown surfaces are lightly abraded. The 1877 is the widely heralded key to the series from a mintage of 852,500 coins. Ex: *San Francisco Signature* (Heritage, 3/2014), 10037. NGC ID# 2284, PCGS# 2127
- 3092 No Lot.**
- 3093 1878 MS65 Red PCGS. CAC.** Bright red and yellow-gold color. A surprisingly well-struck Gem that has flashy luster and nicely preserved surfaces. A few carbon flyspecks do not reduce the eye appeal. The upper left obverse field has a prominent curly lintmark, as struck. Population: 53 in 65 Red, 16 finer. CAC: 3 in 65, 6 finer (4/16). Ex: *New York Signature* (Heritage, 7/2002), lot 5999. NGC ID# 2285, PCGS# 2132
- 3094 1883 MS67 Red and Brown NGC.** The lemon-gold central obverse is bounded by orange-red and lime-green. The pumpkin-gold reverse has splashes of deep ruby-red and plum. Although struck from late-in-life dies, this lustrous Superb Gem 1883 cent possesses surfaces that are virtually free from even the most trivial imperfection. Ex: *Long Beach Signature* (Heritage, 9/2005), lot 873; *Long Beach Signature* (Heritage, 6/2010), lot 81; *FUN Signature* (Heritage, 1/2011), lot 4108. NGC ID# 228A, PCGS# 2146
- 3095 1884 MS65 Red PCGS.** A sharp Gem Red example with frosty copper-red and amber luster. There are no distracting carbon spots, and the surfaces are free of abrasions. The quality and eye appeal surpass expectations for the grade. Population: 39 in 65 Red, 23 finer (4/16). NGC ID# 228B, PCGS# 2150
- 3096 1885 MS65 Red PCGS. CAC.** Satiny copper-red luster illuminates this Gem Red 1885 Indian cent. The strike is sharp, and the surfaces are free of bothersome abrasions. No carbon spotting is seen. Although moderately available in this grade, the 1885 is rarely encountered finer. Population: 72 in 65 (1 in 65+) Red, 17 finer. CAC: 6 in 65, 1 finer (4/16). NGC ID# 228C, PCGS# 2153
- 3097 1891 MS65 Red PCGS. CAC.** Eagle Eye Photo Seal. With 47 million coins struck, the 1891 Indian Head cent is collectible through Gem Red condition, but finer survivors are very rare. The feathers, diamonds, and wreath elements display strong detail. Vibrant luster rolls over well-preserved, copper-orange surfaces. A high-quality example. NGC ID# 228K, PCGS# 2180

**1901 Cent, MS66+ Red
Exceptional Type Coin**

3098 1901 MS66+ Red PCGS. 30th Anniversary Holder. The mintage of 79+ million pieces insures numerous Uncirculated pieces will be available. But in the finer grades of Mint State, nothing is for certain. And in fact, only 12 pieces have been certified in MS66+ by PCGS with a mere five coins finer (4/16). What is immediately apparent about this piece is the thick, swirling mint luster. The centers are lighter than the margins, which tend more toward cherry-red. The strike is strong throughout and there are no obvious or distracting abrasions. NGC ID# 228W, PCGS# 2210

3099 1909-S MS64 Red and Brown PCGS. A well-detailed Choice example from the last year of the Indian design, the original red surfaces of this remarkable piece have mellowed to light brown in some areas, but no large or distracting marks are present. Vibrant mint luster shines through the patina. NGC ID# 2298, PCGS# 2239

3100 1909-S MS64 Red and Brown PCGS. Though reddish-brown shadings dominate each side of this Choice 1909-S Indian cent, elements of copper-orange are noted in the fields. Well-struck and appealing with no obvious evidence of carbon. Ex: *Summer FUN Signature (Heritage, 6/2008)*, lot 188. NGC ID# 2298, PCGS# 2239

3101 1909-S MS65 Red and Brown PCGS. A well-preserved Gem Red and Brown example of this key Indian cent issue, showing copper-orange luster with soft chestnut-brown overtones. The top three headdress feathers are weak, as always. PCGS has seen five finer Red and Brown coins (5/16). NGC ID# 2298, PCGS# 2239

3102 1909-S MS63 Red PCGS. A well-preserved coin for the grade with frosty copper-orange luster and pleasing eye appeal. The top three headdress feathers display characteristic softness, and each side has scattered small specks. This piece is housed in an old green label holder. This particular style is scarce, likely only used by PCGS briefly in November 1989. It was originally a two-piece holder, but the stacking color has broken off, leaving only the "rattler" inner slab. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

3103 1859 PR64 NGC. A sharp tan-gold proof with reflective fields and sharp design elements. A reddish fleck on the cheek is the only notable surface abnormality. This Laurel Wreath type-coin proof displays subtle cameo contrast on the obverse. NGC ID# 2299, PCGS# 2247

3104 1860 PR64 PCGS. A penetratingly struck near-Gem proof with radiant honey-gold surfaces. A hint of lilac visits the left reverse. A lovely, scarce specimen of the short-lived copper-nickel subtype. Population: 57 in 64, 54 finer (5/16). Ex: *ANA Signature (Heritage, 4/2006)*, lot 102. NGC ID# 229A, PCGS# 2253

**1861 Indian Cent, PR64
Scarce Copper-Nickel Date as a Proof**

3105 1861 PR64 PCGS. Richard Snow (2006) writes: "This is the key date in the Proof series, partly due to low mintage (estimated 1,000 pieces), but also because of poor quality of the dies and poor striking quality." Fully struck throughout, the copper-gold surfaces yield some field-motif contrast. A few trivial handling marks prevent full Gem status. Population: 66 in 64, 26 finer (4/16). Ex: *ANA Signature (Heritage, 8/2007)*, lot 196. NGC ID# 229B, PCGS# 2256

3106 1862 PR64 PCGS. Medium almond-brown surfaces boast lively eye appeal, despite a couple of minor contact marks that define the grade. Those marks are located in the left obverse field, away from the focal points, and in any case not overlarge. A couple of small flecks appear on the reverse. Ex: *McGreevy-Lawrence Sale (Stack's, 5/1997)*, lot 399; *Eugene H. Gardner Collection, Part IV (Heritage, 10/2015)*, lot 99023. NGC ID# 229C, PCGS# 2259

3107 1862 PR66 PCGS. Coins of this issue that grade as fine as PR66 are not at all common. This is among the more attractive examples that this cataloger has seen. Both sides are fully struck with lovely, smooth, tan color. There are a handful of small carbon spots on the obverse, and a couple of even smaller spots on the reverse, but there are no marks that would call into question the validity of the assigned grade. Population: 27 in 66, 1 finer (5/16). Ex: *Long Beach Signature (Heritage, 2/2003)*, lot 5280; *FUN Signature (Heritage, 1/2004)*, lot 4430; *Palm Beach Signature (Heritage, 3/2005)*, lot 5108. NGC ID# 229C, PCGS# 2259

3108 1863 PR64 PCGS. A razor-sharp Choice proof with tan-gold surfaces that have modest field-device contrast. A pair of tiny specks in the left obverse field are not bothersome. Eye appeal is pleasing. Housed in an old green label holder. Population: 77 in 64, 31 finer (4/16). NGC ID# 229D, PCGS# 2262

3109 1863 PR64+ NGC. CAC. A razor-sharp, reflective proof copper-nickel type coin, showing relatively unmarked surfaces and medium tan-gold color. A few tiny specks on the obverse hardly affect the eye appeal. This high-end Choice 1863 Indian cent proof is a rarity with the CAC green label. This is also the only Plus-graded non-Cameo at NGC. Census: 51 in 64 (1 in 64+), 37 finer. CAC: 7 in 64, 4 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 229D, PCGS# 2262

3110 1863 PR65 Cameo NGC. The 1863 proof is a challenging issue and is rare in Cameo grades. This is a beautifully contrasted example that shows full "white" coloration on the reverse, with light tinges of orange and lilac on the obverse. A premium example of this scarcer copper-nickel proof. Census: 11 in 65 Cameo, 9 finer (5/16). Ex: *Long Beach Signature (Heritage, 6/2005)*, lot 5171. NGC ID# 26SX, PCGS# 82262

3111 1864 Copper-Nickel PR65 NGC. A scarce Gem example of this final copper-nickel proof issue, showing needle-sharp detail and mirrored fields. The obverse displays obvious cameo contrast, although the reverse has instead a lovely blended of tan-gold and lavender toning. Eye appeal is exceptional. Census: 23 in 65, 9 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 229E, PCGS# 2265

- 3112 1864 Copper-Nickel PR65 NGC.** Moderately reflective in the fields, the honey-tan surfaces show a slight accent of reddish patina in the fields that is quite appealing. A few carbon spots are present on each side, and the strike is sharp. Conditionally scarce in this grade and rare finer. Census: 23 in 65, 9 finer (5/16).
Ex: Long Beach Signature (Heritage, 6/2006), lot 282. NGC ID# 229E, PCGS# 2265

1864 No L Bronze Cent, PR66 Brown

- 3113 1864 Bronze No L PR66 Brown PCGS.** An estimated 300 proof 1864 bronze cents were struck, according to Rick Snow. This is an earlier strike, lacking both the die crack and hub crack seen later in the production run. The surfaces are consistent with many 1864 bronze proofs, showing deep brown and blue patina. The strike details are pinpoint-sharp on both sides and there are no noticeable contact marks. Population: 5 in 66 (1 in 66+) Brown, 2 finer (4/16). NGC ID# 229F, PCGS# 2276

**1864 No L Bronze Indian Cent
PR66 Red and Brown
Substantial Mint Red**

- 3114 1864 Bronze No L PR66 Red and Brown NGC.** Proof 1864 Bronze No L cents are often judged by the amount of mint red color they display as well as their numeric grade. This Premium Gem Red and Brown example is generously endowed with both desired traits. Although the reported mintage is just 150 pieces, most researchers estimate more were struck — perhaps as many as 300 pieces. Even so, the No L proofs are very scarce and especially in PR66 Red and Brown, with NGC reporting just two numerically finer coins. Census: 15 in 66 (1 in 66+ Red and Brown, 1 in 66★), 2 finer (5/16). (5/16). NGC ID# 229F, PCGS# 2277
- 3115 1866 PR66 Red and Brown PCGS.** A desirable Premium Gem example that is quite reflective beneath subtle glossy-brown patina. The underlying surfaces are distraction-free, including no unsightly carbon, and yield rich copper-orange color. Population: 14 in 66 Red and Brown, 0 finer (5/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5283. NGC ID# 229J, PCGS# 2286

**1866 Cent, PR66 Red and Brown
Lovely Originality**

- 3116 1866 PR66 Red and Brown NGC. CAC.** The 1866 proof Indian cent is something of a rarity in Premium Gem condition regardless of color designation. This Red and Brown coin is full red on the obverse and has lovely olive-brown toning on the reverse. The strike is bold, and the fields are deeply reflective. A few tiny specks do not detract. Census: 9 in 66 Red and Brown, 2 finer. CAC: 4 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 229J, PCGS# 2286
- 3117 1867 PR66 Red and Brown NGC.** A sharp Premium Gem proof with golden-tan and coppery-pink hues. The fields are deeply mirrored, and each side shows subtle cameo contrast. An outstanding coin with virtually no carbon spotting. Census: 12 in 66 (2 in 66★) Red and Brown, 0 finer (5/16). NGC ID# 229K, PCGS# 2289

PROOF INDIAN CENTS

- 3118 1868 PR64 Red PCGS.** Strong textural contrast is seen between the sharp, frosty devices and the glasslike mirroring of the fields, although the cameo effect is minimal. Each side displays lovely copper-red and crimson hues with an occasional carbon speck. Eye appeal is outstanding for the grade. Population: 29 in 64 Red, 8 finer (5/16). NGC ID# 229L, PCGS# 2293
- 3119 1869 PR65 Red and Brown NGC.** This conditionally elusive Gem Red and Brown proof 1869 cent displays sharp detail and reflective fields. The obverse is mostly copper-red in color with some deeper amber overtones near the rims, while the reverse displays a more dusky olive-brown patina. A few trivial specks are of little concern. Census: 38 in 65 (2 in 65★) Red and Brown, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 229M, PCGS# 2295
- 3120 1869 PR65 Red and Brown PCGS.** This meticulously struck honey-gold Gem is much closer to Red than Brown, and the moderately reflective fields are largely unblemished. Rarely seen finer. Population: 44 in 65 Red and Brown, 9 finer (5/16).
Ex: Central States Signature (Heritage, 5/2005), lot 5266. NGC ID# 229M, PCGS# 2295
- 3121 1871 PR65 Red and Brown NGC. CAC.** This Gem 1871 Indian cent proof displays a bold strike, although the fields are more satiny than deeply reflective. Stored on its reverse for decades, this coin displays lovely copper-red luster on the obverse and olive-brown toning on the reverse. There are no carbon spots, although a threadlike strike-through (mint-made) appears in the vicinity of Liberty's chin. Census: 46 in 65 Red and Brown, 10 finer. CAC: 7 in 65, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 229P, PCGS# 2301
- 3122 1872 PR65 Red and Brown NGC. CAC.** Coppery-orange obverse color accentuates the mirroring in the fields, while the reverse has soft olive-brown toning. This sharp Red and Brown Gem proof 1872 cent displays pleasing eye appeal. Only a single carbon speck is worth mentioning, seen on the 2 in the date. Census: 46 in 65 Red and Brown, 9 finer. CAC: 10 in 65, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 229R, PCGS# 2304

- 3123 1875 PR65 Red and Brown PCGS.** This boldly struck Gem is primarily copper-orange on the obverse, though a small fingerprint appears above the feathers of the headdress. On the reverse, deeper mahogany shadings prevail, with a single stripe of copper-gold that runs from the lower left to the upper right. Population: 30 in 65 (2 in 65+) Red and Brown, 10 finer (5/16).
Ex: *Central States Signature (Heritage, 4/2008)*, lot 193. NGC ID# 229U, PCGS# 2313

**1877 Cent, PR64 Red and Brown
Pleasing Color and Mirroring**

- 3124 1877 PR64 Red and Brown NGC. CAC.** A sharp, deeply mirrored Choice Red and Brown proof, showing mostly copper-red color but with a thin overtone of amber-brown that precludes a full Red designation. The 1877 proof is popular in light of the key-date status of the circulation strike of this year, and this piece is unusually eye-appealing for the grade. CAC: 16 in 64, 26 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 229W, PCGS# 2319

- 3125 1891 PR65 Red PCGS.** Copper-orange and violet hues deliver rich color on this Gem Red 1891 proof Indian cent. The strike is sharp, and the fields are deeply reflective, despite faint clash marks. The obverse displays considerable cameo contrast. A carbon speck is seen on the top edge of the wreath bow. Population: 15 in 65 Red, 4 finer (5/16). NGC ID# 22AD, PCGS# 2362

- 3126 1892 PR64+ Cameo PCGS.** The 1892 is a curiously available coin among later-date Indian cents in higher grades and even with Cameo contrast. That must be taken in context, of course, as there are only four pieces PCGS has certified as PR64 Cameo and this sole PR64+, but then there are 11 finer (5/16). This is a bright, highly reflective proof with significant field-device contrast on each side. NGC ID# 22AE, PCGS# 82365

**1895 Cent, PR67 Red and Brown
None Graded Higher**

- 3127 1895 PR67 Red and Brown NGC.** A total of 880 proof Indian Head cents were issued in silver-minor proof sets alongside the famous 1895 proof dollars. An additional 1,182 examples were distributed in minor proof sets, bringing the total mintage to 2,062 proofs. Copper-red tones dominate this Superb Gem specimen. Amber-gold elements in the fields likely preclude a full Red designation. Razor-sharp, as one might expect of a proof strike, and free from noticeable contact. Census: 1 in 67 Red and Brown, 0 finer (4/16). NGC ID# 22AH, PCGS# 2373

- 3128 1901 PR66 Red and Brown NGC. CAC.** This Premium Gem turn-of-the-century proof Indian cent displays nearly full Red color with hints of amber and plum toning near the borders on each side. The strike is sharp, and a few small specks do not detract. Census: 28 in 66 (1 in 66+, 2 in 66★, 1 in 66+★) Red and Brown, 11 finer. CAC: 12 in 66 Red and Brown, 6 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 22AP, PCGS# 2391

- 3129 1902 PR65+ Red NGC.** A bold strike and deeply mirrored fields give each side of this high-end Gem Red proof outstanding eye appeal. Wisps of greenish color accentuate coppery-orange surfaces, and a few tiny flecks are not bothersome. This is the only Plus-graded Red coin at NGC. Census: 27 in 65 (1 in 65+) Red, 22 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 22AR, PCGS# 2395

LINCOLN CENTS

**1909 VDB Cent, MS67+ Red
Essentially Flawless Surfaces**

- 3130 1909 VDB MS67+ Red PCGS. CAC.** 30th Anniversary Label. The Philadelphia VDB cent has always been the go-to issue for type collectors. For many collectors, it doesn't seem that long ago when original rolls were available and there was little discrimination between an MS67 and an MS67+. But the difference now is enormous in terms of availability and price. This is a carbon-free example with slight woodgrain surfaces. The strike is strong throughout and no surface problems can be found. Only 11 pieces have been certified by PCGS as MS67+ with one piece finer (4/16). NGC ID# 22AZ, PCGS# 2425

- 3131 1909-S VDB MS63 Brown NGC.** Always the object of collector attention, the S-VDB was widely hoarded at the time of issue because of the designer's initials on the lower reverse that were quickly removed, creating an instant rarity. One cannot help but wonder what Eric Newman paid for this coin when he bought it decades ago. Significant glowing mint red surrounds the devices with mellowed brown elsewhere. Sharply struck. A couple of marks are visible with a loupe on Lincoln's beard and neck.
Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# BYKW, PCGS# 2426

- 3132 1909-S VDB MS65 Red and Brown NGC.** This luminous 1909-S VDB Lincoln cent displays a bold strike and impressively well-preserved copper-orange surfaces with hints of olive toning in the fields. The 1909-S VDB continues to be the most highly sought-after issue in the series, and this coin is unquestionably high-end for the grade.
Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red
Lustrous and Well-Preserved**

- 3133 1909-S VDB MS65 Red ANACS.** A nice, originally lustrous Gem Red example of this key Lincoln cent issue, showing a bold strike and satiny copper-orange luster. A few tiny specks do not detract, and there are no abrasions observed. The 1909-S VDB becomes increasingly scarce in grades above MS65. This piece is housed in an old, white label ANACS holder. NGC ID# 22B2, PCGS# 2428

3134 1909-S MS65 Red PCGS. Crisply struck with fresh, vibrant luster and swirling copper-orange surfaces. A carefully preserved and undeniably appealing Gem example of this challenging Lincoln cent issue. Finer coins are elusive.
Ex: *Central States Signature* (Heritage, 4/2008), lot 228. NGC ID# 22B4, PCGS# 2434

3135 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS. This moderately available *Guide Book* variety is conditionally elusive in MS66 Red. This piece displays frosty golden luster and well-struck design elements without carbon spotting. Faint medal flow lines in the fields weaken the visibility of the S/Horizontal S feature, but the variety is still distinguishable with a loupe. Population: 86 in 66 (9 in 66+) Red, 0 finer (4/16). NGC ID# 22B4, PCGS# 37645

1910 Lincoln Cent, Lustrous MS67 Red Fresh, Original Red Surfaces

3136 1910 MS67 Red PCGS. Ex: Lone Star Collection. Peach-red color at the margins merges into blaze-orange highlights on this coruscating and naturally patinated Superb Gem cent. The finely granular surfaces capture the light and return it in waves of glowing mint luster. Fully struck, the coin delivers seemingly unimprovable in-hand appeal. A glass reveals slight planchet roughness in a few areas plus one or two faint, microscopic flecks, yet they are unseen by the unassisted eye and do not cause any distraction. Neither PCGS nor NGC report a numerically finer example. Population: 32 in 67 (3 in 67+) Red, 0 finer (4/16). NGC ID# 22B5, PCGS# 2437

3137 1911-D MS65 Red PCGS. The original red surfaces of this attractive Gem Lincoln cent show a few microscopic specks of carbon, but no mentionable surface flaws are evident. The design elements are sharply detailed throughout. NGC ID# 22B8, PCGS# 2446

3138 1912-D MS65 Red NGC. Satiny luster displays soft coppery-orange patina on each side of this Gem full Red example, with a small splash of deeper plum color visible on the obverse portrait. No detracting abrasions are present, although indications of die fatigue are seen around the border recesses. Census: 35 in 65 Red, 6 finer (4/16). NGC ID# 22BB, PCGS# 2455

3139 1914-D MS61 Brown ANACS. A sharp olive-brown example of this key Denver issue, showing slightly subdued, satiny luster and even coloration. There are no singular abrasions apparent, despite the grade. This piece is housed in an old, small size white ANACS holder. NGC ID# 84BX, PCGS# 2471

1914-D Lincoln Cent, MS64 Brown Pleasing Red Undertones

3140 1914-D MS64 Brown NGC. This near-Gem 1914-D displays a close knit freckling of blue coloration over pleasing mint-red to earn the Brown designation, yet the glowing luster readily reveals the crimson undertones. The strike is pinpoint-sharp. A tiny mark above NE of ONE and a small carbon at the first A of AMERICA factor into the assigned grade. Still, this cent is exceedingly Choice and original. Census: 52 in 64 Brown, 18 finer (5/16).
Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# 84BX, PCGS# 2471

3141 1915-D MS66 Red and Brown PCGS. CAC. This luminous amber-red and light brown Premium Gem is among the finest Red and Brown coins certified. The strike is sharp, and eye appeal is pleasing. The 1915-D cent is seldom seen in this fine regardless of color designation. Population: 3 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 2 in 66, 0 finer (4/16). NGC ID# 22BL, PCGS# 2481

3142 1915-S MS64 Red and Brown NGC. The 1915-S Lincoln cent is seldom seen in Gem condition regardless of color designation. This near-Gem Red and Brown example balances eye appeal and affordability. The strike is bold, and the satiny surfaces display medium tan-gold color. A few tiny specks near the right obverse rim do not detract.
Ex: *Eric P. Newman Numismatic Education Society*. NGC ID# 22BM, PCGS# 2484

3143 1918 MS66+ Red PCGS. A sharp, satiny example of the 1918 Lincoln cent, showing luminous copper-orange surfaces without any noticeable abrasions. Carbon spotting is absent, and the eye appeal is outstanding for the issue. PCGS has seen only 32 finer Red coins (5/16). NGC ID# 22BV, PCGS# 2506

1918 Cent, MS67 Red Registry Set Essential

3144 1918 MS67 Red PCGS. CAC. The number of surviving full Red 1918 cents declines significantly above the Gem grade level, and in MS67, such pieces are genuine rarities. This representative will appeal most strongly to Registry competitors, as it is numerically equal to the coin in the current highest-rated Registry Set and is one of only 11 MS67 Red examples with CAC approval. Glowing coppery-orange luster illuminates unabraded surfaces. As is typical of the issue, moderate die erosion is evident in the fields on each side and the sharpness of the reverse wheat ears is by extension weak. Nonetheless, eye appeal is outstanding. Population: 31 in 67 (4 in 67+) Red, 1 finer. CAC: 11 in 67, 0 finer (5/16). NGC ID# 22BV, PCGS# 2506

3145 1919-D MS65 Red and Brown PCGS. CAC. The reverse is rose-red and the obverse displays jade-green and apricot-gold shades. Lustrous and unabraded with minor carbon. A conditionally challenging early branch mint issue. CAC-endorsed in a green label holder. Population: 32 in 65 Red and Brown, 3 finer. CAC: 11 in 65, 0 finer (5/16).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3691; Houston Signature (Heritage, 12/2013), lot 3119. NGC ID# 22BZ, PCGS# 2517

3146 1919-D MS65 Red PCGS. *Ex: Lone Star Collection.* Mint red-orange color dominates lustrous surfaces on each side of this sharply struck D-mint 1919 Lincoln cent. A few small flecks are scattered about, none of which are overly bothersome. Population: 66 in 65 (1 in 65+) Red, 16 finer (4/16).
Ex: FUN Signature (Heritage, 1/2003), lot 5688; Long Beach Signature (Heritage, 2/2005), lot 5456. NGC ID# 22BZ, PCGS# 2518

3147 1919-S MS66 Red and Brown PCGS. A well-preserved Premium Gem example with amber-colored, satiny luster. The strike is weak on the O in ONE, as is often seen on this issue, but the obverse is better defined. This is the sole finest Red and Brown 1919-S cent certified and it is one of only four Premium Gems known across all color categories at PCGS and NGC combined (4/16). NGC ID# 22C2, PCGS# 2520

3148 1922-D MS66 Red and Brown NGC. CAC. A sharply struck, early-die-state example of this better Denver issue, showing satiny copper-orange luster with hints of amber toning throughout. There are no abrasions or bothersome carbon specks. Census: 3 in 66 Red and Brown, 0 finer. CAC: 3 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22C8, PCGS# 2538

3149 1922-D MS66 Red and Brown NGC. CAC. The McClure Collection contains two of the three Premium Gem Red and Brown 1922-D cents reported at NGC, tied for the finest in that color designation at either service. This example is boldly struck and displays copper-orange luster similar to that of the other McClure coin. There are no mentionable carbon specks. CAC: 3 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22C8, PCGS# 2538

1925-D Cent, MS65 Red Scarce in Gem, Almost Unattainable Finer

3150 1925-D MS65 Red PCGS. The mintage for the 1925-D was not huge — only 22.5 million pieces struck — but most coins left the Mint looking “tired” from improperly hardened dies. As a result, only 66 Gems with full red color have been certified by PCGS with a mere two coins finer (4/16). This example has bright, vibrant color and is only held back from an even higher designation by peripheral flyspecks and a mark in the upper-right obverse field. NGC ID# 22CG, PCGS# 2563

3151 1925-S Doubled Die Obverse, FS-101, MS65 Brown PCGS. The obverse is faintly die doubled on this *Cherrypickers'* variety, mostly visible on the date and LIBERTY. The present coin is sharply struck with satiny auburn-brown luster. A single mark on Lincoln's cheek is the only abrasion of note. This is the single finest Brown coin attributed by PCGS (4/16). NGC ID# 22CH, PCGS# 37682

3152 1926-S MS64 Red and Brown NGC. Olive and violet overtones on the obverse of this Choice 1926-S Lincoln cent account for the Red and Brown designation, while the reverse shows full copper-orange luster. The strike is bold, and only a couple of tiny specks are discernible. NGC lists 29 finer Red and Brown examples (4/16).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 22CL, PCGS# 2574

3153 1926-S MS64 Red and Brown PCGS. CAC. The obverse is mostly olive-brown with peripheral tinges of orange luster, while the reverse is primarily brilliant orange with traces of pale brown toning. PCGS has only certified 16 finer examples within the color designation (5/16). NGC ID# 22CL, PCGS# 2574

3154 1926-S MS64 Red and Brown NGC. CAC. This Choice Red and Brown example displays olive-gold luster that is neither red nor brown, with bold relief detail and satiny surfaces. A small tick inside the C in CENT is the only mentionable abrasion. The 1926-S is a better date from this decade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22CL, PCGS# 2574

3155 1927-D MS65 Red NGC. This otherwise plentiful Denver issue is conditionally rare at the Gem Red level, and finer coins are prohibitively so. This piece is boldly struck and displays satiny copper-red luster without obvious carbon spotting. Census: 12 in 65 Red, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22CN, PCGS# 2581

1929-S Lincoln Cent, MS66 Red None Numerically Finer at PCGS

3156 1929-S MS66 Red PCGS. *Ex: Lone Star Collection.* Well-defined with attractive mint-green and orange patina. The reverse has a couple of small contact marks, and the obverse exhibits a single carbon spot, on Lincoln's shoulder. A lovely Premium Gem, in a superior state of preservation. Population: 38 in 66 (1 in 66+) Red, 0 finer (4/16).
Ex: Baltimore Signature (Heritage, 7/2003), lot 328; San Francisco Signature (Heritage, 7/2005), lot 5305. NGC ID# 22CW, PCGS# 2602

3157 1931-S MS66 Red PCGS. *Ex: Lone Star Collection.* A sharply struck, semikey-date Lincoln cent. Bright orange patina overlays lustrous surfaces, and several small toning spots are scattered over the reverse. The 1931-S is scarce in this grade and unknown numerically finer (4/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5525. NGC ID# 22D4, PCGS# 2620

3158 1933-D MS66+ Red and Brown PCGS. Surprisingly, this high-end Premium Gem 1933-D Lincoln cent is almost fully copper-red in color. Vivid violet overtones around the obverse peripheries and in the central reverse denote the “Brown” aspect of the grade, but in practice actually accentuate the eye appeal. The strike is bold, and the preservation is outstanding. The sole finest Red and Brown coin at PCGS. Population: 2 in 66 (1 in 66+) Red and Brown, 0 finer (5/16). NGC ID# 22D8, PCGS# 2631

**1935-D Cent, MS67+ Red
Bright, Fresh-Looking Surfaces**

- 3159 1935-D MS67+ Red PCGS.** A bright, fresh-looking '35-D cent with none of the often-seen heavy die wear. Each side shows even red color with almost no variation in hue. The strike details are strong throughout with no noticeable abrasions present. Only two MS67+ coins have been certified (with one finer) out of the mintage of 47 million pieces. NGC ID# 86BY, PCGS# 2644

- 3160 1937 Lincoln Cent and Buffalo Nickel, Reeded Edge Set, Uncirculated Uncertified.** Most accounts of this intriguing pair suggest that these coins had their edges reeded outside the Mint by Pennsylvania coin dealer Ira Reed, intended as a promotional gimmick to advertise his business at the 1941 ANA Convention in Philadelphia. It is thought that about 100 sets were prepared, and they are quite popular with collectors today. The cent is Red and Brown with a faint "wheel mark" in the right obverse field. The nickel has brilliant light gray luster. (Total: 2 coins)

- 3161 1938 MS67+ Red PCGS. CAC.** Blazing copper-red luster covers both sides of this high-end Superb Gem cent. The mint luster is terrific, and the in-hand eye appeal is undeniable. A loupe reveals only minor microscopic freckles and a few tiny ticks on Lincoln's shoulder and the cheekbone. This Philadelphia date is for all purposes unobtainable finer, with just one coin certified in a numerically higher grade at either service. Population: 318 in 67 (10 in 67+) Red, 1 finer. CAC: 30 in 67, 0 finer (5/16). NGC ID# 22L5, PCGS# 2668

- 3162 1941 MS67+ Red PCGS.** Glowing copper-orange luster gives this high-end Superb Gem 1941 Lincoln cent instant eye appeal. The strike is bold, and the virtually carbon-free surfaces are devoid of noticeable abrasions. Only a single coin is finer at PCGS (5/16). NGC ID# 22DW, PCGS# 2695

**1942 Cent, MS67+ Red
Dazzling Cherry-Red Coloration**

- 3163 1942 MS67+ Red PCGS.** Fulsome mint luster reveals vibrant cherry red color on the obverse with redder-than-red coloration on the reverse imbued with vivid pink highlights. There are no spots or even the tiniest flecks to mention, while the strike is exceedingly sharp on both sides. A unique and memorable Registry Set candidate of the highest order. Population: 10 in 67+ Red, 0 finer (4/16). NGC ID# 22L9, PCGS# 2704

- 3164 1943-D MS68 PCGS. CAC.** Satiny zinc-silver luster illuminates virtually flawless surfaces and boldly struck design elements on this high-end Superb Gem 1943-D steel cent. The issue is elusive this fine and unknown finer. CAC-endorsed MS68 coins are rare. CAC: 10 in 68, 0 finer (5/16). NGC ID# 22E6, PCGS# 2714

- 3165 1944-D MS67+ Red PCGS.** A high-end example of this wartime Denver date with sharply defined motifs and blazing original red surfaces that are impeccably preserved. PCGS has graded only two numerically finer Superb Gems. Population: 25 in 67+ Red, 2 finer (4/16). NGC ID# 22EC, PCGS# 2725

- 3166 1944-D MS67+ Red PCGS. CAC.** The obverse is razor-sharp and dramatically appealing with swirling hues of pinkish-red and flame-orange. The reverse is equal in eye appeal, with a faint die crack from the L in PLURIBUS to the O in ONE. CAC endorsed, an important award for this Plus-graded Superb Gem. Population: 25 in 67+ Red, 2 finer. CAC: 36 in 67, none finer (4/16). NGC ID# 22EC, PCGS# 2725

**1945 Lincoln Cent, MS67+ Red
Only Three Other Pieces So Graded**

- 3167 1945 MS67+ Red PCGS.** More than a billion cents were struck in 1945, the highest mintage until 1956. Many individual coins were saved as well as rolls. In Superb condition, though, few are known. PCGS has only certified four MS67+ coins and none are finer (4/16). That positions this piece as a premier target for Registry collectors. The mint luster is outstanding, bright and frosted, with very little variation in hue, just a slight hint of lilac tint around Lincoln's portrait. Very well struck throughout and free from any distracting abrasions. NGC ID# 22EG, PCGS# 2734

- 3168 1945-S MS67+ Red PCGS. CAC.** Although the 1945-S Lincoln cent is plentiful in MS67 Red, this piece is one of only 15 with the coveted Plus designation and none are finer (4/16). The strike is bold, and the preservation is seemingly flawless. The carbon-free surfaces show glowing coppery-orange luster and exceptional eye appeal. NGC ID# 856Y, PCGS# 2740

- 3169 1952-S MS67+ Red NGC.** An obvious candidate for Registry Set consideration, this blaze-orange example displays unrestrained mint luster and compelling eye appeal. A memorable Superb Gem with high-end surface quality, the coin shows two or three microscopic carbon flecks that are of zero consequence in overall visual impact. This is the sole Plus-graded MS67 Red example at NGC, a grade not exceeded at PCGS as well. Census: 1 in 67+ Red, 0 finer (4/16). NGC ID# 22F8, PCGS# 2803

**1954 Cent, MS67 Red
Among the Finest Certified**

- 3170 1954 MS67 Red NGC.** A Registry-grade 1954 Lincoln cent, among the finest certified. The strike is bold, and the beautifully preserved surfaces yield frosty copper-red luster. There are no bothersome abrasions or carbon specks. This issue is rarely seen so fine. Census: 13 in 67 Red, 0 finer (4/16). NGC ID# 22FC, PCGS# 2815

3171 1955 Doubled Die Obverse, FS-101 — Improperly Cleaned — NGC Details. AU. Remarkably strong die doubling of the obverse legends identifies the famous FS-101 variety. This lightly circulated example offers bright sea-green, orange-gold, and rose-red surfaces. A cluster of tiny spots is noted near the T in CENT. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3172 1955 Doubled Die Obverse, FS-101, AU53 NGC. The spectacular nature of the doubling on this briefly circulated cent cannot fail to impress even the novice collector. Among the most desirable and iconic anomalies in all of numismatics. Pleasing brown surfaces show chestnut highlights. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3173 1955 Doubled Die Obverse, FS-101, AU53 NGC. A few tiny marks and brief circulation determine the AU53 grade, yet this example of the classic 1955 doubled die is eminently collectible and appealing. Blue overtones visit the rich-brown surfaces that retain a degree of glossiness. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3174 1955 Doubled Die Obverse, FS-101, AU53 NGC. Smooth, medium-brown patina covers both sides of this attractive About Uncirculated example of one of the most notorious and widely-sought die errors of U.S. coinage. The doubling is sharply visible to the unaided eye, a bizarre error to escape the Mint and of unceasing interest to all levels of collectors. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3175 1955 Doubled Die Obverse, FS-101, AU55 NGC. Richly deserving of the Choice About Uncirculated grade, this pleasing example of the most-sought Lincoln cent error is a delight in all regards. Glossy surfaces show only a few random marks from circulation, while the doubling is characteristically bold and the eye appeal is terrific. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3176 1955 Doubled Die Obverse, FS-101, AU55 NGC. A splendid, Choice example of this highly desired Mint error, with ideal surfaces for the grade and the bold doubling visible at arm's length. A problem-free example with chocolate-brown surfaces and no untoward marks. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3177 1955 Doubled Die Obverse, FS-101, AU58 NGC. The "spread" on the obverse doubling for this 1955 anomaly is astounding and perhaps taken for granted by some numismatists because of its availability and familiarity, yet the error is still of unending amazement to the new collectors or the uninformed public. This briefly circulated example displays attractive medium-brown color and only minor marks when viewed with a lens. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3178 1955 Doubled Die Obverse, FS-101, AU58 NGC. Glossy luster remains across both sides of this near-Mint example of the doubled die, with remarkably few signs of circulation. A coin that would be at home in any Uncirculated set, with pleasing reddish-brown surfaces and great eye appeal. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3179 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS. A remarkable spread throughout all obverse legends identifies the famous FS-101 variety. A well struck and coruscating steel-blue and tan-brown representative. Marks are inconsequential, and the eye appeal is impeccable. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3180 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC. Glimmers of mint red remain around the raised elements of this Mint State doubled die cent. Bluish overtones enhance the attractive, mahogany-brown surfaces. Marks are limited to a few planchet nicks that were not fully eliminated by strike on the shoulder, and a single short abrasion at ER of AMERICA on the reverse. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3181 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC. Although designated as Brown, both sides display noticeable orange-red in protected regions. The devices are deep brown, as is the obverse field. The reverse field is sea-green. Marks are trivial, but we note small spots near ONE CENT. The most dramatic among all doubled die varieties, due to a spectacular spread and a bold initial hubbing. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1956-D Cent, MS67+ Red Tied for Finest, Rare

3182 1956-D MS67+ Red PCGS. CAC. This is a boldly struck, frosty example of this conditionally scarce Wheat cent issue. Vivid copper-red luster adorns the interiors, ceding to brighter gold around the peripheries. A few tiny flecks are not bothersome, and there are no abrasions of note. The 1956-D is scarce in Superb Gem Red condition, and this Plus-graded coin is tied for the finest certified. Population: 72 in 67 (6 in 67+) Red, 0 finer. CAC: 14 in 67, 0 finer (4/16). NGC ID# 22FL, PCGS# 2839

3183 1959 MS67 Red PCGS. 30th Anniversary Green Label Holder. The debut Memorial reverse Lincoln cent is seldom seen in MS67 Red. This piece is among the finest certified, displaying sharp design elements and satiny copper-red luster. No carbon is seen, and eye appeal is outstanding. Population: 19 in 67 Red, 0 finer (5/16). NGC ID# 22FS, PCGS# 2854

3184 1964-D MS67 Red PCGS. A superb Registry coin, among the finest certified. This 1964-D Lincoln cent is boldly struck and satiny with copper-red, rose, and orange-gold hues intermingled over each side. There are no discernible carbon specks. Population: 13 in 67 (1 in 67+) Red, 0 finer (4/16). NGC ID# 22G8, PCGS# 2893

1972 Cent, MS67 Red FS-101, Doubled Die Obverse

3185 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. This dramatic *Guide Book* and *Cherrypickers'* variety shows pronounced doubling on the date, LIBERTY, and IN GOD WE TRUST. The surfaces of this spectacular Superb Gem cent radiate swirling mint luster and showcase gorgeous copper-orange coloration. This piece was clearly set aside early on, as it displays impeccable preservation throughout. Population: 38 in 67 Red, 1 finer (5/16). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

3186 1989 MS68 Red PCGS. Surprisingly few 1989 Lincoln cents are certified at the top PCGS numeric grade level of MS68. This piece displays a full strike and satiny copper-red luster. A tiny toning speck is seen at Lincoln's chin. An essential Registry Set acquisition. Population: 16 in 68 (1 in 68+) Red, 0 finer (5/16). NGC ID# 5C72, PCGS# 3077

1992-D Close AM Cent, MS62 Red

- 3187 1992-D Close AM, FS-901, MS62 Red PCGS.** A rare variety of the 1992-D Lincoln cent shows the AM in AMERICA touching at their bases. This Uncirculated Red example displays a bold strike and satiny copper-pink luster. There are no singular abrasions, although some faint lines in the obverse fields limit the grade. Population: 1 in 62 Red, 12 finer (4/16). PCGS# 391429 Base PCGS# 83101

PROOF LINCOLN CENTS

- 3188 1909 Lincoln PR64+ Red and Brown NGC.** By far the more available of the two proof variants for 1909, the "Plain" 1909 cent had a mintage of 2,618 pieces. This example retains much of the original mint red with just the slightest mellowing. Excellent value in this grade and color designation.
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 22KS, PCGS# 3304

1910 Cent, PR66 Red and Brown
Fresh and Original Matte Proof Cent

- 3189 1910 PR66 Red and Brown NGC.** A lovely display of variegated color imbues the natural coloration of this exceptional matte proof Lincoln. The hues range from lemon-gold to orange to cherry-red, with enough mellow-brown overtones to receive the Red and Brown designation. Lively mint luster glows from every angle of the finely granular, virtually mark-free surfaces.
Census: 7 in 66 Red and Brown, 1 finer (5/16).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 22KT, PCGS# 3307

1910 Lincoln Cent, PR66 Red and Brown
Significant Underlying Red Remains

- 3190 1910 PR66 Red and Brown PCGS.** National Archive records (uncovered by Kevin Flynn) indicate 4,083 proof cents were struck in 1910, a much higher number than the official Mint records of only 2,405 pieces. This example retains significant mint red over each side with a light to moderate layer of mellowed brown patina. As expected, the strike details are intricately defined on each side and there are no mentionable contact marks. Population: 28 in 66 (2 in 66+) Red and Brown, 5 finer (4/16). NGC ID# 22KT, PCGS# 3307

- 3191 1910 PR65 Red PCGS.** Of the 4,083 matte proof cents struck in 1910, very few have retained their full red color over the past 116 years. This is a bright, even red piece, whose only detractor is an irregular dark patch in the field above ER in LIBERTY. The strike is strong and complete in all areas. Population: 43 in 65 (1 in 65+) Red, 28 finer (5/16). NGC ID# 22KT, PCGS# 3308

1911 Cent, Elusive PR66 Brown

- 3192 1911 PR66 Brown PCGS.** This sharp 1911 matte proof is among the finest Brown coins at PCGS, and is conditionally scarce as such. Each side has deep olive-green and brown coloration over rich reddish-brown undertones. A loupe reveals a hair-thin strike-through on the reverse (mint-made), extending upward from the rim between the stems. Population: 29 in 66 (1 in 66+) Brown, 0 finer (5/16). NGC ID# 22KU, PCGS# 3309

- 3193 1911 PR65 Red and Brown PCGS. CAC.** Wisps of burgundy-brown toning stretch across the copper-orange matte surfaces of this Gem Red and Brown 1911 proof. The strike is full, and the surfaces are free of obvious marks. Elusive numerically finer. Population: 66 in 65 (2 in 65+) Red and Brown, 25 finer. CAC: 14 in 65, 15 finer (5/16). NGC ID# 22KU, PCGS# 3310

- 3194 1912 PR65 Red and Brown PCGS.** Matte proof cent production totaled 2,172 pieces in 1912. The obverse of this Gem Red and Brown specimen displays amber-gold and orange patina with accents of rose, while the reverse is primarily burgundy-brown and olive. A thin contact mark occurs in the field in front of Lincoln's nose. Population: 54 in 65 Red and Brown, 15 finer (4/16). NGC ID# 22KV, PCGS# 3313

- 3195 1914 PR65 Red PCGS.** Razor-sharp definition is evident on all design elements of this remarkable Gem. The original red surfaces are free of mentionable distractions and vibrant mint luster adds to the considerable eye appeal. Population: 35 in 65 (2 in 65+) Red, 29 finer (5/16). NGC ID# 22KX, PCGS# 3320

- 3196 1936 Type Two — Brilliant Finish PR65 Red PCGS.** After a gap of 20 years, proof set production was resumed in 1936. Initial deliveries of proof cents showed a satin finish, but later (and future) deliveries reverted to the brilliant finish used on proof Indian cents. A predominantly peach-gold specimen with a blush of olive on the right obverse and a spot above the U in UNITED. Housed in an old green label holder. NGC ID# 22L3, PCGS# 3335

- 3197 1938 PR67 Red PCGS. CAC.** The fields on each side display noticeable reflectivity, although contrast against the devices is subdued. Deep copper-gold color graces carefully preserved surfaces. An excellent opportunity for the Registry builder. Population: 38 in 67 Red, 0 finer (5/16). NGC ID# 22L5, PCGS# 3341
- 3198 1942 PR66 Red Cameo PCGS.** This fully struck Premium Gem Red Cameo proof displays stark field-device contrast with deep mirroring in the fields. The color is mostly a rich orange-gold hue although there are occasional bits of lavender toning. Population: 13 in 66 Red Cameo, 3 finer (4/16). NGC ID# 22L9, PCGS# 83353
- 3199 1952 PR67 Cameo NGC.** A bright, coppery-orange Superb Gem Cameo proof with color that lightens towards the centers. The strike is sharp, and the field-device contrast is immediately obvious. Seldom seen this fine and rare finer. Census: 27 in 67 (1 in 67+) Cameo, 7 finer (5/16). NGC ID# 22LC, PCGS# 83365
- 3200 1953 PR69 Red NGC.** Among the finest proof 1953 cents certified and conditionally rare as such. This virtually flawlessly preserved Red proof displays deeply mirrored fields and a bold strike. The edges of Lincoln's portrait are slightly blended with the fields as a result of die polishing. Eye appeal is superb. Census: 5 in 69 (1 in 69★) Red, 0 finer (4/16). NGC ID# 22LD, PCGS# 3368

**1990 No S Cent, PR68 Red Ultra Cameo
FS-101, Fewer than 200 Coins Extant**

- 3201 1990 No S, FS-101, PR68 Red Ultra Cameo NGC.** Fewer than 200 1990 No S proof cents are believed extant. The egregious error occurred when Philadelphia Mint officials shipped circulation-strike dies without the mintmark to San Francisco, where they were polished and used to strike proofs. This virtually pristine specimen displays deep mirrors set against thickly frosted motifs. An important opportunity for the specialist. Census: 30 in 68 Red Ultra Cameo, 22 finer (4/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**1990 No S Cent, PR68 Red Ultra Cameo
FS-101, Renowned Modern Proof Error**

- 3202 1990 No S, FS-101, PR68 Red Ultra Cameo NGC.** The 1990 No S proof cent actually had its beginnings as a circulation-strike die, shipped to San Francisco and then polished for proof strikes, the missing mintmark unnoticed until too late until several examples escaped the Mint. A stunning error for modern coinage, yet one that was repeated on a handful of occasions (most notably the 1968 No S proof dime). It is a boon for collectors, though, with Schechter and Garrett ranking the 1990 No S cent number 13 on their list of the *100 Greatest U.S. Modern Coins*, as well as *Cherrypickers'* and *Guide Book* notoriety. Census: 33 in 68 Red Ultra Cameo, 25 finer (5/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**1998-S Close AM Cent, PR70 Red Ultra Cameo
One of Two Examples at NGC**

- 3203 1998-S Close AM, FS-901, PR70 Red Ultra Cameo NGC.** Some proofs were struck using a reverse die made from a business strike hub, which shows a distant FG and a close AM. Registry Set collectors covet the rare variety in Proof format, especially when the coin approaches technical and visual flawlessness such as this PR70 Red example with Ultra Cameo contrast. NGC reports just two such coins in the unimprovable grade — this very specimen, and one other (4/16). PCGS# 507302 Base PCGS# 93529

TWO CENT PIECES

- 3204 1864 Small Motto, FS-401, MS65 Red and Brown PCGS. CAC.** A boldly rendered Small Motto 1864 two cent piece with satiny luster and unabraded surfaces. Rich burgundy and auburn-brown hues blanket much of each side but allow tinges of copper-red luster to emerge in the protected areas of the fields. The obverse is struck minutely off-center with almost no rim along the upper-right periphery. Population: 17 in 65 Brown, 1 finer. CAC: 14 in 65, 0 finer (5/16). PCGS# 38233 Base PCGS# 3580
- 3205 1864 Large Motto MS66 Red and Brown NGC.** Fiery woodgrain toning and gunmetal patina combine throughout this Premium Gem two cent coin. The strike is generally strong, and marks are predictably scarce. First-year two cent pieces were struck with Small and Large Mottos, the later being more available. NGC shows three finer Red and Brown submissions (4/16). NGC ID# 22N9, PCGS# 3577
- 3206 1864 Large Motto MS66 Red and Brown NGC.** Superb preservation is the hallmark of this Large Motto 1864 two cent piece, showing unabraded surfaces and lovely copper-orange and amber luster. The strike is bold, and eye appeal is outstanding. Only three Red and Brown examples are numerically finer at NGC (4/16). NGC ID# 22N9, PCGS# 3577
- 3207 1864 Large Motto MS66+ Red and Brown NGC.** The 1864 Large Motto two cent piece is elusive in Premium Gem condition and rare finer. This Plus-designated coin displays a sharp strike and well-balanced copper-red and burgundy luster. There are no obvious carbon specks. NGC lists only three Red and Brown coins finer (5/16). NGC ID# 22N9, PCGS# 3577

1864 Two Cent, MS66 Red
Exceptional Color and Spot-Free Surfaces

- 3208 1864 Large Motto MS66 Red PCGS.** The two cent piece was the first circulating United States coin to display the IN GOD WE TRUST motto. Issued into a Civil War economy that was devoid of circulating gold and silver coinage, both Large and Small Motto coins were introduced by the millions, although the Large Motto variety is considerably more available. This vibrant and colorfully toned Premium Gem is near the top of all surviving examples, with spot-free Red surfaces that show lilac and lime-green highlights over fire-orange coloration. The reverse displays numerous die cracks and an area of die rust or deterioration near the right ribbon end. Population: 62 in 66 (1 in 66+) Red, 2 finer (5/16). NGC ID# 22N9, PCGS# 3578

- 3209 1865 MS66 Red and Brown PCGS.** The original red surfaces of this impressive Premium Gem have mellowed to light brown in places, but few signs of contact are evident. The design elements are sharply detailed and vibrant mint luster shines through the patina. Population: 32 in 66 (2 in 66+) Red and Brown, 0 finer (5/16). NGC ID# 22NA, PCGS# 3583

- 3210 1865 Plain 5, Doubled Die Obverse, FS-102, MS66 Red and Brown NGC.** The obverse wreath, arrow, shield, and TRUST are die doubled on the right side. This Premium Gem example is boldly struck and displays satiny copper-red and auburn-brown surfaces with soft luster. A few tiny specks do not detract. Census: 73 in 66 (2 in 66+) Red and Brown, 3 finer (4/16). PCGS# 569398 Base PCGS# 38248

- 3211 1869 Repunched and Misplaced Date, FS-301, MS66 Brown NGC.** The 18 in the date is clearly repunched north, and a digit appears in the denticles below 18. This is one of three repunched date varieties for the issue. Primarily chestnut-brown patina has tinges of coppery-orange color that gives this Premium Gem two cent lovely eye appeal. Smooth and lustrous with strong detail on the olive leaves and wreath. NGC ID# 22ND, PCGS# 38277 Base PCGS# 3603

1870 Two Cent, MS66 Red and Brown
Lightly Repunched Date

- 3212 1870 MS66 Red and Brown PCGS. Flynn-KF-2-RPD.** The 18 is lightly repunched, apparent beneath the flag of the 1, and within the tops of the inner loops of the 8. A lovely peach-red Premium Gem. The obverse appears full Red, and the reverse is mostly Red with occasional hints of steel-gray toning on the open field. Marks are effectively absent, and the strike is generally sharp despite minor blending on the right obverse. NGC ID# 22NE, PCGS# 3607

- 3213 1872 AU55 NGC. CAC.** A well-detailed Choice AU example of this key two cent issue, showing reddish-brown patina and boasting a CAC endorsement. A few tiny ticks are seen in the fields, as is consistent with the grade. Finer examples are scarce. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

- 3214 1865 PR65 Brown NGC.** A razor-sharp Gem proof with olive-brown and amber toning that encompasses each side. The fields are reflective, and there are no mentionable imperfections. Census: 17 in 65 Brown, 7 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 274U, PCGS# 3627

- 3215 1865 PR65 Red and Brown NGC. CAC.** Splashes of crimson and cobalt-blue complement the coppery-gold surfaces of this sharply struck Gem. A few light flecks, more so on the reverse, fail to disturb. Census: 32 in 65 Red and Brown, 11 finer (4/16).

Ex: FUN Signature (Heritage, 1/2015), lot 3422. NGC ID# 274U, PCGS# 3628

1865 Two Cent, PR66+ Red and Brown
Sharp and Colorful

- 3216 1865 PR66+ Red and Brown PCGS. CAC.** Coppery-orange and violet-red hues encompass each side of this high-end Premium Gem 1865 proof two cent piece, the single finest Red and Brown coin at PCGS (4/16). The strike is sharp, and the fields are deeply reflective. No carbon spotting is observed. Population: 17 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 5 in 66, 0 finer (4/16). NGC ID# 274U, PCGS# 3628

- 3217 1866 PR65 Red and Brown NGC. CAC.** An attractive Gem proof with razor-sharp design elements and significant original red on the obverse. The reverse displays mostly olive-brown toning. This CAC-endorsed coin will please even the most discerning collector. Census: 43 in 65 Red and Brown, 16 finer. CAC: 11 in 65, 14 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 274V, PCGS# 3631

- 3218 1867 PR66 Red and Brown NGC.** The obverse of this Premium Gem proof 1867 two cent piece displays bright copper-orange color and deeply reflective fields, while the reverse has more subdued olive-brown patina. The strike is bold, and eye appeal is pleasing. Census: 20 in 66 Red and Brown, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 274W, PCGS# 3634

- 3219 1868 PR66 Brown NGC.** Well-struck, with pleasing light brown and gold patination. This Premium Gem Brown 1868 proof two cent piece is essentially devoid of abrasions, with just a couple of small, trivial flecks on each side. Census: 6 in 66 (1 in 66★) Brown, 0 finer (4/16).

Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5404. NGC ID# 274X, PCGS# 3636

- 3220 1868 PR65 Red and Brown NGC.** A pleasing Gem 1868 proof two cent piece, showing similar visual characteristics to the other proof two cents in the McClure Collection. The obverse is reflective and bright copper-orange, while the reverse displays olive-brown toning over the mirrored fields. The strike is bold. Census: 39 in 65 Red and Brown, 28 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 274X, PCGS# 3637

- 3221 1869 PR66 Brown NGC.** Among the finest proofs certified in the Brown color category, this Premium Gem 1869 proof two cent displays a bold strike and reflective fields. Olive-brown and amber hues intermingle over each side, allowing tinges of copper-red to emerge in the peripheral fields. Census: 11 in 66 Brown, 0 finer (5/16). NGC ID# 274Y, PCGS# 3639

3222 1869 PR65 Red and Brown NGC. CAC. An olive-brown reverse complements the tangerine-orange obverse of this Gem Red and Brown 1869 proof. A few small bits of toning appear on the central obverse, although the shield and wreath nonetheless display modest contrast. The strike is sharp, and eye appeal is pleasing. Census: 55 in 65 Red and Brown, 29 finer. CAC: 23 in 65, 13 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 274Y, PCGS# 3640*

3223 1870 PR65 Red and Brown NGC. CAC. This Gem Red and Brown 1870 proof two cent displays nearly full red color on both sides, although hints of olive toning over the high points of the design confirms the given designation. The strike is bold, and the fields are modestly reflective. Eye appeal is outstanding. Census: 56 in 65 (2 in 65+) Red and Brown, 23 finer. CAC: 24 in 65, 12 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 274Z, PCGS# 3643*

3224 1871 PR66 Brown NGC. FS-102. The obverse is die doubled on IN GOD WE TRUST, as it is on all 1871 proof two cent pieces. This Premium Gem Brown coin displays a razor-sharp strike and reflective fields. Olive-gold and chestnut-brown toning blankets each side. Census: 8 in 66 Brown, 2 finer (5/16). NGC ID# 22NH, PCGS# 3645

3225 1871 PR66 Brown NGC. CAC. A sharp Premium Gem proof with modestly reflective fields and rich amber-red and olive-brown toning. There are no noteworthy flaws. This piece is high-end for the Brown color category. Census: 9 in 66 Brown, 2 finer. CAC: 5 in 66, None finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22NH, PCGS# 3645*

3226 1872 PR65 Red and Brown NGC. The key-date status of the circulation-strike 1872 two cent piece increases demand for the more affordable proof variant. This Gem Red and Brown proof displays a sharp strike, with copper-orange obverse color and an olive-brown reverse. *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2752, PCGS# 3649*

1872 Two Cent Piece, PR66 Red and Brown None Numerically Finer at PCGS

3227 1872 PR66 Red and Brown PCGS. CAC. Only 950 proof two cent pieces were struck in 1872, and the denomination was cancelled after the following year. This spectacular Premium Gem displays a mix of original red and light brown patina over the impeccably preserved surfaces. The design elements are sharply detailed and the fields are deeply mirrored, adding to the outstanding eye appeal. Population: 26 in 66 (1 in 66+) Red and Brown, 1 finer. CAC: 13 in 66, 0 finer (5/16). NGC ID# 2752, PCGS# 3649

1873 Closed 3 Two Cent, PR64 Pleasing Red and Brown Coin

3228 1873 Closed 3 PR64 Red and Brown NGC. A boldly struck final-year proof, showing nearly full red color on the obverse and deeper olive-brown on the reverse. The fields are deeply mirrored, and the eye appeal is excellent. There is a faint planchet lamination above the second S in STATES, and a threadlike strike-through between the D in UNITED and the first S in STATES. *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2753, PCGS# 3652*

THREE CENT SILVER

3229 1852 MS66 PCGS. CAC. A beautifully preserved Premium Gem with frosty luster and champagne-gray toning. The strike is well-executed, but die erosion near the borders gives the peripheral details minimal sharpness. PCGS lists 23 numerically finer submissions. CAC: 32 in 66, 15 finer (4/16). NGC ID# 22YZ, PCGS# 3666

3230 1853 MS66+ PCGS. CAC. The 1853 is the final Type One issue in the silver three cent series, and it is the last date with an eight-figure mintage (11.4 million coins). This Plus-graded Premium Gem is sharply struck with thick, frosty luster and champagne-gray surfaces. Most Uncirculated examples grade MS65 or lower, making this MS66+ coin conditionally scarce. Population: 88 in 66 (6 in 66+), 11 finer. CAC: 24 in 66, 9 finer (5/16). NGC ID# 22Z2, PCGS# 3667

3231 1854 MS65 PCGS. CAC. An impressively well-struck Gem example, showing satiny luster with mottled olive-gold toning over each side. The 1854 three cent silver is elusive in this grade and rare finer. Population: 63 in 65 (1 in 65+), 12 finer. CAC: 21 in 65, 11 finer (5/16). NGC ID# 22Z3, PCGS# 3670

1860 Three Cent Silver, MS66 Only One Finer Coin at PCGS

3232 1860 MS66 PCGS. CAC. Vivid shades of magenta and sea-green toning blanket the well-preserved surfaces of this attractive Premium Gem. The design elements are well-detailed, with just a touch of softness on the reverse star centers. Dramatic clash marks from the shield show on the central reverse and satiny mint luster shines through the toning. Population: 14 in 66, 1 finer. CAC: 8 in 66, 0 finer (5/16). NGC ID# 5LDM, PCGS# 3678

**1860 Three Cent Silver, MS67
Among the Finest Certified**

- 3233 1860 MS67 NGC.** The 1860 three cent silver is a seldom-seen issue, particularly in Gem or finer grades. This piece is one of just three MS67 coins at NGC (one in MS67 ★) with none finer; PCGS shows one coin in this grade, also with none finer (4/16). This piece displays delicate, satiny luster with blended shades of lavender-gold and olive-gray toning over each side. Trivial softness is noted on the central shield, as usual, but the strike is otherwise well-executed. NGC ID# 5LDM, PCGS# 3678

- 3234 1862 MS66+ PCGS. CAC.** Shimmering luster glows beneath ice-blue and champagne overtones on this incredibly well-preserved 1862 silver three cent. The strike is a trifle soft on the central high points, as usual. NGC ID# 22ZB, PCGS# 3680

- 3235 1863 MS63 NGC.** Issued to counter the disappearance of silver coinage from circulation, the lower silver content of three-cent silver pieces lost its effect as gold-to-silver ratios normalized. Starting in 1863 (with just 21,000 pieces struck) mintages of the small silver pieces declined to mere token levels, soon to be superseded by three-cent nickels in 1865. This Select Uncirculated 1863 displays original patina of gunmetal-blue and amber-gold shades on the obverse, with deep bluish-gray toning on the reverse. Slight weakness is noted on the top point of the obverse star. Census: 11 in 63, 59 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22ZD, PCGS# 3682

- 3236 1863 MS64 PCGS.** A well-struck Choice example with brilliant surfaces and semiprooflike fields. A few light grazes limit the grade. The 1863 silver three cent is a better date overall, benefiting in this regard from a small 21,000-coin mintage. Population: 29 in 64, 41 finer (4/16). NGC ID# 22ZD, PCGS# 3682

PROOF THREE CENT SILVER

**1861 Three Cent Silver, PR66
Reflective, Richly Toned Surfaces**

- 3237 1861 PR66 PCGS. CAC.** From a nominal mintage of 1,000 pieces, the 1861 proof three cent silver piece is very rare in Premium Gem condition. This strong example displays well-preserved reflective surfaces under vivid shades of navy-blue, lavender, and golden-orange toning. Population: 7 in 66, 5 finer (5/16).
Ex: Long Beach Signature (Heritage, 6/2014), lot 3302. NGC ID# 27C8, PCGS# 3710

- 3238 1863 PR65 PCGS.** *Ex: Teich Family Collection.* A needle-sharp Gem proof with mirrored fields and beautiful multicolor toning. The obverse displays a champagne-gold interior with blue and mint-green around the periphery, while the reverse has olive-gold margins with an internal ring of blue around a sun-orange center. Population: 23 in 65 (1 in 65+), 15 finer (5/16). NGC ID# 7VZE, PCGS# 3712

**1863 Silver Three Cent, PR66
A Delightful Early Die State Proof**

- 3239 1863 PR66 NGC. CAC.** A fully struck, reflective proof, struck from fresh dies that show no die lapping. Pale mint-green and champagne pastels accent each side, while the underlying surfaces are beautifully preserved. The proof 1863 silver three cent is rare in this well-preserved. Census: 13 in 66 (1 in 66★), 9 finer. CAC: 8 in 66, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 7VZE, PCGS# 3712

- 3240 1865 PR64 NGC. CAC.** Bold reflectivity remains on the mirrored fields despite some patchy umber-gray and reddish-gold toning, with original eye appeal and a sharp strike that earn this near-Gem proof CAC endorsement. A moderately available issue with 500 pieces struck in proof format. Census: 53 in 64, 51 finer. CAC: 8 in 64, 12 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CB, PCGS# 3715

- 3241 1865 PR65 NGC.** Gold, blue, and violet shadings mingle on this exquisitely toned Gem proof 1865 three cent silver. The design elements are crisply detailed with intense mirrors beneath the toning. Census: 25 in 65, 26 finer (5/16).

Ex: Long Beach Signature (Heritage, 5/2009), lot 249. NGC ID# 27CB, PCGS# 3715

**1867 Three Cent Silver, PR66+
Only 625 Pieces Struck**

- 3242 1867 PR66+ NGC. CAC.** A high-end Premium Gem from a small proof mintage of 625 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields throughout. The well-preserved surfaces are blanketed in shades of pale gold toning, with occasional highlights of blue and lavender. Eye appeal is outstanding. Census: 27 in 66, (1 in 66+), 11 finer. CAC: 11 in 66, 3 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CD, PCGS# 3717

**1868 Silver Three Cent, PR66 Cameo
Attractively Toned**

- 3243 1868 PR66 Cameo NGC. CAC.** A rare Cameo example of the 1868 silver three cent, showing bold detail and frosty, contrasted design elements. The mirroring is toned in rose-gold and sea-green hues, and the eye appeal is outstanding. Finer Cameo examples are extremely rare, and Ultra Cameos are exceedingly so. Census: 6 in 66 Cameo, 2 finer. CAC: 11 in 66, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CE, PCGS# 83718

- 3244 1870 PR64 NGC.** While business strikes approached obsolescence, proofs were made in larger quantity in 1870 with 1,000 pieces struck. Pinkish-gold and azure-blue toning show a few deep-gray accents over the reflective surfaces of this Choice proof. If not for the pervasive toning, the frosted devices would suggest a cameo designation. A pleasing, well-struck and carefully preserved example of this later date in the silver three-cent series.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CF, PCGS# 3721

- 3245 1870 PR66 Cameo NGC.** A beautifully toned and deeply reflective contrasted proof, with glassy-smooth mirrors and a pinpoint-sharp strike. A few scattered toning spots and raised die polish lines aside, the technical quality of this radiant blue- and gold-toned proof is palpable and it is duly recognized by NGC, making it one of the few 1870s to reach the Premium Gem cameo level. Census: 2 in 66 Cameo, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CF, PCGS# 83721

- 3246 1871 PR65 NGC. CAC.** This Gem CAC-endorsed proof three cent silver is boldly struck and reflective with lemon-gold, mint-green, and ocean-blue toning. The 1871 proof had a mintage of 960 pieces, but the scarcity of circulation strikes of this year keeps demand high among date collectors. Census: 34 in 65 (1 in 65★), 32 finer. CAC: 7 in 65, 18 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CG, PCGS# 3722

- 3247 1872 PR64+ NGC. CAC.** The obverse is modestly contrasted on this high-end near-Gem proof, and both sides are razor-sharp. The obverse displays medium mint-gold toning, and the reverse has lovely lavender and sky-blue hues. Eye appeal exceeds expectations. CAC: 8 in 64, 32 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CH, PCGS# 3723

- 3248 1873 PR65 NGC.** Ex: Richmond Collection. A sharp, Gem-quality Closed 3 proof 1873 silver three cent, showing mostly warm golden toning but with hints of blue around the reverse border. The obverse shows modest cameo contrast. Rarely seen finer. Census: 64 in 65 (1 in 65+, 1 in 65★), 34 finer (5/16).
Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1153. NGC ID# 27CJ, PCGS# 3724

**1873 Silver Three Cent Piece, PR66
Final Proof-Only Mintage**

- 3249 1873 PR66 NGC.** The silver three cent piece was discontinued after 1873, when a final proof-only mintage of 600 specimens was accomplished. All the coins were struck early in the year, as evidenced by the Closed 3 in the date. This delightful Premium Gem is sharply detailed and well-preserved, with deeply reflective fields and attractive shades of greenish-gold and powder-blue toning. Census: 27 in 66 (1 in 66+, 1 in 66★), 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

- 3250 1868 MS66 PCGS. CAC.** A well-preserved and conditionally scarce example with satiny, champagne-tinted luster. The left Roman numeral is the only design element with an incomplete strike. Population: 42 in 66 (2 in 66+), 1 finer. CAC: 13 in 66, 2 finer (5/16). NGC ID# 2756, PCGS# 3734

- 3251 1870 MS66 PCGS. CAC.** This attractive Premium Gem exhibits strongly impressed design elements, with some clash marks and die breaks on both sides. The well-preserved, lustrous surfaces are blanketed by shades of jade-gold toning. Population: 37 in 66 (2 in 66+), 0 finer. CAC: 5 in 66, 0 finer (5/16). NGC ID# 22NM, PCGS# 3736

**1870 Nickel Three Cent, MS66+
Tied for Finest at PCGS**

- 3252 1870 MS66+ PCGS. CAC.** Satiny luster and champagne toning combine to give this high-end Premium Gem 1870 nickel three cent pleasing eye appeal. The central Roman numeral on the reverse shows the only noticeable weakness of strike. The 1870 is scarce in MS66 and prohibitively rare at the Superb Gem level. This piece is tied for the finest at PCGS. Population: 36 in 66 (2 in 66+), 0 finer. CAC: 5 in 66, 0 finer (4/16). NGC ID# 22NM, PCGS# 3736

- 3253 1871 MS66+ PCGS. CAC.** The sharply struck, satin-smooth surfaces tend to capture the plentiful mint luster in coruscating ripples to illuminate the attractive nickel-gray fields and devices. There are absolutely no abrasions of note and the only marks to report are those from die clashing that is prominent on both sides. CAC endorsed. Population: 63 in 66 (9 in 66+), 1 finer. CAC: 14 in 66, 2 finer (4/16). NGC ID# 22NN, PCGS# 3737

**1874 Three Cent Nickel, MS66+
Only One Finer Example at PCGS**

- 3254 1874 MS66+ PCGS. CAC.** While the silver three cent pieces were discontinued in 1873, the three cent nickel soon stepped in with a mintage of 789,300 pieces in 1874. Numismatic conservation was not a priority in those financially troubled times, and few Uncirculated examples of the first-year issue were saved. This high-end Premium Gem is one of the finest survivors, with lustrous untoned surfaces and an impeccable strike. Just a single coin is certified finer by either service. CAC endorsed, and this is the sole MS66 coin at PCGS with the Plus designation. Population: 14 in 66 (1 in 66+), 1 finer. CAC: 8 in 66, 2 finer (5/16). NGC ID# 2759, PCGS# 3742

- 3255 1880 MS66 PCGS. CAC.** A delightful Premium Gem from a mintage of 21,000 pieces, this coin displays well-detailed design elements and well-preserved lustrous surfaces that radiate vibrant mint luster. Eye appeal is outstanding. PCGS has graded 37 numerically finer examples (5/16). NGC ID# 275C, PCGS# 3748

- 3256 1880 MS67 PCGS.** The 1880 three cent nickel is a fairly plentiful date for type representation, but Superb Gem-quality examples are rarely encountered. This piece is among the finest certified. The strike is sharp, and the frosty, champagne-tinted surfaces are devoid of abrasions. Population: 37 in 67, 0 finer (4/16). NGC ID# 275C, PCGS# 3748

- 3257 1880 MS67 PCGS.** Vibrant mint luster and sharply detailed design elements are the calling cards of this spectacular Superb Gem, with impeccably preserved surfaces and terrific eye appeal. Population: 37 in 67, 0 finer (5/16). NGC ID# 275C, PCGS# 3748

PROOF THREE CENT NICKELS

**1865 Three Cent Nickel, PR65 Cameo
Excellent First-Year Type Example**

- 3258 1865 PR65 Cameo PCGS. CAC.** Three cent nickels were struck for the first time in 1865, because their silver counterparts were widely hoarded. A small proof mintage of 500+ examples was accomplished, to accompany a staggering business-strike production of 11.3 million pieces. This well-preserved Gem exhibits sharply detailed design elements and reflective fields that contrast boldly with the frosty devices. Population: 37 in 65 (2 in 65+) Cameo, 36 finer. CAC: 9 in 65, 14 finer (4/16). NGC ID# 275K, PCGS# 83761

- 3259 1866 PR66 Cameo PCGS. CAC.** An elusive Premium Gem Cameo example of the 1866 three cent nickel. This piece is fully struck and displays stark field-device contrast. A hint of light golden toning accentuates the eye appeal. Population: 25 in 66 (3 in 66+) Cameo, 1 finer. CAC: 15 in 66, 1 finer (5/16). NGC ID# 275L, PCGS# 83762

**1866 Nickel Three Cent, PR66
Rare Ultra Cameo Example**

- 3260 1866 PR66 Ultra Cameo NGC. CAC.** Rarely is an Ultra Cameo example of the proof 1866 nickel three cent seen. This piece is fully struck and displays stark white-on-black contrast. No toning appears in the fields, and the mirroring is excellent. An outstanding type coin or Registry candidate. Census: 8 in 66 Ultra Cameo (2 in 66★ Ultra Cameo), 7 finer. CAC: 8 in 66, 1 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275L, PCGS# 93762

- 3261 1867 PR66 Cameo NGC. CAC.** A sharp, starkly contrasted Premium Gem Cameo proof, this 1867 nickel three cent piece displays untuned surfaces and deeply reflective fields. Cameos are occasionally seen in this grade but are rare any finer. Census: 54 in 66 (1 in 66+, 5 in 66★) Cameo, 7 finer. CAC: 24 in 66, 1 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275M, PCGS# 83763

**1869 Three Cent Nickel, PR66
Starkly Contrasted Ultra Cameo**

- 3262 1869 PR66 Ultra Cameo NGC.** Fully mirrored fields and frost-white, sharp design elements give this Premium Gem proof 1869 three cent nickel is exceptional Ultra Cameo eye appeal. The obverse has a few tiny strike-throughs, as normal, and both sides display a halo of light golden rim toning. Census: 14 in 66 Ultra Cameo (1 in 66★ Ultra Cameo), 4 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275P, PCGS# 93765

- 3263 1870 PR66 Cameo NGC. CAC.** The 1870 proof three cent nickel is scarce in PR66, particular as a Cameo. This CAC coin displays sharp, frosty design elements and untuned, mirrored fields. A number of tiny strike-throughs (mint-made) appear on the obverse, as is typical of this issue. Census: 26 in 66 (1 in 66+, 2 in 66★) Cameo, 4 finer. CAC: 14 in 66 Cameo, 1 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275W, PCGS# 83766

**1872 Three Cent Nickel, PR66+ Cameo
Rare Issue With Cameo Surfaces**

- 3264 1872 PR66+ Cameo NGC. CAC.** The sharply detailed frosty design elements of this Plus-graded Premium Gem contrast boldly with the deeply mirrored fields to create an attractive cameo effect. Virtually pristine surfaces add to the outstanding visual appeal. From a proof mintage of 950 pieces. Census: 28 in 66 Cameo (3 in 66+ Cameo), 3 finer. CAC: 10 in 66, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 26JT, PCGS# 83768

**1873 Closed 3 Nickel Three Cent, PR66 Cameo
Only One Cameo Finer at PCGS**

- 3265 1873 Closed 3 PR66 Cameo PCGS. CAC.** This Premium Gem Cameo 1873 proof three cent nickel is sharply struck and has deep mirroring in the fields. Light golden toning graces each side, and there are no distracting marks or hairlines. A localized point of weakness is seen on the upper portion of the central Roman numeral, produced by a partially clogged die. Rarely seen this fine and prohibitively scarce finer. Population: 20 in 66 (4 in 66+) Cameo, 1 finer. CAC: 18 in 66, 1 finer (5/16). NGC ID# 275U, PCGS# 83769
- 3266 1873 Closed 3 PR66+ Cameo NGC.** A nicely mirrored proof representative with nearly brilliant and minutely granular surfaces. The strike is bold save for Liberty's shoulder curl. The dies were lapped, attenuating the eye socket and many of the leaves in the wreath. Census: 22 in 66 (2 in 66+) Cameo, 3 finer (5/16). NGC ID# 275U, PCGS# 83769
- 3267 1874 PR66+ Cameo NGC. CAC.** The official mintage of 700 proofs does not include those sold in minor proof sets, increasing the actual mintage to perhaps double that number. Collectible in grades through Gem proof, contrasted Premium Gems are scarce and they are especially challenging with the Plus designation. This high-end example is brilliant and reflective on both sides with strong definition on the frosty motifs. Few are finer. Census: 41 in 66 Cameo (8 in 66+ Cameo, 2 in 66★ Cameo), 5 finer. CAC: 24 in 66, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275V, PCGS# 83770
- 3268 1875 PR66 PCGS. CAC.** This spectacular Premium Gem displays well-detailed design elements and deeply reflective fields under pale shades of champagne-gold toning. Population: 20 in 66, 0 finer. CAC: 8 in 66, 0 finer (4/16).
Ex: New York Signature (Heritage, 11/2013), lot 3188. NGC ID# 22NV, PCGS# 3771

- 3269 1875 Misplaced Date, FS-301, PR66 NGC. CAC.** This coin displays one of the most-distant misplaced digits in any series, where the base or flag of a misguided 1 protrudes from Liberty's neck. The obverse is deeply mirrored and toned, contrasting boldly with the frosted visage of Liberty. The reverse is less mirrored with a faint gold tinge at the center, but it is equally well-struck and attractive. Scarce at the PR66 level regardless of the MPD variety, which adds to the appeal. CAC endorsed. Census (includes all varieties): 18 in 66 (2 in 66+), 0 finer. CAC: 8 in 66, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22NV, PCGS# 524940 Base PCGS# 3771

- 3270 1876 PR66 Cameo NGC. CAC.** The Centennial issue of proof sets accounts for the greater number of 1876 proofs in all denominations, three-cent nickels included. This example is brilliant and deeply mirrored with particularly strong field/device contrast. The lack of wayward lines or marks combines with a crisp strike and provides the appeal of an even higher grade. CAC endorsed. Census: 37 in 66 Cameo (4 in 66★ Cameo, 1 in 66+★ Cameo), 6 finer. CAC: 10 in 66, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275W, PCGS# 83772

**1877 Three Cent Nickel, PR66 ★ Cameo
Brilliant and Beautiful**

- 3271 1877 PR66 ★ Cameo NGC.** A brilliant high-grade specimen that features frosty motifs and reflective fields. The strike is intricate throughout. No contact is apparent, although a lens reveals minute obverse carbon. The Star designation is elusive on 19th century proofs. Census: 61 in 66 Cameo (2 in 66+ Cameo, 5 in 66★ Cameo), 27 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275X, PCGS# 83773
- 3272 1878 PR67 Cameo NGC. CAC.** As a proof-only issue, the 1878 is generally available in up to Gem condition from the mintage of 2,350 pieces, yet finer coins are scarce and those with confirmed Cameo contrast are very scarce. This CAC-endorsed example is lustrous and fully contrasted with strongly mirrored fields on both sides. The strike is sharp throughout. Census: 32 in 67 Cameo (3 in 67★ Cameo), 2 finer. CAC: 27 in 67, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275Y, PCGS# 83774
- 3273 1878 PR67 Cameo NGC. CAC.** Of the three proof-only issues in the three-cent nickel series (1877, 1878, and 1886) the 1878 is moderately available — less so than the 1886, but more so than the 1877. This Superb Gem with recognized cameo contrast is CAC-endorsed for its mark-free mirrored fields and frosted raised elements. The strike is satisfyingly sharp. Census: 32 in 67 Cameo (3 in 67★ Cameo), 2 finer. CAC: 27 in 67, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275Y, PCGS# 83774
- 3274 1881 PR65 Ultra Cameo NGC.** Ultra Cameo proof 1881 three cent nickels are rare regardless of numeric grade. This Gem example is fully struck and contrasted with a lovely champagne hue and frosty design elements. A threadlike strike-through at the tip of Liberty's nose is mint-made. Census: 2 in 65 Ultra Cameo, 3 finer (5/16). PCGS# 93777
- 3275 1883 PR67+ PCGS.** A high-end example of the 1883 proof nickel three cent, showing fully struck design elements and highly reflective fields. Each side is cast in lovely ice-blue, lavender, and champagne hues, delivering outstanding eye appeal. Population: 74 in 67 (4 in 67+), 4 finer (4/16). NGC ID# 2765, PCGS# 3779

3276 1885 PR67 NGC. CAC. A low circulation-strike mintage of just 1,000 pieces puts the burden on proofs for date collectors, since proofs outnumber business strikes by a factor of nearly 4 to 1. This glittering Superb Gem is the equal of any top-end example. Significant contrast between the mirrored fields and sharply struck frosted devices suggests a future cameo designation would be of no surprise. CAC endorsed for high quality, with none numerically finer by NGC. Census: 27 in 67 (1 in 67★), 0 finer. CAC: 20 in 67, none finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2767, PCGS# 3781

3277 1886 PR67 Cameo PCGS. This spectacular Superb Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields to create a stunning cameo effect. The surfaces are immaculately preserved and eye appeal is terrific. Population: 26 in 67 Cameo, 0 finer (5/16). NGC ID# 5E5Y, PCGS# 83782

1887/6 Three Cent Nickel, PR67+ Cameo Popular Guide Book and Cherrypickers Variety

3278 1887/6 PR67+ Cameo NGC. CAC. FS-302. Repunching shows on the 1 and both 8's in the date, and the remnants of an undertype 6 show plainly beneath the 7 on this popular *Cherrypickers* variety. This Plus-graded Superb Gem offers sharply detailed design elements throughout, and the deeply mirrored fields contrast boldly with the frosty devices. The surfaces are impeccably preserved and eye appeal is terrific. Census: 10 in 67 Cameo, (1 in 67+ Cameo), 3 finer. CAC: 3 in 67, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276A, PCGS# 83784

3279 1887/6 PR66 Cameo PCGS. CAC. FS-302. The remnants of an undertype 6 are clearly evident below the 7, and the 1 and both 8's show evidence of recutting. This delightful Premium Gem is sharply detailed throughout, with a few short die cracks in the area of the date. The frosty devices contrast boldly with the deeply mirrored fields. Population: 12 in 66 Cameo, 1 finer. CAC: 4 in 66, 0 finer (5/16). NGC ID# 2769, PCGS# 83783

3280 1888 PR67 ★ Cameo NGC. CAC. Among the finest Cameos certified, this Star-designated Superb Gem displays a bold strike and pleasing white-on-black contrast without the hindrance of toning. Conditionally rare so well-preserved. Census: 17 in 67 (1 in 67+, 4 in 67★) Cameo, 0 finer. CAC: 13 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276B, PCGS# 83785

SHIELD NICKELS

3281 1868 MS66+ NGC. Fletcher IIa reverse. An untuned and thoroughly lustrous Premium Gem with unmarked surfaces and excellent eye appeal. The strike is precise except for the star above the T in CENTS. The fields show faint parallel die polishing lines (mint-made). Census: 38 in 66 (2 in 66+, 1 in 66★), 2 finer (5/16).
Ex: ANA Signature (Heritage, 3/2011), lot 3195. NGC ID# 22P2, PCGS# 3795

3282 1869 MS66 PCGS. Sharply detailed in most areas, this impressive Premium Gem shows just a touch of softness on some of the stars. The well-preserved surfaces show a few spidery die breaks on the obverse, with vibrant mint luster and subtle highlights of pale gold toning. Population: 17 in 66 (1 in 66+), 0 finer (5/16). NGC ID# 22P3, PCGS# 3796

1870 Shield Nickel, MS66 Recut Date

3283 1870 MS66 PCGS. An unlisted variety that shows the 0 in the date recut on the lower-left loop. This conditionally rare Premium Gem 1870 Shield nickel displays satiny nickel-gray luster with hints of light golden toning. The strike is bold, although several left-hand wreath leaves show evidence of having been struck with a partially grease-filled die. Population: 17 in 66 (3 in 66+), 0 finer (4/16). NGC ID# 22P4, PCGS# 3797

1871 Shield Nickel, MS66 Among the Finest Certified

3284 1871 MS66 NGC. A conditionally rare Premium Gem example of the 1871 Shield nickel, showing satiny nickel-gray luster with tinges of warm golden toning. Several right-hand wreath leaves are softly defined due to a partially grease-filled die, but the strike is otherwise bold. IN GOD WE TRUST is strike doubled, and several peripheral die cracks are seen amid the wreath leaves. Census: 4 in 66 (1 in 66★), 0 finer (4/16). NGC ID# 22P5, PCGS# 3798

3285 1874 MS65 PCGS. Satiny nickel-gray luster illuminates each side of this Gem 1874 Shield nickel, while the fields are free of distracting abrasions. Some minor weakness is seen on select obverse high points, but nothing is singularly obvious. Rarely seen finer. Population: 39 in 65 (1 in 65+), 11 finer (5/16). NGC ID# 22P9, PCGS# 3803

3286 1875 MS65 PCGS. CAC. This satiny Gem 1875 Shield nickel displays a bold strike and a hint of champagne toning over each side. Heavy lathe lines (mint-made) appear in the upper portion of the wreath. Population: 54 in 65 (1 in 65+), 14 finer. CAC: 7 in 65, 4 finer (4/16). NGC ID# 22PA, PCGS# 3804

1875 Shield Nickel, MS66+ Top-Grade Condition Rarity

3287 1875 MS66+ PCGS. A razor-sharp, frosty 1875 Shield nickel with a hint of ice-blue toning on each side that delivers outstanding eye appeal. Both sides are heavily cracked around the periphery, as is typically seen on this issue. The hard nickel alloy of the planchets was far more destructive of dies during this period than silver coins were. This high-end Premium Gem is tied for the finest certified. Population: 14 in 66 (3 in 66+), 0 finer (5/16). NGC ID# 22PA, PCGS# 3804

**1879 Shield Nickel, MS66
Lustrous and Lightly Toned**

3288 1879 MS66 NGC. A razor-sharp, satiny Premium Gem with nickel-gray surfaces that show hints of champagne toning. Eye appeal is excellent. Some minor strike doubling is seen on the date and wreath leaves. The 1879 Shield nickel is elusive in Mint State and is rare in MS66 and finer condition. Census: 18 in 66 (3 in 66★), 4 finer (4/16). NGC ID# 5KWK, PCGS# 3808

3289 1883/2 FS-302 AU55 PCGS. CAC. An underlying 2 is evident left of the 3. The 8s in the date also show secondary digits. Lustrous, silvery-gray surfaces display crisp detail on the leaves and stars with minimal blending. Extensive die cracks occur around the obverse, and light marks are noted on each side. Housed in an old green label holder. PCGS# 38413 Base PCGS# 3814

3290 1883/2 FS-305 MS63 ANACS. Fletcher-7. The plate coin for the FS-305 variety in the fifth and sixth editions of the *Cherry-pickers' Guide*, as confirmed by minute carbon flecks near the date. Crisply struck and highly lustrous with moderate reverse carbon. Small strike-throughs are noted near the O in OF and the I in UNITED. NGC ID# 22PD, PCGS# 406858 Base PCGS# 3814

PROOF SHIELD NICKELS

3291 1867 No Rays PR65 ★ Cameo NGC. CAC. A razor-sharp, starkly contrasted and virtually untuned Gem proof, fully worthy of the Star designation. The mirroring in the fields is eye-catching. The 1867 No Rays proof is elusive in Cameo grades and is rarely seen above PR65. Census: 21 in 65 (1 in 65 ★) Cameo, 16 finer. CAC: 10 in 65, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5EB6, PCGS# 83821

3292 1868 PR66 ★ NGC. CAC. The date is prominently repunched within the loops of the second 8. The 18 is also lightly recut. A sharply struck and flashy Premium Gem with a brilliant obverse and light wheat-gold toning on the reverse. The awkward layout of STATES is usual for this lower mintage proof date.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276J, PCGS# 3822

3293 1868 PR66 Cameo PCGS. CAC. Ex: Eliasberg. Cameo proof 1868 Shield nickels are scarce in all grades and Premium Gems are rare. This piece displays a bold strike and incredibly deep mirroring in the fields with stark white-on-black contrast. A blush of light golden toning appears on the central reverse amid faint remnants of mint-made roller marks. Population: 18 in 66 (2 in 66+) Cameo, 0 finer. CAC: 14 in 66, 0 finer (5/16).
Ex: Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 755, which realized \$3,300. NGC ID# 276J, PCGS# 83822

3294 1869 PR66 ★ NGC. CAC. The fields of this razor-sharp Premium Gem proof display liquidlike mirroring, undoubtedly the reason for the coveted Star designation. The coin is brilliant, and cameo contrast is discernible on each side, although undesignated by NGC. Eye appeal is remarkable. Census: 37 in 66 (1 in 66+, 2 in 66★), 6 finer. CAC: 11 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276K, PCGS# 3823

3295 1870 PR65 ★ NGC. CAC. The obverse of this stark-white Gem proof showcases beautiful cameo contrast, although the reverse is far less pronounced — a Star designation awards the majestic eye appeal. Spectacular mirroring in the fields is interrupted only by occasional die polishing lines (mint-made), and remnants of lathe lines (also mint-made) are seen within the wreath and lower shield. Census: 73 in 65 (2 in 65★), 17 finer. CAC: 17 in 65, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276L, PCGS# 3824

3296 1871 PR66 Cameo NGC. CAC. This frost-white 1871 proof Shield nickel displays stark cameo contrast on each side, accentuated by razor-sharp detail in the strike. The fields are mirrored, and the eye appeal is superb. Seldom seen this fine. Census: 13 in 66 Cameo, 7 finer. CAC: 14 in 66, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# AMU3, PCGS# 83825

1872 Proof, PR67 Cameo Outstanding Contrast and Sharpness

3297 1872 PR67 Cameo PCGS. Die doubled on the obverse, with the annulet the pick-up point. This Superb Gem Cameo 1872 proof Shield nickel is fully struck and showcases stark field-motif contrast. Warm golden toning blankets each side, and the eye appeal is superb. Cameo 1872 proofs are scarce in any grade but become genuinely rare at the PR67 level and are unknown finer. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (5/16). NGC ID# AMU4, PCGS# 83826

3298 1873 Closed 3 PR66 Cameo PCGS. Fletcher-2. The 1 in the date is recut on this proof obverse. All proof 1873 Shield nickels show the Closed 3 date type. This Premium Gem Cameo displays a bold strike and mirrored fields. A hint of champagne toning adds to the eye appeal. Population: 33 in 66 (1 in 66+) Cameo, 2 finer (5/16). NGC ID# 276P, PCGS# 83827

3299 1873 Closed 3 PR66 Cameo PCGS. Fletcher-2. The 1 in the date is recut on this proof obverse. All 1873 proof Shield nickels are Closed 3 coins. This Premium Gem Cameo is boldly struck and displays brilliant, nicely contrasted surfaces. Conditionally scarce and rare any finer. Population: 33 in 66 (1 in 66+) Cameo, 2 finer (5/16). NGC ID# 276P, PCGS# 83827

3300 1873 Closed 3 PR66 Cameo PCGS. All proof 1873 Shield nickels were struck with a Closed 3 in the date. This attractive Premium Gem exhibits strongly impressed design elements, with some incompleteness in the leaves, due to lapping. The flawless surfaces are blanketed in shades of pale gold toning, with deeply reflective fields underneath. Population: 33 in 66 (1 in 66+) Cameo, 2 finer (5/16). NGC ID# 276P, PCGS# 83827

3301 1874 PR66 Cameo PCGS. CAC. Variable quality is the watchword for proof 1874 nickels. This is a well-produced example that is brilliant, deeply mirrored, and has pinpoint-strike details. Type coins such as this one are an exceptionally good buy at today's market levels. Population: 38 in 66 (2 in 66+) Cameo, 4 finer. CAC: 15 in 66, 0 finer (5/16). NGC ID# 276R, PCGS# 83828

3302 1875 PR66 Cameo NGC. CAC. This untuned Premium Gem Cameo proof is fully struck with stark field-device contrast. Eye appeal is exceptional for the issue, which is seldom seen in Cameo grades. This coin is conditionally rare. Census: 12 in 66 (2 in 66★) Cameo, 1 finer. CAC: 8 in 66, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276S, PCGS# 83829

- 3303 1876 PR66+ Cameo NGC. CAC.** A sharp 1876 proof Shield nickel with stark cameo contrast on each side. A hint of champagne toning accentuates the eye appeal, and the mirrored fields are beautifully preserved. Scarce in this grade and rarely seen finer. Census: 49 in 66 (2 in 66+, 3 in 66 ★) Cameo, 7 finer. CAC: 17 in 66, 5 finer (5/16). NGC ID# 276T, PCGS# 83830

1876 Nickel, PR66 Ultra Cameo

- 3304 1876 PR66 Ultra Cameo NGC. CAC.** A hint of golden patina adorns this otherwise brilliant example. The mirrored fields are virtually void of carbon and contact. The strike is razor-sharp, sufficient to create a wire rim on the reverse between 11 and 3 o'clock. Impressive white-on-black contrast further ensures the eye appeal. Census: 7 in 66 Ultra Cameo (1 in 66+ Ultra Cameo), 1 finer. CAC: 1 in 66, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276T, PCGS# 93830

- 3305 1878 PR64 NGC.** Its status as an essential coin for a complete date set makes this proof-only 1878 nickel always in demand beyond the 2,350-piece mintage. Modestly reflective fields contrast with the frosty raised elements, while fawn-gold toning covers both sides. Sharply struck and spot-free except for a single tiny carbon between M and E of AMERICA. NGC ID# 276V, PCGS# 3832

- 3306 1878 PR66 Cameo NGC.** A reflective example of this proof-only issue — essential for a complete date set, and seldom seen any finer. Vibrant, brilliant-silver surfaces show frosted motifs and a razor-sharp strike with a slight hint of gold at the margins. A small planchet flaw by the T in TRUST goes nearly unnoticed but is mentioned for accuracy. Nicely mirrored for the issue, which often resembles a business strike although only proofs were made. Census: 12 in 66 Cameo, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276V, PCGS# 83832

- 3307 1879/8 PR66+ Cameo PCGS.** Attributed as 1879/8 on the PCGS holder, some numismatists believe the final digit is merely a repunched 9. This spectacular Plus-graded Premium Gem displays sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices. Population: 38 in 66 (2 in 66+) Cameo, 7 finer (5/16). NGC ID# 22PG, PCGS# 83834

1879 Shield Nickel, Pastel-Toned PR67+ Finest Certified at PCGS

- 3308 1879 PR67+ PCGS. CAC.** Proofs from 1879 are surprisingly scarce when one considers that 3,200 pieces were struck. PR67 is the finest PCGS has certified (16 in PR67, 1 in PR67+), and only one piece is possibly finer, a PR68 at NGC. This is a lovely example that displays pale pastel rings of color around each side. Strike details are complete on each side, and we see no distracting contact marks. NGC ID# 22PG, PCGS# 3833

- 3309 1879 PR65 ★ Cameo NGC. CAC.** Cameo examples of the 1879 proof Shield nickel are scarce, particularly in Gem and finer grades. This Star-designated PR65 Cameo displays obvious contrast on each side amid brilliant, reflective fields. The eye appeal is significant, and there are no contact marks. Census: 34 in 65 (1 in 65+, 2 in 65★) Cameo, 40 finer. CAC: 6 in 65 Cameo, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22PG, PCGS# 83833

- 3310 1882 PR67 PCGS.** This is a razor-sharp proof with reflective fields that show modest cartwheel luster when rotated beneath a light. The obverse is lightly contrasted, while the reverse shows a hint of champagne color. Population: 44 in 67, 0 finer (4/16). NGC ID# 276Y, PCGS# 3837

LIBERTY NICKELS

- 3311 1883 With Cents MS66 PCGS. CAC.** The last of three nickel five cent types struck in 1883, this With Cents Liberty nickel is remarkably well-preserved with satiny silver-gray luster. The strike is boldly rendered throughout the devices. Several thin peripheral die cracks are seen on each side, as usual with coins from this period. Population: 67 in 66 (8 in 66+), 6 finer. CAC: 29 in 66, 2 finer (4/16). NGC ID# 22PH, PCGS# 3844

- 3312 1887 MS66 PCGS.** Struck from worn dies with metal flowlines near the borders, but nonetheless showing bold design definition and frosty mint luster. A blush of light golden toning graces each side, and only a few tiny ticks on the devices limit the grade. Population: 28 in 66 (3 in 66+), 3 finer (5/16). NGC ID# 22PL, PCGS# 3848

- 3313 1887 MS66 PCGS.** Premium Gem examples of the 1887 Liberty nickel are seldom seen, and finer coins are rare and out of reach for most collectors. This Registry Set-worthy coin displays vibrant, satiny luster and well-defined motifs. Various pastels of gold, mint-green, and rose encompass each side. Population: 28 in 66 (3 in 66+), 3 finer (5/16). NGC ID# 22PL, PCGS# 3848

- 3314 1889 MS65+ PCGS. CAC.** Bright, softly frosted frosted mint luster lies beneath the pale golden toning seen on each side. The only striking problem we see is weakness on some of the peripheral stars. Otherwise, this is an exceptionally clean, problem-free Liberty nickel. NGC ID# 2775, PCGS# 3850

- 3315 1889 MS66 PCGS.** Delicate chestnut-gold toning adorns lustrous and lightly marked surfaces. The strike is bold save for merging on the uppermost stars and the left ear of corn. A lower-mintage date. Population: 29 in 66 (4 in 66+), 0 finer (4/16). NGC ID# 2775, PCGS# 3850

1889 Nickel, MS66+ Tied for Finest at PCGS

- 3316 1889 MS66+ PCGS. CAC.** Both sides of this coin are richly frosted and brilliant without the slightest suggestion of toning. As befits the grade, the surfaces are essentially blemish-free with a sharp strike. An important opportunity for the Liberty nickel collector, as the 1889 is scarce this fine and extremely rare finer. Population: 29 in 66 (4 in 66+), 0 finer (4/16).
Ex: FUN Signature (Heritage, 1/2004), lot 5202. NGC ID# 2775, PCGS# 3850

3317 1891 MS66 PCGS. A common date but conditionally rare so well-preserved. This Premium Gem 1891 Liberty nickel displays above-average sharpness through the stars and wreath, with satiny luster that illuminates warm golden toning. Housed in a green label holder. Population: 36 in 66 (3 in 66+), 2 finer (5/16). NGC ID# 2776, PCGS# 3852

3318 1892 MS66 PCGS. CAC. Wisps of almond-gold patina invigorate this highly lustrous and well-impressed Premium Gem. The 1892 is a somewhat lower-mintage date in the series (relatively speaking), and it is especially desirable when located with such immaculate fields. Only the portrait shows any evidence of surface imperfections. Population: 41 in 66 (5 in 66+), 0 finer. CAC: 15 in 66, 0 finer (5/16).

NGC ID# 2777, PCGS# 3853

1894 Nickel, MS66+ Scarcer, Low-Mintage Date

3319 1894 MS66+ PCGS. The Panic of 1893 diminished the need for circulating coinage of all denominations. Mintage for nickels dropped from 13.3 million in 1893 to 5.4 million in 1894. This is an all-brilliant example that lacks the often-seen planchet flakes and flaws that plague many 1894 nickels. The strike is strong throughout with minimal abrasions (of course). Population: 51 in 66 (8 in 66+), 1 finer (4/16). NGC ID# 2779, PCGS# 3855

1895 Nickel, Golden-Toned MS66 Conditionally Rare

3320 1895 MS66 PCGS. CAC. The lofty grade and satiny luster of this Premium Gem 1895 nickel are complemented by uncommonly sharp definition of the stars and wreath, particularly that of the corn ear to the left of the bowknot. Each side displays soft golden toning and excellent eye appeal. This issue is rarely seen so fine, and better pieces are almost unknown. Population: 29 in 66 (2 in 66+), 1 finer. CAC: 10 in 66, 1 finer (4/16). NGC ID# 277A, PCGS# 3856

3321 1895 MS66 PCGS Secure. CAC. The design elements of this attractive Premium Gem are sharply detailed, unusual on the 1895 issue, which is often seen softly struck. The well-preserved surfaces are blanketed in shades of golden-tan and lavender-gray toning with soft mint luster shining through. Population: 29 in 66 (2 in 66+), 1 finer. CAC: 10 in 66, 1 finer (5/16). NGC ID# 277A, PCGS# 3856

1896 Nickel, Top-Graded MS66 Soft Champagne-Gold Hues

3322 1896 MS66 PCGS. A small number of Premium Gems represents the finest 1896 Liberty nickels certified. This exemplary representative is boldly struck and vibrantly lustrous, showing soft champagne-gold toning over each side. A lack of noticeable abrasions boosts the eye appeal and confirms the high grade. Population: 23 in 66 (3 in 66+), 0 finer (5/16). NGC ID# 277B, PCGS# 3857

3323 1897 MS66 PCGS. This Premium Gem 1897 Liberty nickel is remarkably well-preserved with frosty luster that shows a hint of champagne toning. Despite outstanding eye appeal, it must be noted that the lower-left portion of the wreath as well as most obverse stars are flat. The Liberty portrait is better defined. Population: 22 in 66 (4 in 66+), 1 finer (5/16). NGC ID# 22PN, PCGS# 3858

3324 1901 MS66+ PCGS. CAC. Ice-blue and peach-gold toning provides a pleasing, light patina across the frosty and finely textured surfaces of this high-end Premium Gem. The strike is sharp for a 1901, although a few of the stars lack complete centers and the ear of corn on the reverse shows only a few kernels. Finer examples are few and far between. Plus-graded by PCGS with CAC endorsement. Population: 16 in 66+, 3 finer. CAC: 31 in 66, 3 finer (4/16). NGC ID# 277C, PCGS# 3862

3325 1904 MS66+ PCGS. Champagne-toned with beautiful, frosty luster and lacking any obvious abrasions. The corn ear to the left of the wreath bow and several obverse stars show mild weakness. PCGS has only seen a single coin finer (5/16). NGC ID# 277F, PCGS# 3865

3326 1905 MS66+ PCGS. CAC. Frosty, vibrant mint luster rolls over delicately champagne-toned surfaces on this high-end Premium Gem 1905 Liberty nickel. Were it not for a single tiny tick on Liberty's jaw, a full Superb Gem grade might have been achieved. Star 5 is weak, but the remaining design elements are well-defined. PCGS has seen only two finer coins. CAC: 29 in 66, 0 finer (5/16). NGC ID# 277G, PCGS# 3866

3327 1905 MS66+ PCGS. CAC. A very nearly flawless 1905 Liberty nickel with softly frosted luster that shows lovely rose-gold and pale lavender hues. A few stars are slightly weak, and the lower-left portion of the wreath is flat, but the eye appeal is hardly affected. PCGS lists two finer representatives (5/16). NGC ID# 277G, PCGS# 3866

3328 1907 MS66 NGC. Subtle rose-gold toning envelops the obverse of this attractive Premium Gem, with a touch of dove-gray over the reverse. Immensely lustrous for a Liberty nickel with memorable eye appeal. Census: 12 in 66, 0 finer (5/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 869; Long Beach Signature (Heritage, 5/2009), lot 289. NGC ID# 277J, PCGS# 3868

1908 Nickel, MS66+
Even Color and Attractive Lustrous Surfaces

3329 1908 MS66+ PCGS. CAC. As one would expect from the mintage of 22.6 million pieces Uncirculated coins are available. However, at this grade level, not so much. Only five MS66+ coins have been certified by PCGS and none are finer (5/16). This is a remarkably pleasing coin with even, satiny luster and light reddish tinted surfaces. The strike is strong throughout. CAC: 8 in 66, 0 finer (5/16). NGC ID# 24FR, PCGS# 3869

3330 1910 MS66 PCGS. Rose-gray surfaces show a good strike with all star centers clear. A couple of small ticks on Liberty's neck determine the grade. A light toning spot shows on the neck. Seldom seen in this grade. Population: 35 in 66 (4 in 66+), 1 finer (5/16). NGC ID# 277L, PCGS# 3871

3331 1910 MS66 PCGS. This attractive Premium Gem displays well-detailed design elements, with just a touch of the usual softness on the lower wreath. The well-preserved surfaces are visited by shades of orange-gold toning, with vibrant mint luster underneath. Population: 35 in 66 (4 in 66+), 1 finer (5/16). NGC ID# 277L, PCGS# 3871

1910 Nickel, MS66+
Only Four Coins Certified With the Plus Designation

3332 1910 MS66+ PCGS. CAC. A few hints of multicolor toning emerge from dusky olive-gold patina on the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed and slightly subdued mint luster shines through the toning. The 1910 is an available later date in the series; however only four MS66+ pieces have been certified by PCGS with a puny one coin finer (4/16). NGC ID# 277L, PCGS# 3871

1912-S Nickel, Satiny MS65+
Elusive in Finer Grades

3333 1912-S MS65+ PCGS. This high-end Gem key-date Liberty nickel displays soft golden-gray luster with mint and lavender accents faintly visible in the fields. The surfaces are characteristically satiny, showing a few faint marks on the cheek that define the grade. The corn ear left of the wreath bow on the reverse is weak, as usual, but the stars are better struck. PCGS lists 38 finer representatives (5/16). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3334 1883 No Cents PR67 NGC. VP-001, 1/1 Misplaced Digit. The flag of an errant numeral 1 protrudes from the left upright of the primary 1 in the date. The variety is interesting, but the real attraction is the Superb Gem quality of this ice-blue proof. Fully struck on the raised devices, the hair, stars, and wreath are razor-sharp. A few scattered areas of gray patina along the left reverse edge add to the toning palette. Neither PCGS nor NGC report a numerically finer example of this one-year type. Census: 20 in 67 (1 in 67+, 1 in 67★), 0 finer (4/16). NGC ID# 22PU, PCGS# 3878

1883 No Cents Nickel, PR67
Concentric Toning

3335 1883 No Cents PR67 PCGS. Even after numerous transitional patterns were struck the previous two years, no one noticed the lack of the word CENTS on the reverse, or considered the possibility that the "ungodly" would take advantage of the situation and gold plate these pieces. It's one of the great stories in U.S. numismatics. This is an outstanding example with deeply mirrored fields and concentric rings of light toning encircling each side. Population: 8 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 22PU, PCGS# 3878

1884 Nickel, PR67 Cameo
Rarely Seen So Well-Preserved

3336 1884 PR67 Cameo NGC. CAC. A hint of light champagne toning graces each side of this Superb Gem Cameo 1884 proof nickel, a condition rarity this well-preserved. The strike is full, and the fields are highly reflective. Eye appeal is outstanding. Census: 14 in 67 Cameo (1 in 67★ Cameo), 4 finer. CAC: 9 in 67, 0 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22PV, PCGS# 83882

3337 1885 PR66 Cameo NGC. Razor-sharp detail and frosty design elements contribute to the champagne-tinged cameo contrast on each side of this Premium Gem 1885 proof nickel. The fields are mirrored, and the eye appeal is excellent. The 1885 proof is in demand among date collectors due to the scarcity of high-grade circulation strikes. Census: 39 in 66 (3 in 66★) Cameo, 17 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 277T, PCGS# 83883

3338 1886 PR66 PCGS. CAC. Proof examples of the 1886 often stand in for their sought-after circulation-strike counterparts, placing considerable pressure on the 4,290 specimens minted. This remarkably attractive Premium Gem is brilliant with blushes of pale blue and gold color. Housed in a green label holder. PCGS reports 26 submissions finer (5/16). NGC ID# 277U, PCGS# 3884

3339 1886 PR66 Cameo PCGS. CAC. Date pressure from the key 1886 business strike assures the continued popularity of the proofs from this year. This is an all-brilliant example with significant field-device contrast. The strike details are pinpoint-sharp on each side, an attribute that may or may not be seen on business strike Liberty nickels. Population: 22 in 66 (3 in 66+) Cameo, 5 finer. CAC: 14 in 66, 5 finer (5/16). NGC ID# 277U, PCGS# 83884

3340 1890 PR66 Cameo NGC. A boldly rendered proof with adequate cameo contrast and a hint of light golden toning. The mirrored fields are free of bothersome marks. The 1890 is elusive this well-preserved as a Cameo, and finer coins are rare. Census: 21 in 66 Cameo, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 277Y, PCGS# 83888

3341 1891 PR66 Cameo PCGS. A razor-sharp proof with stark white-on-black contrast. Faint hints of lemon-gold toning emerge from the rims but disappear at the fields. Cameo 1891 proofs are elusive overall, but coins grading finer than this piece are rare. Population: 32 in 66 (6 in 66+) Cameo, 5 finer (5/16). NGC ID# 277Z, PCGS# 83889

3342 1892 PR66 ★ Cameo NGC. The untuned silver fields of this Premium Gem proof are much more perfectly mirrored than is often seen on proof Liberty nickels of this period, and the sharp, frost-white design elements offer stark contrast. Eye appeal is outstanding, as the Star designation suggests. Census: 27 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5EJP, PCGS# 83890

3343 1892 PR65 Ultra Cameo NGC. CAC. A nominal proof mintage of 2,745 Liberty nickels was achieved in 1892, and the coin offered here is among the finest survivors. The sharply detailed design elements have a frosty texture that contrasts profoundly with the deeply mirrored fields, producing a dramatic cameo effect. The surfaces are impeccably preserved and eye appeal is outstanding. Census: 2 in 65 Ultra Cameo (1 in 65+), 0 finer. CAC: 3 in 65, 2 finer (5/16). NGC ID# 54DT, PCGS# 93890

1893 Nickel, PR67 Cameo No Cameos Finer at Either Service

3344 1893 PR67 Cameo NGC. CAC. Among the finest Cameo 1893 proof nickels known, this NGC CAC coin displays a bold strike and significant field-device contrast. The deeply mirrored fields are devoid of noticeable imperfections. Ideal for type or Registry purposes. Census: 13 in 67 (4 in 67★) Cameo, 0 finer. CAC: 13 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2783, PCGS# 83891

1893 Nickel, PR65 Deep Cameo Rarely Seen With Such Contrast

3345 1893 PR65 Deep Cameo PCGS. The level of cameo contrast on this Gem proof 1893 Liberty nickel is captivating, accentuated by warm golden toning that enlivens the frosty devices. The strike is razor-sharp, and were it not for a few stray lines on the obverse portrait, an even finer grade might have been achieved. Deep Cameo 1893 proofs are rare at any numeric level. Population: 2 in 65 Deep Cameo, 5 finer (5/16). NGC ID# 2783, PCGS# 93891

3346 1896 PR66 Cameo PCGS. A sharp Cameo with light golden toning and deeply mirrored fields. The design elements display satiny luster and offer pleasing contrast. The 1896 proof is seldom seen this fine in the Cameo category. Population: 21 in 66 (1 in 66+) Cameo, 3 finer (5/16). NGC ID# 2786, PCGS# 83894

3347 1896 PR66 Cameo PCGS. CAC. The warm golden toning of this Premium Gem proof Cameo accentuates the eye appeal of the contrast. The strike is sharp, and the devices yield lovely mint frost. One glance, and this coin captivates the eye. Population: 21 in 66 (1 in 66+) Cameo, 3 finer. CAC: 5 in 66, 0 finer (5/16). NGC ID# 2786, PCGS# 83894

3348 1898 PR66 Cameo NGC. CAC. A boldly struck Premium Gem Cameo with a hint of champagne color warming the mirrored fields and frosty design elements. The 1898 proof Liberty nickel is elusive this well-preserved in the Cameo category. Census: 28 in 66 (1 in 66+, 6 in 66★, 2 in 66+★) Cameo, 2 finer. CAC: 13 in 66, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2788, PCGS# 83896

3349 1902 PR67 NGC. Vivid shades of greenish-gold and powder-blue toning blanket the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed design elements and deeply reflective fields underneath. Census: 17 in 67 (1 in 67★), 1 finer (5/16). NGC ID# 278C, PCGS# 3900

3350 1902 PR67 PCGS. A beautifully preserved 1902 proof with completely untuned surfaces and sharp design elements. The 1902 is rarely seen with cameo contrast due to a change in the method of proof die production at the Mint, making this Superb Gem highly appealing. Population: 17 in 67, 0 finer (5/16). NGC ID# 278C, PCGS# 3900

3351 1905 PR67 NGC. This razor-sharp Superb Gem proof has perceptible contrast on each side, particularly on the reverse, with liquidlike mirroring in the fields. A blush of golden peripheral toning accents the razor-sharp design elements. The 1905 proof Liberty nickel is a rarity this fine. Cameos are rare in any grade. Census: 25 in 67 (2 in 67★), 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278F, PCGS# 3903

3352 1905 PR67 PCGS. Ice-blue and champagne hues grace the mirrored fields and satiny devices of this Superb Gem 1905 proof nickel, showing splendid eye appeal. The strike is fully rendered. Proof 1905s are rarely seen this fine. Population: 15 in 67, 1 finer (4/16). NGC ID# 278F, PCGS# 3903

3353 1907 PR67 NGC. CAC. A rare Superb Gem example of this otherwise plentiful Liberty nickel proof issue. The strike is full, and modest contrast is seen on each side. A blush of light champagne toning warms the mirrored fields. Census: 10 in 67 (3 in 67★), 0 finer. CAC: 5 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278H, PCGS# 3905

3354 1908 PR67 NGC. CAC. Both the circulation strike and proof 1908 Liberty nickels are popular among type collectors. This Superb Gem example of the latter displays bold detail and gleaming fields with warm golden toning. Census: 25 in 67 (1 in 67+, 3 in 67★), 3 finer. CAC: 14 in 67, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278J, PCGS# 3906

1911 Liberty Nickel, PR67 Cameo Only One Finer Coin at NGC

3355 1911 PR67 Cameo NGC. CAC. A few hints of pale gold toning enhance the outstanding eye appeal of this delightful Superb Gem. The design elements are sharply detailed throughout and the richly frosted devices contrast boldly with the deeply mirrored fields to create a stunning cameo effect. The surfaces are impeccably preserved. Census: 8 in 67 Cameo (1 in 67★ Cameo), 1 finer. CAC: 10 in 67, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278M, PCGS# 83909

1912 Nickel, PR67 Colorful Surfaces

3356 1912 PR67 PCGS. Lilac-red, orange, and powder-blue toning alternates across the obverse. The reverse is predominantly caramel-gold. Fully struck and brightly mirrored with a few pinpoint flecks on the reverse. The final collectible proof date of the Liberty type. Encapsulated in an old green label holder. NGC ID# 278N, PCGS# 3910

BUFFALO NICKELS

3357 1913 Type One MS67+ NGC. Glowing surfaces yield soft rose and sun-gold hues overall, with deeper aquamarine also evident around the outer peripheries. This magnificent Type One representative is sharply struck and impeccably well-preserved. Significant die erosion does not impede the sharpness nor the luster. NGC shows only 12 numerically finer pieces (4/16).
From The Soquel Creek Collection. NGC ID# 22PW, PCGS# 3915

3358 1913-D Type One MS67 NGC. This Type One 1913-D nickel shows consistent color and excellent preservation throughout both sides, with no mentionable marks and a bold strike. A great coin for a type or complete set. Census: 17 in 67 (1 in 67★), 1 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22PX, PCGS# 3916

1913-S Type One Nickel, MS67 Lovely Rainbow Toning

3359 1913-S Type One MS67 NGC. Concentric rainbow toning gives this Superb Gem 1913-S Type One Buffalo nickel outstanding eye appeal. The strike is bold despite moderate die erosion in the fields, and the satiny surfaces are free of abrasions. Examples are seldom seen this fine and are prohibitively rare any finer. Census: 17 in 67 (1 in 67+, 1 in 67★), 1 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22PY, PCGS# 3917

3360 1913-D Type Two MS65+ NGC. CAC. Soft iridescent accents in shades of pink and mint-green on the obverse add to the visual appeal of this lustrous satiny high-end Gem. A few tiny dark spots and contact marks appear. Census: 83 in 65 (1 in 65+), 23 finer. CAC: 26 in 65, 27 finer (4/16).
From The Soquel Creek Collection. NGC ID# 254M, PCGS# 3922

3361 1913-S Type Two MS64 NGC. CAC. A splendid near-Gem example of the scarcer Type Two reverse, which was struck in limited numbers at the San Francisco Mint. Buffalo nickel collectors have always considered the Type Two 1913-S a key series issue in Mint State. The Bowers reference suggests the optimal collecting grade is MS64, and this attractive lilac and rose-gold toned example is sure to satisfy many specialists. CAC endorsed, the numeric grade is compromised only by some slight peripheral weakness at LIBERTY and the top-most reverse legend.
From The Soquel Creek Collection. NGC ID# 22R3, PCGS# 3923

3362 1914/3 FS-101 AU55 NGC. CAC. The slab has the older FS-014.87 designation. The undertype 3 is visible at the top of the primary final digit on this popular Guide Book overdate. Just a touch of wear shows on the well-detailed design elements of this Choice AU specimen, with lightly abraded surfaces that show subtle hints of nickel-gray and golden-brown toning.
From The Soquel Creek Collection. NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

3363 1914/3 FS-101 MS62 NGC. The *Cherrypickers' Guide* states "the overdate is seen as the straight top bar of an underlying 3 at the top of the 4, and the start of the diagonal of the 3 on the upper right outside of the 4." Streaks of walnut-brown toning overlie dusky dove-gray surfaces. Satiny and unabraded with a typical strike. NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

**1914/3 Nickel, Lustrous MS64
Guide Book Overdate**

- 3364 1914/3 FS-101 MS64 NGC.** The rounded impression from the crossbar of a 3 appears behind the 4 in the date, very faintly on this piece. This luminous representative shows a prominent “chin whiskers” die clash on the obverse. The surfaces are softly lustrous beneath gold-gray patina on the obverse and a blend of champagne and green-gold on the reverse. Heavy die erosion is seen in the obverse fields and recesses.
Ex: Long Beach Signature (Heritage, 6/2002), lot 5531; New York Signature (Heritage, 7/2002), lot 6460; ANA Signature (Heritage, 7-8/2008), lot 1330. NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

**1914 Nickel, Toned MS67
None Finer Certified**

- 3365 1914 MS67 NGC.** An outstanding Registry-grade example with near-proof sharpness and mattelike luster. Warm olive-gold toning along with hues of pistachio-green, cherry, and amber blanket each side. The reverse has a vertical woodgrain pattern. An unabraded and eye-appealing coin, among the finest certified. Census: 9 in 67 (1 in 67★), 0 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22R4, PCGS# 3924

**1914-D Nickel, MS66
Few Known Finer**

- 3366 1914-D MS66 NGC.** A delightful Premium Gem, this Denver Mint 1914 nickel is popular in part due to the importance of the similar Lincoln cent issue. This piece is brilliant with hints of gold toning. The surfaces display soft, satiny luster, and the strike is well-executed. Census: 22 in 66 (1 in 66+, 1 in 66+★), 1 finer (4/16).
Ex: Long Beach Signature (Heritage, 9/2013), lot 3260. From The Soquel Creek Collection. NGC ID# 22R5, PCGS# 3925

- 3367 1914-S MS65 NGC.** This delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster, with subtle hints of golden-tan and ice-blue toning. Census: 57 in 65 (3 in 65★), 24 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22R6, PCGS# 3926

**1914-S Buffalo Nickel, MS66
Vivid Multicolor Toning**

- 3368 1914-S MS66 NGC.** The 1914-S nickel is available in lower grades but is rare at the Premium Gem level. The grayish surfaces of this MS66 example displays splashes of blended gold, green, and crimson. This is a well-struck piece that is devoid of mentionable marks or spots. Census: 20 in 66 (1 in 66+, 1 in 66★), 4 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22R6, PCGS# 3926

- 3369 1915 MS67 NGC.** This delightful Superb Gem is one of the finest survivors of the large mintage of nearly 21 million pieces. Razor-sharp detail is evident on all design elements and the pristine surfaces shimmer with vibrant mint luster. The incredible eye appeal is enhanced by shades of champagne-gold and ice-blue toning. Neither NGC nor PCGS show any example in a finer numeric grade. NGC Census: 8 in 67, 0 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22R7, PCGS# 3927

- 3370 1915-D MS65 PCGS. CAC.** The design elements of this impressive Gem are sharply detailed, with fine definition on the Bison's shoulder and the hair above the braid. The well-preserved lustrous surfaces show hints of champagne-gold and ice-blue toning. PCGS has graded 41 numerically finer examples (5/16). NGC ID# 22R8, PCGS# 3928

**1915-D Nickel, Sharp MS66
Conditionally Elusive**

- 3371 1915-D MS66 PCGS.** Champagne-tinted, satiny luster illuminates the pristinely preserved surfaces of this Premium Gem 1915-D Buffalo nickel. The strike is sharp, and the eye appeal is excellent. The 1915-D is conditionally scarce in MS66 and is a notable rarity any finer. The quality of this coin will surely impress even the most discerning collector. Population: 39 in 66 (2 in 66+), 2 finer (4/16). NGC ID# 22R8, PCGS# 3928

1915-D Nickel, MS66
Lovely Multicolor Toning

- 3372 1915-D MS66 NGC.** A conditionally scarce Premium Gem example of this early Denver issue, showing beautiful rainbow toning in swirling hues over each side. The strike is well-defined, and the surfaces yield outstanding preservation. Despite a mintage of nearly 8 million coins, the 1915-D Buffalo nickel commands a premium over the common date even in low circulated grades. Only a handful of coins are known finer than this piece. Census: 13 in 66, 2 finer (4/16). NGC ID# 22R8, PCGS# 3928

1915-S Buffalo Nickel, MS65
Rich Pastel Toning

- 3373 1915-S MS65 NGC.** Gorgeously toned, particularly on the obverse, this Gem 1915-S nickel exhibits rich pastel hues of yellow, pink, green, orange, violet, and red. The level of design detail is strong, aside from minor weakness at LIBERTY. Tiny flecks of carbon are confined to the reverse. NGC has awarded higher numeric grades to only 25 examples (4/16).
From The Soquel Creek Collection. NGC ID# 22R9, PCGS# 3929

- 3374 1916 MS66+ PCGS. CAC.** This satiny 1916 Buffalo nickel displays remarkable surface preservation. Ice-blue luster emerges into lemon-gold hues over the high points of the design elements, and the strike is bold. The Plus designation-CAC combination will undoubtedly draw significant attention when this eye-catching coin crosses the auction block. PCGS has seen only 22 finer representatives. CAC: 42 in 66, 4 finer (4/16). NGC ID# 22RA, PCGS# 3930

- 3375 1916 Doubled Die Obverse, FS-101 — Acid Damage — NGC Details. Good.** The 1916 Doubled Die Obverse is the rarest Guide Book variety of Buffalo nickels. Doubling is apparent on the date and feathertips. The date area has been treated with acid and has a granular appearance but no abrasions are consequential. The tops of LIBERTY are worn into the rim but the reverse legends are clear.
From The Soquel Creek Collection.

- 3376 1916-D MS65 NGC. CAC.** Soft champagne patina resides on the lustrous surfaces of this D-mint Gem. Well-struck design elements and impeccably preserved surfaces round out the coin's pleasing eye appeal.
From The Soquel Creek Collection. NGC ID# 22RB, PCGS# 3932

- 3377 1916-S MS65 NGC.** A delightful Gem example of this underrated S-mint issue. The generally nickel-white surfaces show glimpses of violet and gold patina. Census: 48 in 65 (2 in 65★), 17 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22RC, PCGS# 3933

1916-S Nickel, Premium Gem
Only Two NGC Coins Finer

- 3378 1916-S MS66 NGC.** Extraordinary strike and luster for the issue, with a hint of delicate golden color here and there. A horizontal die crack bisects much of the obverse, and a few tiny speckles of carbon are seen overall. While relatively common in lower grades and occasionally available with a strong strike in these lower grades, in fully struck Premium Gem condition the 1916-S is a rare coin. Census: 15 in 66, 2 finer (4/16).
Ex: Long Beach Signature (Heritage, 6/2006), lot 776.
From The Soquel Creek Collection. NGC ID# 22RC, PCGS# 3933

- 3379 1918 MS65 PCGS. CAC.** Steel-blue, orange, and rose hues endow this decently struck and lustrous Gem 1918 nickel. The surfaces are immaculate aside from a couple of tiny contact marks on the bison's hide. Several die cracks on the central portrait and along the ground on the reverse indicate a late die state, although the fields show little erosion. CAC: 17 in 65, 10 finer (4/16).
Ex: Central States Signature (Heritage, 5/2003), lot 5733; Portland Signature (Heritage, 3/2004), lot 5376. NGC ID# 22RG, PCGS# 3937

- 3380 1918/7-D FS-101 Fine 15 NGC.** The upper right corner notch of the crossbar of the underdigit 7 is apparent on this pleasing cream-gray key date collector coin. No marks are noticeable, and the minimal granularity is confined to the Indian's profile and nearby field. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3381 1918/7-D FS-101 — Cleaned — NGC Details. VF.** The Indian's cheekbone shows some wear, but some of the bison's horn is visible, and the undertype of the 7 shows at the top of the final digit in the date. The surfaces are free of large or distracting abrasions, but the luster is dimmed by the effects of a light cleaning. This popular hubbing error is prized by collectors in all grades and conditions. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3382 1919 MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. This conditionally elusive 1919-S Buffalo nickel is well-struck with glistening luster and warm champagne-gold toning that shows hints of blue in the centers. The coin was struck from clashed dies, showing "whiskers" on the Indian's chin. PCGS lists 18 finer representatives (5/16). NGC ID# 22RL, PCGS# 3941

1919 Buffalo Nickel, MS67
Lovely Patination

- 3383 1919 MS67 NGC.** Jade-green, golden-brown, and orange-red patina graces this pristine Superb Gem. Only the hair above the braid lacks a full strike. A colorful and beautiful example of an issue seldom seen in such remarkable quality. Housed in a prior generation holder. Census: 7 in 67 (1 in 67+), 1 finer (4/16).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3239; Long Beach Signature (Heritage, 2/2012), lot 3945; Long Beach Signature (Heritage, 2/2013), lot 4117.
From The Soquel Creek Collection. NGC ID# 22RL, PCGS# 3941

3384 1919-D MS63 PCGS. A Select Mint State coin, struck with severely deteriorated dies that show considerable weakness on the devices and heavy metal flowlines in the fields. The date and mintmark are clear. Weak strikes are not uncommon on branch mint issues from this period. This coin shows golden-gray patina and has minimal abrasions. NGC ID# 22RM, PCGS# 3942

3385 1919-S MS63 NGC. An attractive Select representative of this early series branch-mint issue, with well-detailed design elements, satiny mint luster, and a few hints of pale gold toning.
From The Soquel Creek Collection. NGC ID# 22RN, PCGS# 3943

3386 1920-D MS64 NGC. CAC. The 1920 Denver issue is moderately available in MS64 but very scarce any finer. This Choice example shows little of the die erosion that affects much of the issue. The strike is bold-to-sharp, with slight weakness at the feather tips but strong hair definition and boldness on the bison. Struck with a loose collar, resulting in cud-like extra metal along the right reverse rim. Smooth, satiny surfaces display nice mint luster and pearlescent lilac toning with a hint of gold. CAC endorsed. NGC reports just 35 finer coins. CAC: 15 in 64, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RR, PCGS# 3945

**1920-D Nickel, Well-Struck MS65
Rarely Seen Finer**

3387 1920-D MS65 NGC. Here is a conditionally scarce issue that is seldom seen well-struck. The present Gem is a rarity and the strike is above-average. Die erosion in the fields is minimal, but rim cuds are seen along the upper-right reverse. The satiny surfaces display light golden-gray toning. Census: 31 in 65, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RR, PCGS# 3945

**1920-S Buffalo Nickel, MS64+
Elusive Issue in Finer Grades**

3388 1920-S MS64+ NGC. CAC. The 1920-S Buffalo nickel claims a substantial mintage of 9.6 million pieces, but the issue was not well-produced and relatively few high quality examples have survived. This high-end Choice specimen displays well-detailed design elements, with just a touch of softness on the bison's shoulder. The lightly marked surfaces exhibit delicate shades of lavender-gray and greenish-gold toning, with satiny mint luster underneath. NGC has graded 19 numerically finer examples (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RS, PCGS# 3946

3389 1921 MS66 NGC. CAC. The 1921 was better-produced than many 1920s-era Buffalo nickels. This Premium Gem example is typically sharp with excellent eye appeal. All of the raised elements are sharply rendered, while satiny mint luster glows brightly from the pleasing silver-gray surfaces. There are no distractions of note. Census: 71 in 66 (2 in 66+, 6 in 66★), 14 finer. CAC: 33 in 66, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RT, PCGS# 3947

**1921-S Nickel, Satiny MS64+
Only Plus-Graded Choice Coin at NGC**

3390 1921-S MS64+ NGC. CAC. This is the single Plus-graded MS64 coin at NGC, and finer pieces in MS65 and MS66 are seldom available. The strike is bold, and the satiny nickel-gray surfaces display a hint of light golden color. Die erosion in the fields indicates a late die state, as is a mainstay on most branch mint issues from the 1920s. CAC: 13 in 64, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RU, PCGS# 3948

3391 1923-S MS64+ NGC. Light nickel-gray appears at the centers within a frame of gold toning along the borders. Traces of reflectivity appear on both sides of this Plus-graded Choice specimen, with well-detailed design elements and strong eye appeal. NGC has graded 46 numerically finer examples (4/16).
From The Soquel Creek Collection. NGC ID# 22RW, PCGS# 3950

3392 1924 MS66 NGC. Although plentiful in MS64 and MS65, the 1924 Buffalo nickel is scarce at the Premium Gem level. This piece is boldly struck and displays satiny mint luster with a delicate champagne hue. Finer coins are rarely seen. Census: 35 in 66 (1 in 66★), 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RX, PCGS# 3951

3393 1924 MS66 NGC. This spectacular Premium Gem exhibits well-preserved, mostly brilliant surfaces, with a few subtle hints of lavender-gray and greenish-gold toning. Both sides radiate vibrant mint luster and the design elements are well-detailed. NGC has graded four numerically finer examples (4/16).
From The Soquel Creek Collection. NGC ID# 22RX, PCGS# 3951

3394 1924-D MS64 NGC. The 1924-D Buffalo nickel is a well-known strike rarity, a factor that limits the number of really high grade survivors. This impressive Choice specimen displays much better-than-average detail on the obverse, but the reverse shows some of the typical softness on the bison's head and shoulder. The lightly marked surfaces are blanketed in shades of ice-blue and champagne-gold toning, with satiny mint luster underneath. NGC has graded 21 numerically finer examples (4/16).
From The Soquel Creek Collection. NGC ID# 22RY, PCGS# 3952

3395 1924-D MS64+ NGC. CAC. Frosty luster and a hint of champagne toning give this high-end Choice 1924-D Buffalo nickel stupendous eye appeal. There are no mentionable abrasions, and the coin would likely have achieved a full Gem grade were it not for moderate strike weakness on the central devices. NGC lists only 22 pieces numerically finer; CAC: 17 in 64, 21 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS63
Well-Struck, Lightly Toned**

- 3396 1924-S MS63 NGC.** The 1924-S is a scarcer issue in the Buffalo nickel series, but pieces in MS63 and MS64 remain obtainable by most collectors. This Select example shows warm golden toning and minimal abrasions. A bold strike defines the motifs despite considerable die erosion and rust on each side — both of which are characteristic attributes of San Francisco issues from this period. *From The Soquel Creek Collection.* NGC ID# 22RZ, PCGS# 3953

**1925 Buffalo Nickel, MS67
Gorgeous Toning**

- 3397 1925 MS67 NGC.** Many examples of the 1925 nickel show strike softness, a result of die overuse. A touch of this softness and quicksilver luster are among the few traits this remarkable Superb Gem shares with its peers. Bold toning, a mix of blue and violet outer shades with warm pinks and peaches on the interior, makes the eye appeal undeniable. This piece is among the finest certified by either service. Census: 7 in 67, 0 finer (4/16). *From The Soquel Creek Collection.* NGC ID# 22S2, PCGS# 3954

- 3398 1925-S MS64 NGC. CAC.** This is a remarkably well-preserved 1925-S Buffalo nickel for the grade, showing satiny champagne-tinged luster without obvious signs of contact. The high points of the devices are slightly soft, as might be expected for this mid-1920s San Francisco issue. NGC lists 24 numerically finer representatives (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 22S4, PCGS# 3956

- 3399 1926 MS67 NGC.** This lovely, satiny Superb Gem 1926 nickel is well-struck and luminous with a hint of light golden color. There are no obvious abrasions, only glistening eye appeal. A suitable date or type coin. Census: 17 in 67 (1 in 67★), 1 finer (4/16). NGC ID# 22S5, PCGS# 3957

- 3400 1926 MS67 NGC.** The surfaces display creamy mint luster with orange-red patina and the legends are strongly defined. This Superb Gem has exceptionally well-preserved surfaces and no noticeable imperfections. Census: 17 in 67 (1 in 67★), 1 finer (4/16). *Ex: Long Beach Signature (Heritage, 9/2002), lot 6015, where it realized \$2,415.* *From The Soquel Creek Collection.* NGC ID# 22S5, PCGS# 3957

- 3401 1926-D MS64 NGC.** Despite a substantial mintage of 5.6 million pieces, the 1926-D Buffalo nickel is very scarce in grades above MS64. This well-detailed Choice example shows just a touch of softness on the bison's shoulder and the well-preserved, lustrous surfaces are toned in attractive shades of champagne-gold and ice-blue. NGC has graded 46 numerically finer examples (4/16). *From The Soquel Creek Collection.* NGC ID# 22S6, PCGS# 3958

- 3402 1926-S XF45 PCGS.** A collectible Choice XF example of this semikey Buffalo nickel issue, from a mintage of only 970,000 pieces. Even battleship-gray patina shows hints of olive toning overall, and the surfaces are generally problem-free. NGC ID# 22S7, PCGS# 3959

**1927-S Buffalo Nickel, MS64+
Seldom Encountered in Finer Grades**

- 3403 1927-S MS64+ NGC. CAC.** Despite an adequate mintage of 3.4 million pieces, the 1927-S Buffalo nickel is difficult to locate in grades above the MS64 level. This Plus-graded Choice specimen offers sharply detailed design elements and vibrant, satiny mint luster throughout. The surfaces are well-preserved and eye appeal is outstanding. NGC has graded 28 numerically finer examples (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 22SA, PCGS# 3962

- 3404 1928-D MS66 NGC.** While only a decade separates the 1928-D and the final issue in the series, the 1938-D, there is normally night-and-day difference in striking quality for these two D-mint Buffaloes. Taking that into consideration, the Premium Gem offered here is all the more remarkable. Both sides are very well-struck and the lustrous surfaces are further enhanced by splashes of golden color. The 28 and LIBERTY exhibit strike doubling. Census: 7 in 66, 2 finer (4/16). *From The Soquel Creek Collection.* NGC ID# 22SC, PCGS# 3964

- 3405 1928-D MS66 PCGS. CAC.** 30th Anniversary Green Label Holder. Lovely rainbow peripheral hues frame soft golden and lavender-blue interiors of this Premium Gem 1928-D Buffalo nickel. The design elements are well brought up, and the satiny luster is devoid of major abrasions. Population: 51 in 66 (1 in 66+), 0 finer. CAC: 13 in 66, 0 finer (5/16). NGC ID# 22SC, PCGS# 3964

**1928-S Buffalo Nickel, MS65 ★
Excellent Color**

- 3406 1928-S MS65 ★ NGC. Ex: Yankee Collection.** A ribbon of rainbow toning graces each side of this Gem 1928-S nickel, flanked on the left side by a thin strip of olive-gold and on the right side by satiny lavender-blue luster. The strike is better than average for the issue, although die erosion in the fields softens the peripheral clarity. Finer examples are rarely seen. Census: 48 in 65 (3 in 65+, 1 in 65★), 11 finer (4/16). *From The Soquel Creek Collection.* NGC ID# 22SD, PCGS# 3965

- 3407 1929-D MS66 NGC.** The mostly silver-gray surfaces feature light-gold accents and satiny luster. An extremely sharp strike, with full detail on the bison's horn, contributes to the impressive eye appeal of this Premium Gem. Census: 14 in 66, 1 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22SF, PCGS# 3967
- 3408 1929-D MS66 NGC. CAC.** This conditionally scarce Premium Gem 1929-D Buffalo nickel displays well-struck design elements and satiny luster with a hint of reflectivity in the fields. Light champagne toning warms each side. Census: 15 in 66, 1 finer. CAC: 10 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22SF, PCGS# 3967
- 3409 1929-S MS66+ PCGS. CAC.** A high-end Premium Gem specimen of this popular issue, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces display shades of ice-blue and champagne-gold toning. PCGS has graded nine numerically finer examples (5/16). NGC ID# 22SG, PCGS# 3968

**1929-S Buffalo Nickel, MS65
Two Feathers Variety**

- 3410 1929-S Two Feathers, FS-401, MS65 PCGS.** A variety caused by a Mint worker's lapping of the die to remove clash marks. Not listed in the Sixth Edition of *Cherrypickers'*, but listed in David Lange's series reference. A hint of softness is noted in the centers, but generally sharp at the margins. Light tan-gray surfaces are smooth save for a few tiny lower obverse toning flecks.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 354. PCGS# 569443 Base PCGS# 3968

**1930 Buffalo Nickel, MS67
Among the Finest Known**

- 3411 1930 MS67 NGC.** The 1930 Buffalo nickel is seldom encountered with a sharp strike. Like almost all examples seen, this spectacular Superb Gem shows a touch of softness on the bison's fur. Both sides display vibrant mint luster under shades of violet and champagne-gold toning. Eye appeal is excellent. The 1930 is rare in MS67 and unknown finer. Census: 6 in 67, 0 finer (4/16).
Ex: Houston Signature (Heritage, 11/2012), lot 3919; Central States Signature (Heritage, 4/2013), lot 1561.
From The Soquel Creek Collection. NGC ID# 22SH, PCGS# 3969

- 3412 1934-D MS66 NGC.** Splendid bands of cherry-red and lime-green toning alternate across the borders of this lustrous and mark-free branch mint nickel. The strike is good despite slight blending at the centers and on the tail. Housed in a circa-2000 holder. Census: 23 in 66 (3 in 66+, 2 in 66★), 0 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22SM, PCGS# 3973

**1935-D Nickel, MS67
Condition Rarity**

- 3413 1935-D MS67 NGC.** Deep golden toning is seen over each side of this lustrous Superb Gem, one of only a dozen pieces graded MS67 at both services combined. The strike is nearly complete on the high points of each side and the eye appeal is tremendous, with no mentionable abrasions. Census: 3 in 67, 0 finer (4/16).
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 573; Long Beach Signature (Heritage, 6/2010), lot 437.
From The Soquel Creek Collection. NGC ID# 22SP, PCGS# 3975

- 3414 1936 MS67+ ★ NGC.** A magnificent Superb Gem from the later part of the series, this coin exhibits sharply detailed design elements and vibrant mint luster under iridescent shades of ice-blue and greenish-gold toning. Eye appeal is terrific. NGC has graded two numerically finer examples (4/16).
From The Soquel Creek Collection. NGC ID# 22SS, PCGS# 3977

- 3415 1937-D Three-Legged, FS-901, AU58 NGC.** A satiny and unmarked example of the famous mint error, caused by overzealous lapping of the reverse die. Slight wear on the bison's horn indicates a momentary stint in commerce, but the eye appeal is pleasing despite the occasional minute carbon fleck. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Buffalo Nickel, AU58

- 3416 1937-D Three-Legged, FS-901, AU58 NGC. CAC.** An appealing near-Mint representative of this incredibly popular die-polishing error, with just a trace of wear on the design elements and vivid shades of greenish-gold and ice-blue toning. This attractive specimen retains much of its original mint luster.
From The Soquel Creek Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Buffalo Nickel, MS62
Popular Three-Legged *Guide Book Variety*

- 3417** 1937-D Three-Legged, FS-901, MS62 PCGS. CAC. The well-detailed design elements of this impressive MS62 specimen show just a touch of the usual softness on the hair above the braid and the bison's shoulder. Satiny mint luster is evident, under shades of bluish-gray and golden-tan toning. The 1937-D Three-Legged Buffalo nickel is an incredibly popular issue, caused by excessive die polishing. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3418** 1938-D MS67+ PCGS. CAC. The 1938-D Buffalo nickel is a common date even through MS67, but MS68 coins are rare. This Plus-graded, CAC-endorsed MS67 example is extremely close to perfection. The design elements are well-struck, and the glistening mint luster yields lovely ice-blue and champagne hues. PCGS has seen 15 finer representatives (4/16). NGC ID# 22T2, PCGS# 3984

1938-D Buffalo Nickel, MS68
Delicate Multicolor Toning

- 3419** 1938-D MS68 NGC. A Registry-grade example of this final-year Buffalo nickel issue, showing well-struck design elements and satiny luster that is free of abrasions. Both sides display concentric shades of yellow-gold, lavender-blue, and pale rose toning, delivering outstanding eye appeal. Conditionally rare and among the finest certified. Census: 18 in 68 (8 in 68★), 0 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22T2, PCGS# 3984

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR66+
Ideal for Type Purposes

- 3420** 1913 Type One PR66+ PCGS. CAC. Type collectors will want to closely consider this high-end Premium Gem Type One matte proof Buffalo nickel. The strike is full, and the matte surface texture attractively accentuates the details. Each side shows light golden toning, and there are no bothersome marks. Finer examples of this one-year proof type are infrequently seen. NGC ID# 278R, PCGS# 3988

1913 Type Two Nickel, PR66
Exceptional Eye Appeal

- 3421** 1913 Type Two PR66 PCGS. CAC. According to the *Complete Guide to Buffalo Nickels*, "It's almost a certainty that many of the proofs struck [1,514 pieces] remained unsold at the end of the year and were melted." The same reference adds that many survivors are unattractive, but thankfully this Premium Gem proof is an exception. Marvelous golden-orange patina graces the satiny surfaces. Well-preserved and seldom seen finer. NGC ID# 278S, PCGS# 3990

- 3422** 1914 PR65 PCGS. CAC. Delicate shades of ice-blue and jade-gold toning blanket the well-preserved surfaces of this spectacular Gem. The design elements are sharply detailed and strong matte luster shines through the patina. Eye appeal is tremendous. NGC ID# 278T, PCGS# 3991

1914 Nickel, Gold-Toned PR66
Attractive Matte Proof

- 3423** 1914 PR66 PCGS. CAC. Ex: Forsythe II. This is one of the most collectible Buffalo nickel proof issues of the 1913-16 period. The 1914 claims a mintage of 1,275 specimens, and the typical survivor grades between PR65 and PR66. An overlay of faint golden color covers largely brilliant surfaces of this matte proof. The strike is predictably needle-sharp and eye appeal is excellent. NGC ID# 278T, PCGS# 3991

**1914 Buffalo Nickel, PR66
Stunning Matte Proof Example**

- 3424 1914 PR66 NGC. CAC.** Only 1,275 matte proof Buffalo nickels were struck in 1914, the second year of the series. This delightful Premium Gem shows the razor-sharp design elements, textured fields, and squared off rims that characterize the matte proof issues. Satiny matte luster radiates from the well-preserved surfaces and overall visual appeal is outstanding.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278T, PCGS# 3991

**1914 Nickel, Fully Struck PR66+
High-End Matte Proof Type Coin**

- 3425 1914 PR66+ PCGS. CAC.** A delightful, high-end Premium Gem example of the 1914 matte proofs, from a mintage of 1,275 pieces. Many examples survive in Gem and Premium Gem grades, although this piece goes a step further with the PCGS Plus designation and CAC endorsement. Gleaming silver-nickel surfaces with a hint of rose-gold toning provide substantial eye appeal, while the strike is predictably sharp throughout. Population: 2 in 66+, 100 finer. CAC: 37 in 66, 44 finer (5/16). NGC ID# 278T, PCGS# 3991

- 3426 1915 PR66 PCGS. CAC.** PCGS ranks the 1915 as the secondmost challenging proof issue in the Buffalo nickel series after the 1916, tied with the 1913 Type One. An eye-catching medley of peach-orange, violet, and gold tones swathes each side of this Premium Gem proof. A couple of minuscule contact marks are noted. NGC ID# 278U, PCGS# 3992

- 3427 1915 PR66 PCGS. CAC.** A razor-sharp matte proof with thick luster and a hint of champagne toning. The 1915 proof had a mintage of just 1,050 coins, continuing a decline in sales as collectors became increasingly unhappy with the matte finish of the proof coins. NGC ID# 278U, PCGS# 3992

**1915 Buffalo Nickel, PR66+
Very Scarce Any Finer**

- 3428 1915 PR66+ NGC. CAC.** A small mintage of 1,050 matte proof Buffalo nickels was accomplished in 1915 and few examples have survived in grades above PR66. This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the broad, squared off rims that identify the proof issues. The impeccably preserved surfaces radiate satiny matte luster, with a few subtle hints of lavender and greenish-gold toning. NGC has graded 39 numerically finer examples (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 278U, PCGS# 3992

**1916 Nickel, PR66
Smooth and Satiny**

- 3429 1916 PR66 PCGS. CAC.** Series specialists acknowledge the 1916 as the key date among Buffalo nickel proofs thanks to a low production total of merely 600 specimens. Delicate woodgrain patina covers the surfaces of this matte proof in shades of gold and russet, delivering pleasing visual appeal. Each side is smooth and satiny with a minimal number of ticks. NGC ID# 278V, PCGS# 3993

- 3430 1936 Type One — Satin Finish PR67 PCGS.** A fully struck satin proof with sharp rims and unmarked surfaces. Each side shows warm golden toning, and the eye appeal is excellent. PCGS has seen 40 numerically finer submissions (4/16). NGC ID# 278X, PCGS# 3994

- 3431 1936 Type One — Satin Finish PR67 NGC.** In 1936, the Mint resumed proof nickel production. Scrapping the matte finish that was so unpopular in the early 1910s, the first 1936 proofs were coined with a satin finish. This too was not well-received by collectors, and later in 1936, the old brilliant finish was finally resumed. This Superb Gem satin proof displays mostly olive-gold toning with a dash of blue, lavender, and rose in the centers. The strike is bold, and the preservation is virtually flawless. NGC has seen 30 finer examples (4/16). NGC ID# 278X, PCGS# 3994

- 3432 1937 PR66 NGC.** A spectacular Premium Gem, from a mintage of 5,769 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields with no mentionable distractions. Overall eye appeal is outstanding. NGC ID# 278Z, PCGS# 3996

- 3433 1937 PR67 NGC. CAC.** While the 1937 proof typically has brilliant fields and mirrored devices, this Superb Gem example actually displays mild contrast between the deeply mirrored fields and somewhat satiny motifs. Soft yellow-gold and pale violet patina dances over the impeccably preserved surfaces of both sides. Exquisitely struck throughout.
Ex: Long Beach Signature (Heritage, 5/2008), lot 1362; Summer FUN Signature (Heritage, 7/2012), lot 4010. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3434 1938 Quadrupled Die Obverse, FS-1105, MS67 Full Steps PCGS.** This is one of the two finest FS-1105 1938 Jeffersons attributed by PCGS (5/16). This piece is well-struck with satiny luster and golden-lavender toning. The quadrupled obverse is discernible on select peripheral letters, but extensive die erosion blurs much of the serif separation. PCGS# 38480 Base PCGS# 84000

1938-S Jefferson Nickel, MS67 Full Steps
First Year Of Design, None Certified Finer

- 3435 1938-S MS67 Full Steps PCGS.** A magnificent Superb Gem from the first year of the design, this coin displays razor-sharp definition on all design elements, including full steps on Monticello. The virtually pristine surfaces radiate vibrant mint luster, under subtle hints of greenish-gold toning. Housed in a new 30th Anniversary green holder. Population: 10 in 67 Full Steps, 0 finer (5/16). NGC ID# 22T6, PCGS# 84002

- 3436 1939 Reverse of 1940, Doubled Die Obverse, FS-101, MS66 PCGS. MONTICELLO and FIVE CENTS** are boldly die doubled on this popular *Guide Book* variety. This piece is well-struck but with slight weakness on the steps. Each side displays satiny golden-gray luster. Moderate die erosion is seen in the fields. Population: 38 in 66 (1 in 66+), 7 finer (5/16). PCGS# 569968 Base PCGS# 94003

- 3437 1939 Doubled Monticello, FS-801, MS66 PCGS.** A vastly popular variety with particularly wide die doubling seen on much of the reverse lettering. The strike is bold, and the satiny surfaces display a hint of light champagne toning. The steps are nearly full. Elusive this well-preserved. Population: 38 in 66 (1 in 66+), 7 finer (4/16).
From The Eagle One Collection. NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

- 3438 1939 Doubled Monticello, FS-801, MS66+ PCGS. CAC.** This important *Guide Book* variety shows dramatic die doubling on MONTICELLO and FIVE CENTS. This is a virtually pristine Premium Gem with sharp details on the obverse and a slightly softer strike on the reverse. Vibrant mint luster shines through shades of lavender-gray and greenish-gold toning. NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

- 3439 1940-D MS67+ Full Steps PCGS.** 30th Anniversary Green Label Holder. In MS67 Full Steps, the 1940-D nickel is scarce, and the present coin is one of only five in this grade with the coveted Plus designation. Finer coins are unknown (5/16). This piece displays satiny luster and sharp detail with rich golden toning overall. NGC ID# 22TE, PCGS# 84008

- 3440 1940-S MS67 Full Steps PCGS.** 30th Anniversary Green Label Holder. Subtle golden toning adds a warm hue to the dominate rainbow colors that appear on each side of this Superb Gem Full Steps 1940-S Jefferson nickel. The strike is sharp throughout. The 1940-S is rarely seen this fine and unknown finer. Population: 15 in 67 (1 in 67+) Full Steps, 0 finer (5/16). NGC ID# 22TF, PCGS# 84009

- 3441 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** This famous *Guide Book* variety was produced by a 1942 head die that was rehubbbed with a 1943 hub, creating the overdate feature as well as the minor doubling of the peripheral legends. This Premium Gem Full Steps coin is sharp and satiny with a hint of light champagne toning. There are no major abrasions. Population: 43 in 66 (4 in 66+) Full Steps, 5 finer (5/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

- 3442 1946-D/D D Over Inverted D, FS-501, MS65 Full Steps PCGS.** The well-known D Over Inverted D variety. Delicate gold toning visits this lustrous and minimally marked Gem. The design elements are nicely struck. A particularly important acquisition for variety Registry collectors. Population: 14 in 65 Full Steps, 26 finer (4/16).

Ex: FUN Signature (Heritage, 1/2010), lot 604.

From The Eagle One Collection. NGC ID# 22U3, PCGS# 38508 Base PCGS# 894029

- 3443 1948 MS66 Full Steps PCGS.** 30th Anniversary Green Label Holder. The 1948 Jefferson is a challenging date in Full Steps. This Premium Gem is conditionally rare and among the finest at PCGS. The strike is bold, and the satiny surfaces display soft champagne toning with other, less noticeable pastel hues. Population: 15 in 66 Full Steps, 0 finer (5/16). NGC ID# 22U8, PCGS# 84034

- 3444 1955-D/S MS66 PCGS. CONECA OMM-003.** Slanted die lines through the D in UNITED confirm this lesser 1955-D/S overmintmark variety. The underlying S is seen closely cropped to the primary D on the top and bottom edges. This piece displays satiny nickel-gray luster with a hint of champagne toning and is free of distracting abrasions. Slight strike weakness on the central high points prevents a Full Steps designation. Population (all overmintmark varieties included): 9 in 66, 0 finer (5/16). NGC ID# 22UX, PCGS# 4058

- 3445 1963 MS66 Full Steps PCGS.** The sharply detailed design elements of this impressive Premium Gem exhibit Full Steps definition on Monticello. The impeccably preserved surfaces are brightly lustrous, with a few subtle hints of golden-tan toning. Population: 13 in 66 Full Steps, 1 finer (4/16). NGC ID# 22VE, PCGS# 84073

- 3446 1964 MS66 Full Steps PCGS.** 30th Anniversary Green Label Holder. The 1964 nickel is surprisingly scarce in high-grade Full Steps. This Premium Gem is a Registry-grade coin with satiny luster and untuned surfaces. The strike is sharp, and there are no severe abrasions. Population: 9 in 66 (2 in 66+) Full Steps, 2 finer (5/16). NGC ID# 22VG, PCGS# 84075

- 3447 1978-D MS67 Full Steps PCGS.** This Registry-graded Superb Gem 1978-D Jefferson nickel displays sharp Full Steps detail and satiny, champagne-tinted luster. This piece is tied with three others as the finest at PCGS, and NGC lists only one Full Steps coin in this grade (5/16). NGC ID# 22WB, PCGS# 84101

PROOF JEFFERSON NICKELS

- 3448** 1938 PR68 NGC. Hints of soft champagne color visit the bright surfaces of this gorgeous proof. Both sides are sharply struck and immaculately well preserved. Census: 14 in 68 (1 in 68★), 0 finer (4/16). NGC ID# 279X, PCGS# 4175

1938 Jefferson Nickel, Superlative PR68 Two-Sided Rainbow Toning

- 3449** 1938 PR68 PCGS. CAC. The Mint struck 19,365 Jefferson nickel proofs in the series' inaugural year, this PR68 coin being among the top-graded examples. Each side showcases intermingled rainbow hues over near-flawlessly preserved surfaces. An unbeatable representative. Population: 13 in 68, 0 finer (5/16). NGC ID# 279X, PCGS# 4175
- 3450** 1939 Reverse of 1940, FS-901, PR67 NGC. The design elements display bold definition on this lovely Superb Gem and Monticello has the straight steps of the Reverse of 1940. The cheek displays a minor contact mark, preventing an even higher grade. Census: 72 in 67 (1 in 67+), 2 finer (4/16). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176
- 3451** 1940 Reverse of 1938, FS-901, PR67 NGC. This delightful Superb Gem proof exhibits sharply detailed design elements throughout, with the wavy steps of the Reverse of 1938 on Monticello. The impeccably preserved surfaces show a few subtle hints of golden-tan and ice-blue toning. Census: 14 in 67, 2 finer (4/16). NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177
- 3452** 1940 Reverse of 1938, FS-901, PR67 PCGS. Struck from a leftover reverse from 1938, this rare proof nickel shows the characteristic "wavy" steps of the 1938 reverse. At one time, it was possible to pick off the Reverse of 1938 nickels, but those days are long gone. This is an all-brilliant example with deeply reflective fields. Population: 3 in 67, 0 finer (5/16). NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177
- 3453** 1942-P Type Two PR68 NGC. Collectors treasure the 1942-P Jefferson nickel because it is the only wartime proof with the silver/manganese composition. Only 27,600 Type Two proofs were minted in 1942, and proof offerings were discontinued after that year. This spectacular coin displays toning in shades of iridescent pearl, cherry, lemon-yellow, lime-green, pink, denim-blue, and violet. Census: 27 in 68 (5 in 68★), 0 finer (4/16). NGC ID# 27A4, PCGS# 4180
- 3454** 1951 PR69 Cameo NGC. A conditionally rare, nearly perfect Cameo example of the proof 1951 Jefferson nickel. This piece showcases a full strike and seemingly flawless surfaces. The fields are fully mirrored. Census: 17 in 69 Cameo, 0 finer (5/16). NGC ID# 22YD, PCGS# 84183 Base PCGS# 84172

1951 Nickel, PR68 Ultra Cameo Only One Ultra Cameo Finer

- 3455** 1951 PR68 Ultra Cameo NGC. A Condition Census Ultra Cameo example of this otherwise plentiful proof nickel issue. Ultra/Deep Cameo 1951 proofs are rare in any grade, but only a single coin is finer than this high-end example. The strike is razor-sharp, and the field-device contrast is stark. Neither side is toned. Census: 3 in 68 Ultra Cameo, 1 finer (4/16). NGC ID# BBUZ, PCGS# 94183
- 3456** 1971 No S, FS-501, PR68 Cameo PCGS. An almost flawlessly preserved, fully struck Cameo proof, showing stark contrast and a faint suggestion of pale champagne toning. This popular *Guide Book* variety is missing the S mintmark from its mint of original, San Francisco. Population: 75 in 68 Cameo, 14 finer (4/16). PCGS# 569931 Base PCGS# 84204
- 3457** 1981-S Type 2 PR70 Ultra Cameo NGC. A technically perfect example of the scarcer Type Two proof 1981-S Jefferson nickel, with the clear mintmark. This magnificent PR70 specimen exhibits fully struck design elements with a rich coat of mint frost that creates an intense cameo effect against the deeply mirrored fields. Census: 8 in 70 Ultra Cameo, (4/16). NGC ID# 27KM, PCGS# 94216

EARLY HALF DIMES

- 3458** 1794 V-3, LM-3, R.4, VG10 NGC. An intermediate die state with cracks through the R in AMERICA, star 6, and the E in LIBERTY, but without radial cracks on the reverse at 5 and 8 o'clock. This first-year Flowing Hair type coin offers problem-free stone-gray surfaces. All legends and stars are sharp. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 22ZT, PCGS# 38583 Base PCGS# 4250

1794 Half Dime, XF Details Sharp Motifs, Great Color, V-3, LM-3

- 3459** 1794 V-3, LM-3, R.4 — Graffiti — PCGS Genuine. XF Details. To the naked eye, this sharply detailed, gunmetal-gray 1794 half dime is incredibly pleasing. The strike is sharp and even, and wear is light. Both sides show olive and gray patina that gives this coin its outstanding old-time look with lighter highlights on the devices. A loupe shows some faint, hair-thin scratches clustered around the eagle in the reverse fields that preclude a numeric grade from PCGS. NGC ID# 22ZT, PCGS# 38583 Base PCGS# 4250
- 3460** 1795 V-9, LM-5, R.6 — Tooled, Cleaned — ANACS. XF40 Details. A very rare die variety, this example boldly detailed and evenly struck. Each side displays pale gray patina as a result of aggressive cleaning, and deep tool marks are seen on the obverse primarily below Liberty's chin. Still-pleasing to the naked eye and suitable as an affordable LM-5 representative. PCGS# 38589 Base PCGS# 4251

3461 1795 V-4, LM-10, R.3 — **Damage** — PCGS Genuine. VF Details. A well-detailed example that will fit a strict budget. This steel-gray LM-10 Flowing Hair half dime shows extensive tooling in the fields in an attempt to eradicate corrosion and other abrasions. To the naked eye, the coin is still pleasing. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

3462 1795 V-4, LM-10, R.3 — **Filed Rims** — PCGS Genuine. AU Details. A sharply detailed and evenly struck Flowing Hair type coin, showing steel-gray surfaces. Some faint file marks are seen on the raised rim cud above the TY in LIBERTY, but any other rim filing must be hidden by the holder tabs. Each side shows fine granularity in the fields. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 LIBERTY Half Dime, Fine 12 V-1, LM-1, Problem-Free Surfaces

3463 1796 LIBERTY, V-1, LM-1, R.3, Fine 12 NGC. CAC. Hair-thin upper and lower crossbars exist on the B in LIBERTY, but if they are overlooked, the letter somewhat resembles a K. Hence the LIBERTY nickname, in use for generations although unmentioned in the classic Valentine reference. This is a problem-free caramel-gold and slate-gray example with sharp legends and substantial hair and plumage detail.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

3464 1797 15 Stars, V-2, LM-1, R.3, VG10 NGC. Golden-brown toning enriches the obverse, as well as the reverse eagle and periphery. The remainder of the reverse is aquamarine. Well detailed for the designated grade, and the few brief hair-thin obverse marks do not distract.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

3465 1800 V-1, LM-1, R.3, VG10 PCGS. CAC. Although worn, this collector-grade 1800 LM-1 half dime shows remnants of the late die state rim cud below the date. The design elements are boldly outlined, and each side displays pleasing olive-gray patina. The CAC endorsements confirms the collector-worthy quality. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

3466 1803 Large 8, V-2, LM-3, R.3, Fine 12 NGC. An evenly circulated dove-gray example with light honey-gold toning on the obverse field and deeper charcoal patina in design crevices. The surfaces are moderately granular and void of apparent abrasions.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 4FMM, PCGS# 38609 Base PCGS# 4269

3467 1805 V-1, LM-1, R.4, VG8 NGC. CAC. Although less famous than its 1802 predecessor, the 1805 is another rare and low mintage date. The delivery of 15,600 pieces was the final half dime emission until 1829. The present example has a cream-white obverse. The reverse field is apricot-gold but the high points are stone-gray. Hair-thin marks are scattered but none are offensive. The peripheral stars and legends are distinct except for OF, which is softly defined due to its status opposite the bust tip.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 232A, PCGS# 38611 Base PCGS# 4272

BUST HALF DIMES

1832 Half Dime, V-8, LM-5, MS64

3468 1832 V-8, LM-5, R.1, MS64 PCGS. CAC. Lovely aquamarine and sea-green hues illuminate the satiny surfaces of this Choice 1832 Capped Bust half dime. The strike is sharp, and there are no major abrasions. This issue is fairly plentiful overall, suitable for type representation. NGC ID# 232E, PCGS# 38667 Base PCGS# 4279

3469 1834 V-3, LM-5, R.3, MS65 NGC. CAC. Golden-brown borders frame ocean-blue and dove-gray centers. The vertical "Scarface" die crack on the portrait helps attribute the better LM-5 marriage. Although this die variety is available in circulated grades, Mint State examples are surprisingly elusive. As of (4/16), NGC and PCGS have each certified two Uncirculated pieces as LM-5, with the single finest as MS65 NGC. PCGS# 38704 Base PCGS# 4281

SEATED HALF DIMES

1837/1837 Seated Liberty Half Dime, MS66 Spectacular Overdate Variety, V-1, VP-001

3470 1837 No Stars, Large Date (Curl Top 1) MS66 NGC. V-1, VP-001. On their website, NGC describes the VarietyPlus-001 as, "The entire date is repunched north of the first impression. The 8 is triple punched, one punching touching a denticle." This delightful Premium Gem is sharply detailed and well-preserved, with lustrous surfaces under shades of greenish-gold and bluish-gray toning. Census (for the variety): 1 in 66, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 232M, PCGS# 4311

**1837 Seated Half Dime, MS66
No Stars, Curved Large Date**

3471 1837 No Stars, Large Date MS66 PCGS. CAC. The Large Date variety displays a curved date with the diagnostic, sloped-top serif 1. A frosty and technically superior Premium Gem example of the No Stars, Large Date half dime, lightly toned in dusky peach-gold and warm-gray hues. The strike is sharp except on the left-side dentils, perhaps the result of the late die state with two strong obverse die cracks — one from 7:30 into the shield, and the other that travels from the rim at 1 o'clock and runs down the pole, across Liberty's lap, and into the shield where it intersects with the first crack. Population: 30 in 66, 4 finer. CAC: 11 in 66, 6 finer (4/16). NGC ID# 232M, PCGS# 4311

3472 1838 Large Stars, No Drapery, MS66 NGC. The large mintage of 2.2 million 1838 dimes occasioned at least 15 die varieties listed in Valentine. This piece shows repunching most prominent on stars 1, 3, and 8. The satiny surfaces are silver-gray in the centers with iridescent rim toning. A small luster graze in the lower reverse field is the only mentionable contact. A super and well-struck example of the issue. Census: 47 in 66 (1 in 66+, 1 in 66★), 30 finer (5/16). Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 3327. NGC ID# 2TXX, PCGS# 4317

3473 1843 MS66 PCGS. This impressive Premium Gem displays well-detailed design elements and well-preserved surfaces that radiate vibrant mint luster. Subtle highlights of greenish-gold and lavender toning appear at certain angles. Population: 9 in 66 (1 in 66+), 5 finer (5/16). NGC ID# 2334, PCGS# 4332

3474 1846 VG8 NGC. CAC. The 1846 Seated half dime is a scarce date with a small mintage of 27,000 pieces. This VG example displays original battleship-gray color with a few small darker spots on the reverse. Wear is even, and eye appeal is pleasing for the grade and issue. Census: 8 in 8, 42 finer. CAC: 4 in 8, 12 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2338, PCGS# 4336

3475 1850 MS66 PCGS. Attractively toned in alternating shades of steel-blue, violet, and rose-gold across both the obverse and the reverse. There are no distracting marks or weakness of strike to report. Mint luster radiates from both sides in cartwheels, unhindered by the rich patina. Population: 19 in 66, 11 finer (4/16). NGC ID# 233F, PCGS# 4345

3476 1853 Arrows MS66 PCGS. Intermixed violet, cobalt-blue, and golden-russet rim toning progresses toward brilliant centers, with the effect generating a visual quality that will appeal to a wide variety of enthusiasts. Crisply rendered and free of marks worthy of mention. This popular Arrows type-coin issue is seldom seen finer. Population: 50 in 66 (4 in 66+), 9 finer (4/16). NGC ID# 233Y, PCGS# 4356

3477 1858-O MS66 NGC. There are only a handful of 1858-O half dimes that can match this quality of this Premium Gem despite a mintage of 1.6 million pieces. Luminous luster shines through melded shades of gold, rose, and blue on the obverse and issues from brilliant surfaces on the reverse. This well-defined Registry candidate has a single notable mark below star 5. Census: 2 in 66, 0 finer (4/16). NGC ID# 233V, PCGS# 4369

3478 1859 MS65 PCGS. V-1, V-4, Flynn-RPD-001. All four date numerals are recut at their bases. This satiny Gem displays brilliant luster and unabraded fields. The strike is slightly soft on the high points of the design, but the eye appeal is hardly hindered. Population: 23 in 65, 63 finer (5/16). NGC ID# 233W, PCGS# 4371

3479 1863 MS65 NGC. V-1, Flynn RPD-001. Dusky autumn-brown, jade-green, and stone-gray toning embraces this crisply struck and coruscating Gem. Both sides appear devoid of detractors. A scant 18,000 pieces were struck, since silver coins were hoarded by the public during the Civil War. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 234C, PCGS# 4382

3480 1869 MS66 PCGS. This boldly impressed Gem features strong head and kernel definition. The upper left stalks are a bit soft, but inconsequentially so. Each side is fully brilliant with cartwheel luster. An impressive, Mint-fresh condition rarity. Population: 13 in 66 (3 in 66+), 6 finer (4/16). NGC ID# 234R, PCGS# 4394

3481 1871 MS66+ PCGS. CAC. The 1871 is one of the more frequently encountered late-date half dimes, and as such is often used for type sets. This example exudes bright frosted mint luster over each side with just a dab of golden patina on the lower obverse. Sharply struck on the obverse, less so on the reverse. Population: 24 in 66 (3 in 66+), 2 finer. CAC: 10 in 66, 2 finer (5/16). NGC ID# 234V, PCGS# 4398

**1872-S Half Dime, Lovely MS67
Mintmark Below Bow**

3482 1872-S Mintmark Below Bow MS67 PCGS. The 1872-S Mintmark Below Bow half dime is slightly more plentiful overall than its Mintmark Above Bow counterpart, but this remarkable Superb Gem is conditionally rare. The strike is bold, and the satiny surfaces are free of abrasions. Warm golden centers cede to violet, amber, and forest-green toning, producing exceptional eye appeal. Population: 9 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 2352, PCGS# 4401

PROOF SEATED HALF DIMES

**1858 Half Dime, PR66 Cameo
Sole Finest at PCGS**

3483 1858 PR66 Cameo PCGS. Frosted design elements stand out boldly against reflective fields. Shades of champagne-gold, crimson-orange, and cobalt-blue toning enhance the terrific eye appeal. The mintage of the 1858 is unrecorded but estimated at only 300 proofs, the first time proofs were sold to the general public. This PR66 Cameo example is destined for a fine Registry Set. Population: 1 in 66 Cameo, 0 finer (5/16). NGC ID# 235N, PCGS# 84437

3484 1859 PR64 PCGS. V-1, V-4, Flynn-RPD-001 Vivid blue, violet, gold, and mint-green paint the fields of this deeply mirrored Choice proof 1859 half dime. The strike is full, and modest cameo contrast is seen on the obverse. Finer coins are scarce, and the eye appeal of this piece surpasses expectations for the grade. A couple of planchet voids are seen at the bases of the 8 and 5. NGC ID# 235P, PCGS# 4438

- 3485 1861 PR65 Cameo PCGS.** A delightful Gem, with sharply detailed design elements throughout and deeply reflective fields, under shades of greenish-gold and cerulean-blue toning. The well-preserved surfaces add to the outstanding eye appeal. Population: 8 in 65 (1 in 65+) Cameo, 1 finer (5/16). NGC ID# 235W, PCGS# 84444
- 3486 1862 PR66 NGC.** Ex: Eric P. Newman Collection. Orange, russet, and teal patina envelops this Premium Gem proof. A small mark appears in the right obverse field between Liberty's face and the cap. Census: 16 in 66 (1 in 66★), 15 finer (4/16).
Ex: *Eric P. Newman Collection, Part II (Heritage, 11/2013)*, lot 33081; *New York Signature (Heritage, 10/2014)*, lot 3345. NGC ID# 5LL6, PCGS# 4445
- 3487 1863 PR65 NGC. CAC. V-1, Flynn RPD-001.** The 18 in the date is clearly repunched. This sharply struck Civil War Gem has a golden-brown and ocean-blue obverse. The reverse exhibits deeper lavender and aquamarine shades. Just 460 proofs were produced. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 235Y, PCGS# 4446
- 3488 1864 PR65 NGC. CAC.** A delightful array of pastel golds, blues, and greens give this Gem proof 1864 Seated half dime quite a visual display. The fields are deeply mirrored, and the sharp design elements are frosty. Eye appeal is undeniable. Census: 25 in 65, 17 finer. CAC: 3 in 65, 5 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 235Z, PCGS# 4447
- 3489 1866 PR65 NGC. CAC. V-1, Flynn RPD-001.** The base of the 18 is repunched north. A fully struck specimen with iridescent apple-green and caramel-gold obverse patina. The reverse exhibits deep tan-brown, orange, violet-red, and navy-blue toning. A desirable example of this low mintage date. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2363, PCGS# 4449
- 3490 1867 PR66 NGC. CAC.** The obverse of this delightful Premium Gem proof 1867 Seated half dime displays soft mint-green and champagne toning, while the reverse has lavender and blue hues. The strike is bold, and the obverse shows modest cameo contrast through the patina. Census: 29 in 66 (2 in 66★), 9 finer. CAC: 10 in 66, 3 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2364, PCGS# 4450
- 3491 1868 PR65 NGC. CAC.** A deeply mirrored proof with a pale sea-green obverse and lovely lavender-blue reverse. The upper-left portion of the wreath and the corresponding part of the obverse rock are slightly soft, but the eye appeal is hardly affected. Census: 22 in 65, 21 finer. CAC: 4 in 65, 10 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2365, PCGS# 4451
- 3492 1868 PR65 Cameo NGC.** The obverse showcases ice-blue patina at the margins, progressing to violet, rose, sea-green, and peach-orange hues. A similar effect characterizes the reverse, though that side is lighter overall. Frosted motifs and reflective mirrors explain the Cameo designation. Census: 5 in 65 Cameo, 9 finer (4/16). NGC ID# 2365, PCGS# 84451
- 3493 1869 PR65 NGC. CAC.** This is a razor-sharp proof with liquidlike mirroring in the fields and obvious cameo contrast on the obverse. The reverse is more deeply toned. Lemon-gold, mint-green, and lavender-blue hues adorn each side. Census: 36 in 65, 29 finer. CAC: 4 in 65, 8 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2366, PCGS# 4452

- 3494 1872 PR66 NGC. CAC.** A sharply struck and beautifully preserved Premium Gem proof half dime, showing sea-green and lemon-gold obverse toning and blue with lavender-gray on the reverse. The 1872 is rare this well-preserved. Census: 9 in 66, 8 finer. CAC: 3 in 66, 2 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2369, PCGS# 4455
- 3495 1873 PR66 NGC. CAC.** Sharp, frosty design elements provide near-cameo contrast on each side of this Premium Gem final-year proof Seated half dime. The obverse displays mint-green and rose-gold toning, while the reverse has a lavender-orange interior surrounded by sky-blue margins. Census: 25 in 66 (2 in 66+), 10 finer. CAC: 7 in 66, 3 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236A, PCGS# 4456

EARLY DIMES

1796 JR-1 Dime, VG8 Two-Year Introductory Type

- 3496 1796 JR-1, R.3, VG8 NGC.** The cud below star 1 confirms the John Reich variety. The reverse is a fairly early die state without cracks below the right (facing) wing. This evenly circulated example is mostly cream-white with glimpses of charcoal-gray in protected regions. All legends are sharp and the dentils are complete. The portrait is faintly hairlined, but marks are confined to a solitary line above the ED in UNITED.
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461
- 3497 1796 JR-1, R.3 — Damaged — NGC Details. VF.** Two digs in the hair, another on the right wreath stem, and a large laminated area on the lower left obverse account for the NGC notation. Both sides display several small oval marks, and the surfaces are moderately wavy. An affordable example of this scarce two-year introductory type. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461
- 3498 1798/97 16 Stars Reverse, JR-1, R.3, VG8 NGC.** JR-1 is the only 1798-dated variety with 16 reverse stars. It is also an overdate, with the extremities of the underdigit 7 apparent beneath a lens. This example has bold peripheral legends. The microgranular pearl-white and silver-gray surfaces are unblemished aside from a thin line near the B in LIBERTY.
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468
- 3499 1798/97 13 Stars Reverse, JR-2, R.6 — Repaired — NGC Details. VG.** The central obverse is repaired and both sides are hairlined. The IT in UNITED is absent and a few thin marks are scattered. Nonetheless, an affordable example of this rare *Guide Book* variety. A small rim clip at 11 o'clock is of mint origin. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236G, PCGS# 38751 Base PCGS# 4469

- 3500 1803 JR-2, R.6, VG8 NGC.** A curved die crack through the CA in AMERICA identifies the rare JR-2 variety. This representative is void of noticeable abrasions. The obverse is cream-gray and the reverse displays deeper gunmetal toning. The date is sharp and a majority of E PLURIBUS UNUM is readable. Portions of LIBERTY are faint, but UNITED STATES OF AMERICA is clear.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 38763 Base PCGS# 4473
- 3501 1803 JR-3, R.4, VG8 NGC.** The obverse displays blended almond-gold and cream-gray toning. On the reverse, the field is ocean-blue, while the high points are pearl-white. The upper half of LIBERTY is faint, but the remainder of the border legends are bold, and most letters in E PLURIBUS UNUM are sharp.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 236L, PCGS# 38764 Base PCGS# 4473
- 3502 1805 5 Berries, JR-1, R.3, VG10 NGC. CAC.** The scarcer of the two 1805 *Guide Book* varieties. Both JR-1 and JR-2 share the same obverse die but have different berry counts on the eagle's branch. The present piece has clear peripheral legends and all stars are sharp. All letters in E PLURIBUS UNUM are least partial. A few thin marks are noted on the reverse. The obverse is fire-red, sun-gold, and sea-green. The reverse field displays deep aquamarine toning.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 38768 Base PCGS# 4478
- 3503 1805 4 Berries, JR-2, R.2, XF40 PCGS.** Deep dove-gray toning encompasses this well defined and lightly abraded early type coin. The strike shows minor softness at the center of the shield, but PLURIBUS and the stars above the eagle are bold. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

BUST DIMES

1809 JR-1 Dime, VF30 Elusive Introductory Capped Bust Date

- 3504 1809 JR-1, R.4, VF30 NGC. CAC.** The sole die marriage for this scarce first-year Capped Bust date. This midgrade example has a stone-gray obverse and a lavender and forest-green reverse. Marks are minor, though we note a pair of thin lines near the crest of the right (facing) wing. All legends are sharp, and the eagle is well defined.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 236U, PCGS# 38771 Base PCGS# 4486

- 3505 1814 Large Date, JR-4, R.2, AU58 PCGS.** This near-Mint 1814 Capped Bust dime shows barely a brush of high-point friction with substantial satin luster remaining in the fields. The strike is slightly weak along the right obverse stars and rim but is bold elsewhere. The Large Date 1814 dime possesses strong eye appeal. PCGS# 38776 Base PCGS# 4488
- 3506 1814 STATESOF, JR-5, R.3, AU55 PCGS.** The unevenly spaced UNITED STATES OF AMERICA makes JR-5 distinctive. A similar variety is seen on the 1818 BD-2 half eagle. JR-5 is rare in Uncirculated grades, and PCGS has certified only a single example as Mint State. The present Choice AU dime is tied with one other piece in this grade at PCGS (5/16). It is a satiny pearl-gray and straw-gold example with unblemished surfaces. The strike shows the occasional softness of strike always seen for the die variety. NGC ID# 236W, PCGS# 38777 Base PCGS# 4490

1822 Capped Bust Dime, VG10 JR-1, Only Dies for the Date

- 3507 1822 JR-1, R.4, VG10 NGC.** A small mintage of 100,000 Capped Bust dimes was accomplished in 1822, with a single die variety known for the date. Experts estimate the surviving population at 200-250 examples in all grades. The legends and date are plain on this pleasing VG10 specimen, and all letters in LIBERTY are legible. The original light gray surfaces are free of large or distracting abrasions. Census: 2 in 10, 26 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497
- 3508 1825 JR-4, R.2, MS62 PCGS.** A satiny, visually pleasing large size Capped Bust dime type coin, limited in grade by minor slide marks on the high points of the devices. Each side displays a hint of champagne toning and luminous fields. The eagle's neck shows the only mentionable weakness. Population (all varieties included): 14 in 62, 38 finer (4/16). NGC ID# 2374, PCGS# 38810 Base PCGS# 4503

**1833 JR-3 Dime, AU Details
Rare Variety, John Reich Plate Coin**

- 3509 1833 JR-3, R.6 — Improperly Cleaned — NCS. AU Details.** Ex: Jules Reiver Collection. The surfaces of this coin were once cleaned with resulting hairlines over the surfaces, and Liberty's cap shows fine scratches that are best seen with a loupe. Bright silver throughout, the coin shows a hint of gold starting to form around the periphery. Some luster remains in the protected areas, and this offsets the visual effects of the cleaning to a degree. Boldly struck by the dies, with sharp stars and curls on the obverse, and the reverse displays full definition on the eagle's claws and wings. A die crack over the final A of AMERICA extends down the right leg of the A to the arrowheads, curling back to the rim forming a retained internal cud. Most examples of this variety show the retained cud to some degree. The reverse die was replaced after very few pieces were coined, creating one of the most elusive die pairings in the entire Capped Bust dime series. On balance, this is a clearly acceptable coin for the rare variety despite the problems mentioned, and it ranks high in the Condition Census for the die pair. It has served collectors for many years as the 1833 JR-3 plate coin in the John Reich dime book.
Ex: Milford Coin Company (1947); Allen F. Lovejoy; *Stack's Lovejoy Sale* (October 1990); *The Jules Reiver Collection, Volume III* (Heritage, 1/2006), lot 22253 which realized \$4,888.

SEATED DIMES

- 3510 1837 No Stars, Large Date, F-101b, R.2, MS61+ NGC. CAC.** An early die state of F-101b, without an obverse radial crack at 7:30. This satiny and refreshingly unabraded dime has a sharp strike and provides good eye appeal. The No Stars subtype was struck for only two years; in 1837 at Philadelphia and in 1838 at New Orleans.
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561
- 3511 1837 No Stars, Small Date, F-102, R.3, MS63 NGC.** The 1837 No Stars Seated Liberty dime represents the first year of the two-year design type. This attractive Select specimen offers well-detailed design elements, with some interesting clash marks on the reverse. The lightly marked surfaces are blanketed in pleasing shades of greenish-gold and lavender-gray toning. Census: 2 in 63, 9 finer (4/16). NGC ID# 237R, PCGS# 537638 Base PCGS# 4562
- 3512 1846F-101, R.4, VF25 NGC. CAC.** For unknown reasons, the U.S. Mint struck only 31,300 dimes in 1846, the lowest business mintage of the Stars subtype. The present problem-free cream-gray example lacks mentionable marks, and all letters in LIBERTY are sharp.
From *The Rev. Dr. James G. K. McClure Collection*. PCGS# 537837 Base PCGS# 4588

- 3513 1853 Hubbed Date and Arrows, F-104, MS65 PCGS. CAC.** A delightful Gem that shows the clash marks at Liberty's face and the light crack in the ribbon ends that characterize the die variety. The design elements are well-detailed and the lustrous surfaces are toned in delicate shades of pale gold and lavender-gray. PCGS# 537952 Base PCGS# 4603
- 3514 1857-O Large O, F-106, R.3, MS64 PCGS.** This is a sharp Choice example with satiny luster and warm golden toning. Surprisingly for the grade, there are no singular abrasions — only a few tiny marks in the left obverse field prevent a Gem designation. This coin is about the finest that can be had in MS64. Higher-grade examples are scarce. Population: 33 in 64, 25 finer (5/16). PCGS# 538116 Base PCGS# 4615
- 3515 1857-O Medium O, F-107a, R.3, MS65 PCGS.** A sharply struck Gem example of this conditionally elusive New Orleans issue, showing vivid aquamarine, orange-gold, and lavender-gray toning. A pair of die cracks stretching toward the rock and the date from the rim below star 1 are diagnostic of this late-die-state variety. Population (all varieties included): 14 in 65, 11 finer (5/16). PCGS# 538118 Base PCGS# 4615
- 3516 1859-O Medium O, F-103, R.3, MS65 NGC.** Medium O. In addition to the mintmark size, the date shows weakness and the 5 in the date is more open than usually seen on this issue. The surfaces are mostly brilliant, with just the slightest tinge of golden color on the obverse, and strong definition on the design elements. Census: 19 in 65, 15 finer (5/16). PCGS# 538142 Base PCGS# 4620
- 3517 1862 MS66 PCGS.** The 1862 Seated Liberty dime is an available date in grades through MS64, but Gem or finer representatives are seldom seen. This Premium Gem example displays satiny luster beneath lavender-gray, rose-gold, and aquamarine toning. The strike is soft on Liberty's foot, right (facing) shoulder, and the corresponding portion of the reverse wreath. Population: 17 in 66 (2 in 66+), 2 finer (4/16). NGC ID# 239H, PCGS# 4635
- 3518 1865 Repunched Date, F-101b, R.6, XF40 NGC. CAC.** According to Gerry Fortin, F-101b shows a "repunched 6 between [the] 8 and 6 digits," although charcoal patina in design recesses obscures that feature on the present coin. The fields and high points are slate-gray. Neither side appears abraded. Just 10,000 pieces were struck due to wartime hoarding of silver coin.
From *The Rev. Dr. James G. K. McClure Collection*. PCGS# 538205 Base PCGS# 4641

**1872-CC Dime, VF30
Impressively Low Mintage**

- 3519 1872-CC F-101, Low R.4, VF30 NGC.** The 1872-CC is a scarce Seated dime issue, struck to an impressively low mintage of only 35,480 pieces. Only one die pair is known, and the reverse die was reused in 1873 and 1874. On 1872 dimes, it is a die state question: Does it show the die crack through the mintmark that terminates at the right ribbon end? On this piece it is only faintly visible. The surfaces are light gray with modest amounts of luster surrounding the devices. The only mentionable defects are a shallow scratch in the right obverse field and a series of light pinscratches below the date.
Ex: *Dallas Signature* (Heritage, 11/2007), lot 389. PCGS# 538286 Base PCGS# 4657

**1873-S Seated Liberty Dime, MS64
Short-Lived Arrows Design Type**

- 3520** 1873-S Arrows, Small Thin S, Repunched Date, F-101, R.4, MS64 PCGS. The 1873-S Seated Liberty dime boasts a small mintage of 455,000 pieces, and few examples were saved for numismatic purposes. This attractive Choice example exhibits well-detailed design elements and lightly marked, lustrous surfaces, under delicate shades of golden-brown and lavender-gray toning. Population: 19 in 64 (1 in 64+), 3 finer (5/16). PCGS# 538327 Base PCGS# 4667

**1875-CC Seated Dime, MS65
Brilliant with Frosty Mint Luster**

- 3521** 1875-CC Mintmark Below Bow, F-103a, R.3, MS65 PCGS. The obverse shows a die crack through the lower parts of the 18, slanting down to the rim below the 5. The reverse is faintly cracked through the first C of the mintmark. This lovely Gem is frosty and highly lustrous with a crisp strike and exceptional eye appeal. Population: 11 in 65, 1 finer (5/16). PCGS# 538408 Base PCGS# 4674

- 3522** 1877-CC MS66 PCGS. An impressive Premium Gem from the famous Carson City Mint, this piece exhibits well-detailed design elements, with a faint die crack that connects the numerals in the date. The well-preserved surfaces radiate vibrant mint luster, under shades of golden-brown and bluish-gray toning. PCGS has graded six numerically finer examples (5/16). NGC ID# 23AM, PCGS# 4683

**1879 Seated Dime, MS67 ★
Undesignated Prooflike Example**

- 3523** 1879 Repunched Date, F-104a, R.4, MS67 ★ NGC. The Fortin-104a variety represents a later usage of dies previously used for proofs (Fortin-104), now polished with evidence of die clashing on both sides. The fields are prooflike, although undesignated as such, with frosted raised devices and gold toning at the borders. The date is clearly repunched on the 1 and 8, with less-visible repunching on the 9. An attractive Superb Gem with the NGC Star for its obvious eye appeal. Census: 37 in 67 (11 in 67★, 2 in 67+★), 5 finer (4/16). NGC ID# 23AS, PCGS# 538642 Base PCGS# 4687

- 3524** 1883 F-113, R.2, MS66 PCGS. CAC. A boldly struck Legend Obverse type coin, showing satiny luster and original toning. The central obverse and much of the reverse are champagne-gold, while the obverse periphery displays blue and sun-orange hues. The preservation is outstanding. Population: 61 in 66 (3 in 66+), 18 finer. CAC: 20 in 66, 7 finer (4/16). PCGS# 538672 Base PCGS# 4691

- 3525** 1885 F-108, R.2, MS66+ PCGS. A high-end example of this popular type-coin issue, showing bold design elements and lightly clashed fields. Frosty luster displays mottled gold, olive, and amber-gray toning. There are no mentionable abrasions. Population: 41 in 66 (12 in 66+), 12 finer (4/16). PCGS# 538697 Base PCGS# 4694

- 3526** 1887-S F-101, R.3, MS66 PCGS. CAC. Fortin-101 shows a thin die line in the lower loop of the mintmark, although this is not a repunched mintmark according to Gerry Fortin. This Premium Gem 1887-S Seated dime displays satiny luster with gray-gold, lavender, and sea-green toning. The upper wreath and lower corners of the rock and foot support show minor strike weakness. Population: 11 in 66, 1 finer. CAC: 7 in 66, 0 finer (5/16). PCGS# 538737 Base PCGS# 4699

- 3527** 1890 MS66+ PCGS. Fortin-Unlisted. The date position appears similar to Fortin-102a, but the reverse is extensively cracked around the periphery. As a type coin, this Premium Gem 1890 Seated dime is an outstanding choice. The strike is bold and the frosty surfaces reveal toning in shades of mint-gold, ocean-blue, violet, and amber-gray. A few tiny ticks in the upper-left obverse field are all that limit the grade. A small patch of mint-made planchet flaws appears in the central reverse. Population: 54 in 66 (4 in 66+), 6 finer (5/16). NGC ID# 23BB, PCGS# 4704

PROOF SEATED DIMES

- 3528** 1863 F-101, R.4, PR66 NGC. CAC. Deep sky-blue toning dominates the reverse and visits the obverse, which also displays sun-gold and violet shades. A well struck Premium Gem. A better date either as a proof or business strike. Proof mintages were low due to the distractions of the Civil War, and the commercial mintage was scant since silver coin was displaced by fractional currency and Gresham's Law. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23BS, PCGS# 539011 Base PCGS# 4756

**1863 Seated Dime, PR66+
Only 460 Proofs Coined**

- 3529** 1863 F-101, R.4, PR66+ PCGS. CAC. Just 460 proofs were struck in the midst of the Civil War — enough to satisfy the collecting public in 1863, but yielding only a fraction of the quantity required for today's collectors and specialists, especially with the low business-strike mintage of just 14,000 pieces. The current razor-sharp coin is among the finest survivors of the proof mintage. Comprehensive sea-green and azure-blue toning covers the obverse and the cameo contrast is strong. The field/device contrast on the reverse is less obvious, but vibrant cherry-red is added to the mirrored palette for outstanding eye appeal. Population: 15 in 66 (2 in 66+), 0 finer. CAC: 8 in 66, 0 finer (5/16). NGC ID# 23BS, PCGS# 539011 Base PCGS# 4756

- 3530** 1864 F-102, R.5, PR65 NGC. CAC. Lush blue-green toning is predominant across this crisply struck and coruscating Gem, although the lower left obverse displays iridescent peach and plum patina. An original and outstanding Civil War proof dime. Just 470 proofs were coined. *From The Rev. Dr. James G. K. McClure Collection.* PCGS# 539013 Base PCGS# 4757

- 3531 1866 F-102, R.3, PR66 NGC.** Deep cherry-red, apple-green, and peach-gold encompass this precisely struck and flashy Reconstruction-era proof. The reverse is immaculate, and the obverse field displays only wispy contact. Census: 11 in 66 (1 in 66+, 1 in 66★), 8 finer (5/16).
Ex: Chicago Signature (Heritage, 8/2011), lot 3568; Long Beach Signature (Heritage, 2/2012), lot 3368; Central States Signature (Heritage, 4/2012), lot 3806; Summer FUN Signature (Heritage, 7/2012), lot 3430. NGC ID# 23CP, PCGS# 539017 Base PCGS# 4759

**1868 Seated Liberty Dime, PR66
Well-Preserved and Richly Toned**

- 3532 1868 F-104, R.3, PR66 NGC. CAC.** The date slopes downward and the S in States is not broken, identifying the F-104 variety. Only 600 proof Seated Liberty dimes were struck in 1868. This spectacular Premium Gem exhibits sharply detailed design elements and deeply reflective fields throughout. The well-preserved surfaces show vivid greenish-gold centers, yielding to cerulean-blue at the rims. Census: 8 in 66 (1 in 66★), 3 finer. CAC: 4 in 66, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23CS, PCGS# 539020 Base PCGS# 4761
- 3533 1869 F-106, R.5, PR65 NGC. CAC.** The golden-brown and apricot fields are bounded by violet-red and cobalt-blue shades. Flashy and free from contact with a good strike and a small, subtle spot between the NE in ONE. Likely the scarcest of the three 1869 proof die varieties.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539024 Base PCGS# 4762
- 3534 1870 PR66 Cameo NGC. F-101, R.3.** A fully struck Premium Gem proof with stark cameo contrast and outstanding preservation. Aside from a dash of blue along the left-hand borders, each side displays faint lavender-gold toning. Cameo examples of the 1870 proof dime are rarely seen, regardless of grade. Census: 6 in 66 Cameo (1 in 66+ Cameo), 3 finer (4/16). NGC ID# 59UM, PCGS# 84763
- 3535 1870 F-101, R.3, PR65 NGC. CAC.** Wheat-gold fields accompany navy-blue and plum-red borders. This undisturbed and nicely mirrored Gem has a good strike and excellent eye appeal. The two proof marriages, F-101 and F-103, share the same reverse die but have different date placements.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763
- 3536 1870 F-101, R.3, PR65+ NGC. CAC.** The 1870 proof dime is elusive in Gem condition, and this Plus-graded coin possesses keen eye appeal. The strike is full, and the fields are deeply mirrored. Modest cameo contrast emerges from beneath the rich patina. The obverse displays vivid forest-green and cherry-red peripheral toning around a light golden center, while the reverse has more subdued coloration of gold and mint-green. Census: 22 in 65 (1 in 65+), 15 finer. CAC: 6 in 65, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763
- 3537 1871 Repunched Date, F-101, R.5, PR66 NGC. CAC.** The 18 in the date is clearly repunched north. Lovely golden-brown, lavender, and ocean-blue toning dominates the obverse. The reverse has a wheat-gold center framed by mauve and aquamarine shades. An undisturbed and impressive specimen.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539027 Base PCGS# 4764

- 3538 1872 Misplaced Date, F-109, FS-302, R.5, PR65+ NGC. CAC.** The curl of a 2 is misplaced on Liberty's rock above the 7 in the date. Dappled wheat-gold and lilac-red toning adorn this well struck Gem. Both sides are devoid of detractions. One of only 950 proofs issued.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539031 Base PCGS# 4765
- 3539 1873 Closed 3, No Arrows, F-101, R.3, PR65 NGC. CAC.** Peach-gold toning graces the centers, while cobalt-blue, rose-red, and apple-green encompass the margins. The strike shows minor blending on Liberty's hair and the upper areas of the wreath, but contact is absent, and the sole imperfection is a mint-made roller mark near the N in UNITED.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539032 Base PCGS# 4766
- 3540 1875 F-101, R.3, PR66 ★ NGC. CAC.** Exquisite peripheral bands of cherry-red, apple-green, and apricot-gold endow the obverse. The portrait is silver-gray and the nearby field is ocean-blue. The reverse has a straw-gold center and deeper lavender and cobalt-blue margins.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539035 Base PCGS# 4772
- 3541 1877 Type Two Reverse, F-101, R.4, PR65 NGC.** The ME in DIME and lower-right portion of the wreath are doubled on this Type Two Reverse 1877 proof dime. This Gem example is boldly struck and reflective with lavender-gold toning that deepens around the reverse borders. Census: 13 in 65, 19 finer (5/16). PCGS# 539040 Base PCGS# 4774
- 3542 1878 Type Two Reverse, F-101, R.3, PR65 NGC.** A well-struck, deeply mirrored proof with original rose, gold, sea-green toning on each side. A few faint roller marks (mint-made) are seen on the figure of Liberty, but there are no mentionable contact marks. Elusive in Gem condition. Census: 26 in 65 (1 in 65+), 15 finer (4/16). PCGS# 539041 Base PCGS# 4775
- 3543 1880 F-101, R.3, PR65+ NGC. CAC.** Peach-red and olive-green embrace the obverse. The reverse has a lavender center and an ocean-blue periphery. The strike is good and the eye appeal is imposing. A low mintage date, due to the nearly continuous production of silver dollars that year.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777
- 3544 1881 F-102, R.3, PR66 NGC. CAC.** Aquamarine borders frame lavender-red centers. Undisturbed and practically pristine with the usual slight softness of strike on the upper left area of the wreath. Fortin-102 has a date position nearly identical to F-101, but the first S in STATES is partial instead of broken. PCGS# 539050 Base PCGS# 4778
- 3545 1882 F-101, R.3, PR66 NGC. CAC.** The 2 in the date is lightly repunched. This high grade proof dime has a bold strike and rich multicolor toning. The obverse has a brick-red and apricot-gold border, and the reverse has a chestnut-gold center bounded by bands of rose-red and ocean-blue.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23D7, PCGS# 539052 Base PCGS# 4779
- 3546 1882 PR66 Cameo NGC. F-101, R.3.** A conditionally scarce Premium Gem Cameo example of this otherwise plentiful Seated dime proof issue. The strike is full throughout, and both sides display splashes of amber-orange toning. Census: 21 in 66 (1 in 66 ★) Cameo, 16 finer (4/16). NGC ID# 23D7, PCGS# 84779
- 3547 1883 F-103, R.3, PR65+ NGC. CAC.** Lemon-gold, olive, and amber-red toning appear on the obverse of this high-end Gem 1883 proof dime, while the reverse displays blended lavender-blue and champagne hues. The strike is bold, and the eye appeal is superb. Census: 49 in 65 (1 in 65+), 57 finer. CAC: 16 in 65, 21 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539053 Base PCGS# 4780

- 3548 1883 F-103, R.3, PR66 NGC.** The orange-gold obverse field cedes to a dove-gray Liberty and a blue-green border. The reverse is dusky peach-gold with sea-green and lavender toning near the rims. The strike shows selected inexactness. The more available of two proof die varieties for the date.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539053 Base PCGS# 4780
- 3549 1883 F-103, R.3, PR66 PCGS.** Light caramel-gold toning visits this flashy and unmarked Premium Gem. The upper left portion of the wreath is incompletely impressed, but the remainder of the strike is good. The motifs are frosty and appear to merit Cameo status, although the circa-2003 PCGS holder omits that designation.
Ex: Central States Signature (Heritage, 5/2004), lot 6622, which realized \$1,725. PCGS# 539053 Base PCGS# 4780
- 3550 1884 F-101, R.3, PR65 PCGS.** Rotated in light, fiery-orange toning with blue rim accents appear on this mirrored Gem proof. The toning is comprehensive over both the fields and devices, precluding a Cameo designation although the raised motifs are nicely frosted. Population: 52 in 65, 51 finer (4/16). PCGS# 539055 Base PCGS# 4781
- 3551 1884 F-101, R.3, PR65 NGC. CAC.** Rose-red, lemon-gold, and forest-green illuminate the obverse periphery. The central obverse is aquamarine, and the reverse is deep blue-green. The strike is good aside from the usual blending on the upper left area of the wreath. A scant 875 proofs were produced.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539055 Base PCGS# 4781
- 3552 1884 F-101, R.3, PR66 NGC.** Lavender, sea-green, and straw-gold toning encompass the obverse. The reverse offers areas of butter-gold, rose-red, and cobalt-blue patina. The satiny surfaces are unperturbed aside from a mint-made diagonal roller mark on the upper left obverse.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539055 Base PCGS# 4781
- 3553 1885 F-101, R.3, PR65 NGC. CAC.** Die lines on the upper wreath are a prominent marker for Fortin-101, the only confirmed proof 1885 marriage. The centers are autumn-gold and the peripheries are jade-green. The flashy fields and nicely struck devices are free from detractors.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782
- 3554 1885 F-101, R.3, PR65 NGC. CAC.** Slight repunching on the 1 in the date, combined with die scratches at the top of the wreath, identify Fortin-101. The dies struck both proof and commercial pieces, but the mirrored fields and squared rims confirm proof status. The obverse is predominantly aquamarine. The reverse has a tan-gold center and an electric-blue periphery.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782
- 3555 1886 F-103, R.3, PR65 NGC. CAC.** Orange-gold toning illuminates the obverse periphery. The well struck devices are dove-gray, and the central reverse field is violet-blue. A flashy and attractive Gem proof type coin.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539057 Base PCGS# 4783
- 3556 1886 F-103, R.3, PR65 NGC. CAC.** Iridescent peach-gold, lilac-red, ocean-blue, and olive-green toning illuminates the obverse. The reverse exhibits medium to electric-blue patina. Smooth aside from a few delicate vertical hairlines on the right obverse field.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539057 Base PCGS# 4783
- 3557 1887 F-101, R.3, PR65+ NGC. CAC.** Fire-red, orange, and apple-green toning endow the obverse. The lavender central reverse is framed by peripheral ocean-blue patina. The strike is crisp, and both sides are void of detractors. Only 710 proofs were issued.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539059 Base PCGS# 4784
- 3558 1887 F-101, R.3, PR66 PCGS.** This gleaming Premium Gem proof exhibits lovely rose-gold, mint-green, blue, and lavender-gray toning on the obverse in concentric hues, while the reverse is more evenly colored in warm champagne-gold with grayish undertones. Well-preserved and sharp. Rarely seen finer. Population: 13 in 66, 2 finer (5/16). PCGS# 539059 Base PCGS# 4784
- 3559 1888 PR65 Cameo PCGS. CAC. F-101, R.4.** A lovely Gem Cameo, showing deeply mirrored fields and bold design elements. Excessive die polishing appears in the recesses of Liberty's gown but has little effect on the level of detail. Both sides show soft lavender-gold toning, with the obverse also exhibiting a dash of teal-blue along the upper-right border. Population: 13 in 65 Cameo, 14 finer. CAC: 3 in 65, 12 finer (5/16). NGC ID# 23DD, PCGS# 84785
- 3560 1888 F-101, R.4, PR65 NGC.** Fortin describes the diagnostic for F-101 as "a punch defect in the upper left part of the lower loop of the middle eight." This originally toned specimen has a golden-brown and olive-green obverse. The reverse displays deeper ruby-red and lemon-gold patina. Liberty's hair and the top of the cereal wreath show selected incompleteness of strike.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539061 Base PCGS# 4785

**1890 Dime, Lightly Toned PR67
Tied for Finest at PCGS**

- 3561 1890 F-103, R.4, PR67 PCGS.** One of four different die pairings for the proof 1890 dime, identified by date placement. This Superb Gem proof is toned in dusky lavender-gray and champagne hues, with hints of turquoise around the reverse periphery. The strike is well-executed, and the eye appeal is pleasing. Housed in a green label holder. Population: 8 in 67, 0 finer (4/16). PCGS# 539068 Base PCGS# 4787
- 3562 1891 F-130, R.3, PR65+ ★ NGC. CAC.** Cherry-red toning is confined to UNITED STATES, but much of the obverse exhibits honey-gold and powder-blue patina. The reverse has a lilac-red center and an aquamarine periphery. A nicely struck and flashy Gem. A Fortin-unlisted die state with a delicate crack on the reverse between 4:30 and 6:30. The lower loop of the 8 in the date is repunched.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 539071 Base PCGS# 4788

BARBER DIMES

- 3563 1893 MS66 PCGS. CAC.** Frosty mint luster illuminates boldly struck design elements on each side of this Premium Gem 1893 dime. The reverse is extensively cracked, showing also a pair of large die chips in the upper wreath. Both sides yield mottled olive-gold and aquamarine toning. Population: 82 in 66 (37 in 66+), 6 finer. CAC: 14 in 66, 5 finer (5/16). NGC ID# 23DN, PCGS# 4800
- 3564 1895 MS64 PCGS.** Sharp devices and satiny luster give this toned 1895 Barber dime type coin pleasing eye appeal. Olive-gray, champagne, and amber-red toning is seen on each side, masking a few trivial marks that define the grade. Population: 38 in 64 (3 in 64+), 44 finer (4/16). NGC ID# 23DV, PCGS# 4806

**1896-S Barber Dime, MS65
Semikey Issue, Scarce This Nice**

3565 1896-S MS65 PCGS. Untoned and frost-white, this Gem S-Mint dime is brightly lustrous and sharply struck. A pair of tiny ticks on the nose and neck and a short reeding mark above E in ONE are the sole marks to report but they are of little concern — the fields are entirely free of abrasions. Despite a mintage of more than 575,000 pieces, fewer than three dozen pieces at PCGS and NGC combined have attained a finer grade. Population: 15 in 65, 18 finer (5/16). NGC ID# 23E2, PCGS# 4811

3566 1897 MS66+ PCGS. CAC. A high-end example of this collectible 19th century type coin issue, showing a bold strike and satiny luster. Aquamarine, gold, and lavender-gray toning blends over each side. Population: 40 in 66 (4 in 66+), 5 finer. CAC: 10 in 66, 6 finer (4/16). NGC ID# 23E3, PCGS# 4812

3567 1900-O MS64 PCGS. This attractive Choice specimen exhibits well-detailed design elements, with a touch of softness on the lower wreath. The lightly marked surfaces are blanketed in shades of greenish-gold and gray toning, with much prooflike reflectivity underneath. Population: 10 in 64 (1 in 64+), 19 finer (5/16). NGC ID# 23ED, PCGS# 4822

3568 1902-O MS64 PCGS. A sharp 1902-O dime with satiny luster and well-preserved surfaces. Clash marks are seen in the fields. This New Orleans issue is elusive in MS64 and becomes genuinely rare any finer. Population: 36 in 64 (2 in 64+), 9 finer (5/16). NGC ID# 23EK, PCGS# 4828

3569 1902-O MS64 PCGS. CAC. An especially pleasing coin for the grade, this 1902-O Barber dime is well-struck and free of hazardous abrasions. A light olive-gold hue accents each side, with hints of mint and pale rose appearing when tilted beneath a light. Population: 36 in 64 (2 in 64+), 9 finer. CAC: 5 in 64, 2 finer (5/16). NGC ID# 23EK, PCGS# 4828

3570 1904 MS66 PCGS. CAC. Gem examples of the 1904 (14.6 million coins struck) are surprisingly elusive, and comparable Premium Gems are very rare. Sea-green and violet-gray iridescence mingle throughout this softly frosted MS66 dime. The corn kernels are complete, and hair detail is strong. Population: 15 in 66 (5 in 66+), 1 finer (5/16). NGC ID# 23GH, PCGS# 4833

3571 1905-O MS65 PCGS. Gold CAC. From a mintage of 3.4 million pieces, the 1905-O Barber dime is surprisingly difficult to locate in high grade. This charming Gem exhibits well-detailed design elements and well-preserved lustrous surfaces, under shades of greenish-gold and lavender-gray toning. Population: 21 in 65, 25 finer. Gold CAC: 6 in 65, 9 finer (5/16). NGC ID# 23EU, PCGS# 4836

**1909-D Dime, MS66
None Finer at PCGS**

3572 1909-D MS66 PCGS. This brilliant, satiny Premium Gem 1909-D dime displays unabraded surfaces and pleasing eye appeal. The wreath bow and the leaves above LIBERTY are weakly struck, but the remainder of each side is sharp. This Denver issue is a better date in Uncirculated condition and is rare in MS66. This piece is among the finest at PCGS (4/16). NGC ID# 23FC, PCGS# 4851

3573 1910 MS66+ PCGS. CAC. A beautifully preserved 1910 Barber dime with glowing, champagne-toned luster and a bold strike. This Philadelphia issue is scarce in MS66 and rare any finer. The present CAC-endorsed MS66+ coin offers significant appeal and technical quality. Population: 28 in 66 (3 in 66+), 15 finer. CAC: 9 in 66, 11 finer (5/16). NGC ID# 23FF, PCGS# 4854

3574 1913-S MS65 NGC. The 1913-S Barber dime boasts a low mintage of 510,000 pieces. This spectacular Gem offers razor-sharp definition on all design elements and some interesting clash marks are evident on the reverse. The well-preserved, brilliant surfaces radiate vibrant mint luster. Census: 21 in 65, 8 finer (4/16). NGC ID# 23FS, PCGS# 4864

PROOF BARBER DIMES

3575 1893 PR66 NGC. CAC. Magnificent multicolor hues paint the obverse of this Premium Gem proof 1893 Barber dime, while the reverse has complementary mint-green and yellow-gold hues. The strike is sharp, and there are no interferences with the eye appeal. Seldom seen finer. Census: 46 in 66 (1 in 66+, 1 in 66★), 28 finer. CAC: 10 in 66, 13 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23G4, PCGS# 4877

3576 1894 PR65 NGC. CAC. Mirrored fields provide a reflective backlight for the sharp design elements on this Gem 1894 proof dime. The obverse has primarily sun-gold toning, while the reverse displays sea-green and champagne hues. CAC: 6 in 65, 31 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23G6, PCGS# 4878

3577 1898 PR65+ NGC. CAC. Original, lightly mottled toning gives each side of this high-end Gem 1898 proof dime milky-gold and greenish-gray coloration. The strike is bold. Few examples this fine are CAC-endorsed. CAC: 2 in 65, 8 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23GB, PCGS# 4882

3578 1898 PR66 PCGS. Moderate patina on each side complements a bold proof strike and an essential lack of mentionable contact on this attractive Premium Gem proof. Population: 33 in 66 (1 in 66+), 12 finer (5/16). NGC ID# 23GB, PCGS# 4882

3579 1898 PR66 NGC. The impeccably preserved surfaces of this spectacular Premium Gem display a mix of lavender, gray, greenish-gold, and cerulean-blue toning. The design elements are sharply detailed and the fields are deeply reflective beneath the all-encompassing patina. Census: 34 in 66, 34 finer (4/16). NGC ID# 23GB, PCGS# 4882

3580 1900 PR65 NGC. This deeply mirrored Gem proof 1900 Barber dime yields original gunmetal-blue, lavender, mint-green, and rose-gold toning interspersed throughout the fields. The strike is full, and a hint of cameo contrast emerges from beneath the patina. Finer examples are elusive, but this coin is readily accessible by collectors. NGC ID# 23GD, PCGS# 4884

3581 1901 PR66 NGC. An ideal 20th century type coin, this boldly struck 1901 proof Barber dime displays soft lilac toning with interior accents of pine-green and gold. The mirrored fields easily reflect light, and this piece might have garnered a Cameo designation were it not for the delicate patination. Census: 47 in 66 (1 in 66★), 17 finer (4/16). NGC ID# 23GE, PCGS# 4885

3582 1901 PR66 NGC. CAC. Vivid lavender-blue and sea-green toning in the obverse fields accentuates cameo contrast on that side, while the reverse displays softer mint-gold and amber hues without noticeable contrast. The strike is bold, and the eye appeal is excellent. Census: 48 in 66 (1 in 66★), 17 finer. CAC: 17 in 66, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23GE, PCGS# 4885

3583 1907 PR65 NGC. CAC. A collectible Gem example of this available 20th century proof Barber dime. The strike is sharp, and the fields display liquidlike mirroring. Mottled lavender, blue, and mint-green toning grace each side. CAC: 6 in 65, 20 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23GM, PCGS# 4891

3584 1911 PR66 NGC. CAC. The 1911 Barber dime proof is scarce at the Premium Gem level. This piece is fully struck and has attractive, mirrored fields. The obverse displays noticeable cameo contrast, but the reverse does not. Both sides are toned in lavender and ocean-blue hues. Census: 25 in 66, 26 finer. CAC: 11 in 66, 16 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23GS, PCGS# 4895

MERCURY DIMES

3585 1916-D VG8 PCGS. The 1916-D Mercury dime is the acknowledged key to the series and collectors prize examples in all grades and conditions. This pleasing VG example is well-worn, but close inspection reveals about half of the sticks in the fascies are still differentiable and no large or distracting abrasions are evident. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, XF Details Pleasing Silver-Gray Color Remains

3586 1916-D — Cleaning — PCGS Genuine. XF Details. Demand far outstrips the supply of the 1916-D regardless of condition or grade, with the issue a true stopper for the series. This sharply defined example was lightly cleaned at one time with some resultant hairlines and microporosity, yet the in-hand appeal is substantial and the resultant color is a pleasant silver-gray that deepens around the raised elements. Sure to elicit many bids despite the lack of a numeric grade. NGC ID# 23GY, PCGS# 4906

Key 1916-D Dime Uncirculated Details

3587 1916-D — Cleaning — PCGS Genuine. Unc. Details. The 1916-D is the lowest mintage issue of the series, and has less than one-fourth the production of its nearest rival, the 1921-D. Most survivors are in heavily circulated grades, but the present piece is both unworn and devoid of abrasions. The coruscating surfaces are attractive despite delicate vertical obverse hairlines. NGC ID# 23GY, PCGS# 4906

3588 1916-S MS66+ Full Bands PCGS. A total of 10.4 million Mercury dimes were produced at the California mint in the series' inaugural year, yet few examples can match the quality of this Premium Gem. Cartwheel luster rolls over brilliant surfaces with a band of crimson and golden-russet patina at the upper obverse border. Strongly rendered. NGC ID# 23GZ, PCGS# 4909

1917-D Dime, MS65 Full Bands Conditionally Elusive

3589 1917-D MS65 Full Bands PCGS. An elusive Gem Full Bands example of this early Denver issue, showing satiny luster and well-preserved surfaces. The obverse displays mottled russet, olive, gold, and amber toning, while the reverse is brilliant with only a light golden ring around the periphery. Population: 39 in 65 Full Bands, 14 finer (4/16). NGC ID# 23H3, PCGS# 4913

3590 1918 MS66 Full Bands PCGS. The 1918 Mercury dime is an available date in Full Bands, but such coins are conditionally scarce at the Premium Gem level. This coin displays a bold strike and frosty, original mint luster. The preservation is outstanding, and the eye appeal is also excellent. Population: 54 in 66 Full Bands, 4 finer (5/16). NGC ID# 23H5, PCGS# 4917

3591 1918 MS66 Full Bands NGC. CAC. A boldly struck Premium Gem with glistening frosty luster and untuned surfaces. The 1918 Mercury dime is elusive this fine in Full Bands, and the CAC endorsement is rarely seen. Census: 20 in 66 (1 in 66+) Full Bands, 3 finer. CAC: 12 in 66, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23H5, PCGS# 4917

**1918-D Dime, MS64 Full Bands
Seldom Encountered With Band Separation**

- 3592 1918-D MS64 Full Bands PCGS.** The 1918-D is arguably the scarcest D-mint dime with Full Bands. There is no doubt about the split on the central bands on this piece. Each side is enveloped in rich shades of gray, golden, rose, and blue. This color scheme serves well to conceal the small, grade-limiting abrasions that are present (but not visible without magnification). Population: 78 in 64 (3 in 64+) Full Bands, 31 finer (4/16). NGC ID# 23H6, PCGS# 4919

- 3593 1918-S MS66 PCGS.** A beautifully preserved Premium Gem 1918-S Mercury dime, showing frosty luster with dusky lavender-gold toning. Struck from worn dies with metal flowlines in the fields and weakness on the fasces bands, but nonetheless a pleasing, high-grade example. Population: 25 in 66 (3 in 66+), 1 finer (5/16). NGC ID# 23H7, PCGS# 4920

**1919-D Dime, MS64 Full Bands
Conditionally Rare Branch Issue**

- 3594 1919-D MS64 Full Bands NGC.** A hint of iridescent auburn toning confirms the originality of the brilliant, silver surfaces on this lustrous, near-Gem dime. The 1919-D date is surprisingly difficult to find with Full Bands despite 9.9 million pieces struck by the Denver Mint. NGC has graded six numerically finer examples (4/16).
Ex: *FUN Signature* (Heritage, 1/2014), lot 4051, which realized \$3,818.75. NGC ID# 23H9, PCGS# 4925

**1919-D Mercury Dime, MS64 Full Bands
Better Date With Full Bands**

- 3595 1919-D MS64 Full Bands PCGS.** From a smallish mintage of 9.9 million pieces, the 1919-D Mercury dime is a better date in the early series. The present coin is a sharply detailed Choice example, with Full Bands definition and vibrant mint luster. The pleasing surfaces display attractive gold and ice-blue toning. Population: 89 in 64 (5 in 64+) Full Bands, 21 finer (4/16).
Ex: *Long Beach Signature* (Heritage, 2/2011), lot 3449; *FUN Signature* (Heritage, 1/2013), lot 4669. NGC ID# 23H9, PCGS# 4925

- 3596 1919-S MS65 PCGS. CAC.** A lovely champagne-toned Gem with flecks of lavender throughout each side. The fasces bands are not fully defined, but the strike is otherwise bold. There are no significant abrasions. Population: 26 in 65, 21 finer. CAC: 7 in 65, 9 finer (4/16).
Ex: *FUN Signature* (Heritage, 1/2013), lot 9625. NGC ID# 5LLM, PCGS# 4926

- 3597 1919-S MS66 PCGS. CAC.** Beautifully preserved with a hint of champagne toning. The fasces bands are not fully separated, but the strike is otherwise well-rendered. The frosty luster delivers pleasing eye appeal. Scarcely seen this fine. Population: 19 in 66 (2 in 66+), 2 finer. CAC: 9 in 66, 0 finer (4/16). NGC ID# 5LLM, PCGS# 4926

- 3598 1920-D MS64 Full Bands NGC.** The 1920-D in Full Bands is scarce above MS64, making this sharp Choice example highly appealing among budget-conscious collectors. There are no mentionable abrasions, and the strike is outstanding. Each side shows light golden toning and satiny luster. Census: 57 in 64 Full Bands, 26 finer (5/16). NGC ID# 23HC, PCGS# 4931

**1920-D Dime, MS65+ Full Bands
Sharp Detail, Rich Luster**

- 3599 1920-D MS65+ Full Bands NGC. CAC.** Full Bands examples of the 1920-D Mercury dime are elusive in Gem condition. This plus-graded example displays needle-sharp detail throughout the devices and peripheral legends, and the satiny surfaces are devoid of toning and abrasions. Eye appeal exceeds expectations even for the Gem level. Census: 16 in 65 (1 in 65+) Full Bands, 12 finer. CAC: 11 in 65, 7 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 23HC, PCGS# 4931

- 3600 1920-S MS65 NGC. CAC.** The 1920-S is a better date in high grade, with or without a Full Bands designation. This piece is well-struck, but the horizontal fasces bands are just a touch shy of being fully separated. Glistening luster adorns each side, and there are wisps of champagne toning on the obverse. Census: 18 in 65, 9 finer. CAC: 6 in 65, 0 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 23HD, PCGS# 4932

- 3601 1920-S MS65 NGC. CAC.** A lovely, lustrous Gem example of this conditionally elusive San Francisco issue, showing unabraded, frosty surfaces with hints of champagne toning. The strike is bold, although the fasces bands are just shy of full definition. Census: 18 in 65, 9 finer. CAC: 6 in 65, 0 finer (4/16).
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 23HD, PCGS# 4932

- 3602 1920-S MS64 Full Bands PCGS Secure.** This Choice Full Bands example is sharply struck with satiny luster and light golden toning. There are no major abrasions. A loupe reveals parallel die striations in the fields, indicative of lapped dies. Finer Full Bands examples are elusive. NGC ID# 23HD, PCGS# 4933

**1921 Dime, MS64 Full Bands
Elusive CAC Endorsement**

- 3603 1921 MS64 Full Bands PCGS Secure. CAC.** A frosty, champagne-tinted 1921 Mercury dime with a bold strike and exceptional eye appeal. A single small tick on Liberty's neck is all that precludes a Gem grade. After the 1916-D, the 1921 and '21-D are the biggest keys in the series. This CAC-endorsed Choice 1921 will fit in well with a Gem or near-Gem collection. CAC: 11 in 64, 32 finer (4/16). NGC ID# 23HE, PCGS# 4935

**1921-D Dime, MS65
Nearly Full Bands**

- 3604 1921-D MS65 NGC. CAC.** A lovely Gem example of this key Denver issue, even if the fasces bands are not fully rounded. Linear separation of the bands is nearly complete. This CAC coin displays satiny luster with a brilliant reverse and wisps olive-green toning over the obverse. There are no mentionable abrasions. Census: 14 in 65, 10 finer. CAC: 5 in 65, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HF, PCGS# 4936

- 3605 1921-D MS62 Full Bands NGC.** A satiny, golden-toned Mint State Full Bands example of this key Mercury dime issue, showing bold detail and softly lustrous fields. Light handling marks are all that preclude a finer grade. The 1921-D boasts a small mintage of barely more than 1 million coins, the second-lowest in the series. NGC ID# 23HF, PCGS# 4937

**1921-D Mercury Dime, MS64 Full Bands
Iridescent Multicolor Toning**

- 3606 1921-D MS64 Full Bands PCGS.** From a low mintage of just over 1 million pieces, the 1921-D Mercury dime is a scarce issue in MS64 Full Bands. The present coin is sharply detailed in most areas, but exhibits some typical softness on the peripheral devices. The outstanding feature of this Choice Mint State specimen is the vivid gold, ice-blue, sea-green, violet, russet, and frosty yellow patina that blankets the lustrous reverse. NGC ID# 23HF, PCGS# 4937

**1923-S Dime, MS65 Full Bands
Only One Coin Finer at NGC**

- 3607 1923-S MS65 Full Bands NGC.** A sharp, eye-appealing Gem Full Bands example of this slightly better San Francisco issue. Wisps of champagne toning accent otherwise brilliant surfaces, and the eye appeal is pleasing. Finer examples are rarely seen, and even in this grade, the 1923-S is elusive. Census: 14 in 65 Full Bands, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HH, PCGS# 4941

- 3608 1924-D MS66 Full Bands NGC. CAC.** A frosty, brilliant Premium Gem example, showing a bold strike and exuberant eye appeal. The 1924-D Mercury dime is scarce in this high of a grade, but CAC endorsed coins are rare at this level. Census: 31 in 66 (1 in 66+) Full Bands, 6 finer. CAC: 6 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HK, PCGS# 4945

- 3609 1924-D MS66 Full Bands NGC. CAC.** Frosty, untuned luster rolls over the Premium Gem-quality surfaces and bold design elements of this 1924-D Mercury dime. Eye appeal is exemplary, and few finer coins are known. Census: 29 in 66 (1 in 66+) Full Bands, 6 finer. CAC: 6 in 66, None finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HK, PCGS# 4945

- 3610 1924-S MS65 NGC. CAC.** The sole second-finest non-Full Bands 1924-S dime at CAC. This brilliant, frosty Gem displays an overall bold strike but with localized weakness on the fasces bands. Eye appeal is pleasing. Finer coins are rare. Census: 21 in 65, 6 finer. CAC: 1 in 65, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HL, PCGS# 4946

3611 1926 MS66+ Full Bands PCGS. CAC. This Plus-graded Premium Gem exhibits unusually sharp definition on the design elements, including full split bands on the fasces. The impeccably preserved surfaces radiate vibrant mint luster, with a few hints of greenish-gold toning. PCGS has graded 24 numerically finer examples (5/16). NGC ID# 23HR, PCGS# 4955

**1926-S Dime, Frosty MS65
Elusive This Fine**

3612 1926-S MS65 NGC. CAC. Glistening, frosty luster illuminates the unabraded surfaces of this Gem 1926-S Mercury dime. This issue is scarce in Full Bands, and the present coin displays typical weakness on the fasces. Hints of golden toning appear around the outer peripheries, but most of each side is brilliant. Census: 17 in 65, 8 finer. CAC: 1 in 65, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HT, PCGS# 4958

**1926-S Mercury Dime, MS64 Full Bands
Nice Luster, Mellow Toning**

3613 1926-S MS64 Full Bands PCGS. This attractive Choice Mercury dime exhibits sharply detailed design elements with fully split and rounded bands on the fasces. The lustrous surfaces show only scattered, minor contact marks and hints of sea-green and amber toning. The 1926-S is seldom encountered in higher grades, with the Full Bands designation. Population: 47 in 64 Full Bands, 37 finer (4/16). NGC ID# 5LX7, PCGS# 4959

3614 1927-D MS66 NGC. CAC. An impressively sharp 1927-D dime, save for slight localized weakness on the fasces bands. This Premium Gem CAC coin is ideal for the collector seeking a bold strike without shelling out the big bucks on a Full Bands example. The surfaces are brilliant and frosty and highly eye-appealing. Census: 8 in 66, 0 finer. CAC: 3 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HV, PCGS# 4962

3615 1928-D MS66 NGC. CAC. As most collectors clamor for the Full Bands representatives, this conditionally rare non-Full Bands Premium Gem remains relatively affordable for the astute specialist. The central high points are slightly soft, but the strike is otherwise pleasing. Brilliant surfaces display frosty luster. Census: 5 in 66, 7 finer. CAC: 1 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HY, PCGS# 4968

3616 1928-D MS65 Full Bands NGC. The 1928-D is a challenging issue in high-grade Full Bands. This Gem is boldly struck and displays frosty luster with a hint of light champagne toning. A faint graze on Liberty's cheek is all that precludes a finer grade. Census: 20 in 65 Full Bands, 17 finer (5/16). NGC ID# 23HY, PCGS# 4969

3617 1928-S MS65 Full Bands PCGS. This delightful Gem Mercury dime displays sharply detailed design elements throughout, including Full Bands definition on the fasces. The well-preserved surfaces radiate vibrant mint luster with outstanding eye appeal. Population: 67 in 65 Full Bands, 46 finer (5/16). NGC ID# 23HZ, PCGS# 4971

3618 1929-D MS67 Full Bands NGC. CAC. Very few Superb Gem Full Bands coins are certified at NGC. This CAC coin displays a full strike and beautifully preserved surfaces. Frosty, untuned luster gives this coin stellar eye appeal. None are finer at NGC. Census: 5 in 67 (1 in 67★) Full Bands, 0 finer. CAC: 15 in 67, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5LXC, PCGS# 4975

3619 1930 MS66 Full Bands PCGS. CAC. This spectacular Premium Gem Mercury dime exhibits immaculate brilliant surfaces, with vibrant mint luster on both sides. The design elements are sharply detailed, with Full Bands definition on the fasces, and eye appeal is terrific. PCGS has graded 18 numerically finer examples (4/16). NGC ID# 23J5, PCGS# 4979

3620 1935-D MS67 Full Bands PCGS. Vivid shades of sea-green, lilac, and amber toning visit the impeccably preserved, lustrous surfaces of this spectacular Superb Gem. The design elements are sharply detailed, with Full Bands definition on the fasces. Population: 44 in 67 Full Bands, 0 finer (5/16). NGC ID# 23JD, PCGS# 4995

**1938-S Dime, MS67+ Full Bands
Brilliant and High End**

3621 1938-S MS67+ Full Bands PCGS. CAC. This stunning Superb Gem earned both the PCGS Plus designation and CAC endorsement, awards that place the coin among the elite of this San Francisco issue and a viable Registry Set candidate. The strike is comprehensively sharp with full bands on the reverse. A few tiny ticks appear on the diagonals. This brilliant and untuned silver dime displays excellent eye appeal, and is rarely found better. PCGS reports only certified six finer examples, a situation that has not changed in the past several years. Population: 7 in 67+ Full Bands, 6 finer. CAC: 43 in 67, None finer (5/16). NGC ID# 23JP, PCGS# 5015

1939-D Mercury Dime, MS68 Full Bnds

- 3622 1939-D MS68 Full Bands PCGS. CAC.** The 1939-D is an available date in Full Bands, ideal for type purposes. This remarkable MS68 Full Bands example displays a bold strike and seemingly flawless, frosty surfaces. Both sides displays areas of vivid multicolor toning, and the eye appeal is exceptional. CAC-endorsed in a green label holder. CAC: 63 in 68, 1 finer (4/16). NGC ID# 23JS, PCGS# 5019

- 3623 1942/1 FS-101 AU58 NGC.** Just the slightest trace of wear shows on the sharply detailed design elements of this incredibly popular overdate. The lightly abraded surfaces retain much of their original mint luster and highlights of pale gold toning add to the strong eye appeal. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

- 3624 1945-S MS67+ Full Bands PCGS. CAC.** This Plus-graded Superb Gem exhibits razor-sharp definition throughout, with fully separate and rounded bands on the fasces. The virtually pristine surfaces are brightly lustrous and overall eye appeal is extraordinary. PCGS has graded four numerically finer examples (5/16). NGC ID# 23KG, PCGS# 5061

PROOF MERCURY DIMES

- 3625 1936 PR66 NGC.** A spectacular Premium Gem from a mintage of 4,130 pieces, this coin exhibits sharply detailed design elements throughout and the fields are brightly reflective. A few hints of greenish-gold toning add to the outstanding eye appeal. NGC ID# 27DG, PCGS# 5071

- 3626 1936 PR66 PCGS. CAC.** A spectacular Premium Gem from a proof mintage of 4,130 pieces, this coin exhibits sharply detailed design elements and deeply mirrored brilliant fields. Finer examples are elusive.
Ex: New York Signature (Heritage, 11/2013), lot 3343. NGC ID# 27DG, PCGS# 5071

- 3627 1936 PR66 PCGS. CAC.** Gleaming, fully mirrored surfaces deliver blinding brilliance on this Premium Gem 1936 proof Mercury dime. The strike is full, and the preservation is largely flawless. Finer examples of the debut Mercury dime proof are scarce. NGC ID# 27DG, PCGS# 5071

1941 Mercury Dime, Immaculate PR68 None Finer at PCGS

- 3628 1941 PR68 PCGS.** An incredible, deeply reflective example from the next-to-last year of Mercury dime proofs. Gleaming mirrors are brilliant overall with a hint of reddish-gold toning at the margins. The strike is unsurprisingly full on Liberty's portrait and the fasces, as well as the surrounding legends. Glassy surfaces give this memorable dime the illusion of concave fields with extra-dimensional central motifs. Population: 25 in 68, 0 finer (5/16).
Ex: Houston Signature (Heritage, 12/2008), lot 1203; The Joshua II Collection of Mercury Dimes (Heritage, 8/2010), lot 4573. NGC ID# 27DM, PCGS# 5076

1942 Dime, PR68 Stunning Obverse Toning

- 3629 1942 PR68 NGC. CAC.** The obverse is elegantly toned in blue, violet, and magenta hues surrounding the gleaming center, while the reverse is mostly brilliant with amber-gold rims. The surfaces of this Superb Gem are pristine and nicely mirrored with immaculate, fully struck devices. NGC reports just two finer submissions, and PCGS has seen only one higher-graded example (5/16). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

- 3630 1950-S Over Inverted S, FS-501, MS67+ PCGS.** 30th Anniversary Green Label Holder. Formerly regarded as a 1950-S/D variety, but the current consensus is that the mintmark was entered inverted, then repunched in the proper position. Lustrous and well preserved with dappled tan-gold and olive-green toning. As of (4/16), PCGS has certified a total of 63 pieces, with the present coin as the single finest. NGC ID# 23KZ, PCGS# 38904 Base PCGS# 5096

1955-S Dime, MS67 Full Bands
Top-Grade Registry Coin

- 3631 1955-S MS67 Full Bands PCGS.** This Registry-grade 1955-S Roosevelt dime is tied with seven others as the finest in Full Bands at PCGS (4/16). Some metal flow lines in the fields and a thin radial die on the reverse at 5 o'clock indicate a late die state, but the strike is nonetheless bold. Wisps of tan-gold toning accent the frosty surfaces. NGC ID# 23LG, PCGS# 85111

TWENTY CENT PIECES

- 3632 1875 MS64 PCGS. BF-1, R.1.** Dusky golden-gray, violet, and green patina swatches this Choice first-year twenty cent coin, one of only 38,500 pieces struck at the Philadelphia Mint in 1875. The stars, shield, and drapery are boldly defined, as are the eagle's talons and feathers. Population: 67 in 64 (3 in 64+), 29 finer (4/16). NGC ID# 23R5, PCGS# 5296
- 3633 1875-CC AU58 PCGS.** The 1875-CC twenty cent piece is the only collectible issue of the short-lived series from the famous Western mint. This attractive near-Mint specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces are blanketed in shades of lavender and golden-brown toning. NGC ID# 23R6, PCGS# 5297
- 3634 1875-CC MS62 PCGS. BF-2, R.1.** Satiny luster illuminates olive-gold toning on this Mint State 1875-CC twenty cent piece, giving it pleasing eye appeal for the grade. Some minor strike weakness is seen on the central high points as well as the upper edge of the eagle's left (facing) wing. NGC ID# 23R6, PCGS# 5297

1876 BF-1 Twenty Cent, Rare MS63 Prooflike
One of Just Four Prooflikes Certified

- 3635 1876 MS63 Prooflike NGC. BF-1, R.4 as a Business Strike.** Two die marriages are listed for the 1876 twenty cent pieces — BF-1, which is the scarcer variety, and BF-2, which shows a more-centered (higher) date. The current coin is the seldom-seen, low-date BF-1 die pair. Brunner and Frost suggest no more than 10% of the 1876 business strikes are of the BF-1 variety.
- Nor is the coin a proof. Our auction archive confirms the date is further left on proofs, so this coin is indeed a business strike (although our consignor may have thought it was a proof when he assembled his collection many decades ago). So the present "double dime" is doubly rare — it is a very scarce variety, as well as a rare business strike with certified Prooflike finish. Colorfully toned in rainbow hues on both sides, the coin ranks second among the known prooflikes. A few light abrasions determine the numeric grade. Just four pieces are reported as prooflike by NGC including this example. Census: 2 in 63 Prooflike, 1 finer (4/16).
- From The Rev. Dr. James G. K. McClure Collection. PCGS# 85299 Base PCGS# 5299*

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR63
Original Toning

- 3636 1875 PR63 NGC. BF-1, R.1.** Original lavender-gray and champagne hues encompass the mirrored fields of this Select 1875 proof twenty cent piece, masking a few scattered marks and hairlines, which determine the grade. The strike is bold, and eye appeal is pleasing for the PR63 level. The debut proof of the short-lived twenty cent series had a mintage of 1,200 coins. All four issues in the proof series are readily collectible. NGC ID# 27GZ, PCGS# 5303
- 3637 1876 PR61 NGC. CAC. BF-2.** Attractively toned (and CAC-endorsed as a result), this lower-grade proof shows many small marks and abrasions as if it served as a pocket piece or possibly was plucked from brief circulation. Nevertheless, the mirrored fields are intact and the coin acquired delightful rainbow colors during its long tenure in the McClure Collection. Slight weakness at some of the star centers is noted.
- From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27H3, PCGS# 5304*

End of Session One

SESSION TWO

EARLY QUARTERS

1796 Draped Bust Quarter, AG Details Popular One-Year Type Issue

3638 1796 B-2, R.3 — Holed — NGC Details. AG. From the first year of the denomination, the 1796 Draped Bust, Small Eagle quarter is the only issue of its design type. Examples in all grades and conditions are prized by type collectors and series specialists alike. This well-worn example represents the B-2 variety, with a high 6 in the date. Much design detail has been worn smooth on this light gray specimen, but no large or distracting abrasions are evident, aside from the noted hole at 12 o'clock on the obverse.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

3639 1804 B-1, R.3, AG3 NGC. The obverse has full legends and well-outlined stars. On the reverse, STATES OF and the stars are bold, while portions of UNITED and AMERICA are worn away. The obverse displays vertical hairlines but there are no remotely mentionable marks.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

3640 1804 B-1, R.3 — Reverse Scratched — NGC Details. AG. A stone-gray and straw-gold example of this heralded rarity. Only 6,738 pieces were struck for the first year of the Heraldic Eagle type. The reverse exhibits five parallel pinscratches but no other marks are consequential. The date, LIBERTY, and UNITED STATES OF are bold. The stars near 3 o'clock, the denomination, and the final letters in AMERICA are well-worn.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

3641 1805 B-4, Low R.4, VF25 PCGS. The field stars were struck from a larger-than-normal punch, and field star 4 is entirely missing on this VF example, although all of the other stars are present. The motto is soft at UNUM as expected for the grade and — as always for the B-4 variety — the shield is weakly struck. Deep brownish-gray patina complements the light silver-gray toning on the smoothly worn, raised devices. Some granularity is evident at the margins, yet this richly toned quarter displays considerable appeal for the grade. NGC ID# 23RC, PCGS# 38926 Base PCGS# 5313

BUST QUARTERS

1818 B-8 Quarter, MS61 Lightly Toned Capped Bust Type Coin

3642 1818 B-8, R.3, MS61 NGC. Tompkins Die State 1/1, unclashed. Satiny luster resides beneath light golden-gray toning on this Mint State 1818 Capped Bust quarter. The strike is even and bold, and the reverse is rotated about 45 degrees counterclockwise. Light surface chatter limits the grade but there are no severe abrasions. Ideal for type representation. NGC ID# 23RH, PCGS# 38949 Base PCGS# 5322

3643 1818 B-9, High R.5, VG10 NGC. CAC. A die line from star 2, a repunched U in UNITED, and a radial crack through the N in UNITED identify the rare Browning-9 variety. Tan-brown and cream-gray toning blends across this unblemished Capped Bust quarter. E PLURIBUS UNUM is readable, although several letters are faint. The remaining legends are bold.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RH, PCGS# 38950 Base PCGS# 5322

3644 1821 B-2, High R.4, XF45 NGC. Iridescent plum-red, caramel-gold, and aquamarine toning encompasses this unmarked and moderately circulated quarter. A very scarcer variety, Browning-2 is similar to the more available B-1 but has a small 5 in 25 C. NGC ID# 23RM, PCGS# 38964 Base PCGS# 5331

3645 1824/2 B-1, R.3 — Improperly Cleaned — NGC Details. Fine. Only a single die marriage is known for this much better Capped Bust date. This cream-gray representative has a strike-through near the final star but lacks any noticeable marks. Hairlines emerge beneath a lens.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

3646 1828 B-4, R.3, AU53 PCGS. An outstanding Large Size Capped Bust quarter type coin, showing gunmetal-gray, blue-green, and gold toning on each side with sharp central devices. Very light wear over the high points of the design is all that precludes a Mint State designation. Uncirculated 1828 quarters are seldom seen. NGC ID# 4E5B, PCGS# 38978 Base PCGS# 5342

3647 1831 Small Letters, B-4, R.1, AU58 ANACS. This B-4 1831 quarter is virtually unworn, but a trace of high-point friction on Liberty's cheek prevents a Mint State designation. Each side shows deep olive-gray, blue, and gold toning intermingled in the fields, which slightly mutes any remaining luster. A problem-free coin for the collectors who appreciate that old-time look. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

**1831 Quarter, Pleasing MS62
B-4, Small Letters**

- 3648 1831 Small Letters, B-4, R.1, MS62 PCGS.** Tompkins Die State 1/2. Star 13 is close to the curl, differentiating this B-4 example from the similar but very scarce B-3 variety where the star is distant from the curl. Both varieties share the same reverse, with the 5 in the denomination visibly recut. Blue border toning melds with golden-gray shades and soft mint luster for a pleasing, album-toned appearance. The strike is sharp except at the top fold of the cap, and only a few light obverse abrasions including a short scrape above the date determine the grade. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

- 3649 1831 Large Letters, B-6, R.3, AU58 PCGS.** Tompkins Die State 1/1. A bluish-gray splash of toning crosses Liberty's neck, with golden-gray shades covering the rest of the obverse. Gunmetal-blue toning at the reverse margin yields to rose-gray shades at the center. The Browning-6 variety displays Large Letters and Large (Thin) Arrowheads on the reverse, with the second 1 of the date partially beneath the curl above. Mint luster remains beneath the toning of this nearly Uncirculated Bust quarter. Population (all Large Letters varieties): 11 in 58, 31 finer (4/16). NGC ID# 23RW, PCGS# 38985 Base PCGS# 5349

- 3650 1836 B-5, High R.6, PCGS Genuine.** Browning 5 is by far the rarest of the five 1836 quarter die marriages. This piece has a PCGS number ending in .92, suggesting Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been polished. Wear is even, and the design elements are slightly glossy. Each side shows bright steel-gray color with bits of olive toning in the fields. NGC ID# 23S3, PCGS# 39009 Base PCGS# 5355

SEATED QUARTERS

**1840-O No Drapery Quarter, MS62
Short-Lived Type**

- 3651 1840-O No Drapery MS62 PCGS.** Briggs 2-B, Flynn RPD-002. The 0 in the date is lightly recut on this variety. The 1840-O No Drapery quarter is the scarcest No Drapery issue in high grade. This Mint State coin displays satiny luster and a hint of golden-gray toning. The obverse border is poorly defined, but the central devices are sharp. Light, scattered abrasions limit the grade. Population: 7 in 62, 7 finer (4/16). NGC ID# 23SG, PCGS# 5393

**1842-O Seated Liberty Quarter, XF Details
Small Date Guide Book Variety**

- 3652 1842-O Small Date — Improperly Cleaned — NGC Details.** XF. Briggs 1-A. The 1842-O Small Date quarter is much more difficult to locate than its Large Date counterpart. Most examples seen are in lower circulated grades, and only two specimens have been certified in Mint State, an MS61 at PCGS and an MS63 at NGC (4/16). This attractive specimen shows only light wear on the design elements and the surfaces are lightly abraded, under shades of lavender-gray and golden-tan toning. Mint luster is muted by the effects of a light cleaning in the past. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23SN, PCGS# 5403

- 3653 1845 MS64+ NGC.** CAC. Dappled violet, green, and gold patina appears throughout this lovely near-Gem quarter — an unquestionable mark of originality. Liberty's head, the stars, and the eagle are boldly rendered. Well-preserved with a couple of marks over Liberty. Die cracks appear on both sides. Census: 20 in 64 (2 in 64+), 8 finer. CAC: 7 in 64, 1 finer (5/16). NGC ID# 23SV, PCGS# 5408

- 3654 1853/53 No Arrows, Briggs 1-A, FS-301 — Environmental Damage — PCGS Genuine. Fine Details.** The No Arrows 1853 Seated quarter is scarce in all grades, boasting a small mintage of only 44,200 coins. This VG-level example displays bright steel-gray surfaces with faint evidence of granularity that precludes a numeric designation. Only the L in LIBERTY is not clear. This coin will fill the hole in a budget-friendly collection. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

- 3655 1854 Arrows MS64 PCGS.** A brilliant and frosty near-Gem example of the two-year type, untuned save for a pinpoint, deeply toned spot beneath the flag of the 5 in the date. Lustrous with a razor-sharp strike despite extensive die cracks and die clashing on both sides. More than 12 million pieces were struck, yet PCGS reports fewer than 100 near-Gem or finer examples. Population: 69 in 64 (1 in 64+), 28 finer (4/16). NGC ID# 23U6, PCGS# 5432

- 3656 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS.** The antithesis of a variety such as the 1892-O Micro O half dollar; here the gigantic mintmark is too large, with a misshapen and obviously hand-worked O that bulges markedly on the left side. This slate-gray piece shows light-gray high points, expected wear, and relatively minor marks. Always in demand. Population: 6 in 20, 34 finer (5/16). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1856 Quarter, MS66
None Certified Finer**

- 3657 1856 MS66 PCGS.** Rich russet-red and navy-blue toning embraces the margins of this lustrous and nearly immaculate No Motto quarter. Well-struck and desirable. The die variety is unlisted in Briggs, nonetheless, it is interesting for its faint tail feathers and many spindly obverse cracks. Unimprovable at either leading service. Population: 11 in 66, 0 finer (5/16). NGC ID# 23TB, PCGS# 5438

3658 1857 MS65 PCGS. Lightly toned with wisps of chestnut-brown patina near the borders. The centers are typically struck, but the surfaces are free from detrimental contact. Housed in a green label holder.
Ex: Atlanta Signature (Heritage, 8/2001), lot 5890; FUN Signature (Heritage, 1/2003), lot 6680; Central States Signature (Heritage, 5/2003), lot 874. NGC ID# 23TE, PCGS# 5442

3659 1858 MS64+ PCGS. Nearly brilliant with satiny luster and minimal abrasions, this high-end near-Gem 1858 quarter will appeal to many type collectors. Weakness on the high points of the devices is noted. Finer examples are infrequently seen. NGC ID# 23TH, PCGS# 5445

3660 1858-S XF40 ANACS. Moderate wear is appropriate for the assigned grade, although the eye appeal and delightful toning gives the impression of a finer coin. Variegated shades of orange, blue, and olive-gold provide both sides with a natural, time-earned patina. Hints of mint luster remain beneath the toning. There are no distracting marks or abrasions on the smooth fields or well-detailed devices. Scarce this nice. NGC ID# 23TK, PCGS# 5447

3661 1860-O MS63 PCGS. Briggs 1-A. Pearlescent-white coloration flashes champagne-gold highlights amid generous, satiny mint luster. A well-produced New Orleans issue with few marks, pleasing eye appeal, and only the slightest hint of softness near the upper portion of the obverse stars. Scarce this nice, rare any finer. Population: 34 in 63, 13 finer (5/16).
Ex: Long Beach Signature (Heritage, 9/2005), lot 2652. NGC ID# 23TR, PCGS# 5452

1861-S Seated Quarter, AU Details Challenging S-Mint in Any Grade

3662 1861-S — Improperly Cleaned — NGC Details. AU. Briggs 2-B. Silver coinage virtually disappeared during the Civil War, hoarded by the public in the East and always in short supply on the West Coast, where the effects of the war were not as pronounced but small change was always hard to find. This example was cleaned at one time, retaining much of its coloration but now with a somewhat unnatural glossiness. The surfaces are smooth and nearly unmarked, showing evidence of only brief circulation. The 1861-S is unknown in Mint State and AU examples are rare, making this net-graded example an appealing alternative.

1862 Quarter, MS65+ Rich Green and Gold Patina

3663 1862 MS65+ NGC. CAC. Rich sea-green and wheat-gold toning embraces this highly lustrous and fully struck Civil War Gem. A loupe reveals only incidental contact. A series of delicate die cracks traverse the reverse periphery. The 1862 mintage was less than one-fifth the quantity struck in 1861, but was almost five times greater than the 1863 production. Quarter coinage diminished to token levels during the 1860s, driven out by unbacked paper money. Census: 10 in 65+, 12 finer. CAC: 2 in 65, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23TV, PCGS# 5456

3664 1863 MS64+ NGC. From a mintage of 191,600 pieces, the 1863 Seated Liberty quarter is seldom encountered in high grade. This sharply detailed, Plus-designated Choice example offers lustrous, well-preserved surfaces with a few hints of champagne-gold toning. Census: 12 in 64 (1 in 64+), 18 finer (4/16).
Ex: FUN Signature (Heritage, 1/2014), lot 3739. NGC ID# 23TX, PCGS# 5458

3665 1872-CC — Improperly Cleaned — NGC Details. Fine. Briggs 1-A. A silver-gray rare-date Carson City quarter. All legends are bold, and marks are minimal, but both sides are hairlined. As of (4/16), NGC has certified a total of only 28 pieces, which excludes impaired examples but likely includes several duplicate submissions.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23US, PCGS# 5482

1873 Closed 3, No Arrows Quarter, AU55 Elusive, Low-Mintage Issue

3666 1873 Closed 3 AU55 NGC. The 1873 Closed 3, No Arrows quarter had a small mintage of 40,000 coins and is scarce in all grades. This rare Choice AU example displays bright, partially lustrous surfaces with pleasing detail. Light, scattered marks are expected for the grade. Uncirculated examples of this issue are extremely rare and often show unsightly abrasions. Census: 1 in 55, 3 finer (4/16). NGC ID# 23UU, PCGS# 5484

3667 1873-S Arrows MS61 NGC. An elusive Mint State example of this slightly better San Francisco issue. The 1873-S had a mintage of 156,000 pieces, which draws a premium in all grades. This coin is well-struck with champagne-tinged satin luster. Light, scattered abrasions define the grade. Census: 3 in 61, 18 finer (4/16). NGC ID# BZMM, PCGS# 5493

3668 1876 MS65 PCGS. Type Two Reverse. Highly lustrous and well-struck with attractive dappled forest-green, rose-red, and powder-blue toning. Despite a formidable mintage, the 1876 quarter is surprisingly scarce in MS65, particularly when compared with selected low-mintage successors. Population: 47 in 65, 34 finer (4/16).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3559. NGC ID# 23V2, PCGS# 5501

3669 1877-S MS65 NGC. Gold CAC. Briggs 6-F. An available issue in lower grades, the 1877-S Seated Liberty quarter is much more difficult to locate in MS65 condition than its mintage of nearly 9 million pieces would suggest. This well-detailed Gem offers impeccably preserved, lustrous surfaces, under shades of powder-blue, greenish-gold, and lavender toning. Census: 32 in 65, 12 finer. Gold CAC: 1 in 65, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23V7, PCGS# 5506

3670 1878 MS65 NGC. Radiant frost emanates from surfaces that show alternating areas of brilliance and golden-russet toning. The motifs are well-struck, but the reverse is notably sharper than the obverse. Nearly 2.3 million P-mint quarters were struck in 1878, few of which survive so fine. Census: 9 in 65, 8 finer (4/16). NGC ID# 23V8, PCGS# 5508

1884 Seated Quarter, MS66+
Small Mintage of 8,000 Circulation Strikes

- 3671 1884 MS66+ PCGS. CAC. Briggs 1-A.** Frosty luster cartwheels over surfaces that feature mostly brilliant centers with blushes of original copper-russet toning. The design elements exhibit crisp detail with a hint of softness limited to the upper stars. Close examination with a loupe fails to yield any mentionable impairments aside from an expected number of minuscule ticks. The left base of the 1 in the date is centered over the space between two dentils, distinguishing this circulation strike from a proof. Only 8,000 circulation strikes were manufactured along with 875 proofs. Population: 27 in 66 (4 in 66+), 15 finer. CAC: 8 in 66, 4 finer (5/16). NGC ID# 23VG, PCGS# 5516

1885 Quarter, Prooflike MS66
Obverse Cameo Contrast

- 3672 1885 MS66 PCGS. CAC.** This sharp, prooflike Premium Gem 1885 quarter displays noticeable cameo contrast on the obverse, while the reverse is more deeply toned in lavender and aquamarine hues. There are no mentionable abrasions, only a few tiny ticks in the right obverse field. Prooflike circulation strikes of this period are not unusual given the low mintages. The 1885 had a production total of just 13,600 pieces. Population: 33 in 66 (10 in 66+), 8 finer. CAC: 4 in 66, 3 finer (4/16). NGC ID# 23VH, PCGS# 5517

- 3673 1889 MS65 PCGS. CAC.** A token quantity of 12,000 quarters was produced 1889, following a trend set throughout the 1880s. This gorgeously toned and frosty Gem features mixed rainbow patina around the rims, ceding to mostly brilliant centers. Well-detailed and highly appealing. NGC ID# 23VM, PCGS# 5522

- 3674 1891-S MS66 PCGS.** Attractive original patina clings to the margins in shades of green, blue, russet, and crimson, leaving the centers brilliant with pale blushes of ivory. Coruscating mint luster generates tremendous eye appeal. This final-year quarter is well-struck with trivial softness on the olive leaves. Population: 5 in 66, 2 finer (5/16). NGC ID# 23VT, PCGS# 5526

PROOF SEATED QUARTERS

- 3675 1859 PR64 PCGS. Briggs 1-A.** Type Two Obverse. Type One Reverse. Lovely golden-brown and ice-blue toning adorns the obverse border. The reverse offers similar but more delicate patina. Precisely struck and flashy with scattered minor hairlines. Ex: *New York Signature (Heritage, 6/2005)*, lot 5521, which realized \$1,725. NGC ID# 23WL, PCGS# 5555

- 3676 1864 PR64+ PCGS. Briggs 3-C.** Jade-green fields and apricot-gold borders ensure the eye appeal of this intricately struck high-end near-Gem. The reflective surfaces show only delicate signs of contact. Just 470 proofs were produced for this Civil War date. NGC ID# 23WS, PCGS# 5560

- 3677 1865 PR64+ NGC. CAC. Briggs 3-B.** A fully struck, reflective 1865 proof quarter with modest cameo contrast on the obverse. The fields around Liberty's figure display vivid sun-gold, violet, and blue toning, while the reverse mirrors have more subtle lavender-gold tinting. Census: 41 in 64 (1 in 64+), 36 finer. CAC: 1 in 64, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WT, PCGS# 5561

- 3678 1866 Motto PR64+ NGC. CAC. Briggs 2-B.** Deep, original toning bathes this high-end Choice proof 1866 With Motto quarter in violet, ocean-blue, and mint-gold hues. Reflective fields come alive when tilted beneath a light, and the strike is fully rendered. Census: 45 in 64 (2 in 64+), 36 finer. CAC: 3 in 64, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WX, PCGS# 5565

1866 With Motto Quarter, PR65
Pleasing Original Toning

- 3679 1866 Motto PR65 NGC. CAC. Briggs 2-B.** All collectible 1866 proof quarters are of the With Motto type. This Gem CAC example is modestly contrasted beneath vivid sun-gold, violet, and lavender-blue toning. The strike is bold, and only a few minor hairlines preclude a finer grade. The 1866 proof is scarce in PR65 and is rarely seen finer. Census: 23 in 65 (1 in 65★), 13 finer. CAC: 6 in 65, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WX, PCGS# 5565

- 3680 1867 PR65 NGC. Briggs 2-B.** Champagne-gold and lavender hues adorn the mirrored fields of this Gem proof 1867 Seated quarter, while the frosty design elements are fully struck. A hint of cameo contrast on the obverse is seen beneath the patina. The 1867 proof is elusive this fine and rarely seen finer. Census: 26 in 65, 23 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WY, PCGS# 5566

- 3681 1867 PR65 NGC. CAC. Briggs 2-B.** Aquamarine, gold, and lavender hues adorn the mirrored fields of this Gem 1867 proof quarter, while the frosty design elements are fully struck. A hint of cameo contrast on the obverse is seen beneath the patina. The 1867 proof is elusive this fine and rarely seen finer. Census: 26 in 65, 23 finer. CAC: 6 in 65, 6 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WY, PCGS# 5566

- 3682 1868 PR65 NGC. Briggs 2-B.** Sharply detailed on the obverse, this attractive Gem shows just a touch of softness on the eagle's leg. The well-preserved surfaces are blanketed in iridescent shades of emerald-green toning, with deeply mirrored fields underneath. Census: 18 in 65 (1 in 65★), 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WZ, PCGS# 5567

- 3683 1868 PR63 Cameo PCGS. CAC. Briggs 2-B, Flynn-RPD-001.** The 1 in the date is faintly recut on this proof die pair. The present Select Cameo displays modest contrast and a blush of light golden toning. The strike is bold. Scattered hairlines in the fields limit the grade. Population: 8 in 63 Cameo, 17 finer. CAC: 2 in 63, 5 finer (5/16). NGC ID# 23WZ, PCGS# 85567

- 3684 1869 PR64+ NGC. CAC. Briggs 2-B.** Autumn-gold toning graces the fields of this precisely struck and nicely mirrored near-Gem. The reverse border displays powder-blue and lavender shades. No hairlines are readily evident, and the eye appeal is superior for the third-party grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 29SH, PCGS# 5568

3685 1870 PR65 NGC. Briggs 2-B. Shades of pale greenish-gold toning mix with vivid hues of cerulean-blue on the well-preserved surfaces of this impressive Gem. Razor-sharp definition is evident on all design elements and the fields are deeply mirrored throughout. Census: 16 in 65, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X3, PCGS# 5569

3686 1870 PR65 NGC. Briggs 2-B. The vivid emerald-green centers of this delightful Gem yield to iridescent hues of cerulean-blue at the peripheries. No mentionable distractions are evident and the sharply detailed design elements rest on deeply reflective fields. Census: 16 in 65, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X3, PCGS# 5569

3687 1870 PR64 Cameo PCGS. CAC. Briggs 2-B. Cameo 1870 proof quarters are elusive in all grades. This median-level example displays a razor-sharp strike and untuned surfaces with frost-white design elements that just glisten against the mirrored fields. Population: 31 in 64 (1 in 64+) Cameo, 8 finer. CAC: 7 in 64, 5 finer (5/16). NGC ID# 29XD, PCGS# 85569

1871 Seated Liberty Quarter, PR65 Vivid Multicolor Toning

3688 1871 PR65 NGC. CAC. Briggs 1-A. The well-preserved surfaces of this delightful Gem are blanketed in vivid shades of golden-brown and cobalt-blue toning, with sharply detailed design elements and deeply reflective fields underneath. Overall eye appeal is terrific. From a proof mintage of 960 pieces. Census: 13 in 65 (1 in 65★), 13 finer. CAC: 6 in 65, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X4, PCGS# 5570

3689 1871 PR64 Cameo PCGS. Briggs 1-A. An attractive Choice example, with sharply detailed design elements and deeply mirrored fields that provide intense cameo contrast with the frosty devices. The well-preserved surfaces show hints of pale gold toning. Population: 11 in 64 (2 in 64+) Cameo, 9 finer (5/16). NGC ID# 23X4, PCGS# 85570

3690 1872 PR64 NGC. Briggs 3-C. High-grade 1872 quarters are considerably more available in proof format than as business strikes, putting pressure on near-Gem or finer proofs. This PR64 example shows a few delicate lines in the fields, yet the eye appeal and original patina make it a prime attraction for Seated quarter specialists. The strike is sharp on both sides while blue accents at the rims enhance the Choice, gold-toned mirrored surfaces. Census: 50 in 64 (1 in 64+), 38 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3TWH, PCGS# 5571

3691 1873 No Arrows PR65 NGC. Briggs 1-A. All Closed 3, No Arrows quarters are in great demand as business strikes in grades exceeding About Uncirculated. Proofs are generally available, but they command a premium as well — especially in Gem or finer grades. This glittering, sun-gold example is sharp and original, with frosted devices set against mirrored fields. There are no significant distractions and a Cameo designation may be in the offing at some point in time. Census: 23 in 65 (1 in 65+), 13 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X6, PCGS# 5572

3692 1874 Arrows PR63 Cameo PCGS. Briggs 6-E. An attractive Select proof, from a mintage of 850 pieces, this coin features sharply detailed, richly frosted design elements that contrast boldly with the deeply mirrored fields. A few minor hairlines and contact marks are mostly lost in the light greenish-gold toning. Population: 7 in 63 Cameo, 39 finer (5/16). NGC ID# 23XS, PCGS# 85575

3693 1875 PR65+ NGC. CAC. Briggs 4-E. Type One Reverse. Butter-gold fields cede to ruby-red and navy-blue margins. The left-side stars are lightly brought up, but the remainder of the strike is good. A scant 700 proofs were coined.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X7, PCGS# 5576

1876 Seated Liberty Quarter, PR66 Sharply Detailed and Well-Preserved

3694 1876 PR66 NGC. Briggs 9-J. A die lump on the reverse rim below the left base of L in DOL identifies the Briggs 9-J variety. This impressive Premium Gem exhibits razor-sharp definition on all design elements, with well-preserved surfaces and deeply reflective fields. Medium intensity greenish-gold toning adds to the outstanding eye appeal. Census: 17 in 66, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3TWJ, PCGS# 5577

1876 Seated Quarter, PR66 Type One Reverse Sea-Green Toning

3695 1876 PR66 PCGS. CAC. Briggs 8-H. Type One Reverse. Proofs of both reverse subtypes are known. This attractively patinated Premium Gem exhibits sea-green fields and an orange-red obverse periphery. The strike is needle-sharp and the fields appear devoid of imperfections. The specialist-familiar reverse die with a brief die scratch (as made) on the left shield border. NGC ID# 3TWJ, PCGS# 5577

1876 Seated Liberty Quarter, PR66+ Cameo Rarely Seen Finer

3696 1876 PR66+ Cameo PCGS. CAC. Briggs 9-J. A fairly generous mintage of 1,410 proof Seated Liberty quarters was struck in 1876, probably in anticipation of increased collector demand for this centennial issue. This Plus-graded Premium Gem displays sharply rendered design elements and deeply mirrored fields with dramatic field/device contrast. The well-preserved surfaces show a few hints of pale gold toning. Population: 4 in 66 (1 in 66+) Cameo, 2 finer. CAC: 4 in 66, 1 finer (5/16). NGC ID# 23X8, PCGS# 85577

3697 1877 PR65 NGC. Briggs 1-A. A vibrantly toned Gem proof, draped in violet and azure-blue shades in a swath through the obverse center, surrounded by kelly-green and lemon-yellow hues at the border. Lavender toning embraces peach-gold shades on the reverse. Both sides of this impressive proof are sharply struck. A few lines emerge from the toning or an even finer grade would be in order. Census: 20 in 65, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X9, PCGS# 5578

3698 1877 PR65 NGC. Briggs 1-A. Aside from a few glimpses of blue toning at the rims, this nicely mirrored Gem 1877 quarter radiates brassy-gold color. The proof-quality strike is unfailingly sharp on both sides. The fields retain their original reflectivity while the raised devices are frosty, although contrast is limited by the consistent toning. A Gem coin in every sense of the word. Census: 20 in 65, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23X9, PCGS# 5578

3699 1878 PR65+ NGC. CAC. Briggs 4-D. Type Two Reverse. This well struck and satiny Gem provides dusky golden-brown, violet-red, and electric-blue patination. 1878 is another proof date with both Type One and Type Two Reverse varieties, due to a holdover Type One Reverse die in intermittent use since 1872.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XA, PCGS# 5579

3700 1879 PR66 NGC. Briggs 2-B. Struck from the same reverse used for the 1878 proofs, although the die was rusted with small lumps in the reflective shield stripes. Other proofs for 1879 used a reverse from 1872. Sun-gold toning covers both sides, deepening slightly at the rims. The fields on both sides show deep reflectivity and the motifs are fully struck including the star centers. An attractive Premium Gem example — few proofs are finer. Census: 24 in 66 (2 in 66★), 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XB, PCGS# 5580

3701 1879 PR64 Cameo PCGS. Briggs 2-B. Type Two Reverse. Blue and violet peripheries blend to light golden interiors on this Choice Cameo proof 1879 Seated quarter. The strike is sharp, and the fields are deeply mirrored. Field-motif contrast is readily apparent. The 1879 proof is elusive in any Cameo grade. Population: 14 in 64 (1 in 64+) Cameo, 16 finer (5/16). NGC ID# 23XB, PCGS# 85580

3702 1880 PR65 NGC. CAC. Briggs 2-B. Type Two Reverse. The navy-blue obverse field is framed by peripheral pumpkin-gold and rose-red patina. The reverse field displays violet-blue and golden-brown toning. A crisply struck Gem with flashy fields and minimal hairlines. Proof mintages rose in 1880, likely due to demand for sets with the proof-only Trade dollar.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XC, PCGS# 5581

3703 1881 PR65 NGC. CAC. Briggs 2-B, Flynn-RPD-001. The 8s are repunched — the first 8 south, the second 8 north — visible within the upper and lower loops respectively. This Gem proof displays similar rich toning to other quarters from the McClure Collection, with vibrant blue and violet shades at the margins and reddish-gold toward the centers. The fields are glassy and reflective including within the shield stripes with a pinpoint-sharp strike. CAC endorsed. Census: 42 in 65 (1 in 65+), 46 finer. CAC: 8 in 65, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XD, PCGS# 5582

3704 1881 PR65+ NGC. Briggs 2-B, Flynn-RPD-001. The 8s in the date are lightly repunched within the loops. This attractive and well struck Gem has a mostly ocean-blue obverse. The remainder of the coin is predominantly peach-gold although the reverse border shows hints of olive-green.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XD, PCGS# 5582

3705 1882 PR65+ NGC. CAC. Iridescent shades appear throughout the toning, led by orange-gold and electric-blue. The fields are brightly reflective despite the toning and eye appeal is terrific. A razor-sharp strike and CAC endorsement complete the high-end Gem qualifications, the sole Plus-graded proof by NGC at the MS65 level. Census: 42 in 65 (1 in 65+, 2 in 65★), 57 finer. CAC: 5 in 65, 16 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XE, PCGS# 5583

3706 1883 PR65 NGC. CAC. Briggs 1-A. The raised devices are heavily frosted, while the surrounding fields retain their mirror-proof finish. Rich toning limits the contrast between the elements, but there is no denying the Gem quality of this outstanding proof quarter. Reddish-gold, royal-blue, and wheat-gold shades imbue the sharply struck, CAC-endorsed surfaces. Census: 51 in 65 (1 in 65★), 44 finer. CAC: 7 in 65, 16 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XF, PCGS# 5584

3707 1883 PR65 Cameo PCGS. The 1883 is one of the late-series, low-mintage issues that were sparingly minted but judiciously preserved. This example is blaze-white with bright silver luster. The raised devices show thick mint frost while the surrounding fields are deeply mirrored for maximum contrast. As with all 1883 proofs, misplaced digits are visible in the dentils beneath 83 of the date. A generous 1,039 proofs were struck, although few exist with the eye appeal and silver-white radiance of this Gem Cameo. Population: 20 in 65 (2 in 65+) Cameo, 14 finer (4/16). NGC ID# 23XF, PCGS# 85584

3708 1884 PR64+ NGC. Briggs 2-B. Sea-green, cobalt-blue, and dusky-rose toning forms the rich coloration of this high-end, near-Gem proof. The McClure Collection features many proofs that acquired comprehensive, deep-seated toning through decades of careful preservation. This example is a Choice representative from the collection, stunning to view at the proper angle and richly original in all regards. In our opinion, the exceptional surfaces are suggestive of an even finer grade. Census: 2 in 64+, 109 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3TWH, PCGS# 5585

3709 1884 PR65 NGC. CAC. Briggs 2-B. Attractively toned in gold, blue, and violet hues on the highly reflective obverse. The reverse is a bit more reserved in the coloration, typically seen for the McClure Collection since many of the coins were stored in fabric-lined coin trays, obverse up. This sharply struck Gem example is CAC-endorsed. Census: 47 in 65, 59 finer. CAC: 3 in 65, 14 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3TWH, PCGS# 5585

1884 Quarter, PR66+ Beautiful Toning, Ex: Gardner

3710 1884 PR66+ PCGS. CAC. Briggs 2-B. A paltry total of 8,875 quarters was struck at the Philadelphia Mint in 1884, with the final three digits of that number representing the proof output. The proof issue begins to pose a challenge in Premium Gem condition, and collectors will have difficulty locating a higher-graded example. This is a perfect type candidate. This carefully preserved, moderately toned high-end Premium Gem proof displays wonderfully original surfaces, both sides sporting a coating of multicolored iridescence that is noticeably deeper on the reverse. Shades include violet, russet, and silver-gray on the obverse and purple, blue, and rose on the other side. Population: 28 in 66 (1 in 66+), 9 finer. CAC: 10 in 66, 4 finer (5/16).
Ex: Denver Signature (Heritage, 8/2006), lot 1186; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98542 (as PR67 NGC). NGC ID# 3TWH, PCGS# 5585

3711 1885 PR65 NGC. CAC. Briggs 3-B. Vivid electric-blue, honey-gold, lavender-red, and forest-green toning encompass this well preserved Gem. The strike is precise aside from blending on the right-side stars. A colorful specimen of a scarce proof date.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XH, PCGS# 5586

- 3712 1885 PR66 NGC. CAC. Briggs 3-B.** Coppery-gold toning joins a trace of blue at the rims. The motifs are deeply frosted and toned as well, yet considerable contrast exists with the mirrored fields. A splendid Premium Gem example of the 1885 quarter, with a mintage of 930 pieces. Few can equal this CAC-endorsed representative for eye appeal or technical merit. Census: 23 in 66, 13 finer. CAC: 5 in 66, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XH, PCGS# 5586
- 3713 1886 PR65 NGC. CAC. Briggs 2-B.** A sharp Gem proof with dusky lavender-gray and gunmetal-blue toning over each side. The strike is bold, and there are no bothersome marks or hairlines. Both the 1886 proof and circulation-strike quarters are sought-after due to the low mintages produced during this decade. Census: 32 in 65, 33 finer. CAC: 1 in 65, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XJ, PCGS# 5587
- 3714 1886 PR66 NGC. Briggs 2-B.** The fields exhibit lemon-gold toning. The obverse border displays apple-green, and the reverse periphery shows lavender and cobalt-blue patina. A fully struck and flashy example with minor contact on the upper half of Liberty.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XJ, PCGS# 5587
- 3715 1887 PR64 NGC. CAC. Briggs 2-B.** Spectacular shades of orange-gold, cerulean-blue, and lilac toning enhance the lightly marked surfaces of this impressive Choice specimen, with well-detailed design elements that show just a touch of softness on some star centers and deeply reflective fields. From a proof mintage of 710 pieces.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XK, PCGS# 5588
- 3716 1887 PR64+ NGC. CAC.** Only 710 proof Seated Liberty quarters were struck in 1887. This Plus-graded Choice specimen is patinated in vivid shades of emerald-green, electric-blue, and lavender, with well-detailed design elements that show a touch of the usual flatness on the star centers and deeply mirrored fields.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XK, PCGS# 5588
- 3717 1888 PR65 NGC. Briggs 2-B.** Vivid shades of emerald-green, powder-blue, pale gold, and lavender toning visit the well-preserved surfaces of this delightful Gem, with sharply detailed design elements and deeply reflective fields underneath. From a limited mintage of 800 pieces. Census: 35 in 65, 22 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# BM5X, PCGS# 5589
- 3718 1889 PR65 NGC. Briggs 2-B.** Splashes of lavender in the left field accent mint-green and rose-gold toning elsewhere on the obverse of this Gem proof, while the reverse displays concentric lemon-gold, blue, and violet hues. The obverse stars are weak, but the central motifs are bold. The availability of the 1889 proof quarter declines above the PR65 level. Census: 25 in 65, 34 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 44CX, PCGS# 5590
- 3719 1889 PR65 NGC. CAC. Briggs 2-B.** The orange-gold obverse field is bounded by lavender and violet toning. The reverse field is magenta and the reverse margin is apple-green. Several stars are incompletely impressed, but the remainder of the strike is intricate.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 44CX, PCGS# 5590
- 3720 1890 PR65 NGC. CAC. Briggs 3-C.** Rotation beneath a light reveals radiant orange-gold toning throughout the obverse field. The obverse margin is ruby-red, and the reverse border is sea-green. The reverse field displays lavender patina. Fully struck and flashy with original eye appeal.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XN, PCGS# 5591
- 3721 1891 PR65 NGC. Briggs 1-A.** Rich navy-blue, purple-red, and forest-green toning encompasses this final-year proof Gem. The strike is sharp except on the uppermost stars. The flashy fields lack imperfections, and only minor ticks on star 7 and Liberty's jaw decide the grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23XP, PCGS# 5592

1891 Seated Liberty Quarter, PR67 Only One Finer Coin at PCGS

- 3722 1891 PR67 PCGS.** The obverse surfaces of this magnificent Superb Gem Seated Liberty quarter are deeply toned in shades of blue and green, while the reverse displays a much lighter lavender and gold patina. The fields are brightly reflective, under the toning. The strike is sharper than usually seen on the 1891, which often lacks detail because the dies were excessively polished or too widely spaced. Only 600 proofs were minted, and PR67 survivors are very rare. Population: 4 in 67, 1 finer (4/16).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 3606. NGC ID# 23XP, PCGS# 5592

BARBER QUARTERS

- 3723 1892-O Doubled Die Obverse, FS-101, MS65 PCGS.** Type Two Reverse. IN GOD WE TRUST is die doubled along the upper edge of the letters. This Gem 1892-O Barber quarter displays satiny luster and golden-russet and sea-green toning. The eagle's right (facing) talons are slightly soft, but the obverse is well-defined. Population: 53 in 65 (2 in 65+), 25 finer (4/16). PCGS# 146096 Base PCGS# 5602
- 3724 1894-S MS64 NGC. CAC.** Champagne-gray and pale lavender hues adorn satiny luster on this Choice 1894-S Barber quarter. The strike is sharp, and there are no distinctive abrasions. This issue is occasionally seen in this grade but rarely at a finer level. Census: 63 in 64 (1 in 64+), 14 finer. CAC: 6 in 64, 6 finer (4/16). NGC ID# 23Y3, PCGS# 5609
- 3725 1895 MS65 PCGS. CAC.** A razor-sharp strike on this Gem 1895 Barber quarter is illuminated by satiny lavender-gray luster with hints of olive and champagne intermixed. There are no obvious abrasions, and eye appeal is pleasing. Finer coins are seldom seen. Population: 38 in 65 (1 in 65+), 30 finer. CAC: 6 in 65, 8 finer (4/16). NGC ID# 23Y4, PCGS# 5610
- 3726 1895-O MS65 PCGS.** This attractive Gem Barber quarter displays sharply detailed design elements and satiny mint luster under delicate highlights of greenish-gold and lavender-gray toning. Population: 9 in 65, 6 finer (5/16). NGC ID# 23Y5, PCGS# 5611

1895-S Barber Quarter, MS65 Seldom Seen This Fine

- 3727 1895-S MS65 PCGS.** The 1895-S Barber quarter is elusive in Mint State and rare at the Gem grade level. This piece shows an impressively sharp strike and satiny luster. The champagne-color surfaces displays daubs of olive and amber toning near the borders. The mintmark is faintly repunched at the serifs, different than DL-101. A pleasing and interesting condition rarity. Population: 9 in 65, 4 finer (4/16). NGC ID# 23Y6, PCGS# 5612

3728 1901-S AG3 NGC. The most elusive of all Barber quarters, the 1901-S is eminently collectible even in low circulated grades. Olive-gold color blankets both sides of this smooth-yet-worn example. The reverse, as usual, shows considerably more wear than the obverse at the margins and legend, yet the mintmark is clear. A small rim bruise is noted beneath the second 1 of the date. NGC ID# 23YR, PCGS# 5630

3729 1902 MS66+ PCGS. CAC. Peach-gold and lavender tones meld over the frosty surfaces of this high-end Premium Gem quarter. The overall impression is good, although strike softness occurs on the left-hand stars, the wingtips, and the right shield / wing juncture. The level of preservation appears virtually unsurpassable. Population: 34 in 66 (2 in 66+), 3 finer (4/16). NGC ID# 23YS, PCGS# 5631

3730 1902-O MS64 PCGS. A boldly struck, mostly untuned Choice example of this conditionally elusive New Orleans issue, showing semiprooflike fields that have scattered hairlines limiting the grade. Finer examples are rarely seen. Population: 19 in 64 (3 in 64+), 21 finer (5/16). NGC ID# 23YT, PCGS# 5632

3731 1904-O MS64 PCGS. The 1904-O quarter is a date that is seldom seen in the upper Mint State grades. This Choice example displays satiny luster and impressively well-struck design elements. Light champagne toning masks a few trivial abrasions that limit the grade. Population: 17 in 64, 28 finer (5/16). NGC ID# 23YZ, PCGS# 5638

3732 1905 MS66 PCGS. This impeccable Barber quarter offers jade-green in the recesses with pearl-gray and slate-blue patina overall. Highly lustrous and carefully preserved, each side features well-struck devices without a mark worthy of mention. Population: 19 in 66 (1 in 66+), 1 finer (4/16).
Ex: *Pinnacle Rarities* to Eugene H. Gardner (3/2007); Eugene H. Gardner Collection, Part IV (*Heritage*, 10/2015), lot 98576. NGC ID# 23Z2, PCGS# 5639

1909-D Barber Quarter, MS66+ Few Remain in High Grades

3733 1909-D MS66+ PCGS. CAC. Splendid dappled forest-green, peach-gold, and lilac toning embraces this lustrous and conditionally rare Barber quarter. Obverse star 11 and the fletchings show minor incompleteness. Even though 5.1 million quarters were struck in Denver in 1909, only two have been certified as MS66+ by PCGS, and four are finer (4/16). NGC ID# 43NY, PCGS# 5654

3734 1913-S Good 4 NGC. The low mintage of just 40,000 pieces makes the 1913-S a key issue among Barber quarters in all grades. This is a pleasing Good-4, with natural old-silver color and smooth wear but no distracting marks. The rims blend into the legends in a few areas, yet the motifs well defined for the grade. NGC ID# 23ZW, PCGS# 5666

3735 1913-S Good 6 ANACS. An evenly worn, collector-grade example of this key San Francisco issue. The surfaces are tan-gray and infused lavender hues on each side. The reverse rim is complete, the obverse rim is slightly weak along the left side. The L and Y in LIBERTY are clearly visible. Housed in an old, small size white ANACS holder. NGC ID# 23ZW, PCGS# 5666

3736 1913-S VG8 NGC. The 1913-S Barber quarter is an important key, from a mintage of just 40,000 pieces. The major design elements of this well-worn VG specimen retain some interior detail and the date, mintmark, and legends are bold. The silver-gray surfaces show only minor flaws, aside from a small planchet fissure in the lower right obverse field. NGC ID# 23ZW, PCGS# 5666

3737 1914-D MS66 PCGS. This satiny Premium Gem shows dusky patina in shades of crimson, russet, violet, blue, and olive with flashes of brilliance at the central reverse. The 1914-D has an unremarkable mintage of 3 million coins, but examples are rarely offered at this grade level. Population: 11 in 66 (1 in 66+), 3 finer (5/16). NGC ID# 23ZY, PCGS# 5668

3738 1916-D MS66 PCGS. Vibrant, luminous mint luster gives this final-year Denver type coin immense eye appeal. The reverse is mostly brilliant, while the obverse has a dusting of lavender-gold toning. The strike is bold, and there are no distracting abrasions. PCGS lists only 15 numerically finer representatives (5/16). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

3739 1892 PR66 NGC. CAC. Type Two Reverse. Rotation beneath a light reveals rich and iridescent peach-gold, plum-red, ocean-blue, and lemon patina. A razor-sharp strike further ensures the eye appeal. An outstanding representative of the first-year proof issue. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2427, PCGS# 5678

1892 Quarter, PR67 Cameo Visually Outstanding Type Coin

3740 1892 PR67 Cameo NGC. Type Two Reverse. A lovely champagne-toned Superb Gem Cameo example of this first-year proof. The strike is razor-sharp, and the level of contrast is eye-catching. The 1892 proof Barber quarter was better preserved as a whole than many later dates, and high-end examples such as this are in high demand among type collectors. NGC ID# CEF4, PCGS# 85678

3741 1893 PR66 PCGS. Attractive shades of cobalt-blue and lavender-gray toning blanket the pristine surfaces of this delightful Premium Gem. The design elements are sharply detailed and the fields are deeply mirrored. Finer coins are scarce. Population: 32 in 66 (1 in 66+), 21 finer (5/16). NGC ID# 2428, PCGS# 5679

3742 1893 PR66+ NGC. The availability of the 1893 proof Barber quarter declines significantly above PR66, making this Plus-graded coin — the only Plus-designated Premium Gem at NGC — highly appealing to the budget-conscious collector. The motifs are sharp and frosty, and the fields yield deep mirroring. Modest cameo contrast is seen on the obverse. This piece exhibits mottled champagne-gray and sea-green toning with pleasing eye appeal. Census: 53 in 66 (1 in 66+, 1 in 66★), 31 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2428, PCGS# 5679

**1894 Barber Quarter, PR67
Rarely Seen Finer**

- 3743 1894 PR67 NGC. CAC.** A magnificent Superb Gem example of this early series proof, with razor-sharp definition on all design elements and deeply mirrored fields. The impeccably preserved surfaces display vivid shades of cerulean-blue and pale greenish-gold toning, with incredible eye appeal. From a generous proof mintage of 972 pieces. Census: 26 in 67 (2 in 67★), 4 finer. CAC: 8 in 67, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2429, PCGS# 5680

- 3744 1895 PR66 NGC. CAC.** A razor-sharp Premium Gem proof with liquidlike mirroring in the fields and beautiful multicolor toning on each side. The obverse shows a hint of cameo contrast even through the rich patina. The 1895 is a collectible date, suitable for type purposes. The present coin is visually outstanding. Census: 32 in 66 (2 in 66+), 29 finer. CAC: 7 in 66, 16 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242A, PCGS# 5681

- 3745 1896 PR66 NGC. CAC.** The obverse of this razor-sharp Premium Gem proof 1896 quarter displays noticeable cameo contrast amid vivid sun-orange, mint-gold, forest-green, and crimson toning. The reverse is less contrasted with deeper gold, lavender, and gunmetal-blue hues. Eye appeal is incredible. Census: 32 in 66 (1 in 66★), 43 finer. CAC: 2 in 66, 6 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23Y7, PCGS# 5682

**1896 Quarter, PR67 Cameo
White-on-Black Superb Gem**

- 3746 1896 PR67 Cameo NGC.** Only 762 proof Barber quarters were struck in 1896, and only a small percentage of survivors can match the quality of the present coin. The deeply reflective fields and sharply detailed frosty devices provide profound cameo contrast. Census: 25 in 67 Cameo (1 in 67+ Cameo, 1 in 67+★ Cameo), 10 finer (4/16).

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3649, which realized \$3,737.50. NGC ID# 59JB, PCGS# 85682

- 3747 1897 PR64+ NGC.** This high-end Choice 1897 proof Barber quarter is sharply struck but has dusky olive-gold toning that slightly subdues the mirroring in the fields. There are no distinctive marks, and were the fields more deeply reflective, a full Gem grade might have been achieved.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242C, PCGS# 5683

**1897 Quarter, Attractively Toned PR67
Rare This Well-Preserved**

- 3748 1897 PR67 PCGS.** This is a razor-sharp Superb Gem that boasts mirrored fields and rich peach-gold and plum-red patina. Undisturbed and exemplary surfaces offer perceptible cameo contrast against the devices, especially Liberty's portrait. Eye-appealing and conditionally rare, from a mintage of 731 proofs. Population: 10 in 67, 2 finer (4/16). NGC ID# 242C, PCGS# 5683

- 3749 1899 PR65+ NGC. CAC.** A rare CAC-endorsed Gem proof, also being the only Plus-graded coin at NGC. This piece displays a sharp strike and reflective fields, with sea-green, gold, and russet toning appearing on each side. Subtle obverse contrast is apparent. Census: 29 in 65 (1 in 65+), 56 finer. CAC: 3 in 65, 5 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242E, PCGS# 5685

- 3750 1900 PR66 NGC. CAC.** A sharp, deeply reflective Premium Gem proof 1900 Barber quarter, showing vivid ocean-blue, mint-green, gold, and violet toning. Finer examples are seldom seen, and CAC-endorsed coins are rare at this grade level. Census: 39 in 66, 27 finer. CAC: 8 in 66, 5 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 43VN, PCGS# 5686

- 3751 1901 PR66 NGC.** A boldly struck proof with mirrored fields and distinctive toning. The obverse displays amber and olive splashes amid champagne surfaces, while the reverse has deeper lavender and plum color. The 1901 is a popular 20th century type coin. Census: 34 in 66 (2 in 66+), 34 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242G, PCGS# 5687

- 3752 1901 PR66 NGC.** A beautifully detailed and colorfully toned representative of this popular turn-of-the-century issue. Blue-green and orange-gold toning drape the watery, carefully preserved mirrors on both sides. A hint of contrast is visible through the patina, although apparently not enough for a Cameo designation. Just 813 proofs were issued. Census: 34 in 66 (2 in 66+), 34 finer (4/16). NGC ID# 242G, PCGS# 5687

- 3753 1901 PR64 Cameo PCGS. CAC.** Greenish-blue toning with soft brownish accents covers both sides of this near-Gem, each of which displays pronounced field-device contrast. Sharply struck design features and well-preserved surfaces further contribute to the coin's pleasing eye appeal. Population: 12 in 64 Cameo, 32 finer. CAC: 3 in 64, 25 finer (5/16). NGC ID# 242G, PCGS# 85687

**1903 Barber Quarter, PR66+
Spectacular Iridescent Toning**

- 3754 1903 PR66+ NGC. CAC.** The 1903 proof Barber quarter claims a small mintage of 755 pieces. This delightful Plus-graded Premium Gem exhibits sharply detailed design elements and deeply reflective fields, under iridescent shades of powder-blue, lavender, and pale jade toning. The surfaces are immaculately preserved and eye appeal is terrific. Census: 35 in 66 (2 in 66+), 49 finer. CAC: 10 in 66, 4 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242J, PCGS# 5689

- 3755 1903 PR66 Cameo PCGS. CAC.** Proofs of this era were typically struck with an all-brilliant finish, but this impressive Premium Gem displays frosty texture on the sharply detailed design elements, providing bold cameo contrast with the reflective fields. Vivid shades of lime-green and violet toning blanket the unmarked surfaces. Population: 11 in 66 Cameo, 20 finer. CAC: 4 in 66, 20 finer (5/16).

Ex: Long Beach Signature (Heritage, 6/2013), lot 3400. NGC ID# 242J, PCGS# 85689

- 3756 1904 PR65+ NGC. CAC.** Sharp design elements complement the mirrored fields of this high-end Gem 1904 proof Barber quarter. Each side displays areas of pale lavender, champagne, amber, olive, and blue toning, delivering pleasing eye appeal. The technical quality is equally impressive. CAC: 7 in 65, 10 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242K, PCGS# 5690

- 3757 1905 PR65 NGC. CAC.** This Gem proof 1905 Barber quarter displays bold relief detail and lovely mirroring in the fields. Splashes of vivid ocean-blue and lavender toning appear on each side, along with lesser areas of rose-gold and mint-green. Eye appeal is excellent. CAC: 5 in 65, 31 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242L, PCGS# 5691

**1905 Quarter, Attractive PR67+
Ex: Newman, CAC-Approved**

- 3758 1905 PR67+ NGC. CAC.** Ex: Eric P. Newman Collection. This high-end Superb Gem displays considerable field-motif contrast for a non-Cameo proof. The strike is expectedly bold, and each side reveals no mentionable distractions. Multicolored toning is somewhat deeper on the reverse. Census: 23 in 67 (1 in 67+), 3 finer (5/16).

Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33244; Long Beach Signature (Heritage, 6/2014), lot 4482; FUN Signature (Heritage, 1/2015), lot 4692; Long Beach Signature (Heritage, 6/2015), lot 3665. NGC ID# 242L, PCGS# 5691

- 3759 1906 PR66 NGC.** Dusky champagne-gold and grayish toning covers both sides of this Premium Gem 1906 Barber quarter proof. The strike is bold, and there are no discernible contact marks. The originality and eye appeal are most pleasing. Census: 50 in 66 (1 in 66+), 39 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242M, PCGS# 5692

- 3760 1907 PR64+ NGC. CAC.** Dusky champagne-orange toning appears on the obverse of this Plus-graded Choice proof type coin, while the reverse displays deeper lavender-gray and olive hues. There is trivial weakness on the eagle's right (facing) talons, and a few hairlines in the right obverse field limit the grade. CAC: 7 in 64, 13 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242N, PCGS# 5693

1908 Quarter, Toned PR67

- 3761 1908 PR67 NGC.** Although plentiful in the absolute sense, the 1908 proof Barber quarter is rarely seen in Superb Gem condition. This attractively toned example displays multiple shades of color ranging through sky-blue, gold, russet, crimson, mint, and violet. The eagle's right (facing) talons are slightly soft, but the obverse is sharp. A hint of cameo contrast is seen on each side through the rich patina. Census: 23 in 67 (3 in 67★), 6 finer (4/16). NGC ID# 242P, PCGS# 5694

- 3762 1911 PR65+ NGC.** This is a razor-sharp 1911 proof Barber quarter, showing mirrored fields and a hint of cameo contrast on the obverse. The reverse is toned in blended olive-gray and lavender-blue hues, while the obverse displays a dusting of amber-orange. Census: 41 in 65 (1 in 65+), 56 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242T, PCGS# 5697

- 3763 1911 PR65 Cameo NGC. CAC.** With a limited proof montage of 543 pieces, the 1911 is a popular issue in the proof series. Stark field-motif contrast and bold design rendering are the chief attributes of this Gem Cameo proof, although warm champagne toning that deepens slightly around the borders. Close study with a lens reveals trivial hairlines in the fields, in concert with the grade, but the eye appeal is palpable and dramatic. Census: 12 in 65 Cameo, 38 finer. CAC: 9 in 65, 33 finer (4/16).

Ex: Numisma '95 (Stack's, 11/1995), lot 1239; The Eugene H. Gardner Collection Part IV (Heritage, 10/2015), lot 98620. NGC ID# 242T, PCGS# 85697

- 3764 1913 PR65 NGC.** The brilliant centers of this delightful Gem yield to shades of sea-green and cobalt-blue at the rims. The design elements are sharply detailed throughout and the fields are deeply reflective, with terrific eye appeal. Census: 35 in 65, 62 finer (4/16). NGC ID# 242V, PCGS# 5699

- 3765 1915 PR66 NGC. CAC.** The Philadelphia Mint only struck business-strike Barber quarters in 1916, making the 1915 production of only 450 coins the final proof issue of the series. This spectacular Premium Gem exhibits sharply detailed design elements and reflective fields, under delicate shades of pale gold and cerulean-blue toning. Census: 26 in 66, 20 finer. CAC: 11 in 66, 15 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242X, PCGS# 5701

- 3766 1915 PR67 NGC.** This reflective Superb Gem proof displays pleasing blue, pink, and gray patina on each side over immaculately preserved, fully struck surfaces with excellent eye appeal. From a mintage of 450 pieces. Census: 15 in 67 (2 in 67★), 5 finer (4/16). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, Fine Details

3767 1916 — Cleaning — PCGS Genuine. Fine Details. In circulated condition, the 1916 is the only true “stopper” in the Standing Liberty quarter set (excluding the optional inclusion of the overdate). This cleaned Fine Details example displays deep gunmetal-blue toning and glossy surfaces with some faint granularity in the fields. The date is clear, which is the most important attribute on 1916 Standing Liberties in this grade. NGC ID# 43XR, PCGS# 5704

3768 1917 Type One MS66 Full Head PCGS. Here is a sharp Type One Standing Liberty quarter from the Philadelphia Mint, showing outstanding preservation and iridescent champagne toning. The luster has a faint mattelike texture, as is often seen on this issue. Finer examples of the 1917 Type One are elusive and command strong premiums. NGC ID# 242Z, PCGS# 5707

3769 1917 Type One MS66 Full Head PCGS. Lavender-gray and sun-gold hues spread over both sides of this Premium Gem Full Head Type One Standing Liberty quarter, illuminating vibrant luster and sharp design elements. A tiny reed mark hidden on Liberty's thigh is the only mentionable abrasion. Finer examples are only infrequently available. NGC ID# 242Z, PCGS# 5707

3770 1917 Type One MS66 Full Head NGC. This Type One 1917 quarter is sharp. The outer rim of the shield is raised over Liberty's bust, and the head, eagle, and stars are all boldly rendered. A hint of champagne toning warms the satiny, unabraded surfaces. Finer examples of this popular type-coin issue are elusive. NGC ID# 242Z, PCGS# 5707

3771 1917-D Type One MS66 Full Head NGC. CAC. Dusky original toning casts this Premium Gem Full Head Type One quarter in shades of autumn-gold, pale olive, and champagne, while frosty underlying luster illuminates the eye appeal. The 1917-D Type One is not seen sharply struck nearly as often as its Philadelphia counterpart, and this piece shows some modest weakness on the shield, central figure, and leading edge of the eagle's left (facing) wing. A small tick on Liberty's breast is the only mentionable abrasion. Few finer coins are certified.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2432, PCGS# 5709

3772 1917-D Type One MS66 Full Head NGC. CAC. This is a beautifully preserved 1917-D Type One quarter, showcasing luster that glistens beneath original toning. The obverse has greenish-gold interiors with deep violet and russet near the upper border, and the reverse has more pronounced violet, amber, olive, and russet coloration. The eagle's left (facing) wing edge shows incompleteness, which is also seen on the obverse shield. Seldom encountered finer in Full Head.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2432, PCGS# 5709

3773 1917-D Type One MS66 Full Head NGC. CAC. Original champagne and lavender-gray toning graces satiny luster on each side of this Premium Gem Full Head Type One quarter. There are no significant abrasions. As is occasionally seen on this branch mint issue, Liberty's central figure and the leading edge of the eagle's left (facing) wing are ill-defined. Only 28 finer Full Head coins are listed at NGC (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2432, PCGS# 5709

3774 1917-D Type One MS66 Full Head NGC. CAC. This Type One Denver coin is beautifully preserved with mottled tan-gold toning that yields a wide crescent of plum-brown along the upper-right reverse border. The obverse is expectedly sharp, although the reverse shows weakness on the eagle's body and wings, as is sometimes seen on this issue. Eye appeal and preservation are pleasing. CAC: 41 in 66, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2432, PCGS# 5709

1917-S Type Two Quarter, MS65 Full Head Impressive Sharp Strike

3775 1917-S Type Two MS65 Full Head PCGS. Glistening luster underscores vivid rose-gold and amber toning on this Gem Full Head Type Two quarter. The 1917-S is the first issue in the series to be seen less often in Full Head Mint State grades than in non-Full Head, making the present coin an important acquisition for the serious student of the series. Bold definition presents itself throughout, and the surfaces are free of any meaningful distractions. NGC ID# 2436, PCGS# 5719

3776 1918 MS65 Full Head PCGS. Fully struck head, shield, date, and feather details on this Gem 1918 Full Head quarter deliver impressive eye appeal. A true full strike on any Standing Liberty quarter is rare, but if it is to be seen, the 1918 is one of the few issues on which it is possible. This coin shows satiny luster and few scattered ticks. Olive-gold and aquamarine peripheral hues accentuate the light golden interiors. NGC ID# 2437, PCGS# 5721

3777 1918 MS65 Full Head PCGS. A well-struck piece with all of the shield rivets, Liberty's head, and the date sharp. Light toning appears on portions of the outer edge of the obverse in shades of khaki-green and golden-brown. Very faint almond-gold toning is present elsewhere.
Ex: New York Signature (Heritage, 11/2013), lot 3408.
From The Eagle One Collection. NGC ID# 2437, PCGS# 5721

3778 1918-D MS64 Full Head PCGS. *Ex: Michael F. Hayes.* Hints of gold and iridescent toning appear on each side of this satiny and well-struck 1918-D quarter. Eye appeal is pleasing for the grade, and few finer coins are certified.
Ex: FUN Signature (Heritage, 1/2012), lot 5819.
From The Eagle One Collection. NGC ID# 3TWU, PCGS# 5723

3779 1918-S MS65 PCGS. A subtle dusting of golden toning appears on each side of this Gem 1918-S Standing Liberty quarter, while the satiny surfaces are free of significant abrasions. Bold date numerals, stars, and eagle's feathers are immediately noticed, while Liberty's head and the shield fall shy of fully detailed. Population: 68 in 65 (1 in 65+), 21 finer (5/16). NGC ID# 2439, PCGS# 5724

3780 1918-S MS64 Full Head PCGS. The 1918-S Standing Liberty quarter was produced in large numbers, and high-grade examples are not too difficult to locate, but few coins have Full Head definition. The coin offered here is a satiny Choice example, with a full head and sharp date but showing considerable central weakness, as usual. Accents of ice-blue and pale gold toning add to the considerable eye appeal.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3554.
From The Eagle One Collection. NGC ID# 2439, PCGS# 5725

**1919 Quarter, Glistening MS67
Bold Strike, Near-Full Head Detail**

- 3781 1919 MS67 NGC. CAC.** Here is a fresh-to-the-market Superb Gem 1919 quarter with vibrant, frosty luster and brilliant surfaces. The 1919 is among the more plentiful pre-1925 Type Two Standing Liberty issues in MS67, although such coins are nonetheless elusive. The present coin shows the sharp shield rivets, stars, and eagle's feathers that are often seen on the 1919, and the date is bold; Liberty's head shows a touch of weakness at the temple that precludes a Full Head designation. Census: 18 in 67 (1 in 67★), 2 finer. CAC: 8 in 67, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243B, PCGS# 5728

- 3782 1919-D MS61 NGC.** The 1919-D is a great rarity in Full Head, and this Mint State coin comes very close to achieving such a designation — slight weakness at the temple confirms non-Full Head status. The shield, date, and stars are better-defined than usual, and each side shows satiny, untuned luster. Light slide marks on the high points of Liberty's figure limit the grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243C, PCGS# 5730

- 3783 1919-D MS64 PCGS.** A bold date and above-average definition on the shield contrast with a weak head on this Choice 1919-D quarter. Abrasions are minimal, and the satiny surfaces yield a hint of pale champagne toning. Finer coins are elusive. NGC ID# 243C, PCGS# 5730

**1919-D Quarter, Satiny MS65
Brilliant and Well-Preserved**

- 3784 1919-D MS65 PCGS.** Satiny silver luster glows from the untuned surfaces of this semikey Denver issue. The 1919-D usually evokes comments about strike weakness and incomplete definition on the head, and not surprisingly this coin is a study in contradictions as well. The head is perhaps 60% complete, yet the shield shows blending on just three of the rivets with a nearly full inner shield border. A crack runs through the date, but the numerals are sharper than many examples and only modestly concave. The eagle shows only minor merging of the feathers and wing edges. Overall, the Gem grade seems about right for this challenging issue. NGC ID# 243C, PCGS# 5730

- 3785 1920 MS65 Full Head PCGS.** The 1920 is known for its sharp central strike, but weakness at Liberty's temple usually precludes a Full Head designation. This Gem Full Head coin just makes the minimum detail requirement. Each side is satiny with a hint of champagne toning, although a dash of russet-red is seen around Liberty's head. NGC ID# 243E, PCGS# 5735

**1920 Quarter, MS66 Full Head
Sharp and Lustrous, Few Finer**

- 3786 1920 MS66 Full Head NGC. CAC.** Full Head 1920 quarters are elusive in MS66 and rarely seen finer. This CAC coin displays sharp head and shield details, with a bold date and well-defined central regions. Luster is frosty and vibrant, and there are no significant abrasions. The 1920 comes with a sharp strike more often than not, although a coin such as this with a bold temple area on Liberty's head is special. Census: 16 in 66 (2 in 66★) Full Head, 4 finer. CAC: 16 in 66, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243E, PCGS# 5735

**1920 Quarter, MS66+ Full Head
Frosty Mint Luster**

- 3787 1920 MS66+ Full Head PCGS.** The 1920 Standing Liberty quarter frequently comes with sharp interiors, although predictable weakness at Liberty's temple almost always precludes a Full Head designation. Full Head coins are rare above the Gem grade level, and pieces finer than MS66 are out of reach for most collectors. This Plus-designated Premium Gem is slightly softer than usual on the shield lines and rivets, although Liberty's temple is bold. Faint flow lines in the recesses and fields denote a late die state and produce vibrant luster. Each side shows mottled amber and russet-gold toning. Population: 38 in 66 (4 in 66+) Full Head, 7 finer (4/16). NGC ID# 243E, PCGS# 5735

**1920-D Standing Liberty Quarter, MS64
Elusive Full Head Specimen**

- 3788 1920-D MS64 Full Head PCGS.** While the 1920-D is not a particularly elusive issue in general, it is a strike rarity, with only a tiny fraction of survivors qualifying for Full Head status. This Choice coin is one such piece, lightly gold-toned overall with strong detail, not only on the head, but on the remainder of the well-preserved devices, such as the rivets of the shield and the date. Housed in an old green label holder. Population: 42 in 64 (3 in 64+) Full Head, 51 finer (4/16).
From The Eagle One Collection. NGC ID# 243F, PCGS# 5737

**1921 Quarter, MS64
Upper-End for the Grade
Seldom-Seen CAC Example**

- 3789 1921 MS64 NGC. CAC.** The 1921 is a key date, and few Mint State pieces are CAC-endorsed. This coin displays brilliant, vibrant luster and impressively well-preserved surfaces for the grade — faint slide marks on the high points of Liberty's figure appear to be all that limit the grade. The shield and eagle are characteristically sharp, while Liberty's temple and the date show expected weakness. CAC: 18 in 64, 19 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243H, PCGS# 5740

**1921 Quarter, Luminous MS64
Eye Appeal Befits a High-End Collection**

- 3790 1921 MS64 NGC. CAC.** Frosty, glowing luster delivers rich visual appeal on this Choice CAC-endorsed 1921 quarter. The peripheral regions show weakened definition, partly due to die wear, while the shield and eagle remain bold. Some slide marks on Liberty's knee and a linear abrasion on the eagle's left (facing) wing contribute to the grade. The 1921 is a key date, drawing a premium even in low circulated condition. CAC: 18 in 64, 19 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243H, PCGS# 5740

**1921 Quarter, Sharp MS64 Full Head
Exceptional for the Grade**

- 3791 1921 MS64 Full Head PCGS. CAC.** A remarkably well-preserved coin for the grade, this Choice Full Head 1921 Standing Liberty quarter displays satiny luster and a hint of pale lavender-gold toning. The strike is razor-sharp, showing full shield and head details, as well as a strong date. A finer example of this key-date issue may be unknown below the Gem grade level. CAC: 6 in 64, 20 finer (4/16).
From The Eagle One Collection. NGC ID# 243H, PCGS# 5741

- 3792 1923 MS64 Full Head PCGS.** Satiny, brilliant luster gives this Choice Full Head 1923 quarter pleasing eye appeal. The shield, head, and stars are boldly struck. A loupe reveals some minor marks in the fields and along Liberty's figure that prevent Gem classification. NGC ID# 243J, PCGS# 5743

**1923 Quarter, MS65 Full Head
Sharp Strike**

- 3793 1923 MS65 Full Head PCGS.** An elusive Gem Full Head example of this conditionally elusive Philadelphia issue. The strike is impressively sharp, and the satiny surfaces show a hint of iridescence when tilted beneath a light. A few tiny ticks along the high points of Liberty's figure do not affect the PCGS assessment of the grade. Population: 44 in 65 Full Head, 44 finer (4/16).
From The Eagle One Collection. NGC ID# 243J, PCGS# 5743

**1923-S Standing Liberty Quarter, MS64
Nice Luster, Delicate Toning**

- 3794 1923-S MS64 PCGS.** The 1923-S quarter is a low-mintage better date in the Standing Liberty series. This well-preserved Choice specimen offers well-detailed design elements, with just a touch of the typical softness on some shield rivets and the area around Liberty's ear. Vibrant mint luster and delicate hints of champagne-gold toning add to the exceptional eye appeal. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS62 Full Head
Well-Struck and Appealing for the Grade**

- 3795 1923-S MS62 Full Head NGC.** A well-struck Full Head example of this key San Francisco issue, showing a blush of light golden toning and satiny mint luster. Minimal abrasions are present, and the only notable strike weakness is seen on the shield rivets as usual. The fields have faint parallel die striations, leftover from an attempt to efface clash marks, the remnants of which remain within the recesses of Liberty's lower gown.
From The Eagle One Collection. NGC ID# 243K, PCGS# 5745

3796 1924-D MS64 Full Head NGC. CAC. The 1924-D often comes with a dishd-out head like that seen on most 1926-D quarters, and Full Head coins are elusive. This Choice CAC coin displays an uncommonly sharp strike that spreads throughout the head, shield, date, stars, and eagle. The reverse has faint die polishing lines in the fields along with striking semiprooflike reflectivity — both from an attempt to efface clash marks. This piece has a hint of light golden toning and trivial high-point marks. Census: 48 in 64 (2 in 64+) Full Head, 40 finer. CAC: 7 in 64, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243M, PCGS# 5749

3797 1924-D MS64+ Full Head NGC. CAC. An elusive high-end Choice Full Head coin, showing brilliant, glistening luster and ample eye appeal. Liberty's head is sharp, and the shield, date, eagle, and stars are comparable. The Plus-CAC combination adds to the eye appeal, and only some minor slide marks on the high points of Liberty's figure preclude Gem classification. Census: 48 in 64 (2 in 64+) Full Head, 40 finer. CAC: 7 in 64, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243M, PCGS# 5749

3798 1924-S MS65 PCGS. A well-struck 1924-S quarter but slightly shy of Full Head detail. Some minor weakness is also seen on the shield and central torso. This satiny Gem displays lovely champagne and rainbow toning over both sides and is free of major abrasions.
From The Eagle One Collection. NGC ID# 243N, PCGS# 5750

3799 1925 MS66+ Full Head NGC. This faintly toned Premium Gem Full Head 1925 quarter shows the satiny luster that is typical of the issue with a pleasantly bold strike. There are no significant abrasions, although a small planchet lamination is seen on the rim near Liberty's head. Full Head examples of this recessed-date issue are occasionally seen in MS66 but are rare finer. This Plus-graded coin should definitely please. Census: 38 in 66 (3 in 66+) Full Head, 13 finer (4/16). NGC ID# 243P, PCGS# 5753

**1926 Quarter, MS66 Full Head
 Delicately Toned, Rarely Seen Finer**

3800 1926 MS66 Full Head NGC. CAC. Despite being a late-series Philadelphia issue, the 1926 Standing Liberty quarter has proven to be quite elusive in high-grade Full Head. This frosty, champagne-toned example is well-struck on the head, shield, and eagle. There are no severe abrasions and eye appeal is pleasing. Remarkably few Full Head coins are CAC-approved at this grade level. Census: 28 in 66 (3 in 66+) Full Head, 4 finer. CAC: 10 in 66, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243R, PCGS# 5755

3801 1926-S MS64 PCGS. Satiny luster illuminates pastel interiors on this Choice 1926-S quarter, leaving amber and gold around the peripheries. The strike is soft on the high points of the head, shield, eagle, and torso, but the overall definition is above-average for the 1926-S.
From The Eagle One Collection. NGC ID# 4462, PCGS# 5758

3802 1927 MS66 Full Head NGC. CAC. The 1927 is a fairly available date in Full Head, but Premium Gem examples are nonetheless scarce, and finer pieces are rare. This CAC MS66 Full Head coin displays a bold strike and frosty surfaces that show a hint of champagne color on the reverse. There are no singular abrasions, only abundant eye appeal. Census: 33 in 66 Full Head, 2 finer. CAC: 13 in 66, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243U, PCGS# 5761

3803 1927-D MS66+ PCGS. CAC. The 1927-D is a scarce and underrated date in high grade, with or without a Full Head. This Plus-designated Premium Gem CAC coin displays an average strike with satiny luster. Mottled amber-gold and olive toning appear over each side. Population: 37 in 66 (2 in 66+), 1 finer. CAC: 20 in 66, 2 finer (5/16). NGC ID# 243V, PCGS# 5762

3804 1928 MS65 Full Head PCGS. CAC. Deep crimson and russet toning daubs appear at the upper obverse and lower reverse margins. The rest of the piece is light pearl-gray with suggestions of blue and gold. This coin is well-defined on the shield as well as Liberty's head and the eagle.
*Ex: Dallas Signature (Heritage, 3/2013), lot 3455.
 From The Eagle One Collection. NGC ID# 243X, PCGS# 5767*

3805 1928 MS66 Full Head PCGS. Ex: Walser. Soft russet patination covers the lustrous surfaces of this Premium Gem quarter. This particular coin is significant in that most of the design elements other than the head of Liberty are sharply struck. Liberty's chain mail and the vertical stripes of the inner shield, for example, are virtually fully struck, and all but a couple of rivets are bold. Even the eagle's torso displays some feather detail. Population: 70 in 66 (8 in 66+) Full Head, 8 finer (4/16). NGC ID# 243X, PCGS# 5767

**1928-D Quarter, MS64 Full Head
 Better Date in Full Head**

3806 1928-D MS64 Full Head PCGS. An elusive Full Head example of this late-series Denver issue, showing characteristically satiny luster and minimal abrasions. A hint of pearl-gray color graces each side, adding to the appeal. Finer Full Head coins are scarcely seen and command premiums that are out of reach for many collectors. Population: 44 in 64 Full Head, 50 finer (4/16).
From The Eagle One Collection. NGC ID# 243Y, PCGS# 5769

3807 1929-D MS64 Full Head PCGS. Attractive champagne toning with small splashes of peach provides this lustrous near-Gem Full Head 1929-D quarter with lovely eye appeal. The shield, torso, and central eagle reveal moderate strike weakness, as is sometimes seen on this issue.
From The Eagle One Collection. NGC ID# 2443, PCGS# 5775

3808 1929-S MS66 Full Head NGC. CAC. Frosty, glistening luster adorns each side of this brilliant, CAC-approved Premium Gem Full Head 1929-S quarter. In typical '29-S fashion, the shield rivets and the eagle's breast and leading wing edge show moderate weakness, even while Liberty's head is bold. There are no mentionable abrasions, and the eye appeal is most satisfactory. NGC lists 33 higher-grade representatives. CAC: 38 in 66, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2444, PCGS# 5777

3809 1930 MS66+ Full Head PCGS. CAC. A frosty, sharply struck Full Head type coin, this high-end 1930 Standing Liberty quarter displays soft luster with a blush of olive-gold toning. A few tiny ticks on the eagle and along Liberty's leg are all that prevent a Superb Gem designation. PCGS lists 45 finer Full Head coins (5/16). NGC ID# 2445, PCGS# 5779

- 3810 1930-S MS67 PCGS. CAC.** This frosty Superb Gem 1930-S quarter is almost flawlessly preserved save for a couple of small ticks on Liberty's knee. For the grade, the quality is still first-rate, as the CAC endorsement confirms. Liberty's head is nearly full, and the inner design elements are also well-defined. Pastel lavender and champagne hues grace much of each side, but bluish and olive-color patches on Liberty's abdomen and at the Y in LIBERTY are distinctive pedigree markers. Population: 22 in 67 (1 in 67+), 0 finer. CAC: 12 in 67, 0 finer (5/16). NGC ID# 2446, PCGS# 5780

WASHINGTON QUARTERS

- 3811 1932-D MS64 PCGS.** Occasional daubs of navy-blue and russet toning accent the satiny silver surfaces of this Choice 1932-D Washington quarter. The strike is bold, and grade-limiting abrasions are at a minimum. A suitable, quality Mint State example for the budget-conscious collector. NGC ID# 2448, PCGS# 5791
- 3812 1932-S MS64+ PCGS.** The 1932-S is the secondmost challenging issue in the Washington quarter series after the 1932-D, though the S-mint coins enjoy a lower mintage. This crisp near-Gem example has minimally toned surfaces with daubs of golden-russet color near the border areas. Softly lustrous. NGC ID# 2449, PCGS# 5792
- 3813 1932-S MS64+ PCGS. CAC.** A Plus-graded Choice example of this low-mintage, first-year key, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show a few hints of greenish-gold and lavender toning. NGC ID# 2449, PCGS# 5792
- 3814 1932-S MS65 PCGS.** This lovely key-date Gem features dusky tan-gold centers that progress toward dappled gunmetal-blue and olive-russet hues marginally. Strongly impressed and free of mentionable marks to distract. From a mintage of 408,000 coins, PCGS has seen only four higher grading events (4/16). NGC ID# 2449, PCGS# 5792
- 3815 1934 Accented Hair, Doubled Die Obverse, FS-101, MS64+ PCGS. CAC.** The obverse is boldly die doubled on this popular *Guide Book* variety. The present Plus-graded near-Gem displays a bold strike and frosty, untoned mint luster. Eye appeal is outstanding, and finer coins are seldom seen. Population: 29 in 64 (2 in 64+), 33 finer. CAC: 7 in 64, 7 finer (5/16). NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

1934 Light Motto Quarter, MS67
One of the Finest Certified Examples

- 3816 1934 Light Motto, FS-401, MS67 PCGS. CAC.** The scarce *Guide Book* variety that retains the initial year's weakly defined IN GOD WE TRUST. A majority of the date is the Medium Motto variety. The present lustrous Light Motto Superb Gem displays faint olive-green toning and displays only incidental marks. Population: 21 in 67 (3 in 67+), 0 finer. CAC: 13 in 67, None finer (4/16). NGC ID# 7JK9, PCGS# 146000 Base PCGS# 5794

- 3817 1934-D Heavy Motto MS66 PCGS. CAC.** A minimally toned and highly lustrous high-grade early branch mint example. Well struck and exceptionally preserved. The *Guide Book* has separate listings for the Medium and Heavy Motto 1934 quarters, but has yet to do the same for the 1934-D. NGC ID# 244C, PCGS# 85796

- 3818 1935 MS67+ PCGS. CAC.** This blatantly original Superb Gem quarter boasts speckled golden-orange, green, and crimson patina over the obverse and a largely brilliant reverse with pale toning around the edges. The motto is sharp, as are the eagle's breast feathers. A pleasing early Washington quarter technically surpassed by only a single coin at PCGS (4/16). NGC ID# 244D, PCGS# 5797

1936-D Quarter, Sharp MS67
Among the Finest Known

- 3819 1936-D MS67 PCGS. CAC.** A conditional rarity, among the finest 1936-D quarter certified and one of only four top-grade pieces with CAC approval. This piece is boldly struck and displays vibrant luster. Olive and russet toning appears in the left-hand margin on each side, leaving the remainder of the coin with a light champagne hue. Population: 20 in 67 (1 in 67+), 0 finer. CAC: 4 in 67, 0 finer (4/16). NGC ID# 244H, PCGS# 5801

- 3820 1936-S MS67 PCGS.** This delightful Superb Gem offers virtually pristine surfaces, with satiny mint luster under delicate shades of golden-tan toning. The design elements are sharply detailed throughout and eye appeal is outstanding. Population: 53 in 67 (3 in 67+), 0 finer (4/16). NGC ID# 244J, PCGS# 5802

- 3821 1936-S MS67 PCGS. CAC.** Ice-blue and sun-gold endow the obverse, along with a blush of cherry-red near LIBERTY. The reverse is close to brilliant. Lustrous and crisply struck with contact confined to a tick or two on Washington's neck. Population: 53 in 67 (3 in 67+), 0 finer. CAC: 17 in 67, 0 finer (5/16). NGC ID# 244J, PCGS# 5802

1939-S Quarter, MS67+
Registry-Grade CAC Coin

- 3822 1939-S MS67+ PCGS. CAC.** This high-end Superb Gem 1939-S Washington quarter is tied for the finest certified and is a great rarity with the Plus designation/CAC green label combination. The strike is bold, and the near-brilliant surfaces display vibrant luster. Eye appeal is superb. Population: 88 in 67 (4 in 67+), 0 finer. CAC: 31 in 67, None finer (4/16). NGC ID# 244T, PCGS# 5810

**1943 Washington Quarter, MS67+
Exceptional Wartime Survivor**

- 3823 1943 MS67+ PCGS. CAC.** The design elements of this Plus-graded Superb Gem exhibit razor-sharp definition and the impeccably preserved surfaces radiate vibrant mint luster, under attractive shades of golden-brown and magenta toning. Overall eye appeal is simply terrific. From a wartime mintage of nearly 100 million pieces. Population: 10 in 67+, 2 finer (5/16). NGC ID# 2455, PCGS# 5820

**1951 Quarter, MS67+
Top-Grade PCGS Registry Coin**

- 3824 1951 MS67+ PCGS. CAC.** This CAC-endorsed Superb Gem 1951 Washington quarter is tied for the finest at PCGS, an essential Registry Set acquisition. The strike is bold, and the preservation is nearly flawless. Hints of amber and olive-green toning appear around the peripheries. Population: 73 in 67 (7 in 67+), 0 finer. CAC: 26 in 67, 1 finer (4/16). NGC ID# 43WS, PCGS# 5846

**1954 Quarter, MS67+
Tied for Finest at PCGS**

- 3825 1954 MS67+ PCGS. CAC.** Teal, burgundy, and gold toning encompass the frosty surfaces of this high-end Superb Gem 1954 quarter dollar. The strike is bold, and the surfaces are beautifully preserved. PCGS-certified examples are seldom seen in MS67, and this Plus-graded coin is tied for the finest at that service. Population: 61 in 67 (4 in 67+), 0 finer. CAC: 29 in 67, 1 finer (4/16). NGC ID# 2467, PCGS# 5855

- 3826 1984-P MS67 PCGS.** Well-struck from lightly worn dies, showing a warm golden glow overall. There are no significant abrasions. The 1984-P quarter is seldom seen in Superb Gem condition. This Registry-grade PCGS coin is among the finest at that service. Population: 14 in 67, 0 finer (5/16). NGC ID# 247Y, PCGS# 5916

- 3827 1984-P MS67 PCGS.** A beautifully preserved Registry coin with lavender and blue highlights appearing throughout the soft champagne-gray surfaces. Struck from worn dies with slight softness on the fine details. Rarely seen this fine. Population: 14 in 67, 0 finer (5/16). NGC ID# 247Y, PCGS# 5916

PROOF WASHINGTON QUARTERS

- 3828 1936 PR65 NGC.** A hint of champagne toning warms the mirrored surfaces of this Gem first-year proof Washington quarter. The strike is bold, and eye appeal is pleasing. The 1936 is the most elusive proof in the series in high grade. NGC ID# 27HN, PCGS# 5975

- 3829 1936 PR66 PCGS. CAC.** The inaugural Washington quarter proof issue had a mintage of just 3,837 pieces, few of which survive finer than the present Premium Gem example. This piece shows glossy surfaces with dusky golden and ice-blue toning. PCGS lists 11 submissions in higher grades (5/16). NGC ID# 27HN, PCGS# 5975

- 3830 1936 PR66 PCGS. CAC.** 30th Anniversary Green Label Holder. A reflective Premium Gem proof 1936 Washington quarter with light golden toning and sharp design elements. PCGS lists only 11 Superb Gems finer. CAC: 46 in 66, 4 finer (5/16). NGC ID# 27HN, PCGS# 5975

- 3831 1950 PR67 Cameo PCGS.** Cameo examples of the 1950 proof Washington quarter are scarce, and Superb Gem coins are exceedingly so. This piece displays a full strike and gleaming, untuned surfaces. The devices are softly frosted and provide pleasing contrast. Population: 24 in 67 (1 in 67+) Cameo, 7 finer (5/16). NGC ID# 27VA, PCGS# 85982

- 3832 1956 PR69 Deep Cameo PCGS.** This magnificent Washington quarter is just one tick away from perfection, with fully struck, richly frosted design elements that contrast profoundly with the deeply mirrored fields to create a stunning cameo effect. Population: 47 in 69 Deep Cameo, 0 finer (5/16). NGC ID# 27J2, PCGS# 95988

EARLY HALF DOLLARS

- 3833 1795 2 Leaves, O-105, T-25, High R.3, Fine 12 PCGS.** Deep gunmetal-gray toning encompasses this nicely defined and problem-free Flowing Hair type coin. Liberty's hair exhibits impressive detail, and partial wing feathers are apparent. An intermediate die state with cracks through the C in AMERICA and the I in UNITED, and a clash mark from a wing on the left obverse field. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

**1795 O-106 Flowing Hair Half, VF30
Rare Variety, Condition Census Coin**

- 3834 1795 2 Leaves, O-106, T-30, R.6, VF30 PCGS.** A heavy diagonal die break through the eagle's neck with a 9 x 10 berry arrangement confirms the very rare Overton-106 variety. The Steve Tompkins reference notes that in later die states, the raised section at the top-right of the bisecting reverse die crack shows more wear than any other portion of the coin; therefore, grading should be based primarily on the obverse details rather than the reverse. Not all examples of this rare variety have been so-graded. The present coin shows solid VF details on the lower reverse and on the obverse. Deep-gray toning blankets both sides, with some lighter tan-gray areas on the high points. A few stray, light marks are seen — but extremely few — and no adjustment marks are present. The 2015 Tompkins reference shows the Condition Census 50-30-20-20-20-20. This lot is sure to elicit strong bids from Overton variety specialists. NGC ID# 24E7, PCGS# 39222 Base PCGS# 6052

**1795 Flowing Hair Half Dollar, Fine 15
Bisecting Reverse Die Crack, O-107a**

- 3835** 1795 2 Leaves, O-107a, T-31, R.5, Fine 15 NGC. Tompkins Die State 1/3. A lengthy, bisecting reverse die crack runs stem-to-stern from the left rim through the wing tip and eagle to the rim between OF and AMERICA, confirming the Overton-107a variety and a somewhat advanced state of the reverse die. Pleasing gunmetal-blue and rich-lilac toning cover both sides of this Choice Fine example. Nice definition on Liberty's hair strands and a strong date join the sharply defined stars, rims, and bold lettering on the reverse legend. There are no meaningful distractions.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

- 3836** 1795/1795 2 Leaves, O-112, T-20, R.4, VG10 NGC. An evenly worn example of this popular doubled date variety, showing gunmetal-gray fields and lighter tan-gray relief elements. The obverse rim is bold, while the reverse rim grows slightly weak along the upper periphery. A trio of linear marks in-between the letter of AMERICA are the only notable flaws. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

- 3837** 1795 2 Leaves, O-119, T-1, R.4 — Improperly Cleaned — NGC Details. VF. O-119 is attributed by the die lump above the final star and the die scratch from the wingtip to the E AMERICA. This evenly circulated Flowing Hair type coin offers medium apricot and powder-blue patina. Moderate mint-made adjustment marks are noted on the eagle, portrait, and reverse border. The reverse has a minor rim knock at 2:30.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

**1795 O-125, T-13 Half Dollar, Fine 15
Collectible 'Two Leaves' Reverse**

- 3838** 1795 2 Leaves, O-125, T-13, R.4, Fine 15 PCGS. The O-125 half dollar ranks among the plentiful varieties of 1795, and makes an ideal variety for type collectors who seek a single Flowing Hair representative. This piece has violet-gray and medium brown toning with a few splashes of ebony patina in the protected areas. A pleasing early half dollar with good eye appeal. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**1795 Half Dollar, Fine 15
O-129, S Over D Die Cutter's Blunder**

- 3839** 1795 2 Leaves, Second S Over D, O-129, T-7, R.5, Fine 15 PCGS. CAC. Tompkins Die State 1/3. Both half dollars and half eagles from 1795 show a similar die cutting error of the second S of STATES over a misspunched D, a curious happenstance for such a significant blunder. Among the half dollars, the O-129 S/D variety is slightly more scarce than many of the 31 die pairs. This example is a Choice Fine coin, with reddish-tan toning on the raised devices and smooth, olive-gray fields. The obverse shows a few small marks but it is smooth and attractive. The reverse, too, retains nice eye appeal with some muted adjustment marks primarily near the rims. CAC endorsed for quality. NGC ID# 24E7, PCGS# 39259 Base PCGS# 6052

- 3840** 1801 O-102, T-1, High R.4 — Improperly Cleaned — NGC Details. VF. The rarer of the two die marriages for this elusive date. A well defined and minimally abraded example. A loupe reveals obverse hairlines beneath medium golden-brown and steel-gray toning. The reverse has a gunmetal-blue margin and a lavender-red center. The high points are stone-white.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

- 3841** 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, VF30 PCGS. CAC. The only 1803 die pair that combines the Large 3 obverse with the Small Reverse Stars above the eagle's head. Sharp definition remains throughout this attractive VF example, with deep-gray toning at the borders encompassing silver-gray interiors. Only minor marks, none worthy of special mention, are visible with a glass, although some interesting die clashing is visible in and around the ear. CAC endorsed. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

**1803 Draped Bust Half Dollar, AU50
O-104, Small 3 Variant**

- 3842** 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, AU50 PCGS. Tompkins Die State 2/3. Bits of amber and lavender toning cling to the outer edges, but this scarce Small 3 half is primarily bright, silver-white, and minimally toned. The fields are busy with small abrasions, yet solid About Uncirculated definition remains on the devices. Die clashing suggests a late state of the reverse die. Population: 1 in 50, 10 finer (4/16). NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

- 3843** 1806 Knob 6, Small Stars, O-106, T-4, R.4 — Improperly Cleaned — NGC Details. XF. Tompkins Die State 2/1. Golden-brown patina overlies pearl-white and gunmetal surfaces. This moderately circulated Bust example is surprisingly unabraded, although a lens reveals fine hairlines. 1806 was the peak year of Draped Bust half dollar coinage, but O-106 is considerably scarcer than O-103, O-105, O-109, or O-115.
From The Rev. Dr. James G. K. McClure Collection.

- 3844** 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF45 PCGS. An outstanding Draped Bust type coin with strong XF detail and hints of luster in the reverse peripheries. This 1806, O-109 half dollar displays pale lavender-gold color with olive and bluish accents in the fields. The strike is even and well-centered. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**1806 No Stem Half Dollar, AU50
O-109, Pointed 6**

- 3845** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 ANACS. Rich cobalt-blue, rose-red, and orange toning blankets this lightly circulated Draped Bust type coin. Marks are minor and the eye appeal is irrefutable. The die engraver neglected to add a stem to the eagle's right (facing) claw, an available variety with a Pointed 6 but a great rarity when paired with a Knob 6. Certified in a small-sized holder. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

- 3846** 1806 Pointed 6, No Stem, O-109a, T-15, R.3, XF45 PCGS. CAC. Tompkins Die State 6/3. A diagnostic die crack from the inside point of star 12 toward Liberty's neck with die chipping along the crack confirms the late die state. Silver-gray toning with blue and lilac-gray accents covers both sides. Pleasing orange-gold color glows from protected areas along Liberty's head and ribbon on this Choice XF example, CAC endorsed. A *Guide Book* variety with the stem missing from the eagle's claw. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

**1806 Half Dollar, O-109a, AU53
Pointed 6, No Stem, Late State**

- 3847** 1806 Pointed 6, No Stem, O-109a, T-15, R.3, AU53 PCGS. Tompkins Die State 6/4. The lack of the stem at the eagle's right (facing) claw confirms that while the leafy portion of the olive branch was part of the master die, the stem was not. Added to each reverse by hand, the stem varies from variety to variety but the O-109 (T-15) die pair is the sole variety in which the stem is entirely missing — an engraver's blunder. This example shows ample remaining mint luster and attractive lilac-gold toning. As usual for the late die state, the coin is a touch weakly struck at the centers but somewhat stronger at the peripheries. Very few marks appear on the colorful, appealing surfaces. An important *Guide Book* variety. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

**1806 Draped Bust Half Dollar, AU55
O-115a, Original Surfaces**

- 3848** 1806 Pointed 6, Stem, O-115a, T-17, R.2, AU55 PCGS. CAC. Tompkins Die Stage 4/3. Diagnostics include doubling on TY in LIBERTY and the positioning of the leaf tip relative to the I in AMERICA. The late die stage shows cracks through the date to star 3, and a crack along the top of STATES. While this is an available Overton variety, few examples can match the eye appeal of this Choice AU Draped Bust half dollar, with violet-gray, blue, russet, and olive tones over each side. The high points show moderate friction, but the devices are largely well-defined. Only the eagle's neck and upper wing feathers display softness. A wonderfully original example that should command a premium. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071

BUST HALF DOLLARS

- 3849** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS. Only subtle changes differentiate the O-112 variety from the O-111, which shares the same reverse. The lower left serif on 1 in the date is missing on O-111 but present on O-112, and star 1 points at a segment on O-111 while it points between segments on O-112. This original and attractive O-112 displays remaining golden mint luster at the borders and around the central devices beneath gunmetal-gray toning that deepens around the stars. The sharp strike is softened slightly by brief circulation, with only a few widely scattered, tiny marks. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

- 3850** 1808/7 O-101, R.1, AU53 PCGS. Much luster remains in the fields of this bright 1808/7 half dollar. Clash marks and peripheral die cracks are indicative of a late die state, although the stars and central devices are sharply brought up. Warm tinges of lavender-gold toning appear around the borders, increasing the eye appeal. NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

**1808/7 O-101 Half Dollar, AU55
Choice, Attractive Fields and Motifs**

- 3851** 1808/7 O-101, R.1, AU55 PCGS. Lengthy die cracks occupy both sides of this overdated 1808 half, representing the typical state of the dies for the Overton-101 variety. Delightful, old-time toning blankets both sides of this Choice example, with shades of olive-brown, steel-blue, and rich reddish-gold on display. Sharp definition on the devices and a lack of any serious marks or abrasions justify the assigned About Uncirculated grade for this still-lustrous two-year type coin. NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

1808 O-109a Half Dollar, AU55
Collectible Two-Year Type

- 3852** 1808 O-109a, R.3, AU55 PCGS. CAC. O-109a has identifying die cracks from star 6 to Liberty's head, through 1,0, and 8 in the date, and across the upper part of STATES. A rich overlay of mixed olive, violet-gray, and antique-gold patina blankets well-preserved surfaces with partial luster glowing from underneath. The late die state of this Choice AU half dollar accounts for merging near the borders, but the central areas show good detail with minor friction over the curls and wingtips. The 1808 is desirable as the second and more available of two First Style Capped Bust half dollar issues. The eagle and portrait were modified in 1809. NGC ID# 24EP, PCGS# 39375 Base PCGS# 6090

1811/10 Capped Bust Half, AU55
Popular O-101 Guide Book Variety

- 3853** 1811/10 O-101, R.1, AU55 NGC. The die dot between the 8 and 1 in the date, with the visible undertype of the last two digits, confirms the O-101 variety. This attractive Choice AU specimen is well-detailed and lightly worn, with bright mint luster and highlights of lavender-gray, greenish-gold, and amber toning. Some interesting clash marks show on both sides. Census (for O-101): 6 in 55, 11 finer (4/16). NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811 Half Dollar, Attractive AU58
O-106, Lightly Toned Small 8 Variety

- 3854** 1811 Small 8, O-106, R.3, AU58 NGC. CAC. Smooth, olive-gray patina retains soft mint luster despite brief circulation. A faint glow of rose toning flashes from the well-struck centers of this Small 8 half. The obverse stars are typically drawn to the obverse rims, which displays the weak milling characteristic of the O-106 die pair. Multiple parallel lines run horizontally from the eagle's neck to the left wing and shoulder, and a diagnostic angled line at the top right shield corner pierces the wing. CAC endorsed for eye appeal and surface quality.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

1814 O-103 Half Dollar, MS62
Untoned and Lustrous

- 3855** 1814 O-103, R.1, MS62 PCGS. A bold, ridgelike die line from the end of the scroll to the eagle's left wing is the pick-up point to identify the O-103 variety. Other die lines exist on the coin to confirm the variety below the bust drapery. This example is brilliant with strong silver luster across both sides. Struck from multiply clashed dies, the peripheral elements are drawn to the rim to confirm the late state of the dies. Nevertheless, crisp definition on the central elements adds to the appeal. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

- 3856** 1815/2 O-101, R.2 — Graffiti — NGC Details. Fine. The sole die pair for the date. The obverse is almond-gold and the reverse is rich powder-blue. Numerous field pinscratches confirm the NGC designation. The 1815/2 is the stopper to a date collection of Capped Bust half dollars.
From The Rev. Dr. James G. K. McClure Collection.

1815/2 Half Dollar, VF25
O-101, Uncracked Reverse

- 3857** 1815/2 O-101, R.2, VF25 ANACS. A mostly effaced 2 remains visible beneath the 5 in the date, the legacy of a repurposed 1812 die used to strike 47,150 half dollars in 1815. The British threat from the War of 1812 had eased, but both silver and serviceable dies were in short supply at the Mint. This VF25 example is a pleasing "circulation cameo" with light silver-gray toning on the raised devices surrounded by battleship-gray fields. Marks and abrasions are muted by the moderate circulation, yet solid definition remains on the motifs. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

- 3858** 1815/2 O-101a, R.3 — Plugged — NGC Details. XF. The plug is at 7 o'clock on the reverse. The opposite area on the obverse, at 12 o'clock, is repaired. Several thin marks cross the portrait, and the coin appears lightly bent. A collectible example of the stopper to a date collection of Capped Bust halves.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

- 3859** 1817/3 O-101, R.3, XF45 PCGS. CAC. A well-detailed example with undeniably original olive-gray toning that deepens considerably around the borders. The surfaces are smooth and problem-free. The CAC green label confirms the outstanding originality and eye appeal. A popular *Guide Book* variety. PCGS# 39511 Base PCGS# 6111

- 3860** 1817/3 O-101a, R.2, XF45 NGC. CAC. An obvious overdate with the curve of the underdigit 3 visible to the unaided eye. An early die state of O-101a, without the break in the corner of the 5 in 50 C. Golden-brown, lavender, and dove-gray toning encompasses pleasing surfaces. Smooth save for a reverse rim nick at 11 o'clock.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

3861 1817 O-113a, R.4, AU55 NGC. A die line beneath the beak is Dr. Glenn Peterson's pick-up point for the present die marriage. The descending crack through UNITED confirms the later Overton die state. The obverse border also displays several cracks. Walnut-brown, olive-green, and steel-gray toning embrace unblemished and partly lustrous surfaces.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24F6, PCGS# 39509 Base PCGS# 6109

3862 1818/7 Large 8, O-101a, R.1, AU55 NGC. CAC. The "horns" above the second 8 in the date confirm the overdate. A die crack through the leaves, and a space below the C in 50 C, attribute the piece as O-101a. Medium canary-gold, powder-blue, and olive-green toning embrace this partly lustrous and lightly abraded example.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 8VJ6, PCGS# 39541 Base PCGS# 6115

3863 1818 O-107, R.1, AU58 NGC. CAC. Dusky golden-brown and gunmetal-blue patina encompasses this smooth and satiny near-Mint silver type coin. Minor wear on the top of the eagle's head confirms brief service in early American commerce. A later die state with left-side stars and letters drawn toward the rim.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

3864 1819/8 Large 9, O-102, R.2, AU58 NGC. CAC. The Overton-102 identifier is a gap between the dentils near the 0 in the denomination. Ocean-blue and straw-gold embrace this evenly struck and lightly worn half dollar. The reverse is unabraded, and the obverse shows only moderate marks on the cheek and the field near the chin.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FC, PCGS# 39556 Base PCGS# 6119

3865 1819/8 Large 9, O-105, R.2, AU58 NGC. CAC. Golden-brown, jade-green, and lavender toning graces this lightly circulated and minimally marked example. Only a slight rim nick at 4 o'clock merits passing mention. Although available in well circulated grades, O-105 is surprisingly rare in Mint State, and the present coin might be a candidate for the Condition Census.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FC, PCGS# 39561 Base PCGS# 6119

3866 1819 O-113, R.1, AU58 PCGS. The near-brilliant surfaces exhibit virtually full mint luster on both sides, with faint areas of silver-gray toning on the obverse, with a few scattered gray streaks (possibly grease from the minting process) on the reverse. A sharp strike contributes to the plentiful eye appeal. NGC ID# 24FB, PCGS# 39552 Base PCGS# 6117

3867 1820/19 Curl Base 2, O-102, R.1, AU53 NGC. CAC. Overton-102 is readily attributed as the only Curl 2 overdate variety. The present lightly abraded example has a cream-gray obverse, while the reverse displays dappled almond-gold and lavender toning. Luster illuminates the borders.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

1821 Half Dollar, O-106, MS64 Lovely Concentric Toning

3868 1821 O-106, R.1, MS64 NGC. This readily available variety is attributed by the 21 in the date lower than the 18, while on the reverse, a straight, horizontal die defect joins two of the vertical shield stripes near their bottom. This Select example displays beautiful concentric toning on both sides with rose in the centers that radiates outward to shades of jade, aqua, and gold. The fields are semiprooflike. Census (all varieties): 24 in 64 (4 in 64+), 16 finer (4/16). NGC ID# 24FF, PCGS# 39584 Base PCGS# 6128

1822 O-104 Half Dollar, MS65 Condition Census Example

3869 1822 O-104, R.3, MS65 NGC. The key diagnostic is the high N in UNITED. The Overton reference (fifth edition) shows two MS65 examples at the top of the Condition Census for the O-104 variety. The interiors of this Choice half dollar exhibit cream-gray, gold, and violet hues with elements of cobalt-blue and forest-green around the edges. Luster percolates through the pleasing patina, illuminating strongly struck devices. A top-notch coin not only for the variety, but one of the elite 1822 survivors. Census (all varieties): 4 in 65, 5 finer (4/16). NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

3870 1823 Ugly 3, O-110a, R.3, AU50 NGC. CAC. Apricot-gold toning graces both sides, but the reverse field is chiefly electric-blue. Liberty's chin and neck are strike doubled. This lightly circulated representative is impressively unabraded, though a slight reverse rim nick at 10 o'clock is noted as an identifier.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 46YD, PCGS# 39623 Base PCGS# 6134

1825 Half Dollar, O-102, Well-Struck MS63+ Smooth, Lustrous Fields

3871 1825 O-102, R.1, MS63+ NGC. CAC. Attractive bluish-gray toning rolls across the satiny, smooth surfaces of this high-end Select Uncirculated half. A crisp strike on both sides adds to the technical and visual appeal. The O-102 variety is identified most often by the reverse, where a diagonal line crosses the apex of the horizontal shield lines just below the central apex of the shield border. Extra vertical lines appear at the bottom of gules 3, 4, and 5. While the variety is reasonably available in lesser grades, this MS63+ approaches the low end of the Condition Census for the variety. CAC endorsed.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 47PE, PCGS# 39648 Base PCGS# 6142

3872 1825 O-113, R.1, MS62 PCGS. A lustrous olive-green Bust half dollar that displays hints of rose-red and tan-gold near the rims. A few wispy marks appear on the jaw and on the field near the chin, but the eye appeal is excellent for the grade. A pleasing Capped Bust type coin.
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 3670. NGC ID# 24FL, PCGS# 39660 Base PCGS# 6142

3873 1826 O-106a, R.3, MS63 NGC. Lightly toned at the centers with colorful blue and gold hues at the borders, this satin-smooth Select Uncirculated half exudes mint luster and eye appeal. The strike is sharp for the late state of the dies, which show a diagnostic crack through RICA of AMERICA, through the arrowheads, through C, and to the rim below 50. An attractive example. NGC ID# 24FM, PCGS# 39674 Base PCGS# 6143

3874 1827/6 O-102, R.1, AU58 PCGS. The underdigit 6 is particularly bold on this O-102 variety, with both the bottom curve and the top tail of the 6 visible beneath the primary 7. PCGS must have discerned faint rub, because the handsome, silver-lilac surfaces are frosty and virtually mark-free. The strike is razor-sharp on both sides. Population: 18 in 58, 38 finer (4/16).
Ex: FUN Signature (Heritage, 1/2011), lot 10819.
From The Eagle One Collection. NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

3875 1827/6 O-102, R.1, AU58 NGC. CAC. The 6 underdigit and a blurry die break from the final A in AMERICA combine to attribute the Overton pairing. An unmarked stone-gray and golden-brown Borderline Uncirculated example. Light wear on the curls and wing extremities confirms brief circulation.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827 Square Base 2 Bust Half, XF45
 O-127, The Very Scarce 'Ear Bars' Variety**

3876 1827 Square Base 2, O-127, R.5, XF45 NGC. *Ex: Jules Reiver Collection.* Only one Mint State example of the O-127 variety is known, adding importance to this well-pedigreed Choice XF coin. This is the scarce (R.5) and popular "ear bars" variety, with three prominent square bars immediately below Liberty's earlobe. The present coin offers muted mint luster that complements light copper and gold toning. Examination with a loupe reveals numerous grade-consistent obverse abrasions, and severe obverse die erosion that merges the star points with the rims and removes most of the dentilation. The reverse die is much less eroded, and the overall strike is better than expected, with sharp detail on Liberty's hair.
Ex: Sheridan Downey (6/11/1986). Envelope Included; The Jules Reiver Collection Volume III (Heritage, 1/2006), lot 23033, which realized \$2,530. NGC ID# 24FN, PCGS# 39726 Base PCGS# 6144

3877 1827 Square Base 2, O-135, R.3, MS62 PCGS. Tied at the low end of the Condition Census for the O-135 variety, the A in STATES is rotated right to confirm the die marriage, while the obverse die is confirmed by an extra hair line beneath the I of LIBERTY. The coin is struck from a late state of the dies, with the stars lacking central details and drawn to the edge and both sides lacking the milling. An extremely lustrous and otherwise sharp Mint State coin, the surfaces are untoned and brilliant-white.
 NGC ID# 24FN, PCGS# 39734 Base PCGS# 6144

3878 1828 Square Base 2, Small 8s, Large Letters, O-117, R.1, MS62 NGC. CAC. Light rose-gold, ice-blue, and lime-green toning visits this satiny and well defined half dollar. A few wispy marks near the chin are of little import. O-117 is typically attributed by the recut serif on the C in 50 C.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FR, PCGS# 39771 Base PCGS# 6151

3879 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, MS61 PCGS. *Ex: Frederick Collection.* A splendid representative with stunning pale rose, gold, and blue toning over frosty mint luster. The reverse is cracked through the tops of UNITED STATES and above OF AM to represent a late state of the dies. Destined for a fine collection of Capped Bust half dollars.
Ex: New Netherlands (7/1976); Central States Signature (Heritage, 4/2010), lot 3192.
From The Eagle One Collection. NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

3880 1829/7 O-101, R.1, MS61 NGC. CAC. Silver-gray and caramel-gold toning encompass this satiny and unmarked overdated half dollar. O-101 shares the same obverse die as O-102, but has a different shape to the 5. Well struck except for the uppermost stars and the 0 C in the denomination.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

**1829 Half Dollar, Sharp MS64
 O-112, Die Lines Below Star 13**

3881 1829 Small Letters, O-112, R.1, MS64 NGC. CAC. A series of parallel die lines beneath star 13 is the primary pick-up point to confirm the O-112 variety. Satiny mint luster showcases light, iridescent toning that visits both sides of this sharply struck near-Gem half. An early die state, since the parallel die lines fade in later states of the obverse die. CAC endorsed quality.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

**1832 O-103 Half Dollar, MS64
 Small Letters Reverse**

3882 1832 Small Letters, O-103, R.1, MS64 NGC. CAC. Green-gold and gunmetal-gray toning encompasses this coruscating Choice half dollar. The strike is sharp except on stars 6 and 9, and a loupe is required to locate the few inconsequential marks. Overton-103 is readily attributed by the repunched upright of the 5 in 50 C. The present piece is just shy of the Condition Census for the variety.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

**1833 O-102' Half Dollar, MS64
 Unabraded, Originally Toned**

3883 1833 O-102', R.2, MS64 NGC. CAC. The "prime" die state with a die line beneath the 0 in 50 C. Unlisted in Overton, but described in Stephen Herrman's quarterly reference. Sea-green and cream-gray toning blends across lustrous and unmarked surfaces. Two minor spots are noted on Liberty's neck and on the field above the eagle's neck. Close to Condition Census quality.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FX, PCGS# 39888 Base PCGS# 6163

3884 1833 O-104, R.1, MS61 NGC. CAC. Golden-brown and steel-blue toning alternate across this satiny and essentially unabraded half dollar. The eye appeal is impressive despite occasional incompleteness of strike. Overton-104 is distinguished by the second T in STATES, which is entered higher than adjacent letters. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24FX, PCGS# 39891 Base PCGS# 6163

3885 1833 O-108, R.1, MS62 PCGS. An outstanding Mint State type coin for the budget-conscious collector, showing a bold strike and satiny luster. The obverse displays lovely lemon-gold, violet, and blue peripheral hues around a sun-gold interior, while the reverse has more consistent amber-gold color. Abrasions are minimal for the grade, and eye appeal is pleasing. NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

**1833 O-109 Half Dollar, MS64
Bold Cartwheel Luster**

3886 1833 O-109, R.3, MS64 PCGS. A frosty near-Gem example, attractively toned in blue and reddish-gold shades, with brilliant silver centers that radiate strong cartwheel luster. The strike is sharp but not quite full, with blending on the centers of a few right-side stars and on Liberty's drapery folds and at IB of PLURIBUS on the reverse. Eye appeal is terrific, while marks are limited to a sole tiny contact on the chin, visible with a loupe. Near Condition Census for the variety. NGC ID# 24FX, PCGS# 39897 Base PCGS# 6163

3887 1834 Small Date, Small Letters, O-109, R.1, MS63 PCGS. A rich blanket of blended autumn-brown and olive-green toning endows this satiny Select Capped Bust type coin. The fields display clash marks, as coined, but abrasions are refreshingly absent. A few stars lack a full impression but the remainder of the strike is good. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

3888 1836 Lettered Edge, O-114, R.2, MS62 NGC. CAC. Recutting on star 7 and the 5 in 50 C is characteristic of Overton-114. This satiny representative is draped in dusky sea-green, golden-brown, and steel-gray shades. A loupe reveals only a few incidental marks. Well struck for the variety with full definition on PLURIBUS and the eagle's left (facing) wing. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24G2, PCGS# 39949 Base PCGS# 6169

3889 1836 Lettered Edge, O-122, R.2, MS64 NGC. Ex: Highland Collection. An even blush of golden-gray toning covers this "Dot-Dash" variety, referring to a small dot to the right of the 6 in the date and a tine left of the upper serif of E in STATES on the reverse. The fields are unmarked and smooth with mild softness over the central motifs. An attractive example, likely tied for second on the condition census for the variety. *Ex: FUN Signature (Heritage, 1/2012), lot 3548.* NGC ID# 24G2, PCGS# 39963 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

3890 1836 Reeded Edge, GR-1, R.2 — Repaired — NGC Details. VF. A moderately well-detailed example of this debut Reeded Edge half dollar issue. The coin is cleaned and shows some tooling marks in the obverse fields. An affordable example of this issue with tan-gray patina. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

3891 1836 Reeded Edge, GR-1, R.2 — Improperly Cleaned — NGC Details. XF. The popular first-year issue of the Reeded Edge Bust half dollar, this piece showing olive-gold patina and well-detailed design elements. Evidence of an old cleaning precludes a numeric grade from NGC, but eye appeal is still pleasing. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1839 Reeded Edge Half Dollar, GR-7, MS63

3892 1839 Large Letters, GR-7, R.1, MS63 PCGS. A transitional year, 1839 saw production of Capped Bust half dollars for the final year, No Drapery Seated halves only in 1839, and With Drapery Seated halves for the first time. This Select Mint State piece has frosty blue-gray tinted luster with deeper peripheral toning on each side. *Ex: Long Beach Signature (Heritage, 2/2011), lot 3689.* *From The Eagle One Collection.* NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

3893 1839-O GR-1, R.1, VF30 NGC. A late die state with heavy die cracks on the reverse periphery. Toned in rich shades of olive-brown, aquamarine, and lilac-gray. The cheek, curls, and cap display wear but the eagle retains considerable feather detail. No marks are in any way significant for the grade. The Dick Graham reference suggests about 95% of the 1839-O halves were struck from the GR-1 die pair. *Ex: Houston Signature (Heritage, 12/2013), lot 4708.* *From The Eagle One Collection.* NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

3894 1839-O GR-1, R.1 — Improperly Cleaned — NGC Details. XF. A late die state with prominent cracks across both borders. Most '39-O half dollars are GR-1, identified by southern repunching on the mintmark. This well-defined stone-gray New Orleans type coin displays delicate hairlines but is free from detracting abrasions. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

**1839-O Reeded Edge Bust Half, GR-1, AU55
Terminal State of the Dies**

3895 1839-O GR-1, R.1, AU55 PCGS. The GR-1 variety is readily available for Reeded Edge half enthusiasts, but the latest state of the dies makes the variety much more challenging. On the obverse, die cracks completely encircle the coin including a strong crack through the center of the date. The reverse die is shattered, with lumps and internal cuds while the fields rise and fall along the cracks. Despite the demise of the dies, this example retains attractive golden luster and remarkable definition on the devices. Original warm-gray patina blankets both sides with no abrasions or marks to report. Population (all varieties, regardless of die state): 32 in 55 (1 in 55+), 57 finer (4/16). NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

- 3896 1840 Small Letters, WB-101, MS64 NGC.** (Reverse of 1839). Ex: Dick Osburn Collection. Silver mint luster shines through rich, iridescent toning on both sides of this well-preserved Small Letters half. Blue and russet shades figure prominently in the pleasing coloration. Struck from a late state of the dies, with lengthy die cracks at the tops of the letters on the reverse. The strike is razor-sharp throughout, with just a few tiny marks on the attractive, semireflective surfaces. Census: 11 in 64 (2 in 64+), 17 finer (4/16). Ex: *The Dick Osburn Collection (Stack's Bowers, 8/2011), lot 7003.* NGC ID# 24GM, PCGS# 572002 Base PCGS# 6234

1841 Half Dollar, Sharp MS64 Attractively Toned

- 3897 1841 WB-101 MS64 NGC.** Many 1841 halves are dramatically weak at the eagle's head, often with a soft strike on the neck and breast as well as the left leg and talon, yet this example shows only slight weakness in those areas, as well as minor blending on a few of the obverse star centers. Attractive gunmetal-blue toning at the borders surrounds light, bronze-gold centers on both sides. Mint luster glows beneath the attractive toning on this near-Gem example, with and marks are few. A light abrasion at Liberty's upper gown line is noted. Census: 8 in 64 (2 in 64+), 5 finer (4/16). PCGS# 572007 Base PCGS# 6236
- 3898 1842 Medium Date, Repunched Date, WB-106, MS62 NGC.** CAC. Ex: "Col." E.H.R. Green. Recut 8 and Errant 8 in the Rock. This condition rarity displays attractive silver-gray toning with light gold highlights on both sides along with deep blue-gray peripheral coloration. There are only a few minor marks in the reverse field above the eagle. The 8 in the date is recut west with doubling evident to the east of the prominent 8. The upper loop of a third 8 shows just right of the shield's point in the hemline of Liberty's gown. The reverse displays interesting and extensive die cracks, typical of this die marriage. Rare in Mint State, and a desirable variety for the specialist. Note that the variety designation is not on the coin's holder. Ex: "Colonel" E.H.R. Green; *Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$2.00; Eric P. Newman Numismatic Education Society; Newman Collection, Part II (11/2013), lot 33694.* NGC ID# 24GU, PCGS# 572014 Base PCGS# 6239
- 3899 1844-O Repunched Date, WB-104, MS62 PCGS.** CAC. An array of die cracks with two internal cuds on the reverse makes this variety interesting, and the repunched final 4 in the date on the obverse makes it a doubly desirable die pair. A full strike prevails on both sides — unusual for this New Orleans issue — with original frosty, album toning that displays ocean-blue and peach-gold shades at the margins and lilac-gray patina at the centers. Population (all varieties): 8 in 62, 25 finer. CAC: 3 in 62, 4 finer (4/16). NGC ID# 24H2, PCGS# 572032 Base PCGS# 6246

- 3900 1846 6 Over Horizontal 6, WB-104, FS-301, XF40 NGC.** CAC. The 1846/Horizontal 6 Medium Date Seated half is a famous "demand" rarity — the number of examples available is always exceeded by the number of collectors who want one. One of the more outlandish die cutter's errors in the entire federal series, the primary 6 is recut over a horizontal "lazy" 6 with no attempt to efface the error. This is a wonderful representative of the variety and a textbook example. Light, natural silver-gray patina is attractive with blue-gray accents and excellent eye appeal. Sharp definition remains on all of the devices with perfect rims, dentils, and a crystal-clear overdated 6. LIBERTY is fully sharp on the shield. One of the most-sought *Guide Book* varieties of U.S. coinage, CAC endorsed. Census: 2 in 40, 32 finer. CAC: 2 in 40, 7 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254
- 3901 1846-O Tall Date, WB-106, Die Pair 25, R.6, VF35 PCGS.** A Choice and problem-free VF example, attractively toned with only a few light marks on the otherwise smooth fields and motifs. The grayish-brown surfaces show glints of reddish-gold in protected areas with a slightly deeper toning at the margins. All letters of LIBERTY are visible on the shield. The O-Mint Tall Date is always in demand by both type and Seated half specialists. Population: 6 in 35, 28 finer (4/16). NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256
- 3902 1848-O WB-101, Die Pair 15, R.3, MS63 PCGS.** Faint die cracks are visible through the right-hand obverse stars and the reverse legend, although diagnostic die lumps on the obverse are the most useful pick-up points for the variety. This Select Uncirculated example shows splashes of brownish-gold toning that deepen at the rims with occasional steel-blue accents at the borders. Sharply struck for this O-Mint issue, with plentiful silver luster and no significant marks to mention. The 1848-O is notably scarce in Mint State. Population (all varieties): 9 in 63, 8 finer (5/16). NGC ID# 24HD, PCGS# 572065 Base PCGS# 6261
- 3903 1849 WB-101 MS63 PCGS.** The design elements of this attractive Select specimen are sharply detailed in most areas, but a touch of softness shows on the eagle's left (facing) claw. The lightly marked surfaces show hints of powder-blue and greenish-gold toning, with much prooflike reflectivity in the fields. Population: 12 in 63, 26 finer (5/16). NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262
- 3904 1849 WB-101 MS63 PCGS.** CAC. Pleasing iridescent toning covers the semireflective, lustrous surfaces of this Select Uncirculated example. Lilac, blue, and sunset-gold hues appear when angling the coin in light. The central devices are well-struck, although slight weakness at the stars is noted. Marks are limited to a few tiny ticks. A minuscule lump on the serif of the first 1 in the date suggests the possibility of an underdigit, but in our opinion it is not definitive as such. Population: 12 in 63, 26 finer. CAC: 5 in 63, 9 finer (4/16). NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262
- 3905 1849-O WB-101, Die Pair 7, R.3, MS62 NGC.** CAC. Two large die lumps — one on the rock to the left of Liberty's hand, the other near Liberty's left knee — join two diagnostic die cracks on the obverse to confirm the early die state of this variety. The reverse displays a splendid die crack from the rim through the second A of AMERICA into the eagle's wing near the shield edge. Lustrous silver-gray surfaces show sharp definition on the central elements but weakness at several obverse star centers and Liberty's topmost hair strands. CAC endorsed for eye appeal and quality. Census (all varieties): 3 in 62, 14 finer. CAC: 2 in 62, 6 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection.* PCGS# 572073 Base PCGS# 6263
- 3906 1851 Repunched Date, WB-103 — Improperly Cleaned — NGC Details.** AU. Faint hairlines are visible on both sides from an old cleaning, yet the surfaces have recovered somewhat to display colorful gold and steel-blue toning. A scarce date with just 200,750 pieces struck — many of which were melted, since the value of the intrinsic silver exceeded the face value of a half dollar in 1851 and 1852. The second 1 in the date is widely repunched left. A challenging issue in the series and a reasonable value for the perspective bidder considering the NGC net grade. From *The Rev. Dr. James G. K. McClure Collection.*

3907 1854 Arrows, WB-101, MS64 NGC. The popular first year of a two-year design variation of the Seated Liberty type with Arrows at the date but without the reverse rays that appeared the previous year. This boldly struck Choice Mint State piece has lovely blue and gold toning and glimmering luster. Census: 32 in 64, 12 finer (5/16). NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

3908 1854-O Arrows, WB-101, Die Pair 52, R.3, MS63 NGC. Diagonal die lines near the date and die cracks through AM and IC in AMERICA aid in attribution. Violet-gray centers and steel-blue borders characterize this impressive Select O-mint half dollar. It is the needle-sharp strike, however, that makes this offering so remarkable. Light ticks are inconsequential. NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

3909 1854-O Arrows, WB-101, Die Pair 3, R.1, MS64 PCGS. Struck from a late state of both the obverse and reverse dies — but not the latest state — since a triangular die cud has not yet formed at the intersection of converging die cracks beneath HALF DOL. This is an attractive near-Gem example with lustrous surfaces and iridescent toning. Sharply struck with minimal marks and abrasions, both the eye appeal and technical quality are substantial. The Bugert reference lists 58 varieties of the high-mintage 1854-O. Population (all varieties included): 73 in 64, 34 finer (4/16). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1855-O WB-101 Arrows Half Dollar
Brilliant and Frosty Gem, Scarce Die Pair**

3910 1855-O Arrows, WB-101, Die Pair 16, R.5, MS65 PCGS. CAC. Struck from a monogamous die pair (the sole use of both the obverse and reverse dies). Highly lustrous surfaces display a liberal speckling of blue and olive-gray toning on both sides and a nearly full strike. The date and the accompanying arrows were struck into the master die so they do not vary in position among the varieties, making attributions all the more difficult. With a mintage approaching 3.7 million pieces, die pairs are numerous and new discoveries are already being made. Gem examples of the 1855-O are very scarce despite the large mintage. A scattering of tiny bagmarks keeps this vibrant MS65 from an even finer grade. Population (all varieties): 22 in 65 (1 in 65+), 8 finer. CAC: 8 in 65, 3 finer (4/16). NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

3911 1857-S Medium S, Blundered Date, WB-103, Die Pair 3, R.4, XF45 PCGS. Medium S mintmark. Repunching of the 1 in the date appears far to the left of the date as two dashlike serifs — one for the flag of the 1, the other from an errant bottom left serif. The raised elements are surrounded by deep-brown toning with tan-brown central motifs. Small change was in big demand on the West Coast in the 1850s and the 158,000-piece mintage was hardly enough to keep up with the public's need. Few pieces survive. This Choice XF is sharply struck and a perfect collector grade. Population: 16 in 45, 23 finer (4/16). NGC ID# 24HU, PCGS# 572107 Base PCGS# 6292

**1861 Half Dollar, MS64+
High-End Type Candidate**

3912 1861 WB-101 MS64+ NGC. CAC. Mint luster shines with pearlescent brightness through a thin veil of iridescent toning on the obverse, with rich and attractive powder-gray patina on the reverse. Shades of blue, sea-green, and peach-gold prevail over more subtle hues of supporting colors. With nearly 2.9 million pieces produced for the 1861 Philadelphia halves, near-Gem or finer coins are surprisingly scarce. This example offers tremendous eye appeal that is reflected in the NGC Plus designation and CAC endorsement. The strike is uniformly sharp save for slight blending on a few of the star centers. Census: 61 in 64 (1 in 64+, 1 in 64★), 29 finer. CAC: 5 in 64, 18 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

**1861 WB-101 Half Dollar, MS65
Brilliant, Lustrous, and Sharply Struck**

3913 1861 WB-101 MS65 NGC. Ex: Ashland City. While 1861 halves were plentifully minted (nearly 2.9 million pieces struck), the lack of Gem or finer examples is somewhat perplexing. The Wiley-Bugert reference mentions "Almost all 1861's seen are strongly struck with little evidence of die erosion." Rather, most of the coins went into circulation and soon disappeared into wartime hoards. This Gem example is a seldom-seen survivor — frosty and brilliant with glowing mint luster across both sides. The strike is needle-sharp with only a few inconsequential, tiny marks or abrasions. Census: 22 in 65, 7 finer (4/16). NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

**1861-O Half Dollar, XF40
Confederate Obverse, FS-401**

- 3914 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, XF40 PCGS.** This pleasing XF example is smooth and attractive with golden-gray surfaces with no significant marks for the grade. The WB-102 variety utilizing Die Pair 11 is the most popular of seven die marriages used to strike 1861-O half dollars under the authority of the Confederacy. Confirmed by a diagnostic die crack running from the right of star 7 rim-to-nose, it is paired with the normal federal reverse eagle design. One half of the die pair was also used to strike the most famous half dollars of the Civil War era. Sharing the same obverse die as the “famous four” original, genuine CSA-reverse half dollars (which were a product of Die Pair 12), the present obverse die was combined with a unique Confederate reverse die with the Shield of the Confederacy design — thus the variety’s vast popularity. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

**1861-O Seated Liberty Half Dollar, XF45
C.S.A. Obverse**

- 3915 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, XF45 PCGS.** This coin shows the extensive die break at Liberty’s nose that identifies the obverse die used to strike the four original C.S.A. half dollars. Only light wear shows on this Choice XF example, all letters in LIBERTY are bold, and the clasp and scroll edges are complete. The lightly abraded surfaces are toned in shades of lavender-gray, golden-tan, and amber. Population: 5 in 45, 14 finer (5/16). NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

- 3916 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401 — Obverse Scratched — NGC Details. AU.** Struck from the same obverse die (but in a later die state) used to strike the four famous Original Confederate reverse halves, and as such always in demand by Seated half specialists. This example shows a pair of light pinscratches above Liberty’s head, but no other real problems over the smooth, silver-gray surfaces. Sharp definition remains on both sides with small marks but no major distractions.
From The Rev. Dr. James G. K. McClure Collection.

**1862 Half Dollar, MS64
Low-Mintage, Hoarded Civil War Issue**

- 3917 1862 MS64 NGC. CAC.** Following a Philadelphia mintage of more than 2.9 million Seated halves in 1861, the Mint struck just 253,000 pieces in 1862, most of which were soon pulled from circulation into Civil War silver hoards. This is a lightly toned and scarce, near-Gem example of the issue, with a blush of russet-gold toning over the lilac-silver and powder-gray surfaces. Strong mint luster shines through on both sides. The population reports for both PCGS and NGC confirm the Mint State scarcity of the 1862. CAC endorsed. Census: 16 in 64 (3 in 64★), 9 finer. CAC: 5 in 64, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24J9, PCGS# 6307 Base PCGS# 6307

**1863-S Seated Half Dollar, MS63
Brilliant and Frost-White Surfaces**

- 3918 1863-S Small Broken S, WB-102, Die Pair 3, R.3, MS63 PCGS.** The date is positioned far to the left, confirming the variety. The Small S mintmark is partially broken at the upper loop, positioned vertically below the feather tip. Several raised die lines above Liberty’s head and shoulder are additional pick-up points for the variety. An untoned and lustrous Select example, with only a few minor marks. The strike is uniformly sharp except at Liberty’s head and the surrounding stars 6, 7, and 8. Population (all varieties): 17 in 63, 27 finer (4/16). PCGS# 572157 Base PCGS# 6310

**1866-S WB-101 Half Dollar, XF40
Scarce No Motto Variant**

- 3919 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.5, XF40 NGC. CAC.** A single die pair produced the 60,000 No Motto half dollars, which were briefly minted by the San Francisco Mint in early 1866 before the With Motto reverse dies arrived. Most coins were quickly distributed into commerce and few examples survive in XF or finer grades. This silver-gray example is sharply defined for the issue, with all letters of LIBERTY bold on the shield and nice remaining detail on the eagle's plumage. CAC endorsed — scarce and important for all Seated Liberty collectors. Census: 9 in 40, 13 finer. CAC: 2 in 40, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

- 3920 1870-CC WB-101, Die Pair 2, R.5, AG3 PCGS.** A smoothly worn survivor of the scarce first-year Carson City issue. Many of the diagnostics are lost to the heavy wear, but the lack of drapery under the elbow and no die clashing at the reverse shield narrows the variety identification to Die Pair 2. This piece is perfectly suited to a lower-grade circulated set — a problem free and appealing example. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

- 3921 1872-CC WB-101, Die Pair 7, R.4, VF35 NGC. CAC.** The mintage of 257,000 pieces was generous by Carson City standards but not in the context of the entire series, with Choice examples such as this VF coin always in short supply for collectors. Pleasing silver-gray surfaces show minor, deeply toned build-up in protected areas of the motifs. Nice definition remains including all letters of LIBERTY visible, albeit with the expected wear at E. Only minor lines and ticks are seen on either side and the rims are sharply defined. Census (all varieties): 6 in 35, 40 finer. CAC: 3 in 35, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**1873-CC No Arrows Half, Scarce XF45
WB-101, 1 Repunched in the Date**

- 3922 1873-CC No Arrows, Small CC, WB-101, Die Pair 2, R.5, XF45 NGC.** Attractive, golden-gray color covers both sides of this lightly toned, No Arrows half. The 1873-CC is a low-survival issue either with or without Arrows at the date. The No Arrows is the scarcer of the two types, always with a Closed 3 and a Small CC mintmark. Just 122,500 pieces were minted. The Open 3 halves, in contrast, all have Arrows at the date and outnumber the No Arrows varieties about 2 to 1. This Choice XF No Arrows example retains strong definition and shows only a few light marks — primarily, in the right obverse field. The 1 in the date is noticeably repunched east. A trace of mint luster remains. Census (all No Arrows varieties): 5 in 45, 15 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. PCGS# 572214 Base PCGS# 6338

**1874 Arrows Half Dollar, Sharp MS64
WB-102, Large Arrows**

- 3923 1874 Large Arrows, WB-102, MS64 PCGS.** Mottled blue and slate-gray toning shares surface area with satiny silver luster on both sides of this near-Gem Large Arrows half. The final issue of a two-year type, the 1874 is scarce in MS64 condition and rare any finer. This Choice example is sharply struck on the obverse stars with only minor weakness on Liberty's hair strands and the eagle's left (facing) talon. PCGS reports just 23 finer coins (4/16). NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

**1874-CC WB-101 Arrows Seated Half, VF30
Scarce Carson City Issue, Great Collector Coin**

- 3924 1874-CC Arrows, WB-101, Die Pair 3, R.4, VF30 NGC.** Three obverse dies were employed with a single reverse die to accomplish the 59,000-piece mintage of 1874-CC half dollars. Slight variations in date position and small die markers help identify the obverse, but a small raised defect (a.k.a. "cowlick") on the back of the eagle's head confirms the variety. The 1874-CC challenges series specialists in all grades — the Bugert reference estimates 300 to 350 survivors. This warm-gray example shows pleasing, problem-free surfaces with sharp detail for the VF level. Census: 1 in 30, 35 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

**1875-S Half Dollar, MS65
Frosty Surfaces, Attractively Toned**

- 3925 1875-S Very Small S, WB-101, Die Pair 8, R.3, MS65 PCGS.** Very Small S. The numerous advanced cracks on the reverse periphery characterize the Wiley-Bugert die variety. Original olive-green and apricot-gold toning endows this satiny and well preserved Gem. Well struck except on the upper-left stars. A popular Old West type issue, with 3.2 million pieces struck at the San Francisco Mint. Surprisingly few Gem or finer coins survive from such a large mintage. Population: 59 in 65 (3 in 65+), 26 finer (4/16). NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351

1876 WB-101 Half Dollar, MS65

Few Examples Are Finer

- 3926** 1876 Open Bud, WB-101, MS65 PCGS. CAC. Splashes of golden-orange toning at the borders join lustrous, pearlescent silver centers for outstanding eye appeal on both sides of this Gem 1876 half dollar. A large mintage of more than 8.4 pieces is represented by precious few Gem or finer coins, making this CAC-endorsed example a target for any advanced collection. The strike is razor-sharp, and there are no significant marks to report. An interesting network of die cracks on the reverse exists on both sides. Population: 21 in 65 (3 in 65+), 4 finer. CAC: 7 in 65, 4 finer (4/16). NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

1876-CC WB-101 Seated Half, MS64

Extensive Reverse Die Cracks

- 3927** 1876-CC Small CC, WB-101, Die Pair 16, R.3, MS64 NGC. Both the obverse and reverse dies were retired after striking this variety, one of 42 listed die pairs used to strike nearly 2 million Carson City half dollars in 1876. Extensive die cracks on both the obverse and reverse provide ample reason for the sole use of the dies. In contrast to the late state of the dies, the strike is sharp on both sides. Light blue highlights and orange-gold base toning visit the slightly reflective, softly lustrous surfaces. A Choice near-Gem example of this conditionally challenging issue despite the large mintage. Census (all varieties combined): 24 in 64, 17 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 645M, PCGS# 572238 Base PCGS# 6353

- 3928** 1876-S Open Bud, Very Small S, WB-102, MS64+ PCGS. CAC. Type One Reverse, with the lower berry on the branch split. Creamy luster and rich border toning, in shades of deep purple, cobalt-blue, and golden-brown, are seen on each side of this visually captivating near-Gem. Well-struck and carefully preserved, with blemish-free surfaces that are close to Gem quality. Population: 40 in 64 (3 in 64+), 16 finer. CAC: 7 in 64, 4 finer (5/16). Ex: Dallas Signature (Heritage, 11/2005), lot 2615. NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

1877-S WB-102 Half Dollar Plus-Graded Gem Uncirculated Coin

- 3929** 1877-S Open Bud, Very Small S, WB-102, Die Pair 12, R.3, MS65+ PCGS. CAC. More than 5.3 million pieces were struck of the 1877-S half dollar, and better-grade examples can occasionally be located. This is a nicely toned, original example that is fully struck in all areas. Both sides are lightly toned in subtle shadings of gray, rose, and lilac with strong underlying mint luster. Population (all 1877-S varieties): 36 in 65 (1 in 65+, the present coin), 24 finer. CAC: 8 in 65, 8 finer (4/16). PCGS# 572253 Base PCGS# 6357

- 3930** 1877-S Closed Bud, Very Small S, WB-104, Die Pair 34, R.3, MS64 NGC. CAC. The 1877-S mintage was an all-time high for an S-Mint Seated half at 5,356,000 pieces, but it was the final significant mintage of the series for the San Francisco Mint. After a brief production of 12,000 pieces in 1878, no more Seated halves carried the S mintmark and half dollar mintages nationwide waned. The Bugert reference lists 37 die pairs that were used to accomplish the large 1877 production. Most likely, several more die marriages await discovery. This lightly toned example flashes silver luster beneath pale-gold and cloudy gray toning. Some deep-gray toning sits the crook of Liberty's arm above the drapery. CAC endorses the coin, one of 25 near-Gem coins with CAC approval in 64, and 16 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

- 3931** 1878-CC WB-101, Die Pair 1, R.4, Fine 15 NGC. The 1878-CC trails only the 1870-CC in rarity among Carson City half dollars based on mintage as well as on the estimated number of surviving coins. Just 62,000 pieces were struck, apparently all from a single die pair, and fewer than 250 pieces are thought to exist in all grades. This Choice Fine example is original and pleasing, with warm-gray toning and strong definition on the motifs. LI and TY are present on the shield, with partial visibility of the other letters. The rims and dentils show only moderate wear — a no-problem coin of significant series importance. Census: 1 in 15, 22 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. PCGS# 572257 Base PCGS# 6359

1881 Half Dollar, MS65+ Colorfully Toned Both Sides, WB-102

- 3932** 1881 Closed Bud, WB-102, MS65+ NGC. Partially prooflike fields and frosted central devices dazzle with rainbow colors when viewed in advantageous light. This is a no-questions business strike, with the Type Two Closed Bud reverse and diagnostic die lines in the dentils above ERICA of AMERICA. The coin is reasonably well-struck but its main attraction is the dramatic toning, which exudes originality and eye appeal. Census: 10 in 65 (3 in 65+, 1 in 65★), 13 finer (4/16). NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

**1885 Seated Liberty Half, MS66
High-Grade Business Strike**

- 3933 1885 WB-101 MS66 PCGS.** Business strikes are significantly rarer than proofs in high Mint State grades for the 1885 issue. Just 5,200 pieces were struck for circulation. This MS66 example is lightly toned in iridescent colors while luminous mint luster embraces both sides of the coin. The strike is sharp. A glass reveals a pair of tiny marks — one on each arm — but the otherwise nearly faultless fields and motifs confirm the Premium Gem designation. Population: 5 in 66, 3 finer (4/16). NGC ID# 24KY, PCGS# 572270 Base PCGS# 6367

PROOF SEATED HALF DOLLARS

**1860 Seated Half, PR64
Colorfully Toned, Well-Preserved**

- 3934 1860 PR64 PCGS. WB-102.** Type Two Reverse. The L in HALF was widened at the base to more closely resemble the L in DOL. Blue, lilac, and gold toning form an attractive combination on this near-Gem proof example. The fields show stronger mirroring on the obverse than the reverse (a function of the toning), yet the margins on both sides radiate strong golden reflectivity. In general, the 1860 proofs show extra care in their strike — most are razor-sharp, a likely effort by the Mint to provide a well-made coin during the initial year of marketing proofs to the general public. Demand fell short of expectations when only 600 pieces were sold from the 1,000-piece mintage. Population: 40 in 64, 24 finer (4/16). NGC ID# 27TK, PCGS# 6414

- 3935 1861 PR63 PCGS.** Proof mintages are deceptive for 1859-1861 proofs. Snowden authorized more proofs to be struck in 1860-61 than the Mint could actually sell to collectors and dealers. Plus he charged a premium for proofs beginning in 1860 with the result that dealers especially stayed away from proofs in 1860-61. Many were melted at year's end. This is a richly toned, brightly reflective proof half that would make an excellent No Motto type coin. NGC ID# 27TL, PCGS# 6415

**1862 Seated Half Dollar, PR64
Royally Toned Proof**

- 3936 1862 PR64 PCGS.** The effect of the Civil War on proof mintages was less of a factor than the proofing fee introduced in 1860 — just 13 cents in those days, but a considerable amount in the eyes of the collecting public. Proof mintages were reduced accordingly. Just 550 proofs were struck in 1862. This near-Gem example is richly toned in shades of royal blue with peach-gold margins and hints of rose at the centers. Substantial mirroring exists in the field, but it must be viewed at the proper angle to be appreciated. The strike is needle-sharp throughout both sides. Population: 49 in 64 (1 in 64+), 18 finer (4/16). NGC ID# 27TN, PCGS# 6416

- 3937 1863 PR63 NGC. WB-101.** Numerous lint marks on the obverse suggest the die was polished before striking this Select proof example. Steel-blue, charcoal-gray, and amber-gold toning is more intense at the margins of this medium-mirrored example. A bit of cloudiness in the right obverse field and at the lower-right reverse near the arrowheads accounts for the assigned grade. Just 460 proofs were made of this Civil War issue. Census: 37 in 63, 53 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 27TP, PCGS# 6417

- 3938 1864 PR63 PCGS. WB-101.** The proof mintage was a mere 470 pieces in 1864, a small quantity but reasonable considering the circumstances at the Mint and the ongoing turmoil from the Civil War. Deep blue, gold, and coppery-rose shades combine into a complex and pervasive patina over the mirrored fields and devices. A good light source and the proper viewing angle reveals the impressive coloration of this Select proof. NGC ID# 27TR, PCGS# 6418

- 3939 1864 PR63+ NGC. CAC. WB-101.** Some light lines in the obverse fields mandate the Select proof grade, although the eye appeal is excellent and recognized by NGC with the Plus designation. The strike is razor-sharp throughout. Sky-blue, violet, burgundy-red, and orange-gold toning provide a pleasing palette around the lightly frosted central devices. One of just 470 proofs struck during this Civil War year. CAC endorsed, one of the few 1864 proofs to earn the green bean award. CAC: 3 in 63, 13 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 27TR, PCGS# 6418

**1865 Seated Half, PR64
Choice Surfaces, Sharp Strike**

- 3940 1865 PR64 PCGS.** The final No Motto proof of the series saw a mintage of just 500 pieces, in line with other war-year proof production but on the low side for the Seated series. Based on the number of submissions at the grading services, many proofs survived but relatively few exceed the near-Gem grade of this attractive example. Fawn-gold toning varies in intensity across the deep-mirrored surfaces, with bluish-gray accents for nice eye appeal. The strike is pinpoint-sharp on both sides. Population: 55 in 64 (1 in 64+), 22 finer (4/16). NGC ID# 27TS, PCGS# 6419

**1865 Seated Half, PR64+
High-End, Choice Surfaces**

- 3941 1865 PR64+ NGC. CAC. WB-101.** The proof strike is razor-sharp on this high-end survivor from a mintage of just 500 pieces. Attractive blue, violet, and plum-red toning blankets both sides. The mirrored fields show only a few delicate lines beneath the rich patina. As the final year for No Motto proofs, the 1865 is an important date in the series. Only two display the NGC Plus designation at this near-Gem level. CAC endorsed. Census: 54 in 64 (2 in 64+), 38 finer. CAC: 3 in 64, 8 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27TS, PCGS# 6419

- 3942 1866 Motto PR64 NGC. CAC. WB-101, Type One Reverse.** A chipped dentil over the R in AMERICA suggests this reverse was prepared from the existing No Motto master die with the Motto added, rather than from a new master die. This proof — like all of the Seated halves from our consignor — was carefully preserved for decades, acquiring colorful rim-to-rim multicolor toning over the mirrored fields. The sharply struck, lightly frosted devices display a similar patina, reducing the visible contrast but still showing excellent eye appeal. CAC endorsed. Census: 35 in 64, 22 finer. CAC: 7 in 64, 6 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27TZ, PCGS# 6424

- 3943 1867 PR64+ NGC. CAC. WB-101.** Steel-blue toning at the borders frames wheat-gold centers of this fully struck, borderline Gem proof. Delicate die polish lines exist beneath the rich patina. Viewed at an angle, the mirrored fields are vibrantly colorful and wonderfully preserved. Every strand on Liberty's hair and every star center are bold. Proof mintages started to creep up after the war, but still only 625 pieces were struck of the 1867. This Plus-graded example is CAC endorsed. Census: 44 in 64 (1 in 64+), 35 finer. CAC: 4 in 64, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U2, PCGS# 6425

- 3944 1868 PR64 NGC. CAC. WB-101.** Hoarding of silver during the war years did not subside until nominal changes were made in the weight of silver coinage in 1873, but the lack of circulating coins was of little consequence to collectors, who usually preferred proofs to business strikes. The present Choice proof displays flashes of silver amid vivid neon-blue, violet, and sunset-orange toning. A remarkably full strike covers both sides of this eye-catching near-Gem example. CAC endorsement confirms its quality for the assigned grade. Census: 38 in 64 (1 in 64★), 34 finer. CAC: 5 in 64, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U3, PCGS# 6426

**1869 Seated Half Dollar, Toned PR65
Outstanding Strike and Mirrors**

- 3945 1869 PR65 NGC. CAC. WB-101.** A vibrant — yet deeply toned — proof with vivid orange-gold, violet, and blue toning across smooth, mirrored surfaces and equally toned devices. Both the technical quality and eye appeal are outstanding. The strike is exceedingly sharp in all areas including Liberty's hair definition and the eagle's left (facing) talon as well as the nearby arrow fletchings. One of just 600 proofs struck, and Gem proofs are scarce so well-preserved. CAC endorsed. Census: 15 in 65, 16 finer. CAC: 3 in 65, 6 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U4, PCGS# 6427

**1869 Half Dollar, PR65+
Attractively Toned**

- 3946 1869 PR65+ PCGS. CAC.** Proof 1869 Seated half dollars are most frequently seen in PR64 and lower grades. This high-end Gem is conditionally rare. The strike is sharp, and the fields are deeply mirrored without distracting imperfections. Lemon-gold, aquamarine, and lavender-blue hues encompass each side, delivering excellent eye appeal. Population: 13 in 65 (1 in 65+), 8 finer. CAC: 3 in 65, 6 finer (5/16). NGC ID# 27U4, PCGS# 6427

- 3947 1871 PR64 NGC. CAC. WB-101.** Longtime storage in a kraft envelope produced the dramatic, multicolor toning that occupies both sides of this Choice 1871 proof half. The proper angle reveals spectacular underlying colors that meld into an olive-bronze skin when viewed out of the light. Deeply mirrored fields reveal shades of electric-blue and magenta alongside sea-green, violet, and orange-gold toning. Crisply struck, only minor blending at the arrow fletchings and the left talon preclude a full strike. A beautiful, Choice proof, CAC endorsed. Census: 35 in 64 (1 in 64★), 31 finer. CAC: 3 in 64, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U6, PCGS# 6429

- 3948 1872 PR64 NGC.** A spectacular, multihued patina was acquired over many decades of careful preservation to imbue this 1872 proof half with its dramatic eye appeal. A needle-sharp strike defines the smallest intricacies of the motifs, which share the same vivid coloration as the mirrored fields. A near-Gem, the grade is limited only by a toned-over horizontal mark near the elbow and a curious, untuned circular area above LF of HALF on the reverse. Census: 37 in 64, 24 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U7, PCGS# 6430

3949 1873 No Arrows PR64 NGC. CAC. WB-102. Glittering, mirrored fields display vibrant reflectivity and attractive coloration. Sea-green and steel-blue shades hug the rims, while ruby-red accents float over gold-toned fields. The frosted central devices exhibit medium contrast despite the rich patina. A Choice proof in all regards — an exceptional, original example of the Closed 3, No Arrows design. A razor-sharp strike exists except for the usual blending at the eagle's left (facing) ankle, one of 600 proofs struck for the type. Census: 30 in 64, 45 finer. CAC: 4 in 64, 10 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U8, PCGS# 6431*

3950 1873 Arrows PR62 PCGS. WB-106. Large Arrows Obverse. All With Arrows proof 1873 half dollars exhibit the Open 3 logotype, as seen here. This lower-grade collector coin displays a razor-sharp strike and reflective fields. Milky-gold toning on each side masks grade-limiting marks. NGC ID# 27UU, PCGS# 6434

3951 1874 Arrows PR63 NGC. CAC. WB-101. A blue-toned Select proof, with a blaze of reddish-gold toning across the obverse. The reverse is two-toned as well, with azure-blue shades above and peach-gold toning below over the mirrored fields and frosty central devices. Sharply struck with technical quality that suggests an even higher grade, the reflective surfaces on the obverse are somewhat muted by the rich, original patina. Still, a highly appealing proof with CAC endorsement. *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UV, PCGS# 6435*

1874 Arrows Half Dollar, PR64 Cameo Colorful Two-Year Type Coin

3952 1874 Arrows PR64 Cameo PCGS. WB-101. Proof half dollars struck in 1873-1874, like their circulation-strike counterparts, have arrows flanking the date to signify a minuscule weight increase. The brief production period and relatively low mintage (only 700 proofs in 1874) make them widely sought-after for type purposes. This splendidly toned specimen features rich cobalt-blue, violet-rose, and peach-orange toning without inhibiting the bold field-motif contrast on each side. Population: 38 in 64 (2 in 64+) Cameo, 5 finer (4/16). NGC ID# 27UV, PCGS# 86435

3953 1875 PR64 NGC. CAC. WB-101. Just 700 proofs were struck in 1875, about average for the era except for a larger mintage in the centennial year of 1876. Gunmetal-blue accents at the borders embrace wheat-gold mirrors in the fields that extend across the lightly frosted portrait of Liberty. The reverse shows lively bands of colors that include electric-blue, violet, and yellow-gold. The strike is bold throughout except at the high points of Liberty's top curls, the eagle's left talon, and the rock support beneath Liberty's foot. Excellent eye appeal exists for this near-Gem proof, CAC endorsed. Census: 40 in 64 (1 in 64★), 37 finer. CAC: 5 in 64, 10 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27U9, PCGS# 6436

3954 1876 PR64 NGC. CAC. WB-101, Open Bud. Blue, lavender, and caramel-gold toning covers both sides, limiting the contrast with similarly toned central motifs. Nice mirroring in the fields is visible when viewed at an angle. A pleasing, original near-Gem proof. Sharp stars on the obverse balance slight blending on Liberty's top-most hair strands and at the opposing area of the eagle's left talon. CAC endorsed with great eye appeal. Census: 48 in 64, 27 finer. CAC: 8 in 64, 7 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UA, PCGS# 6437*

1876 Half Dollar, PR64 Cameo Stark Contrast, Pale Rim Toning

3955 1876 PR64 Cameo PCGS. Seated half dollar proof output ballooned to 1,150 pieces in 1876, perhaps in anticipation of greater demand during the Centennial celebrations. This Choice Cameo proof exhibits stark field-device contrast with frosted centers and reflective mirrors framed by blushes of pale patina at the rims. Population: 16 in 64 (2 in 64+) Cameo, 18 finer (4/16). NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

1876 Seated Liberty Half, PR65 Cameo Brilliant and Well-Struck

3956 1876 PR65 Cameo NGC. Type One Reverse (Open Bud). A brilliant, white-on-black example with mirrorlike fields and heavily frosted motifs. The proof mintage was large in 1876 (1,150 pieces) to accommodate demand for the Centennial date. Relatively few proofs survive with the bold cameo contrast of this coin, which is sharply struck with only scattered delicate lines visible with a lens. Census: 12 in 65 Cameo, 8 finer (4/16). NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

3957 1877 PR64 NGC. CAC. WB-103, Closed Bud Reverse. Pale, champagne-gold toning deepens beneath the date and along the left margin into orange-gold accents on both the obverse and, to a lesser extent, on the reverse. Only slight blending at the eagle's left leg prevents a full strike. Just 510 proofs were struck for the year, making the 1877 one of the scarcer issues in proof format — a fact confirmed by the low population totals at both PCGS and NGC. This pleasing example is CAC endorsed. Census: 47 in 64, 16 finer. CAC: 3 in 64, 5 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UC, PCGS# 6438

3958 1878 PR64 NGC. CAC. Sharply struck and lightly toned, pale blue accents visit both sides of this peach-gold proof. More scarce than its mintage suggests in business strike format, the 1878 proofs were struck in larger quantity than the previous year and near-Gem or finer pieces are somewhat more obtainable. This Choice example carries the CAC endorsement for quality and eye appeal, an important vote in its favor. CAC: 3 in 64, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UD, PCGS# 6439

**1878 Half Dollar, PR65 Cameo
Exceptional Eye Appeal**

- 3959 1878 PR65 Cameo NGC. CAC. Type Two Reverse, Closed Bud.** Deep steel-blue and amber-gold toning at the margins frames the bright, champagne-colored centers of this Gem cameo proof, providing plenty of eye appeal. Additional shades of gold, russet, emerald-green, and teal are revealed under light. A reflective, nicely mirrored proof with recognized cameo contrast — sharply struck, with remnants of the original planchet texture visible on portions of the reverse. Census: 14 in 65 Cameo, 15 finer. CAC: 3 in 65, 4 finer (4/16). NGC ID# 27UD, PCGS# 86439

**1878 Half Dollar, PR64 Deep Cameo
The Finer of Two Deep Cameo Proofs**

- 3960 1878 PR64 Deep Cameo PCGS.** Out of 800 Seated half dollar proofs struck in 1878, only two pieces have been deemed to have Deep (or Ultra) Cameo contrast at PCGS and NGC combined. Both examples reside in PCGS holders: one in PR63 Deep Cameo and this PR64 Deep Cameo specimen. Each side has dazzling, untuned surfaces with pronounced field-device contrast. Fully struck, as expected. A couple of reeding marks occur on the central obverse. Population: 1 in 64 Deep Cameo, 0 finer (4/16). NGC ID# 27UD, PCGS# 96439

**1879 Half Dollar, PR65 Cameo
Gold-Mirrored Fields, Frosted Devices**

- 3961 1879 Open Bud, WB-101 PR65 Cameo NGC. Type One obverse (Open Bud).** A comparatively large proof mintage of 1,100 pieces ushered in the era of low circulation strike production for Seated halves, a trend that continued for more than a decade. The extra proofs did little to curb speculation in the issue, which was recognized for its low mintage and many pieces were put aside. This example is a carefully preserved example, with wheat-gold color that deepens at the borders and a sharper strike than often seen for the issue. Census: 11 in 65 Cameo (1 in 65+ Cameo, 1 in 65★ Cameo), 19 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UE, PCGS# 86440

**1880 Half Dollar, PR65
Strong Eye Appeal**

- 3962 1880 PR65 NGC. WB-102.** The proof mintage of 1,355 pieces is the largest of the series, while just 8,400 business strikes were produced for the issue. This Gem example displays a deeply mirrored obverse with attractive light-gold toning and blue accents at the borders. The reverse is more comprehensively toned in rose-gold and blue tones but less mirrored as a result. The strike is bold except at the high points of Liberty's legs, which were not fully brought up. Census: 44 in 65, 36 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UF, PCGS# 6441

- 3963 1881 PR64 NGC. CAC. WB-101, Type One (Split Bud) Reverse.** While both the business strike and proof mintages are small for the 1881 halves, dealers and speculators were aware of the limited production and contemporary collectors put aside late-date sets for the series. This near-Gem example was is attractive and well-preserved. The obverse strike is sharp, while the reverse shows minor incompleteness at the arrow fletchings and the adjacent eagle's leg and talon. A CAC-endorsed example of this popular date.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UG, PCGS# 6442

- 3964 1882 PR63 NGC. WB-102, Misplaced Digits in Denticils.** Iridescent toning on the obverse provides a spectrum of rainbow colors when viewed in light. The reverse is more intensely toned with some deep-gray patina at the right-hand field and margin. The strike is sharp. An interesting variety in proof format, this coin exhibits the tops of two errant 8s in the denticles below the date. NGC ID# 27UH, PCGS# 6443

- 3965 1882 PR64+ NGC. CAC. Type Two Reverse, Closed Bud.** Sharply struck with borderline Gem surfaces, this sole Plus-graded MS64 proof is deeply mirrored and lightly toned with ivory-gold surfaces and occasional blue accents at the rims. Proofs are more available than business strikes in finer grades, putting pressure on high-grade examples such as this Choice example. CAC endorsed, one of the few to receive the honor. Census: 1 in 64+, 64 finer. CAC: 8 in 64, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UH, PCGS# 6443

- 3966 1883 PR64 NGC. CAC. WB-101.** Faint reddish-gold toning on both sides yields to a thin band of blue at the reverse rim. A nicely preserved, near-Gem proof with problem-free surfaces and a sharp strike. Slight blending on Liberty's hair strands a few scattered, tiny marks are all that preclude a finer grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UJ, PCGS# 6444

**1883 Seated Liberty Half Dollar, PR64+
Rare Deep Cameo Example**

3967 1883 PR64+ Deep Cameo PCGS. CAC. WB-101. A generous mintage of 1,039 proof Seated Liberty half dollars was accomplished at the Philadelphia Mint in 1883, to accompany a small business-strike emission of 9,039 pieces. This Plus-graded Choice example displays sharply detailed, frosty design elements that stand out in Deep Cameo contrast with the deeply reflective fields. Only minor signs of contact are evident, with a few delicate hints of pale gold toning. Population: 5 in 64 (2 in 64+) Deep Cameo, 5 finer. CAC: 1 in 64, 1 finer (5/16). NGC ID# 27UJ, PCGS# 96444

3968 1884 PR64 NGC. CAC. WB-101. Business strikes display a recut 4 in the date, not visible on this nicely toned and reflective coin that is obviously a proof. With a business strike mintage of just 4,400 pieces, prooflike examples of the 1884 are common and sometimes mistaken for proofs. A swath of blue-gray toning angles through the right field of this gold-toned, mirrored near-Gem, with glints of rainbow iridescence. CAC endorsed. NGC reports 53 finer proofs. CAC: 8 in 64, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UK, PCGS# 6445

3969 1884 PR65 NGC. WB-101. A faint emergence of bluish-gray toning floats on the mirrored obverse fields and deepens to russet and gunmetal-blue shades at the margins of this Gem late-series proof. The reverse is intensely mirrored with a thin band of amber-gold at the rims. A few light obverse lines are visible with magnification, yet the strike is sharp and the overall eye appeal is satisfying. Census: 33 in 65, 20 finer (4/16). NGC ID# 27UK, PCGS# 6445

**1884 Half Dollar, PR66
Exceptional Surface Quality**

3970 1884 PR66 PCGS. CAC. Intense shades of deep gunmetal-blue and bronze-gold drift from the margins onto the nearly untuned central devices, with bold contrast on the obverse but limited cameo effect on the reverse. The moderately mirrored fields are exceptionally nice and unbothered, while the overall strike is pleasingly sharp. A high-quality Premium Gem, confirmed by CAC endorsement, with only two finer non-cameo proofs at PCGS. Population: 19 in 66, 2 finer. CAC: 6 in 66, 1 finer (5/16). NGC ID# 27UK, PCGS# 6445

3971 1885 PR63 PCGS. Patchy, original blue-gray toning flashes golden highlights across the deep-mirrored surfaces of this Select proof example. The strike is needle-sharp. A few light lines are visible with a glass, but they are well-hidden in the rich toning. Just 930 pieces were struck. NGC ID# 27UL, PCGS# 6446

**1885 Half Dollar, Eye-Catching PR65
Attractive Multicolor Toning**

3972 1885 PR65 NGC. WB-101. The mirrored fields display vibrant gold toning that surrenders to a dazzling exclamation of color at the margins, where fiery-red shades complement vivid blue and violet accents. Importantly, the toning is equally dramatic on both sides of this memorable Gem proof, while the strike is uniformly sharp throughout. Just 930 pieces were struck. Census: 30 in 65, 31 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UL, PCGS# 6446

**1886 Half Dollar, Attractive PR65
Only 886 Proofs Struck**

3973 1886 PR65 NGC. A thin ribbon of sea-green toning at the rims surrounds the glassy-mirrored, champagne-gold fields on the obverse, while the reverse is colorfully toned in blue, magenta, and gold shades. The central devices are fully struck and lightly frosted for pleasing contrast despite the all-encompassing toning. A few fine lines in the right obverse field are noted, although they are of little distraction on this lovely Gem proof. Census: 22 in 65, 17 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UM, PCGS# 6447

3974 1887 PR64 NGC. CAC. WB-101. One of 710 proofs struck, this sharp example displays a deeply mirrored obverse with faint blue rim toning. The blue accents are more extensive on the reverse, tempering the reflectivity — although both sides radiate a pleasing orange-gold glow. In both business strike format and proofs, the 1887 ranks among the scarcest of the late-date Seated halves. CAC endorsed at this near-Gem level. Census: 41 in 64, 42 finer. CAC: 3 in 64, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UN, PCGS# 6448

3975 1888 PR64 NGC. CAC. WB-101. Attractive sky-blue accents at the borders complement the mirrored, champagne-gold fields and lightly frosted devices of this near-Gem proof half. With a business-strike mintage of just 12,001 pieces, many proofs fill the late-date slots in high-grade Seated half collections. This Choice example would serve that purpose well, with no significant detractors and a sharp strike except for the topmost strands of Liberty's hair and the ridges on the eagle's left talon. CAC endorsed. Census: 52 in 64 (1 in 64+), 40 finer. CAC: 3 in 64, 14 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UP, PCGS# 6449

- 3976 1889 PR63 NGC. CAC. WB-101.** Dusky, rich patina blankets both sides of this originally toned Select proof. The toning reduces the mirrored effect, yet the surfaces reveal only a few light lines beneath the intense coloration. Viewed in light, the component colors include sea-green, royal-blue, and reddish gold — a sharply struck proof, with no meaningful distractions. CAC endorsed. Census: 51 in 63, 98 finer. CAC: 6 in 63, 13 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UR, PCGS# 6450

**1890 Half Dollar, Appealing PR65
Late-Series Gem Proof**

- 3977 1890 PR65 NGC. CAC.** Seated half production remained low in 1890, when just 12,000 business strikes and 590 proofs were issued. This glittering Gem proof is glassy-mirrored and boldly contrasted on the obverse, immersed in pale-gold and ice-blue shades. The reverse is colorfully toned in orange-gold, blue, and lilac-silver hues, where the fields are slightly less reflective yet equally well-preserved. A CAC-endorsed example of the penultimate Seated half issue. Census: 33 in 65 (1 in 65+), 28 finer. CAC: 8 in 65, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27US, PCGS# 6451

- 3978 1891 PR64 NGC. CAC.** The circulation-strike mintage increased nearly 20-fold over previous years in 1891, signaling the resumption of half dollar production at the Philadelphia Mint for commerce. Despite the dispersal of 200,000 business strikes, just 600 proofs were produced. This Choice example is nicely mirrored and toned in varying shades of gold and pale-blue on the obverse, and with intense blue and lavender shades on the reverse. A sharp strike except at star 8. Census: 50 in 64, 59 finer. CAC: 5 in 64, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

**1892-O Barber Half, Sharp MS65
Semiprooflike Fields**

- 3979 1892-O MS65 PCGS. CAC.** An unusually well-struck 1892-O half dollar with attractive, semiprooflike fields. The satiny design elements are untoned, although hints of gold appear around the outer periphery of the fields. There are no major abrasions. The first O-mint Barber half dollar is rare in Gem condition, and the present coin exhibits truly stellar eye appeal for the issue. Population: 16 in 65 (1 in 65+), 6 finer. CAC: 3 in 65, 2 finer (4/16). NGC ID# 27UW, PCGS# 6462

- 3980 1893-O MS63 PCGS.** Daubs of vivid blue and reddish-amber appear overtop of orange-gold toning on this Select 1893-O Barber half dollar. Chatter on Liberty's cheek limits the grade, but the fields are well-preserved. As expected for the issue, the eagle is deficiently struck on the right side. Population: 36 in 63 (1 in 63+), 51 finer (5/16). NGC ID# 24LL, PCGS# 6466

- 3981 1895-O MS62+ NGC. CAC.** Original satin luster illuminates this olive-gold and russet-toned 1895-O half dollar. The strike is typically weak on the eagle's right (facing) talons, but the eagle and Liberty portrait are well-defined. Grade-limiting abrasions have surprisingly little visual impact. Census: 13 in 62 (1 in 62+), 36 finer. CAC: 1 in 62, 8 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24LT, PCGS# 6472

- 3982 1895-S MS63 PCGS.** A sharply struck example with a hint of reflectivity in the fields. Champagne-gold toning encompasses each side but with occasional russet overtones on the obverse. Some light marks on Liberty's cheek preclude a finer grade. NGC ID# 24LU, PCGS# 6473

**1895-S Half Dollar, MS64
Sharply Struck, Moderately Toned**

- 3983 1895-S MS64 NGC. CAC.** Light to medium straw-gold and cream-gray toning encompasses this coruscating and sharply struck Choice half dollar. Marks are surprisingly few, and we note only a solitary hair-thin line on Liberty's cheekbone. A better San Francisco issue. Census: 32 in 64 (1 in 64+, 1 in 64★), 16 finer. CAC: 3 in 64, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24LU, PCGS# 6473

**1897 Half Dollar, MS65
Sharp and Frosty**

- 3984 1897 MS65 PCGS. CAC.** Frosty, original luster illuminates champagne-gold toning on each side of this Gem CAC 1897 Barber half dollar. The strike is impressively sharp, and there are no bothersome abrasions. Like most issues in the series, the 1897 is available in Mint State but rare at the Gem level. Finer coins are exceedingly scarce. Population: 33 in 65, 15 finer. CAC: 7 in 65, 9 finer (4/16). NGC ID# 24LY, PCGS# 6477

- 3985 1898-O AU58 NGC.** Just the slightest trace of high-point wear shows on the sharply detailed design elements of this attractive near-Mint example, and the lightly abraded surfaces retain much of their original mint luster, under shades of champagne-gold and lavender-gray toning. NGC has graded 36 numerically finer examples (5/16). NGC ID# 24M4, PCGS# 6481

3986 1898-S MS62 NGC. Sharply detailed in most areas, this attractive MS62 specimen shows just a touch of the usual softness on the shield point and adjacent area on the eagle's wing. The lustrous surfaces are lightly marked for the grade and display pleasing shades of lavender-gray and greenish-gold toning. Census: 7 in 62, 24 finer (4/16). NGC ID# 24M5, PCGS# 6482

3987 1903-O MS63 NGC. CAC. This 1903-O Barber half dollar is unusually well-struck, and the satiny surfaces yield only minimal abrasions. Tan-orange toning appears over much of each side, attesting to the originality of the luster. An elusive date in Uncirculated condition. Census: 15 in 63, 49 finer. CAC: 2 in 63, 10 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24MK, PCGS# 6496

3988 1903-S AU58 PCGS. CAC. Considerable luster remains on each side of this near-Mint specimen, with light gray-gold toning over its pleasing silver surfaces. A trace of wear prevents a full Mint State grade. Population: 10 in 58, 68 finer. CAC: 2 in 58, 11 finer (5/16). NGC ID# 24ML, PCGS# 6497

3989 1905-O MS63 NGC. CAC. A speckling of powder-gray toning covers both sides of this frosty and lustrous Select Uncirculated half. The strike is decent for a New Orleans half, with only slight blending at the shield corner and right talons. Marks are limited to a few light contacts and a pair of tiny, deep toning spots on the reverse. CAC endorsed, just 505,000 pieces struck. Census: 22 in 63, 35 finer. CAC: 2 in 63, 14 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24MS, PCGS# 6502

3990 1906-D MS64 NGC. CAC. Pearlescent lilac-gray toning covers both sides of this sharply struck Denver half. The light patina deepens slightly at the margins with ample mint luster showing through. A near-Gem from the first year of operations at the Denver Mint, with only nominal weakness at the eagle's talons and arrow fletchings. Census: 37 in 64 (2 in 64+), 12 finer. CAC: 11 in 64, 11 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24MV, PCGS# 6505

3991 1906-S MS63 NGC. CAC. Frosty mint luster shines brightly across a multicolor speckling of blue, warm-gray, orange, and gold toning that combines for an appealing iridescent effect. The strike is sharp except at the right talons and arrow fletchings, which show the usual blending. A scarce San Francisco issue in Select Uncirculated or finer conditions despite the mintage of more than 1.7 million pieces. CAC endorsed. Census: 12 in 63, 36 finer. CAC: 3 in 63, 16 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24MX, PCGS# 6507

3992 1907 MS64 NGC. Original, frosty luster displays warm golden toning on this Choice 1907 Barber half dollar. The eagle's right (facing) wing junction is weak, but the talons and the obverse portrait display sharp detail. There are no singular abrasions, only light grazes that limit the grade. Census: 76 in 64 (2 in 64+), 24 finer (4/16). NGC ID# 24MY, PCGS# 6508

3993 1907-S AU58 NGC. CAC. Only a few issues in the Barber half series are genuinely scarce in near-Mint or finer condition, and of those, the 1907-S is the premier late-date issue of the series (including several lower-mintage issues such as the 1913, 1914, and 1915). This AU58 example retains nearly all of its mint luster with frosty, light-gray surfaces and minimal marks and abrasions. A couple of deep toning specks on Liberty's neck are noted, yet this CAC-endorsed example is close to fully Uncirculated. Census: 5 in 58, 31 finer. CAC: 3 in 58, 12 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24N3, PCGS# 6511

1908-O Half Dollar, MS65+ Well Struck, Smooth Fields

3994 1908-O MS65+ NGC. CAC. Rich golden-brown and sea-green toning blanket this well struck and thoroughly lustrous Gem. The fields are well preserved and the portrait shows only unobtrusive marks. The 1908-O is a high mintage type coin, plentiful in Fine and lower grades, but the issue becomes rare at the MS65+ level. Census: 41 in 65, 13 finer. CAC: 6 in 65, 21 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24N6, PCGS# 6514

3995 1909-O MS62 PCGS. Rich gold and iridescent toning appears over satiny silver luster on both sides of this Mint State Barber half dollar. Struck during the final year of New Orleans Mint operations. Population: 5 in 62, 56 finer (5/16). NGC ID# 24N9, PCGS# 6517

3996 1911 MS65 PCGS Secure. CAC. Ex: Hayes-Friend. Gold, orange, and peach overtones characterize the fields, sweeping over a medium-gray base which shows through at the interiors. A luminous and attractive Gem with smooth surfaces. Population: 45 in 65 (1 in 65+), 13 finer. CAC: 7 in 65, 3 finer (4/16).

Ex: Chicago Signature (Heritage, 8/2011), lot 4119. NGC ID# 24ND, PCGS# 6521

3997 1911-D MS65 PCGS. The 1911-D Barber half dollar is a better date in the series, from a low mintage of 695,080 pieces. This impressive Gem exhibits well-detailed design elements and satiny mint luster under shades of golden-brown and lavender-gray toning. Finer coins are rarely seen. Population: 23 in 65 (1 in 65+), 13 finer (5/16). NGC ID# 24NE, PCGS# 6522

1912-D Half Dollar, MS66 Only One Coin Finer at PCGS

3998 1912-D MS66 PCGS. CAC. Though slightly over 2.3 million half dollars were struck at Denver in 1912, the date as not saved in quantity, and today it is a condition rarity at the MS66 level. This is just such a coin, lustrous with gold and pink-purple borders and more silver centers. Population: 17 in 66 (3 in 66+), 1 finer. CAC: 11 in 66, None finer (4/16).

Ex: Long Beach Signature (Heritage, 9/2010), lot 4179. NGC ID# 24NH, PCGS# 6525

**1915-D Barber Half Dollar, MS66
None Numerically Finer at NGC**

- 3999 1915-D MS66 PCGS. CAC.** The 1915-D Barber half dollar is reasonably available in most grades, making the issue a favorite of branch mint type collectors. The well-preserved surfaces of this spectacular Premium Gem are visited by delicate shades of lavender-gray and pale gold toning, with vibrant satiny mint luster underneath. The design elements are well-detailed and eye appeal is outstanding. Population: 21 in 66 (3 in 66+), 0 finer. CAC: 13 in 66, 0 finer (4/16). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 4000 1892 PR64+ NGC. CAC.** The obverse of this high-end Choice first-year proof displays noticeable cameo contrast, although the reverse less so. The obverse has a sun-gold interior with blue and lavender around the periphery. The reverse displays all three hues in a more dispersed pattern. CAC: 3 in 64, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NU, PCGS# 6539

**1895 Barber Half, PR65
Beautiful Multicolor Toning**

- 4001 1895 PR65 NGC. CAC.** A needle-sharp Gem proof with beautiful multicolor toning in the mirrored fields. The obverse displays sun-orange, plum, and ocean-blue, while the reverse has softer mint-gold, lavender, and sky-blue coloration. A hint of contrast is seen on the obverse even through the patina. Finer examples are elusive.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NX, PCGS# 6542
- 4002 1896 PR64 NGC. CAC.** This is a razor-sharp proof with original multicolor toning and mirrored fields. A few stray hairlines limit the grade but are well-masked by the rich patina. This 1896 proof half dollar is in a collectible sub-Gem grade, although it is seldom seen at this level with a CAC endorsement. CAC: 5 in 64, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NY, PCGS# 6543
- 4003 1896 PR63 Cameo PCGS. CAC.** Razor-sharp definition is evident on all the design elements of this impressive Select specimen, with deeply mirrored fields that contrast boldly with the frosty devices. Only minor signs of contact are present, and delicate shades of pale gold toning add to the outstanding visual appeal. NGC ID# 24NY, PCGS# 86543

**1897 Morgan Dollar, PR65
Sharply Detailed, Vividly Toned**

- 4004 1897 PR65 NGC.** A modest production of just 731 proof Barber half dollars was struck in 1897. This delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces display no mentionable distractions, with deeply mirrored fields. Vivid shades of lavender-gray, greenish-gold, and powder-blue toning enhance the outstanding eye appeal. Census: 28 in 65, 62 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NZ, PCGS# 6544

**1899 Barber Half Dollar, PR65+
Undesignated Field-Device Contrast**

- 4005 1899 PR65+ NGC. CAC.** Although not designated as a Cameo, this Plus-graded Gem shows moderate contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. The virtually pristine surfaces are richly toned in shades of greenish gold, lavender, and powder-blue, with tremendous eye appeal. Only 846 proof Barber half dollars were struck in 1899. Census: 17 in 65+, 35 finer. CAC: 3 in 65, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 6C4V, PCGS# 6546
- 4006 1900 PR64 NGC.** Hints of various colors emerge from otherwise olive and lavender-gray toning. This sharp 1900 proof Barber half dollar will appeal to the collector who appreciates original toning. Any grade-limiting flaws are unnoticed beneath the patina.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24P4, PCGS# 6547

**1901 Barber Half Dollar, PR65
Brightly Toned and Sharply Detailed**

- 4007 1901 PR65 NGC. CAC.** The sharply detailed central design elements of this impressive Gem have a generous coat of mint frost and the fields are deeply reflective, but contrast is somewhat limited by the vivid toning. Spectacular shades of cobalt-blue, greenish-gold, and lavender blanket the well-preserved surfaces and add to the terrific visual appeal. From a proof mintage of 813 pieces. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24P5, PCGS# 6548

**1902 Half Dollar, PR65+
Sole Plus-Graded Gem Known**

- 4008 1902 PR65+ NGC.** This sharp, champagne-toned Gem-Plus 1902 proof half dollar displays barely perceptible cameo contrast and deeply mirrored fields. A few faint lines on Liberty's cheek appear to be all that preclude an even finer grade. The 1902 had a mintage of 777 proofs, although pieces grading finer than this coin are scarce. Census: 30 in 65 (1 in 65+), 53 finer (4/16). NGC ID# 24P6, PCGS# 6549

1902 Barber Half, Nicely Toned PR66

- 4009 1902 PR66 NGC.** This delightful Premium Gem displays razor-sharp definition on all design elements and the virtually pristine surfaces exhibit highlights of vivid emerald-green and cerulean-blue toning. The fields are deeply mirrored and overall eye appeal is tremendous. Only 777 proof Barber half dollars were struck in 1902. Census: 34 in 66, 19 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24P6, PCGS# 6549

- 4010 1903 PR64 NGC.** Sharp, satiny design elements are set against deeply mirrored fields on this Choice 1903 proof half dollar. Lavender, champagne, and aquamarine hues appear randomly over each side, masking a few stray hairlines that limit the grade. Eye appeal is pleasing. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24P7, PCGS# 6550

- 4011 1907 PR64 NGC. CAC.** Splashes of violet and ocean-blue toning enliven the ivory-gold coloration of this smoothly mirrored, near-Gem proof. Just 575 pieces were struck in proof format in 1907. Sharply struck including the right-side problem areas on the reverse, where only insignificant blending is seen. The CAC endorsement is an important point of difference for many proofs at this level. CAC: 7 in 64, 12 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24PB, PCGS# 6554

- 4012 1911 PR64 NGC. CAC.** Just 543 proofs were struck in 1911, the lowest number of proofs for any date in the Barber half series other than the 1914 and 1915 issues. Iridescent toning on both sides provides a colorful display (slightly deeper on the reverse), with blue and caramel-gold hues seizing the eye. The strike is razor-sharp, and the visual appeal is excellent as suggested by the CAC endorsement. CAC: 7 in 64, 23 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24PF, PCGS# 6558

- 4013 1912 PR64 NGC.** A deeply mirrored proof with a champagne-colored obverse and a pale lavender reverse. Modest field-motif contrast is seen, although not starkly enough for a Cameo designation from NGC. An outstanding coin for the grade. Census: 54 in 64, 55 finer (5/16). NGC ID# 24PG, PCGS# 6559

- 4014 1913 PR64 PCGS.** This Choice 1913 proof half is boldly struck, with gleaming fields that reside beneath deep amber, gold, and gunmetal-blue toning. A few faint lines on Liberty's cheek are well-hidden by the rich patina. The elusiveness of high-grade circulation strikes of this year heightens demand for the proofs. NGC ID# 24PH, PCGS# 6560

**1915 Half Dollar, Toned PR65
Final-Year Proof Type Coin**

- 4015 1915 PR65 NGC.** A small mintage of 450 coins rounded out the proof Barber half dollar series. This Gem example is boldly struck and reflective. Lavender-gray and olive toning blanket each side, masking any stray hairlines in the fields. Eye appeal and originality are highly desirable. Census: 25 in 65, 44 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

- 4016 1916 MS65 NGC.** An attractive Gem from the first year of the Walking Liberty design, this coin offers well-detailed design elements and satiny mint luster, under delicate shades of lavender-gray and pale gold toning. NGC ID# 24PL, PCGS# 6566

- 4017 1916-D MS64 NGC. CAC.** This first-year branch mint issue is always in demand, especially when as sharply struck as this well-produced example. The central motifs on both obverse and reverse are remarkably defined. Steel-blue and dusky-rose toning covers both sides with mint luster shining through. It is important to note the Denver Mint often extended die life by setting the dies farther apart than normal. This well-struck near-Gem is an obvious exception. CAC endorsed for both its technical merit and eye appeal. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

4018 1916-S AU58 PCGS. A satiny, partially lustrous near-Mint example of the most elusive first-year Walking Liberty half dollar issue. This 1916-S displays untoned surfaces with bold design elements. Barely a brush of friction is seen over the mattelike luster. NGC ID# 24PN, PCGS# 6568

4019 1917-D Obverse MS64 PCGS. A well-struck, satiny example of the earlier Obverse Mintmark 1917-D half dollar variety, showing warm light golden toning with only a few trivial marks. Finer examples of this issue are scarce, making this coin particularly appealing to the budget-conscious collector. NGC ID# 24PR, PCGS# 6570

4020 1917-S Obverse — Improperly Cleaned — NGC Details. Unc. Satiny, unworn, and essentially unabraded. Predominantly silver-white, although design recesses display deep steel-gray toning. The cartwheel luster is slightly subdued but no hairlines are readily observed. The mintmark was moved from the obverse to the reverse early in 1917, and the obverse mintmark variety is significantly scarcer. NGC ID# 26G7, PCGS# 6572

4021 1917-S Reverse MS64 PCGS. A hint of champagne toning graces the mattelike luster of this Choice 1917-S Reverse Mintmark half dollar. The strike is sharp, and only a few minor ticks on the high-points of the devices limit the grade. Finer coins are scarce. NGC ID# 24PU, PCGS# 6573

**1919-D Half Dollar, AU58
Scarce Early Branch Issue**

4022 1919-D AU58 PCGS. The 1919-D half dollar ranks among the most significant conditional rarities of the series. Most survivors are in Fine or lower grades. This dove-gray and wheat-gold example displays cartwheel luster and is only minimally abraded. The strike is somewhat soft on the high points of the walking Liberty, but wear is difficult to identify, even upon perusal beneath a lens. NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, AU58
Scarce Issue At This Level**

4023 1919-S AU58 PCGS. Only the 1921-S and 1919-D Walkers are scarcer in Mint State than the 1919-S, making this near-Mint example of particular interest to collectors of this popular series. Hints of rose and sky-blue visit the smooth surfaces of this lightly toned coin, with a speckling of warm-gray toning and golden undertones. The strike is above average for the issue, with perhaps 60 to 70% definition on the head, branch hand, and eagle's leg feathers. NGC ID# 24R2, PCGS# 6579

**1920-S Half Dollar, MS64
Well-Preserved for the Grade**

4024 1920-S MS64 NGC. This frosty Choice 1920-S Walker displays clean fields with subtle champagne toning that features a splash of olive-gold on the right-hand obverse. The figure and eagle are slightly soft on their high points, as is typical of this San Francisco issue, and a few small marks on Liberty's leg and torso are all that limit the grade. NGC ID# 24R5, PCGS# 6582

4025 1923-S AU53 PCGS. Just a touch of wear shows on the well-detailed design elements of this attractive AU53 specimen and the brightly lustrous surfaces are remarkably free of abrasions. A few highlights of golden-brown toning add to the considerable eye appeal. NGC ID# 24R9, PCGS# 6586

**1923-S Walking Liberty Half Dollar, MS62
Scarce Issue in High Grade**

4026 1923-S MS62 PCGS. CAC. From a mintage of 2.1 million pieces, the 1923-S Walking Liberty half dollar was a widely circulated issue and few examples have survived in high grade. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of the usual softness on the wreath hand and eagle's leg. The lightly marked, lustrous surfaces show a few hints of greenish-gold and lavender-gray toning. NGC ID# 24R9, PCGS# 6586

**1927-S Walking Liberty Half, MS64+
Challenging Issue in High Grade**

4027 1927-S MS64+ NGC. CAC. With a reported mintage of more than 2.3 million pieces, the 1927-S Walking Liberty half dollar is surprisingly elusive in high grade. Most examples seen suffer from striking problems and excessive surface marks. This high-end Choice specimen shows the typical softness on Liberty's wreath hand and the eagle's leg, but the lustrous surfaces show only minor signs of contact, with highlights of golden-brown and lavender-gray toning. NGC has graded 41 numerically finer examples (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24RA, PCGS# 6587

1929-D Half Dollar, MS65
Elusive in Finer Grades

- 4028 1929-D MS65 PCGS.** A well-struck 1929-D half, showing original, frosty luster and a hint of champagne toning. A few trivial marks are not out of line for the grade. Only the branch mints struck half dollars in 1929, and no halves at all would be struck again until 1933. This denomination was sporadically produced throughout the 1920s, and by 1929, the Great Depression was having an effect on demand for new coinage. Finer 1929-D halves are elusive. NGC ID# 24RC, PCGS# 6589

1929-D Half Dollar, MS65
Excellent Eye Appeal

- 4029 1929-D MS65 PCGS. CAC.** Vibrant luster and smooth surfaces ensure the quality of this lightly toned Gem. The skirt lines and branch hand show moderate blending but the head is fully struck. From the technical perspective, as nice as can be obtained at the MS65 level. 1929-D is the sole Denver issue dated between 1922 and 1933, due to silver dollar production and the Great Depression. NGC ID# 24RC, PCGS# 6589

1929-D Half Dollar, MS65+
Good Strike, Exceptional Preservation

- 4030 1929-D MS65+ NGC. CAC.** Faint olive-green toning overlies lustrous pearl-gray surfaces. Remarkably devoid of abrasions. The strike is good, particularly on the skirt lines, although the fingers of the branch hand are incomplete, customary for the series. The final Denver issue until 1934. Census: 85 in 65 (3 in 65+), 14 finer. CAC: 41 in 65, 21 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24RC, PCGS# 6589

- 4031 1929-S MS64 PCGS.** Attractive shades of lavender and greenish-gold toning blanket the lightly marked, lustrous surfaces of this pleasing Choice specimen. The design elements are well-detailed, with a touch of the typical softness on the wreath hand and eagle's leg. NGC ID# 24RD, PCGS# 6590

1929-S Half Dollar, MS65
Conditionally Scarce Issue

- 4032 1929-S MS65 NGC. CAC.** Light silver-gray and caramel-gold toning visit this lustrous and minimally marked Gem. The strike is above average, despite moderate blending on the skirt lines and branch hand. A desirable souvenir from the first year of the Great Depression. The 1929-S is common in VF and lower grades, but scarce by the standards of the series in Mint State.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24RD, PCGS# 6590

1933-S Walking Liberty Half, MS66
Colorful, Lustrous Specimen

- 4033 1933-S MS66 PCGS.** This well-detailed Premium Gem shows emerging detail on Liberty's wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster under shades of greenish-gold, magenta, and amber toning. Overall eye appeal is outstanding. PCGS has graded only 14 numerically finer examples (4/16). NGC ID# 24RE, PCGS# 6591

1933-S Walking Liberty Half, MS66
Sharply Detailed, Lustrous Specimen

- 4034 1933-S MS66 PCGS.** It is difficult to find a better-produced issue in the Walking Liberty series than the 1933-S. Examples are invariably sharply, if not fully struck, and the mint luster is bright and frosted. This brilliant example has both traits and is brilliant overall. Seldom encountered finer. PCGS has graded 14 numerically finer examples (4/16). NGC ID# 24RE, PCGS# 6591

- 4035 1934-D MS66 PCGS. CAC.** Small D mintmark. This Premium Gem displays complete branch hand detail, strong upper gown lines, and crisp leg feathers on the eagle. Brilliant satin surfaces are nearly mark-free and show faint blushes of gold near the borders. PCGS reports merely four finer submissions (4/16). NGC ID# 24RG, PCGS# 6593

- 4036 1934-S MS64 PCGS.** Frosty, brilliant luster illuminates minimally abraded surfaces on this Choice 1934-S Walking Liberty half dollar. The strike is boldly rendered, and eye appeal is pleasing for the grade. The availability of this date declines rapidly in finer grades. NGC ID# 24RH, PCGS# 6594
- 4037 1935-D MS65 PCGS.** This Gem 1935-D Walker displays frosty luster and untuned surfaces. A few faint grazes determine the grade. Minor strike weakness is seen on the branch hand, head, and eagle's trailing leg, as usual. A luminous, original coin with excellent eye appeal. Finer coins are elusive. NGC ID# 24RK, PCGS# 6596
- 4038 1936-D MS66+ PCGS. CAC.** Shades of golden-brown, lilac, and amber visit the well-preserved surfaces of this Plus-graded Premium Gem, with well-detailed design elements and satiny mint luster underneath. PCGS has graded 38 numerically finer examples (5/16). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599
- 4039 1937 MS67+ NGC.** An above-average strike at the centers on both sides includes a bold branch hand with thumb separation and nearly complete feathering on the eagle's trailing leg. As expected for a Superb Gem with the Plus designation, the surfaces are smooth and attractive with a slight hint of gold toning amid bountiful satin luster. Very few examples of the 1937 are finer. Census: 13 in 67+, 3 in 67★, 1 in 67+★, 3 finer (4/16). NGC ID# 256A, PCGS# 6601

**1937 Half Dollar, MS67+
Attractively Toned**

- 4040 1937 MS67+ PCGS. CAC.** A high-grade example of this plentiful Philadelphia issue, showing a bold strike and satiny luster. Lovely concentric rainbow toning on each side boosts the eye appeal. A few tiny ticks in the right obverse field and within the eagle's wing feathers do not affect the PCGS grade. Population: 153 in 67 (17 in 67+), 5 finer. CAC: 67 in 67, 3 finer (4/16). NGC ID# 256A, PCGS# 6601
- 4041 1937-D MS66+ PCGS. CAC.** The frosty, mint-fresh luster and barely perceptible ice-blue and champagne toning of this high-end Premium Gem yield a remarkable degree of eye appeal. The strike is bold, and there are no mentionable abrasions. Although affordable in MS66+, this coin is in no way a compromise on quality. CAC: 79 in 66, 28 finer (4/16). NGC ID# 24RS, PCGS# 6602
- 4042 1937-D MS66+ PCGS. CAC.** A trace of gold patina visits this lustrous and otherwise brilliant high-grade half dollar. The strike is above average. Minor obverse contact precludes an even finer grade. Ex: *FUN Signature (Heritage, 7/2012), lot 4164, which realized \$1,495.* NGC ID# 24RS, PCGS# 6602
- 4043 1938 MS67 PCGS. CAC.** From a mintage of 4.1 million coins, the 1938 is very scarcely seen in Superb Gem. PCGS and NGC each report a single coin finer (4/16). Fully brilliant surfaces glisten with frosty luster over well-rendered motifs. Moderate central softness is expected. Practically unmarked. NGC ID# 24RU, PCGS# 6604
- 4044 1938-D MS65 NGC.** A well-struck, well-preserved Gem with original, satiny luster. This 1938-D Walking Liberty half dollar displays a hint of champagne toning with pleasing eye appeal. Finer examples of this late-series key are infrequently encountered and may be out of reach for many collectors. NGC ID# 24RV, PCGS# 6605

- 4045 1938-D MS66+ PCGS.** A blush of champagne toning graces the satiny, well-preserved surfaces of this high-end Premium Gem 1938-D half dollar. The strike is bold, and the coin displays a lovely glow beneath a light. Finer representatives of this semikey issue are seldom seen. NGC ID# 24RV, PCGS# 6605
- 4046 1939 MS67+ PCGS.** Incredibly sharp detail is the hallmark of this Superb Gem 1939 Walker, although the outstanding preservation equally contributes to the eye appeal. Both sides show champagne-gold toning overall, with hints of pastel around the borders. PCGS has graded 27 numerically finer examples (4/16). NGC ID# 24RW, PCGS# 6606
- 4047 1939-D MS67 PCGS. CAC.** A hint of iridescence graces the mint-fresh, frosty surfaces of this Superb Gem 1939-D Walking Liberty half dollar. Liberty's branch hand is slightly soft, but her head is sharp. The eagle's trailing leg shows trivial incompleteness. This Denver issue is elusive in MS67 and rare any finer. Population: 85 in 67 (4 in 67+), 2 finer. CAC: 51 in 67, None finer (4/16). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607
- 4048 20-Piece 1941 to 1947-D Short Set PCGS.** The lot includes: 1941 MS65 PCGS; 1941-D MS65 PCGS; 1941-S MS65+ PCGS; 1942 MS65 PCGS; 1942-D MS65 PCGS; 1942-S MS65 PCGS; 1943 MS65 PCGS; 1943-D MS65 PCGS; 1943-S MS65 PCGS; 1944 MS65+ PCGS; 1944-D MS65 PCGS; 1944-S MS65 PCGS; 1945 MS65 PCGS; 1945-D MS65 PCGS; 1945-S MS65+ PCGS; 1946 MS65 PCGS, ex: Dakota Collection; 1946-D MS65 PCGS; 1946-S MS65+ PCGS; 1947 MS65 PCGS; 1947-D MS65 PCGS. The 1942, 1943, 1943-S, and 1947 are housed in first generation holders. The 1941, 1941-D, 1942-S, 1944-D, 1944-S, 1946-D, and 1947-D reside in old green label holders. The 1942-D, 1945, and 1945-D are certified in green label holders. (Total: 20 coins)
- 4049 1941-S MS66+ PCGS.** Satiny luster displays light golden toning on this high-end Premium Gem 1941-S half dollar. The central high points are weakly struck, as might be expected, but no obtrusive abrasions are present. The obverse fields display parallel die polishing lines when viewed under a loupe. Only nine coins are finer at PCGS (4/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613
- 4050 1941-S MS66+ PCGS.** Brilliant surfaces awash in frosty S-mint luster are remarkably clean for this notorious issue. Most examples come heavily abraded and softly struck. This conditionally scarce MS66+ half dollar shows the typical incompleteness over the branch hand, upper gown lines, and eagle's breast and leg feathers. PCGS reports nine submissions finer (4/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613
- 4051 1943-S MS66+ PCGS.** A boldly struck 1943-S Walker, showing satiny surfaces and a hint of light golden toning. A small reed mark in the right obverse field is the only mentionable abrasion. Finer examples are scarce, with only 41 certified at PCGS (5/16). NGC ID# 24SB, PCGS# 6620
- 4052 1943-S MS66+ PCGS. CAC.** The West Coast mint struck more Walking Liberty half dollars in 1943 than in any other year, making the 1943-S plentiful through MS66. However, high-end Premium Gems with PCGS and CAC recognition are exceedingly difficult to find and to upgrade. This Walker half is fully brilliant with vibrant luster. Central softness is characteristic. NGC ID# 24SB, PCGS# 6620
- 4053 1943-S MS66+ PCGS. CAC. FS-101.** Trumpet tail S. The often-encountered variety with die doubling on IN GOD WE TRUST and the base of Liberty's dress. A stone-white and virtually immaculate World War II Walker with sharply defined skirt lines. The fingers of the branch hand are merged, customary for this San Francisco issue. NGC ID# 24SB, PCGS# 6620
- 4054 1943-S MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. This Plus-graded Premium Gem is at the top of the affordable grade range for the 1943-S, as Superb Gems are rare. This coin shows intense, frosty luster that is devoid of noticeable abrasions and toning. Liberty's branch hand is slightly soft, but the eye appeal is nonetheless outstanding. PCGS lists 41 finer coins (5/16). NGC ID# 24SB, PCGS# 6620
- 4055 1944 MS67 PCGS.** Conditionally scarce, this blazing 1944 Walking Liberty half boasts vibrant luster and bold detail, including sharp head and branch hand definition. A tinge of russet toning along the upper-left obverse and lower-left reverse borders is the origin of a faint champagne tint that stretches over much of the remaining surfaces. Only a single MS68 coin is finer (5/16). NGC ID# 24SC, PCGS# 6621

4056 1944 MS67 PCGS. CAC. Each side of this impeccably preserved Superb Gem Walker is frosty and brilliant, save for arcs of golden-russet and crimson patina that adhere to the upper obverse and lower reverse borders. The centers are typically struck, but surfaces marks are scant. Practically unobtainable any finer. NGC ID# 24SC, PCGS# 6621

4057 1944-S MS66+ PCGS. CAC. This high-end Premium Gem 1944-S Walking Liberty half dollar displays intensely vibrant, frosty luster with beautifully unabraded fields. The figure of Liberty and the eagle's trailing leg are weakly struck, although the eye appeal is only slightly affected. PCGS lists just eight Superb Gems finer (5/16). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

4058 1946 MS67 PCGS. Forrest-green, ice-blue, and sun-gold tones frame brilliant interiors on the obverse. The reverse is mainly untuned. Each side displays glistening luster over essentially pristine surfaces. The Mint manufactured more than 12.1 million Walking Liberty half dollars in 1946, and this piece is among the finest survivors. Population: 63 in 67 (4 in 67+), 0 finer (4/16). NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

**1946-S Half Dollar, MS67
Among the Finest Certified**

4059 1946-S MS67 PCGS. CAC. The availability of the 1946-S Walker plummets at the Superb Gem level. This MS67 CAC coin is among the finer certified. The strike is boldly rendered, and the unabraded surfaces yield original, frosty luster. A dusting of russet toning appears on the obverse, while the reverse has a hint of champagne color. Population: 72 in 67 (4 in 67+), 0 finer. CAC: 31 in 67, None finer (4/16). NGC ID# 24SL, PCGS# 6629

**1947 Half Dollar, MS67
Sharp and Satiny**

4060 1947 MS67 PCGS. The final Philadelphia Walker of the series is often chosen for type purposes. This Superb Gem example is conditionally scarce, and none are known numerically finer. The strike is bold, and each side displays light olive-gold toning in the margins with brilliant centers. A few light grazes in the right obverse field limit the grade. Population: 64 in 67 (4 in 67+), 0 finer (5/16). NGC ID# 24SM, PCGS# 6630

**1947 Walking Liberty Half Dollar, MS67
Among the Finest Certified**

4061 1947 MS67 PCGS. CAC. This Superb Gem hails from the final Philadelphia Mint issue, an underrated issue within the series. The piece exhibits frosty luster and toning that includes shades of golden-yellow, rose, pink, electric-blue, and light green. Population: 64 in 67 (4 in 67+), 0 finer. CAC: 21 in 67, 0 finer (4/16). Ex: Central States Signature (Heritage, 4/2013), lot 2775. NGC ID# 24SM, PCGS# 6630

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Half Dollar, PR65
Well-Preserved, Lightly Toned**

4062 1936 PR65 NGC. A sharp, reflective Gem example of the debut Walking Liberty half dollar proof, showing milky-gold toning and unmarked surfaces. With a small mintage of 3,901 coins, the 1936 is the rarest proof in the series in high grade. The present coin displays strong quality for the Gem level. NGC ID# 27V4, PCGS# 6636

4063 1937 PR67 PCGS. A magnificent Superb Gem Walking Liberty half dollar, with razor-sharp definition on all design elements and impeccably preserved brilliant surfaces. The deeply reflective fields add to the outstanding eye appeal. PCGS has graded 10 numerically finer examples (4/16). NGC ID# 5ESS, PCGS# 6637

4064 1937 PR67 NGC. All-brilliant surfaces and a full strike are attributes of this Superb Gem. Only 5,728 proof half dollars were struck in 1937, the second-lowest Walking Liberty proof mintage. NGC has certified 28 coins numerically finer (5/16). NGC ID# 5ESS, PCGS# 6637

4065 1937 PR67 NGC. CAC. This remarkable Superb Gem displays razor-sharp definition on all design elements and the deeply mirrored fields are free of mentionable flaws, even on close inspection with a loupe. NGC has graded 28 numerically finer examples (4/16). NGC ID# 5ESS, PCGS# 6637

FRANKLIN HALF DOLLARS

4066 1948-D MS66+ Full Bell Lines PCGS. CAC. A boldly struck 1948-D Franklin half dollar with satiny luster and no significant abrasions. Irregular areas of forest-green, amber-red, and russet-gold toning cover much of each side. PCGS has seen only five finer coins (5/16). NGC ID# 2549, PCGS# 86652

- 4067 1950-D MS66 Full Bell Lines PCGS.** 30th Anniversary Green Label Holder. This conditionally scarce Full Bell Lines 1950-D Franklin half is among the finest at PCGS, suitable for Registry purposes. The strike is bold, and the frosty luster shows lightly mottled golden toning. Population: 87 in 66 (12 in 66+) Full Bell Lines, 0 finer (5/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657
- 4068 1951-S MS66+ Full Bell Lines PCGS. CAC.** The obverse of this high-end Premium Gem is richly toned in shades of sea-green and magenta, while the reverse is much lighter. The bell lines are fully delineated and vibrant mint luster shines through the patina. PCGS has graded five numerically finer examples (5/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660
- 4069 1952 MS67 Full Bell Lines PCGS.** One of 21 Superb Gem 1952 Franklin halves that rank as the finest in Full Bell Lines at PCGS (4/16). This piece is boldly struck, and displays frosty, largely unabraded luster. Dusky ice-blue and grayish toning dominates each side but cedes to olive-gold overtones around the borders. Ideal for Registry Set purposes. NGC ID# 24T3, PCGS# 86661
- 4070 1952 MS67 Full Bell Lines PCGS.** One of the finest 1952 Franklins certified in Full Bell Lines, this Superb Gem displays frosty champagne luster with deeper olive overtones on much of the reverse and around the obverse periphery. The strike is sharp, and there are no significant abrasions. This issue is rare in MS67 Full Bell Lines, where it is an essential Registry Set acquisition. Population: 21 in 67 Full Bell Lines, 0 finer (4/16). NGC ID# 24T3, PCGS# 86661
- 4071 1955 MS66+ Full Bell Lines PCGS.** A boldly struck example with satiny luster and well-preserved surfaces. This high-end Premium Gem 1955 Franklin half dollar displays brilliant centers surrounded by gold, umber, teal, and olive-gold hues. PCGS has seen just four finer Full Bell Lines submissions (5/16). NGC ID# 24TC, PCGS# 86670

**1956 Franklin Half, MS67 Full Bell Lines
Strong Registry Set Contender**

- 4072 1956 MS67 Full Bell Lines PCGS. CAC.** The 1956 Franklin half dollar claims a mintage of 4 million pieces, but few survivors can match the quality and eye appeal of the coin offered here. This delightful Superb Gem exhibits well-detailed design elements, with the coveted Full Bell Lines designation. The impeccably preserved, lustrous surfaces are visited by shades of lavender, golden-tan, and amber toning. Population: 26 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 16 in 67, None finer (4/16). NGC ID# 24TD, PCGS# 86671
- 4073 1959 MS66 Full Bell Lines PCGS.** This Full Bell Lines 1959 Franklin half dollar is well-preserved for the issue, among the finest at PCGS. Satiny luster displays a hint of light golden toning along with pleasing eye appeal. Population: 55 in 66 (3 in 66+) Full Bell Lines, 0 finer (5/16). NGC ID# 24TJ, PCGS# 86676
- 4074 1960 MS66+ PCGS.** 30th Anniversary Green Label Holder. Even in the non-Full Bell Lines category, the 1960 Franklin half is scarce in Premium Gem condition. This Plus-graded coin is the sole finest at PCGS (5/16). The luster is satiny and vibrant, and there are no mentionable abrasions. Both sides show peripheral russet, amber, and olive-green toning, although the obverse has a faint fabric-like pattern to the toning. NGC ID# 24TL, PCGS# 6678
- 4075 1962 MS65 Full Bell Lines PCGS.** A fully struck Gem Registry coin with frosty luster that shows traces of delicate champagne toning. Only a few trivial grazes limit the grade, and the eye appeal is pleasing. PCGS has seen only 12 Full Bell Lines coins finer (5/16). NGC ID# 24TR, PCGS# 86682

- 4076 1963-D MS66 Full Bell Lines PCGS. CAC.** This delightful Premium Gem is among the finest survivors of this popular issue, with sharply detailed design elements (including full definition on the bell lines), and well-preserved, lustrous surfaces. Population: 94 in 66 (4 in 66+) Full Bell Lines, 0 finer. CAC: 7 in 66, 0 finer (5/16). NGC ID# 24TU, PCGS# 86685

PROOF FRANKLIN HALF DOLLARS

**1950 Half Dollar, PR67
Peripherally Toned Obverse**

- 4077 1950 PR67 NGC.** The debut proof issue in the Franklin half dollar series. This Superb Gem is sharply struck and reflective with excellent preservation. The obverse displays a crescent of rainbow toning along the upper border with areas of amber and champagne below, while the reverse is essentially brilliant. NGC has seen only four numerically finer non-Cameo submissions (4/16). NGC ID# 27VA, PCGS# 6691
- 4078 1951 PR67 PCGS. CAC.** A brilliant, reflective proof with full detail and beautifully preserved surfaces. Eye appeal is exceptional. The 1951 proof Franklin is elusive in this grade and rare finer, with just two PR68 coins reported at PCGS (5/16). NGC ID# 27VB, PCGS# 6692
- 4079 1952 PR67 Cameo PCGS. CAC.** This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The impeccably preserved surfaces show a few subtle highlights of pale gold toning. Population: 60 in 67 (3 in 67+) Cameo, 3 finer. CAC: 37 in 67, 3 finer (5/16). NGC ID# 27VC, PCGS# 86693
- 4080 1956 Type 1 PR68 Cameo PCGS. CAC.** A fully mirrored, high-end Superb Gem proof 1956 Franklin half dollar, showing softly frosted design elements that offer appreciable cameo contrast. This Registry-grade coin is among the finest Cameos certified at PCGS. Population: 52 in 68 Cameo, 0 finer. CAC: 24 in 68, 0 finer (5/16). NGC ID# 24TV, PCGS# 86686
- 4081 1956 Type 1 PR68 Cameo PCGS. CAC.** A fully struck, almost flawlessly preserved Cameo proof 1956 Franklin half dollar, boasting a CAC endorsement and outstanding field-motif contrast. Neither side shows evidence of toning, and the eye appeal is outstanding. Population: 52 in 68 Cameo, 0 finer. CAC: 24 in 68, 0 finer (5/16). NGC ID# 24TV, PCGS# 86686
- 4082 1956 Type Two PR69 Deep Cameo PCGS.** A Registry-grade coin, among the finest 1956 Franklin half dollars certified by either service. This PCGS Deep Cameo displays fully struck, frost-white design elements against seemingly immeasurable depth of mirroring in the fields. Population: 60 in 69 Deep Cameo, 0 finer (5/16). NGC ID# 24TW, PCGS# 96697
- 4083 1957 PR68 Deep Cameo PCGS. CAC.** The stark-white Deep Cameo contrast on this high-end proof 1957 half dollar is so blinding that the near-perfect preservation of the mirroring and frosty motifs is at first almost overlooked. The strike is full. Population: 78 in 68 Deep Cameo, 3 finer. CAC: 20 in 68, 0 finer (5/16). NGC ID# 24TX, PCGS# 96698

KENNEDY HALF DOLLARS

1969-D Kennedy Half, MS67 Exceptional Multicolor Obverse Toning

- 4084** 1969-D MS67 PCGS. The Denver Mint struck more than 129 million half dollars in 1969. Most, we guess, were melted for their 40% silver content decades ago. This is an extraordinarily well-preserved example. The obverse displays rich multicolored toning that takes in virtually the entire color spectrum. The reverse, however, is completely untoned. Quite a contrast. The satiny mint luster is disturbed by only the tiniest abrasions (get out your loupe). Population: 9 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 24U8, PCGS# 6712

- 4085** 1981-D MS67 PCGS. This and two dozen other MS67 coins are the finest 1981-D Kennedy halves at PCGS. NGC has seen even fewer Registry-grade pieces with just seven MS67 submissions (5/16). This piece is remarkably well-preserved and boasts a bold strike. A hint of pale champagne color can be detected on each side. NGC ID# 24UX, PCGS# 6740

1984-D Half Dollar, MS67 Among the Finest Certified

- 4086** 1984-D MS67 PCGS. A Registry-grade 1984-D Kennedy half dollar, among the finest certified. The strike is bold, and the satiny surfaces are luminous with champagne-tinted nickel-gray luster. Close examination fails to reveal a single mentionable flaw. Registry Set assemblers will find comparable examples of this issue very rare. Population: 14 in 67, 0 finer (5/16). NGC ID# 24V5, PCGS# 6746

SMS KENNEDY HALF DOLLARS

- 4087** 1966 SMS MS67 Ultra Cameo NGC. While technically not a proof, this deeply mirrored and highly contrasted Cameo certainly gives one the impression of a well-produced proof striking. Each side is brilliant and fully struck. It would be very difficult (and expensive) to upgrade this beautiful SMS half. Census: 61 in 67 Ultra Cameo (1 in 67+), 11 finer (5/16). NGC ID# 24WH, PCGS# 96846

- 4088** 1966 SMS MS67 Deep Cameo PCGS. A sharp, starkly contrasted white-and-black Superb Gem with untoned surfaces and deeply mirrored fields. The 1966 SMS Kennedy half dollar is seldom seen in any Deep Cameo grade and is scarce at the Superb Gem level. Population: 32 in 67 Deep Cameo, 5 finer (5/16). NGC ID# 24WH, PCGS# 96846

PROOF KENNEDY HALF DOLLARS

- 4089** 1964 PR69 Deep Cameo PCGS. Type Two Reverse. Outstanding white-on-black contrast, a needle-sharp strike, and pristine preservation are the hallmarks of this fully brilliant first-year proof Kennedy half dollar. Population: 83 in 69 Deep Cameo, 0 finer (5/16). NGC ID# 24WF, PCGS# 96800

1971-S Kennedy Half, PR69 Deep Cameo Tied for Finest Certified

- 4090** 1971-S PR69 Deep Cameo PCGS. The 1971-S is the first copper-nickel clad proof in the Kennedy half dollar series. PCGS has deemed only 68 examples worthy of a Registry-grade PR69 Deep Cameo designation and none finer (4/16). This piece displays stark white-on-black contrast and razor-sharp detail. Neither side exhibits any toning to distract from the deep mirroring of the fields. NGC ID# 24WM, PCGS# 96807

1971-S Kennedy Half Dollar, PR69 Deep Cameo None Finer at PCGS

- 4091** 1971-S PR69 Deep Cameo PCGS. A hint of golden toning visits the virtually perfect surfaces of this sharply impressed specimen. The portrait and eagle are thickly frosted, creating a dramatic cameo effect with the deeply reflective fields. The 1971-S was the first of the non-silver proof issues. Population: 68 in 69 Ultra Cameo, 0 finer (4/16). NGC ID# 24WM, PCGS# 96807

- 4092** 1981-S Type Two, FS-501, PR70 Deep Cameo PCGS. The Type Two proof 1981-S Kennedy half dollar is significantly scarcer in perfect PR70 Deep Cameo condition than the Type One version. This piece is flawlessly struck and displays stark field-device contrast with a hint of champagne toning. Population: 66 in 70 Deep Cameo (5/16). NGC ID# 24WS, PCGS# 96822

EARLY DOLLARS

- 4093** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Improperly Cleaned — NGC Details. Fine. Deep autumn-brown and gunmetal toning fills the obverse field. The high points are slate-gray, and the reverse displays light straw-gold and powder-blue patina. The portrait and the reverse are hairlined, but the only noticeable mark is a thin line above the date. A scarcer Bolender variety. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

- 4094** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Tooled — PCGS Genuine. VF Details. This nicely detailed Flowing Hair dollar has been smoothed on the obverse field below the chin, and on the reverse field near 2 o'clock. The surfaces are both glossy and microgranular throughout. Gunmetal and golden-brown toning fills the borders and visits the centers. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

- 4095** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Good 4 PCGS. All legends are fully readable and every star is distinct. The types are well outlined, and no marks merit discussion. Struck for only two years, the typical Flowing Hair dollar sells for thousands of dollars, but the present lot is within the means of most type collectors. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Draped Bust Dollar, XF Sharpness
B-14, BB-51, Off-Center Bust**

- 4096** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, — Improperly Cleaned — NGC Details. XF. Bowers Die State II. Light clash marks are visible at the upper reverse near OF. The Mint's inexperience with the new portrait design resulted in the portrait positioned slightly off-center left — a die cutter's error that was corrected on BB-52. Traces of deep patina remain on the obverse of this lightly cleaned example. Sharply defined motifs remain, and abrasions are limited to only minor marks from circulation. Traces of scattered obverse adjustment marks are visible with a glass at the rims.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1796 B-4, BB-61, Silver Dollar, Fine 12
Small Date, Large Letters**

- 4097** 1796 Small Date, Large Letters, B-4, BB-61, R.3, Fine 12 PCGS. Bowers Die State I with three detached forehead curls. Lavender-gray toning encompasses this lightly abraded Small Eagle dollar. Faint adjustment marks, as made, are noted near Liberty's neck. The devices exhibit wear commensurate with the grade. The Large Letters reverse is somewhat scarcer than its Small Letters counterpart. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

- 4098** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Damaged — NGC Details. VF. Bowers Die State I. A scratch through the Y in LIBERTY accounts for the NGC designation, but the only other mentionable mark is a small dig on the reverse exergue. Slate-white high points contrast with gunmetal-gray and russet fields.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 Draped Bust Dollar, Fine 12
Large Date, Small Letters, B-5, BB-65**

- 4099** 1796 Large Date, Small Letters, B-5, BB-65, R.2, Fine 12 NGC. Bowers Die State II. Easily identified by the irregular die break at I in AMERICA, the BB-65 variety is an available issue in most circulated grades. This pleasing Fine 12 example retains some interior design detail in Liberty's hair and the dove-gray obverse shows a few minor digs in the fields. The reverse shows darker, slate-gray patina, with some light planchet adjustment marks on the eagle.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1797 B-3, BB-71 Dollar, Very Fine
10x6 Stars, Large Letters Reverse**

- 4100** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF20 ANACS. Bowers Die State III. Aquamarine toning fills the obverse margin and the reverse exergue. The fields are pearl-gray with hints of golden-brown. The high points are powder-blue. No abrasions of any consequence are apparent. Minor mint-made adjustment marks are noted on the reverse periphery and the field beneath the right (facing) wing. Housed in a small-sized holder. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 Large Letters Dollar, Fine 12
9x7 Stars, B-1, BB-73**

- 4101** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, Fine 12 NGC. CAC. Bowers Die State II. While the Guide Book lists the official mintage of 7,776 pieces for all three varieties of the 1797 issue combined, the number of grading events for 1797 dollars suggest that figure is too low and that some 1797-dated dollars were struck in 1798. Nevertheless, the issue is scarce and highly sought by early dollar specialists. Attractive golden-gray toning covers both sides of this smoothly worn example. A few pinpoint pits above the hair ribbon and beneath LIBERTY are minor, as are a pair of flat spots on the rim at 3 o'clock. Both sides are free of adjustment marks. CAC endorsed for the eye appeal and quality surfaces at the Fine 12 level.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 Silver Dollar, VF Details
Small Eagle, 15 Stars, B-2, BB-81**

- 4102** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3 — Reverse Improperly Cleaned — NGC Details. VF. Bowers Die State II. The obverse die with eight stars left, seven stars right likely was made in 1795 or early 1796, since Tennessee became the 16th state in June, 1796. The final date numeral was punched into the die later, when an oddball 8 was selected — unlike any other 8 in the early dollar series and most closely resembling the 8 used on the 1798 ten dollar gold piece date logotype. An old cleaning on the reverse is noted on the holder, where the coin displays an even, golden-gray patina. Mottled blue and gold shades cover the less evenly toned obverse. The 15-star obverse is considerably scarcer than the subsequent 13-star obverse, which is paired with a different Small Eagle reverse. There are no adjustment marks or significant abrasions to mention on the current coin, making it an important opportunity for a perceptive early dollar enthusiast. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24X5, PCGS# 40007 Base PCGS# 6868

- 4103** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, Fine 15 NGC. Bowers Die State IV. Mottled russet-brown obverse toning overlies pearl-gray surfaces. The reverse exhibits hints of charcoal patina in protected regions. The obverse is faintly hairlined but relevant abrasions are absent. Minor adjustment marks, as coined, are noted above the eagle's beak. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24X6, PCGS# 40011 Base PCGS# 6876

**1798 Large Eagle Silver Dollar, VF35
B-15, BB-112, Wide Date**

- 4104** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF35 PCGS. Bowers Die State II. From a somewhat early state of the dies. Star 13 is fully formed but visually not quite as robust as the other obverse stars. Marks are at an absolute minimum on this smooth and attractive Choice VF example. Sharp definition on the motifs suggests an even finer grade, while pleasing brownish-gray patina blankets both sides. A nice representative of the Wide Date, Pointed 9 type. NGC ID# 24X6, PCGS# 40029 Base PCGS# 6877

**1798 Heraldic Eagle Dollar, Sharp XF40
Pointed 9, B-15, BB-112**

- 4105** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, XF40 PCGS. Ex: Miller. Bowers Die State III. The spindly appearance of star 13 indicates the obverse die was lapped, as does weakness at the outer loop of the curl near 1 in the date. Deep and mottled brown toning covers the glossy fields, contrasting nicely with the tan figure of Liberty and the lightly toned raised reverse elements. Hints of luster remains beneath the original patina. The BB-112 is a moderately available variety and it is often a preferred selection for the Wide Date type. This sharp example is smooth and appealing for the grade, with virtually mark-free surfaces. NGC ID# 24X6, PCGS# 40029 Base PCGS# 6877

**1798 B-28, BB-118 Bust Dollar, XF40
Near-Terminal Reverse Die State**

- 4106** 1798 Large Eagle, Pointed 9, Close Date, B-28, BB-118, R.3, XF40 PCGS. Ex: Miller. Bowers Die State V. The reverse die soon met its demise and appears only on the present variety. The obverse die appears on multiple varieties. Two prominent, parallel die cracks to the left of the eagle's tail help identify the BB-118 die pair. The late state of the reverse is confirmed by a large piece of the die absent between the two cracks, and sinking of the adjacent area. The obverse is likewise cracked below and through the date, to star 1, and well into the left field. Brown and tan toning blankets both sides with traces of remaining gold luster. The coin is sharply defined for the grade, although some of the field stars are weak as normal for the variety. This attractive early dollar is the Bowers *Encyclopedia* plate coin to illustrate the advanced state of the BB-118 reverse die. NGC ID# 24X6, PCGS# 40035 Base PCGS# 6873

**1798 B-29, BB-119 Dollar, XF40
Large Eagle, Pointed 9, Ex: Miller**

- 4107** 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, XF40 PCGS. Ex: Miller. Bowers Die State II. A scarce variety with the date closely spaced and the second 8 high, almost touching the bust. The cracked obverse die was carried forward for its seventh and final use on BB-119. The reverse was used in its early state to strike the current variety, and in a later state for its final use on BB-120. This is the Bowers *Encyclopedia* plate coin for the variety, notable for its lengthening obverse die cracks amid light, almond-gold toning that deepens at the lower obverse with occasional blue accents. The reverse is similarly toned, and both sides show only smooth wear. There are no adjustment marks or serious abrasions. NGC ID# 24X6, PCGS# 40036 Base PCGS# 6873

**1798 Large Eagle Dollar, B-8, BB-125, XF40
Four Berries Reverse**

- 4108** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, XF40 PCGS. Ex: Miller. Bowers Die State II. An unusual, freestanding vertical die crack in the left obverse field confirms the middle state of the dies, a monogamous pair used only for BB-125. Splashes of gunmetal-blue, sea-green, and grayish-brown toning visit the obverse, while the reverse is lightly toned in pale-gold shades. Glimpses of mint luster remain primarily on the reverse. BB-125 is best-known for its Four Berries reverse, the only four-berried reverse for 1798. This early dollar is sharply defined for the XF grade, with light abrasions but no overly heavy marks. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

- 4109** 1799/8 15 Stars Reverse, B-3, BB-141, R.3 — Improperly Cleaned — NGC Details. VF. Popular both for the overdate and the famous engraver's blunder on the reverse field stars, 15 stars were placed above the eagle in error, with the outer two stars clumsily hidden by overstuffed clouds above the wingtips on either side. This silver-gray example is a bit bright with minor hairlines from the cleaning, but retains much to like with no large abrasions or harsh handling. Sharp definition remains on the devices. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**1799/8 Dollar, Choice VF
B-3, BB-141, 15 Stars Reverse**

- 4110** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF35 NGC. Bowers Die State III. BB-141 employs the overdated obverse die with the famous 15 Stars reverse. The two end clouds are enlarged, mostly engulfing two extra stars, whose points protrude from the bottom edge of the clouds. The coin is evenly and boldly struck, with strong detail and outstanding gunmetal-gray fields and battleship-gray relief elements. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**1799/8 Silver Dollar, XF Details
13 Stars Reverse, B-1, BB-142**

- 4111** 1799/8 13 Stars Reverse, B-1, BB-142, R.4 — Improperly Cleaned — NGC Details. XF. Bowers Die State III. An iridescent sheen covers both sides of this sharply defined overdate dollar, with light hairlines visible beneath the toning but no sign of harsh cleaning. Olive-gray and gold toning predominates with faint blue accents. One of three overdated varieties in 1799, this version displays a unique reverse with an advanced die flaw at I of AMERICA and several reverse die cracks that signify the late die state. Eye appeal remains despite the noted cleaning. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

- 4112** 1799 7x6 Stars, B-5, BB-157, R.2 — Improperly Cleaned — NGC Details. VF. Bowers Die State III. Die cracks through UNITED STATES allow prompt attribution. Splashes of golden-brown accompany the obverse. The reverse is steel-gray. This nicely detailed early silver dollar is hairlined but void of consequential abrasions. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

- 4113** 1799 8x5 Stars, B-23, BB-159, R.3, VF30 NGC. Bowers Die State II. BB-159 is the only die marriage that has an 8x5 obverse star arrangement. This attractive midgrade representative has glimpses of russet-brown patina in protected obverse regions. The fields display delicate straw-gold and powder-blue toning. Lightly abraded overall despite a brief field lines near the L in LIBERTY and behind the eagle's head. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

- 4114** 1799 7x6 Stars, B-11, BB-161, R.3, VF25 NGC. "Die State IV," unlisted, with a break below the eagle's beak. This late die state shows a heavily broken tail die that begins to buckle at the eagle's left (facing) wing. The present coin shows deep gunmetal-gray patina in the fields with lighter tan-gray design elements. A loupe reveals a few faint hairlines on the obverse. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40
7x6 Stars, B-11, BB-161**

- 4115** 1799 7x6 Stars, B-11, BB-161, R.3, XF40 PCGS. Ex: Miller. Bowers Die State III. Diagnostic die cracks on the reverse are in an advanced state, and the obverse shows die clashing above the date. This is the Bowers *Encyclopedia* plate coin for the variety. Like its predecessor (the BB-160 variety), the BB-161 is a “No Berries” reverse although it is often not recognized as such. Bluish-brown toning on both sides displays orange-gold mint luster in the protected areas. A short abrasion near Liberty’s mouth is noted, but overall the fields show few abrasions and there are no adjustment marks. Extremely attractive for the assigned grade. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 Draped Bust Dollar, Sharp XF45
Attractive B-17, BB-164 Example**

- 4116** 1799 7x6 Stars, B-17, BB-164, R.2, XF45 PCGS. Ex: Miller. Bowers Die State . Choice silver-gray surfaces are only lightly abraded and sharply struck with a pearlescent glow. Five overly large berries on the olive branch identify the BB-164 reverse, its sole use. The obverse appears in its fifth and final use. Minor strike weakness at the centers is typical for the variety, although less obvious at the present grade. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

- 4117** 1799 7x6 Stars, B-8, BB-165, R.3 — Improperly Cleaned — NGC Details. XF. Bowers Die State II. The horizontal die crack from the second S in STATES identifies B-8. The silver-gray, ice-blue, and almond-gold surfaces are hairlined but lack any distracting marks. Impressively detailed, with all letters in E PLURIBUS UNUM sharp.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

- 4118** 1799 7x6 Stars, B-9, BB-166, R.1, VF25 PCGS. Bowers Die State IV. Small die breaks bookend the second S in STATES, characteristic of the B-9 “Apostrophe” variety. Deep dove-gray toning blankets this problem-free Heraldic Eagle type coin. The surfaces are mildly glossy and devoid of consequential contact. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

- 4119** 1799 7x6 Stars, B-9, BB-166, R.1, VF25 NGC. CAC. Bowers Die State IV to V. The “apostrophe” variety, named after the die break near the second S in STATES. Powder-blue and almond-gold toning drapes this nicely defined Heraldic Eagle dollar. Marks are confined to a pair of vertical lines at the left shield corner. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

- 4120** 1799 7x6 Stars, B-14, BB-167, R.3, VF25 NGC. Ex: Highland Collection. Bowers Die State II. Die flaws occur below AM(ERICA). This bright, steel-gray Draped Bust dollar shows deeper patina around the obverse legends. Considerable details remains despite merging over the hair curls and the eagle’s breast. A planchet flaw appears at the rim below (U)NITED. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

- 4121** 1799 7x6 Stars, B-22, BB-168, R.4, VG8 PCGS. Bowers Die State III. A scarce variety, suggesting quick demise of the reverse die that displays a heavy horizontal die crack with cud-like enlargements at E of UNITED. Noticeable sinking of the die is visible at the top half of the reverse. This is a smoothly worn “circulation cameo” example with battleship-gray fields and light, silver-gray raised elements. An appealing early dollar at the VG level. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

- 4122** 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF35 PCGS. Bowers Die State III. The BB-190 variety is listed in the *Guide Book*, and that fact alone generates considerable demand. A fairly early die state, the reverse hosting minor cracks. Both sides of this Choice VF coin show delicate gold toning over pewter-gray surfaces with a few tiny splashes of deeper toning on each side. Well-defined for the grade with splendid eye appeal. Ex: FUN Signature (Heritage, 1/2011), lot 3957. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 Draped Bust Dollar, VF20
B-11, BB-191, AMERICAI**

- 4123** 1800 AMERICA, B-11, BB-191, R.4, VF20 PCGS. The obverse of this mid-grade BB-191 Draped Bust dollar is light silver-gray, with lighter toning on the devices. The reverse is mostly steel-blue. Both sides have trivial marks with faint hairline scratches and granularity in the fields. The reverse die line next to the final A in AMERICA is faint as a result. From The Eagle One Collection. NGC ID# 24X9, PCGS# 40081 Base PCGS# 6892

- 4124** 1800 AMERICA, B-19, BB-192, R.2, Fine 12 PCGS. Bowers-Borckardt Die State IV. Gunmetal-gray and caramel-gold enrich this Heraldic Eagle dollar, which is surprisingly sharp for the Fine level. All letters in E PLURIBUS UNUM are at least partly present. A thin mark is noted near the nose tip, along with a few tiny upper obverse rim nicks. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

- 4125** 1800 B-13, BB-193, R.3 — Improperly Cleaned — NGC Details. XF. Bowers Die State III. Light sea-green toning visits the obverse field, and hints of peach-red illuminate the obverse stars. The portrait and the reverse are stone-gray. This well-defined early dollar displays obverse hairlines but is surprisingly free from abrasions. A small field flan flaw (as made) is noted below the chin. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**1800 Dollar, Exceptional AU53
Late Die State B-13, BB-193**

- 4126** 1800 B-13, BB-193, R.3, AU53 PCGS Secure. Ex: Miller. Bowers Die State "V." An unlisted die state in the Bowers *Encyclopedia*, where this coin is the plate coin for the late die state with advanced obverse die cracks. In addition to the arc-shaped die crack connecting stars 1 to 4, with the die failing at stars 2 and 3, a similar arc-like crack from stars 8 to 11 is not described in the reference. This is a wonderful early dollar, with blatant originality and rich toning that features steel-blue borders around the golden central devices. Luster remains beneath the natural patina. Both obverse and reverse display cracks and die clashing to satisfy any early dollar die state specialist. There are no adjustment marks or detractors of any kind. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

- 4127** 1800 10 Arrows, B-15, BB-195, R.4 — Improperly Cleaned — NGC Details. Fine. Bowers Die State I. The high points are cream-white, the obverse field is orange-gold, and the reverse field is aquamarine. This representative is moderately bright and exhibits a few minor field marks. Most of E PLURIBUS UNUM is clear, and the wingtips are richly detailed. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

**1801 Dollar, B-1, BB-211, XF40
Bulging Die, Rare Late Die State**

- 4128** 1801 B-1, BB-211, R.3, XF40 PCGS. Ex: Miller. Bowers Die State V. A large die bulge at MER of AMERICA signifies the late die state of this attractive 1801 dollar. A die crack through OF to the right (facing) wing tip confirms the most advanced die state, described by Bowers as "Rare. Not seen." Deep umber-brown toning accents contrast with light brown raised elements on the reverse, while the obverse lilac-ray and orange-gold toning with bits of mint luster. Only light abrasions exist, all softened by wear to be negligible in-hand. Sharp definition remains despite the late die state. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

- 4129** 1801 B-3, BB-213, R.3, VG10 NGC. Bowers Die State II. Generally stone-white, although protected areas are charcoal-gray, and the obverse field displays glimpses of tan toning. The obverse has delicate hairlines but abrasions are inconsequential relative to the grade. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

**1801 Draped Bust Dollar, VF20
B-3, BB-213 Variety**

- 4130** 1801 B-3, BB-213, R.3, VF20 NGC. CAC. Bowers Die State II. All T's in the reverse legend are missing the right foot and the 1 in the date is clearly separated from the curl, identifying the scarce BB-213 variety. The left side of the drapery is worn, but not quite smooth on this attractive VF example, and the pleasing dove-gray surfaces are lightly abraded, with no planchet adjustment marks. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

**1802/1 Silver Dollar, AU Details
Scarce Wide Date, B-2, BB-233**

- 4131** 1802/1 Wide Date, B-2, BB-233, R.4 — Cleaning — PCGS Genuine. AU Details. Bowers Die State I, the sole die state listed from perfect dies. Faint iridescent and gold toning on both sides of this smooth and semireflective dollar add interest to the surfaces, which are otherwise somewhat bright from a light cleaning. Hairlining is minimal, although brief cloudy areas and two or three tiny ticks are noted. BB-233 is a scarce variety among the 1802/1 dollars. Both Wide and Narrow Date varieties exist. NGC ID# 24XC, PCGS# 40093 Base PCGS# 6899

- 4132** 1802 Narrow Date, B-6, BB-241, R.1 — Improperly Cleaned — NGC Details. VF. Bowers Die State III. A nicely defined type representative. Generally stone-gray, although blushes of apple-green and golden-brown adorn the upper obverse field. Hairlines cross the obverse, but the reverse appears problem-free, and neither side exhibits any consequential abrasions. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1802 Draped Bust Dollar, XF40
Very Scarce B-5, BB-242 Variety**

- 4133 1802 Wide Date, B-5, BB-242, R.5, XF40 NGC.** Bowers Die State II. The BB-242 is an elusive variety identified by the perfect date and the perfect T in LIBERTY. This attractive XF specimen retains much interior design detail in Liberty's hair and the eagle's feathers, and the lightly abraded surfaces are toned in pleasing shades of lavender, gray, and golden-brown. This piece is from a later die state, unlisted in Bowers series reference, with an obverse peripheral die crack through the date and most of the stars on the left.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XB, PCGS# 40089 Base PCGS# 6896

- 4134 1803 Small 3, B-1, BB-251, R.4, Fine 15 NGC. CAC.** Bowers Die State III with a narrow vertical break beneath the R in LIBERTY. Slate devices rise above cream-gray fields. A minimally abraded representative of this better Bolender variety. A small round spot is noted on Liberty's shoulder.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XD, PCGS# 40096 Base PCGS# 6900

- 4135 1803 Small 3, B-5, BB-252, R.3, Fine 12 NGC.** The obverse field shows dappled gunmetal toning, and the reverse displays a hint of golden patina, but the majority of this Heraldic Eagle dollar is pearl-gray. The luminous surfaces are surprisingly free from marks. The eagle is richly detailed for the designated grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

- 4136 1803 Large 3, B-6, BB-255, R.2, VF25 NGC.** Bowers Die State II. Splashes of peach-gold adorn the predominantly pearl-gray obverse. The reverse is honey-gold and ice-blue. Minimally abraded. The reverse grades higher than the obverse, and displays luster within the wings and legends.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

**1841 Seated Dollar, Pleasing MS60
Original Patina, Sole CAC for the Grade**

- 4137 1841 MS60 PCGS. CAC. OC-3.** Osburn-Cushing Die State c/c. Struck from a first-time use of the obverse die and from a transitional reverse die from 1840. The mintage of 173,000 pieces is generous in the Seated dollar series, making the 1841 a good type selection for most collections. This example shows traces of prooflike surface at the margins amid thick, original brown and tan toning interspersed with golden mint luster. Sharply struck, with slight loss of definition on Liberty's hair but bold feather details on the eagle. A few small bagmarks are noted on each side. Scarcely seen in this lower Mint State grade, and the sole CAC endorsed coin at the MS60 level from either service. Population: 4 in 60, 76 finer. CAC: 1 in 60, 22 finer (4/16). NGC ID# 24YB, PCGS# 6927

**1844 Seated Dollar, AU58
Sharp No Motto Type Coin**

- 4138 1844 AU58 PCGS.** Some satiny luster remains in the fields of this near-Mint 1844 Seated dollar, illuminating light golden-gray toning and boldly detailed motifs. Light chatter on each side is consistent with the grade, but there are no individually bothersome abrasions. The 1844 is a collectible date, despite its enticingly low mintage of 20,000 pieces. Population: 26 in 58, 31 finer (4/16). NGC ID# 24YE, PCGS# 6930

- 4139 1845 AU53 NGC. CAC. OC-1.** Osburn-Cushing Die State c/b. The reflective obverse shows reddish-orange toning around steel-blue interiors, while the reverse displays pleasing lavender shades. A rim ding between 11 and 12 o'clock on the reverse and a minor reeding mark near the eagle's neck are noted, but the attractive toning and sharp definition on the motifs give this better-date dollar strong appeal. Just 24,500 pieces were struck. A CAC-endorsed example. Census: 23 in 53, 84 finer. CAC: 6 in 53, 20 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YF, PCGS# 6931

- 4140 1847 AU58 NGC.** Well-struck and lustrous, with lovely golden-gray toning over the two sides. A trace of highpoint wear on the reverse confirms the near-Mint status of this lightly abraded 1847 dollar. This issue is popular as a No Motto type coin.
Ex: Long Beach Signature (Heritage, 2/2006), lot 1652. NGC ID# 24YJ, PCGS# 6934

- 4141 1849 MS60 NGC.** A beautifully detailed example from this issue of 62,600 pieces, strongly lustrous with glassy fields beneath ample violet and gold patina. Though a number of wispy abrasions and light ticks are present on each side, this desirable coin retains better eye appeal than the MS60 grade would suggest. Census: 6 in 60, 70 finer (4/16).
Ex: Long Beach Signature (Heritage, 5/2008), lot 904. NGC ID# 24YL, PCGS# 6936

- 4142 1850 XF45 NGC. CAC. OC-1.** Osburn-Cushing Die State b/e. The low mintage of 7,500 pieces make the 1850 a challenging coin at any level. Since few examples saw actual circulation, the issue is scarce in the lowest as well as the highest grades, with levels in between somewhat more available. This Choice XF example is colorfully toned in gold and blue shades with light abrasions in the fields. A small rim mark near 2 o'clock on the reverse needs mention. The eye appeal is excellent as confirmed by the CAC endorsement. Census: 10 in 45, 94 finer. CAC: 3 in 45, 25 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YM, PCGS# 6937

- 4143 1850-O — Improperly Cleaned — NGC Details. AU. OC-1.** Osburn-Cushing Die State b/c. With Mint State examples of the 1850 New Orleans issue in short supply, About Uncirculated coins are always in demand. This example received a light cleaning many years ago, but it has recovered pleasing olive-gold patina on both sides and the effects of the cleaning are minimal. Just 40,000 pieces were struck.
From The Rev. Dr. James G. K. McClure Collection.

**1854 Seated Dollar
Mint State Sharpness**

- 4144 1854 — Improperly Cleaned — NGC Details. Unc. OC-1, High R.3.** Osburn-Cushing Die State b/b. Minor recutting at the base of the 4 and a bold die line in the dentils above RI of AMERICA confirm the circulation-strike dies this scarce issue. The 1854 is a series rarity in Uncirculated condition. Just 33,140 pieces were struck and most of the mintage was destined for export as unofficial “trade dollars.” The present coin is net-graded for an old cleaning, although mottled surface toning hides the overt signs of handling. Deep-blue and olive shades on the obverse are matched with light, speckled gray toning on the reverse.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YT, PCGS# 6942

**1855 Seated Dollar, Unc Details
Scarce 1850s-Era Philadelphia Issue**

- 4145 1855 — Improperly Cleaned — NGC Details. Unc. OC-1, High R.3.** Osburn-Cushing Die State a/b. The 1855 issue — like the 1854 — was minted in small quantities, and both issues are of similar series rarity. Just 26,000 pieces of the 1855 were struck “for circulation,” yet few survive. In Mint State, the issue is rarer than its 1854 predecessor. The present coin displays Mint State sharpness with an old cleaning. Variegated rainbow shades now cover the obverse, with pleasing golden-gray colors on the reverse. A few small contact marks are hidden in the toning. The 1855 is seldom well-struck although this example is reasonably crisp on the obverse. The eagle’s head and wing are less bold on the reverse.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YU, PCGS# 6943

**1856 Silver Dollar, Unc Details
Scarce Series Issue**

- 4146 1856 — Improperly Cleaned — NGC Details. Unc. OC-1.** Osburn-Cushing Die State b/a. Mottled areas of olive-brown toning display gold highlights under light, while the reverse is lightly toned in silver-gray and pale-blue shades. Mint State examples of the 1856 are rare, making this Unc Details coin of greater importance. Light lines remain from a past cleaning, well-disguised by the toning. There are no serious marks, allowing the coin to conceivably improve with age.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YV, PCGS# 6944

**1857 Seated Dollar, Vibrant MS61
Reflective Surfaces, Multihued Toning**

- 4147 1857 MS61 NGC. CAC. OC-2.** Osburn-Cushing Die State a/a. The 1857 is a slightly more available issue in the Seated dollar series than the key, low-mintage rarities, yet it can be challenging in its own right. This example is decidedly prooflike on the obverse and semiprooflike on the reverse. Dramatic multicolor toning covers the obverse with intense shades of forest-green, gunmetal-blue, and reddish-gold with luster shining through. The reverse is a lively mix of violet and orange-gold shades. The strike is a bit flat on the right-hand stars and Liberty’s hair, yet sharp definition prevails elsewhere. Only tiny ticks and a few light lines are visible with a glass. CAC endorsement confirms the appeal. Census: 7 in 61, 44 finer. CAC: 2 in 61, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24YW, PCGS# 6945

- 4148 1859 AU58 NGC.** A brilliant, sharply struck 1859 Seated dollar with barely a trace of friction and light surface chatter preventing a Mint State designation. The fields are semiprooflike, and eye appeal is pleasing. This is a slightly better date in high grade. Census: 9 in 58, 34 finer (5/16). NGC ID# 24YZ, PCGS# 6946

**1859 Seated Liberty Dollar, MS61
Underrated Antebellum Issue**

- 4149 1859 MS61 NGC. CAC. OC-4, Low R.4.** Osburn-Cushing Die State a/a. The 1859 Seated Liberty dollar is much more difficult to locate than its mintage of 255,700 pieces would suggest. It is likely that most of the coins were exported in the China trade and melted for bullion. This attractive MS61 example offers well-detailed design elements and the pleasing surfaces show the minimum number of minor contact marks for the grade. Traces of original mint luster shine through shades of lavender-gray and greenish-gold toning. Census: 3 in 61, 29 finer. CAC: 1 in 61, 7 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24YZ, PCGS# 6946

- 4150 1859-S — Improperly Cleaned — NGC Details. AU. OC-1.** Osburn-Cushing Die State a/a. Slight repunching (underdigits south) is visible on the 1 and 8 of the date. This is a silver-gray example with traces of charcoal-gray patina on both sides. A loupe reveals light lines from the cleaning, but full rims and strong definition on the central motifs remain. Just 20,000 pieces were struck, although some were possibly lost to export. *From The Rev. Dr. James G. K. McClure Collection.*

- 4151 1860 AU53 PCGS.** While its New Orleans counterpart is readily available, the 1860 Seated dollar is notably scarce in the AU and Mint State grade range. This briefly circulated piece shows steel-gray patina with a hint of gold. A deeper toning streak stretches across the reverse horizontally from 8 to 4 o'clock. Well-detailed, with some semiprooflike mirroring surviving in the protected regions of the fields. NGC ID# 24Z2, PCGS# 6949

- 4152 1860 MS61 NGC. OC-4 Die Pair.** The obverse is attractively toned in rich shades of forest-green, gunmetal-blue, and reddish-gold, while the reverse displays attractive blue toning and the borders and lilac-gray patina at the center. Some light, barely noticeable lines exist beneath the toning and account for the assigned grade, although marks are at a minimum and the eye appeal is exceptional. The rims are ideal. Census: 5 in 61, 51 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24Z2, PCGS# 6949

**1865 Seated Dollar, AU55
Elusive in High Grade**

- 4153 1865 AU55 PCGS.** A better date, particularly with original, uncleaned surfaces such as are seen on this piece. This Choice AU 1865 Seated dollar displays a bold strike with modest reflectivity in the fields. Each side has dusky steel-gray and champagne toning with light field chatter. Housed in a green label holder. Population: 20 in 55, 37 finer (4/16). NGC ID# 24Z8, PCGS# 6955

- 4154 1870-CC — Cleaning — PCGS Genuine. XF Details.** A well-detailed example of this elusive Carson City issue, showing tan-gray and olive toning. Hairlines in the fields indicate an old cleaning but are partially masked by the deep patina. An affordable example of this sought-after semikey issue. NGC ID# 24ZE, PCGS# 6964

- 4155 1870-CC — Scratch — PCGS Genuine. AU Details. OC-2.** This popular issue represents the first year of issue from the historic Carson City mint. Only 12,462 dollars were struck from four obverse and four reverse dies. This coin is destined to find an appreciative audience. The surfaces are well-defined, deeply toned, and generally problem-free. However, the scratch mentioned by PCGS is not immediately apparent except as a shiny, thin arc that interrupts the toning near the denticles on the reverse at 9 o'clock. NGC ID# 24ZE, PCGS# 6964

**1871-CC Dollar, XF Details
Rare in Any Condition**

- 4156 1871-CC — Improperly Cleaned — NGC Details. XF. OC-1, High R.4.** Osburn-Cushing Die State a/a. The top of a misplaced 1 is visible in the dentils beneath the 7 in the date. With a minuscule mintage of 1,376 pieces, the 1871 is arguably the most challenging Carson City issue for collectors (although some would argue that honor goes to the 1873-CC). A pleasing golden glow attends the surfaces of this sharply defined example, but assisted by an early cleaning. The resultant light hairlines are visible with a glass. Even so, there are few problem-free survivors of the issue in any condition, making this pleasing old-time collection coin a viable alternative. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24ZH, PCGS# 6967

**1872-CC Dollar, Sharp VF Details
Important Carson City Issue**

- 4157 1872-CC — Improperly Cleaned — NGC Details. VF. OC-1.** Osburn-Cushing Die State a/a. A light cleaning many years ago did little harm to this sharp VF coin, and it has since retuned to an appealing khaki-gold color with a speckling of olive-brown overtones. Light abrasions mix with the few visible hairlines in the fields, while the central motifs retain crisp definition. The rims are ideal at the assigned grade level. Just 3,150 pieces were struck at the Carson City Mint, and all CC Seated dollars are of unending interest to collectors. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24ZK, PCGS# 6969

- 4158 1872-CC — Stained, Cleaned — NGC Details. VF. OC-1.** Osburn-Cushing Die State a/a. Traces of luster remain but the tan-gold surface toning was artificially applied, likely to hide effects of cleaning. The motifs are sharply defined for the assigned VF Details grade, particularly on the reverse. The rims are wide and unmarked except for a slight flattening beneath O of DOL. About half of the letters in LIBERTY are visible on the shield. NGC ID# 24ZK, PCGS# 6969

4159 1872-CC — Scratches, Cleaned — NGC Details. XF. OC-1. Osburn-Cushing Die State a/a. Just 3,150 silver dollars were struck in Carson City for the year, and while the 1872-CC is somewhat more available than the 1871-CC and 1873-CC issues, it remains scarce in all grades. This silver-gray example is bright and smooth from the cleaning, with a few old scratches through the reverse scroll and motto. A small planchet flaw above Liberty's head on the obverse is a mint-related anomaly, but rim bumps at 5 o'clock on both the obverse and reverse are noted, as well as some remnant hairlines from the cleaning. NGC ID# 24ZK, PCGS# 6969

4160 1872-CC — Repaired — PCGS Genuine. XF Details. The 1872-CC Seated dollar had a small mintage of 3,150 coins and is sought-after in all grades. This XF-level coin displays bold detail and consistent olive-gray toning. Minor tool marks in areas of the fields preclude a numeric designation. NGC ID# 24ZK, PCGS# 6969

4161 1872-S VF25 PCGS. With a mintage of only 9,000 coins, the 1872-S Seated dollar is a sought-after semikey date. This VF example displays strong detail for the grade with patinated surfaces. The fields have an interesting bluish steel-gray hue, while the relief elements show more traditional lavender-gray color. NGC ID# 24ZL, PCGS# 6970

4162 1872-S — Improperly Cleaned — NGC Details. XF. OC-1. Apparently, the scant mintage of 9,000 pieces circulated in West Coast commerce upon release from storage at the San Francisco Mint upon implementation of the Coinage Act of 1873. Some pieces may have been melted and recoinced as Trade dollars, and a few others may have been exported, but grading events suggest most of the mintage circulated. The present coin is attractively toned in a tawny, cream-gray color. Evidence of a long-ago cleaning lingers on the smooth surfaces beneath the patina.
From The Rev. Dr. James G. K. McClure Collection.

4163 1873 AU53 PCGS. CAC. This well-detailed final-year Seated dollar type coin displays deep, original olive-gray patina such as is highly sought-after by a number of collectors. A few scattered abrasions are consistent with the AU grade. The CAC green label only increases the desirability. CAC: 1 in 53, 25 finer (4/16). NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLAR

1870 Seated Dollar, PR62 Cameo Pleasing Contrast

4164 1870 PR62 Cameo NGC. CAC. The 1870 Seated Liberty dollar claims a large production figure of 1,000 proofs. Accordingly, Dick Osburn and Brian Cushing note that this is "one of the most available years in proof." This PR62 Cameo dollar displays razor-sharp details on all design elements, with reflective fields that offer strong contrast against the frosty devices. Census: 5 in 62 Cameo, 31 finer (4/16).
Ex: FUN Signature (Heritage, 1/2011), lot 4008. NGC ID# 252S, PCGS# 87018

TRADE DOLLARS

1873-CC Trade Dollar, AU53 Introductory Carson City Issue

4165 1873-CC AU53 NGC. The Carson City Mint began producing Trade dollars shortly after July 22, 1873, when four die pairs were received from Philadelphia. By year's end, the facility had minted 124,500 Trade dollars, many of which were shipped to East Asia, while 2,580 pieces were distributed to local depositors. This AU53 dollar has light silvery surfaces with glimpses of antique-gold. Partial luster is evident near the major design elements, showing bold detail on the stars and branch. Minimally marked. NGC ID# 252X, PCGS# 7032

4166 1875-CC Type One Reverse AU55 NGC. Dappled cream-gray, wheat-gold, olive-green, and lilac patina enriches this satiny and unblemished Carson City type coin. The eagle's right (facing) leg is typically brought up, but actual wear from circulation is difficult to discern.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

4167 1875-CC Type One Reverse MS61 PCGS. Tall CC. The 1875-CC Trade dollar is elusive in the finer Mint State grades. This collectible MS61 coin displays frosty original luster with a hint of pale champagne toning. The strike is boldly rendered, and light, scattered ticks in the obverse fields are all that limit the grade. Housed in an old green label holder. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1876-CC Trade Dollar, AU55 Low-Mintage, Branch-Mint Issue

4168 1876-CC Type Two Reverse AU55 NGC. Tall CC. Only 509,000 Trade dollars were struck at the Carson City Mint in 1876, all delivered before May. The issue is scarce in circulated grades and rare in Mint State. This lightly abraded Choice AU specimen shows just a touch of actual wear and the pleasing surfaces are blanketed in shades of lavender-gray, ice-blue, and pale gold toning. Census: 21 in 55, 92 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

**1876-S Trade Dollar, Near-Gem
Type One Obverse and Reverse
Patinated Silver Type Coin**

- 4169 1876-S Type One Obverse, Type One Reverse, MS64 PCGS.** Large S. Deep sea-green, gunmetal-gray, chestnut-gold, and powder-blue toning encompasses this Choice Trade dollar. Thorough inspection reveals only incidental marks. The strike is full, unusual for business issues of the series. The Type One obverse and reverse combination is the most prevalent for the '76-S, although the only impossible combination is a Type Two obverse with a Type One reverse.
Ex: FUN Signature (Heritage, 1/2007), lot 5252, which realized \$2,760. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

PROOF TRADE DOLLARS

- 4170 1874 PR61 NGC.** Only 700 proof Trade dollars were struck in 1874. This attractive PR61 specimen exhibits sharply detailed design elements in most areas, but the right (facing) eagle's leg shows some incomplete detail, like many other examples of this issue. The fields are brightly reflective, under shades of lavender-gray and beige toning. NGC ID# 27YK, PCGS# 7054
- 4171 1874 PR62 NGC.** Champagne and lavender hues encompass each side of this lower-end proof Trade dollar, accentuating modest field-device contrast on each side. The eagle's right (facing) leg is weak, but the obverse figure and stars are sharp. Hairlines in the fields limit the grade. NGC ID# 27YK, PCGS# 7054

**1874 Trade Dollar, PR64
Underrated Early Series Issue**

- 4172 1874 PR64 NGC. CAC.** From a small mintage of just 700 pieces, the 1874 Trade dollar is an underrated issue, outside of series specialists. This impressive Choice specimen is sharply detailed in most areas but, like many examples of this date, the eagle's leg shows some incomplete detail. The brightly reflective fields shine through layers of vivid greenish-gold and cerulean-blue toning. Census: 45 in 64, 26 finer. CAC: 5 in 64, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YK, PCGS# 7054

**1878 Trade Dollar, PR63
First Proof-Only Issue**

- 4173 1878 PR63 PCGS.** A nominal proof-only mintage of 900 Trade dollars was accomplished at the Philadelphia Mint in 1878, a watershed year for the series. This attractive Select specimen displays well-detailed design elements and deeply reflective fields, under dusky shades of lavender-gray and greenish-gold toning. Only minor scattered contact marks are evident. NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR63+
Deeply Reflective, Richly Toned**

- 4174 1878 PR63+ PCGS. CAC.** *Ex: Teich Family Collection.* The proof fields display exceptional depth of reflectivity in spite of a rich layer or two of toning on each side. The obverse is teal, while the reverse has the addition of rose patina. The strike is complete in all areas, as expected. The 1878 is a significant issue as it is the first proof-only year from the Philadelphia Mint. Population: 83 in 63 (1 in 63+), 93 finer. CAC: 6 in 63, 12 finer (4/16). NGC ID# 27YP, PCGS# 7058

- 4175 1880 PR62 NGC.** A razor-sharp proof 1880 Trade dollar, ideal for type purposes. Each side displays deeply reflective fields with blended lavender, blue, and sun-orange toning. For the grade, eye appeal surpasses expectations. This proof-only issue had a fairly substantial mintage of 1,987 pieces, adding to its desirability as a type coin.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64
Vivid Multicolor Toning**

- 4176 1880 PR64 PCGS.** Vivid shades of burnt-orange, lavender-gray, and violet toning blanket the lightly marked surfaces of this attractive proof Trade dollar, with sharply detailed design elements and deeply reflective fields underneath. The 1880 Trade dollar was only struck in proof format, and a short-lived speculation on the part of dealers and collectors resulted in a large mintage of 1,987 pieces. NGC ID# 27YS, PCGS# 7060

**1881 Trade Dollar, PR63
Limited Proof-Only Mintage**

- 4177 1881 PR63 NGC.** Production of Trade dollars was limited to 960 proofs in 1881, a drastic reduction from the previous two years, when speculators drove orders for proof Trade dollars to record highs. This attractive Select example displays well-detailed design elements and deeply reflective fields under vivid shades of greenish-gold and cerulean-blue toning.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YT, PCGS# 7061

1882 Trade Dollar, Toned PR63

- 4178 1882 PR63 NGC.** A sharp, deeply reflective Select example of this proof-only Trade dollar issue. Blended aqua-green and rose-gold toning encompasses each side, masking scattered hairlines that limit the grade. Subtle cameo contrast is mostly muted by the deep patina. A collectible example of this late-series proof. NGC ID# 27YU, PCGS# 7062
- 4179 1883 PR63 NGC.** A fully struck Select 1883 proof Trade dollar, showing deeply mirrored fields and satiny devices with warm amber-gold toning over each side. A daub of blue appears along the obverse rim at 2 o'clock. Scattered hairlines in the fields limit the grade. A pleasing proof type coin for the budget-conscious collector. NGC ID# 5DP8, PCGS# 7063

**1883 Trade Dollar, PR64
Last Official Issue**

- 4180 1883 PR64 NGC.** Only 979 proof Trade dollars were struck in 1883, the last year the denomination was officially produced. The issue has a relatively low survival rate and an unusually high number of survivors are in impaired condition. This impressive Choice example exhibits sharply detailed design elements and moderately reflective fields, under vivid shades of greenish-gold and magenta toning.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5DP8, PCGS# 7063

**1883 Trade Dollar, Brilliant PR65 Cameo
Final Official Issue of the Series**

- 4181 1883 PR65 Cameo PCGS.** The obverse is brilliant and deeply mirrored with bold cameo contrast, as is the reverse except for some golden toning on the rims. A glass reveals a small lintmark near the forehead but no hairlines or other signs of handling. As the final regular issue of the Trade dollars, just 979 pieces were produced. Only the clandestine issues dated 1884 and 1885 followed, and despite the rarity of those tainted issues, many numismatists ignore them, choosing to call 1883 the true end of the series. Population: 15 in 65 Cameo, 15 finer (5/16). NGC ID# 27YV, PCGS# 87063

MODERN ISSUES

- 4182 1994-P P.O.W. Silver Dollar PR70 Deep Cameo PCGS.** Perfect in all respects, contrast included. The barbed-wire circle on the obverse is broken by the last letter of the word FREEDOM, a fitting element. Population: 53 in 70 (4/16). NGC ID# 28SP, PCGS# 9691
- 4183 1994-P Women in Military PR70 Deep Cameo PCGS.** The proof 1994 Women in Military Service Memorial half dollar was coined in Philadelphia rather than San Francisco. This piece is perfectly preserved with stark white-on-black contrast and beautifully rendered devices. Few pieces are certified so fine. Population: 39 in 70 Deep Cameo (5/16). NGC ID# 34TD, PCGS# 9695
- 4184 1996-P Olympic/Tennis PR70 Deep Cameo PCGS.** The XXVI Olympiad proof Tennis commemorative silver dollar is surprisingly rare in the top PR70 Deep Cameo grade. This coin displays a full strike and flawless field-device contrast. Population: 12 in 70 Deep Cameo (5/16). NGC ID# 28TL, PCGS# 9725
- 4185 1996-P Paralympics PR70 Deep Cameo PCGS.** The 1996-P proof Paralympics silver dollar is a great rarity in perfect PR70 Deep Cameo condition. This piece is fully struck with untuned surfaces that showcase stark cameo contrast. Population: 13 in 70 Deep Cameo (5/16).
Ex: New York Signature (Heritage, 12/2011), lot 10502. NGC ID# 28TV, PCGS# 9727
- 4186 1996-P Olympic/Rowing Silver Dollar PR70 Deep Cameo PCGS.** This flawless proof 1996 Atlanta Olympic Games commemorative dollar marks the sport of rowing in perfect fashion. Population: 14 in 70 Ultra Cameo, (4/16). NGC ID# 28TX, PCGS# 9729

- 4187 Four-Piece 1997 Jackie Robinson Commemorative Set.** The complete set featuring business strike and proof formats of both the San Francisco silver dollar and the gold five dollar struck at West Point. Rarest and most valuable of the four coins is the 1997-W five dollar in Mint State, which has a net mintage of just 5,174 pieces. Accompanied by the Mint-issued red cardboard box, presentation case, and certificate of authenticity. (Total: 4 coins) NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

MODERN BULLION COINS

- 4188 1986 Quarter-Ounce Gold Eagle MS70 PCGS.** The debut quarter-ounce gold eagle is rare in PCGS-certified MS70, with only 44 such pieces graded at that service (5/16). This piece is fully struck and perfectly preserved with lovely mint-fresh luster. NGC ID# 26M2, PCGS# 9804

1987 Quarter-Ounce Gold Eagle, MS70

- 4189 1987 Quarter-Ounce Gold Eagle MS70 PCGS.** A substantial mintage of 269,255 quarter-ounce Gold Eagles was produced in 1987, but few have been certified in the ultimate grade of MS70. This magnificent specimen offers technically perfect yellow-gold surfaces, with sharply detailed design elements and vibrant mint luster. Population: 12 in 70 (5/16). NGC ID# 26M3, PCGS# 9811

- 4190 1988 Silver Eagle MS70 NGC.** Silver Eagle production declined by more than 50% between 1987 and 1988, when 5 million coins were struck. This is a technically flawless representative with brilliant surfaces and fully struck devices. A great Registry coin. NGC ID# 26J8, PCGS# 9816

1988 Quarter-Ounce Gold Eagle, MS70 Seldom Seen This Fine

- 4191 1988 Quarter-Ounce Gold Eagle MS70 NGC.** The 1988 quarter-ounce Gold Eagle had a small mintage of 49,000 pieces and is scarce in perfect MS70 condition. NGC lists 73 coins this fine and PCGS only six (4/16). This piece is boldly struck and flawlessly preserved with frosty yellow-gold luster. Eye appeal is excellent. NGC ID# 26M4, PCGS# 9820

1990 Tenth-Ounce Gold Eagle, MS70

- 4192 1990 Tenth-Ounce Gold Eagle MS70 NGC.** This delightful tenth-ounce Gold Eagle exhibits technically perfect yellow-gold surfaces and fully struck design elements throughout. Vibrant mint luster radiates from both sides and overall eye appeal is terrific. Like most tenth-ounce issues from this era, the 1990 shows relatively low population totals at both of the leading grading services in the ultimate grade of MS70. Census: 74 in 70 (5/16). NGC ID# 26KZ, PCGS# 9838

1991 Silver Eagle, Flawless MS70 Among the Most Elusive Dates So Fine

- 4193 1991 Silver Eagle MS70 NGC.** A mintage of 7.2 million Silver Eagles struck in 1991 is consistent with other production figures in the series, yet the issue ranks among the most challenging dates at this unimprovable grade level. Each side is utterly flawless with brilliant surfaces and cartwheel luster. The Weinman-Mercanti design is fully rendered. NGC ID# 26JE, PCGS# 9846

- 4194 1991 Tenth-Ounce Gold Eagle MS70 PCGS.** The year 1991 was the final one for which Roman numerals were employed to signify the date. A total of 165,000 Uncirculated tenth-ounce Gold Eagles were struck that year. This flawless MS70 coin has delightful lemon-gold color and full strike definition. Population: 53 in 70 (5/16). NGC ID# 26L2, PCGS# 9848

- 4195 1991 Half-Ounce Gold Eagle MS69 NGC.** The 1991 half-ounce Gold Eagle was the final issue in the series with a Roman numeral date. Coins in MS70 are scarce, making the more available MS69 coins appealing to budget-conscious collectors. This piece is sharp and splendidly preserved with mint-fresh luster. NGC ID# 26NC, PCGS# 9852

- 4196 1991 Half-Ounce Gold Eagle MS69 NGC.** The final Roman numeral date half-ounce Gold Eagle had a small mintage of 24,100 pieces. Perfectly preserved coins are scarce. This near-perfect MS69 representative displays a full strike and virtually flawless preservation. Eye appeal is excellent. NGC ID# 26NC, PCGS# 9852

- 4197 1992 Silver Eagle MS70 NGC.** Only a single 1992 Silver Eagle is certified MS70 at PCGS, and NGC lists only a few hundred pieces in this grade for Registry collectors. This NGC coin is fully struck and perfectly preserved with frosty, brilliant luster. NGC ID# 26JG, PCGS# 9856

1993 Quarter-Ounce Gold Eagle, MS70 Registry-Grade Rarity

- 4198 1993 Quarter-Ounce Gold Eagle MS70 NGC.** Fewer than 100 1993 quarter-ounce Gold Eagles are certified in perfect MS70 condition, including 79 at NGC and 12 at PCGS (4/16). This is a Registry Set candidate with sharp design elements and frosty, mint-fresh luster. The 1993 is infrequently seen at auction in this grade. NGC ID# 26M9, PCGS# 9870

**1993 Quarter-Ounce Gold Eagle, MS70
Elusive Issue in Perfect Grade**

- 4199 1993 Quarter-Ounce Gold Eagle MS70 PCGS.** From a mintage of 71,864 pieces, the 1993 quarter-ounce Gold Eagle is conditionally very scarce in the ultimate grade of MS70. This delightful specimen exhibits technically perfect yellow and orange-gold surfaces, with vibrant mint luster and well-detailed design elements throughout. Population: 13 in 70 (5/16). NGC ID# 26M9, PCGS# 9870

**1996 Quarter-Ounce Gold Eagle
Important Registry Coin, MS70**

- 4200 1996 Quarter-Ounce Gold Eagle MS70 PCGS.** A full strike, technically pristine butter-gold surfaces, and unsurpassable eye appeal characterize this quarter-ounce Gold Eagle. A minimal 60,318 coins were struck in 1996. Amazingly, PCGS has seen only 11 submissions that meet the requirements for a flawless MS70 assessment (4/16). NGC ID# 26MC, PCGS# 9904

**1997-W One-Ounce Platinum Eagle, PR70
In-Demand Inaugural Issue**

- 4201 1997-W One-Ounce Platinum Eagle PR70 NGC.** The one-ounce Platinum Eagle was struck for the first time in 1997 and 20,851 proof examples were struck at the West Point Mint, to accompany a larger regular-issue mintage. The obverse design by John Mercanti has been retained on both proof and regular-issue coins ever since, but the proof issues have featured a new reverse every year. This technically perfect example offers fully struck design elements and deeply mirrored fields that contrast profoundly with the richly frosted devices. Housed in a new black NGC holder that accentuates the brilliant surfaces. NGC ID# 293M, PCGS# 9751

- 4202 1998 Quarter-Ounce Gold Eagle MS70 NGC.** The 1998 quarter-ounce Gold Eagle is scarce in an MS70 holder, at either service. This is one of 48 so fine at NGC (5/16). The strike is sharp, and the frosty surfaces yield vibrant luster. NGC ID# 26ME, PCGS# 9933

**1999-W Tenth-Ounce Gold Eagle, MS70
FS-401, Unfinished Proof Dies**

- 4203 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 PCGS.** This is the five dollar counterpart to the quarter-ounce 1999-W Gold Eagle that was struck with an unfinished West Point die pair. As usual, West Point Gold Eagle dies produced proof coinage in 1999, but a small run of regular bullion pieces were inadvertently struck with the W mintmark. This perfectly preserved example is fully struck and lustrous. A popular *Guide Book* variety. Population: 42 in 70 (5/16). NGC ID# 26LB, PCGS# 99940

**1999-W Tenth-Ounce Gold Eagle, MS70
Unfinished Proof Dies *Guide Book* Variety**

- 4204 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 PCGS.** In 1999, the West Point facility inadvertently struck a small number of regular-issue tenth-ounce Gold Eagles using unfinished dies that were intended for proof production. These coins have become a sought-after *Guide Book* variety, especially in the ultimate grade of MS70. This technically perfect example is fully struck in most areas, with just a touch of the always seen softness on the eagle. The lustrous yellow-gold surfaces add to the terrific eye appeal. NGC ID# 26LB, PCGS# 99940

- 4205 Four-Piece 1999-W Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** All four coins are separately encapsulated in matched grade holders. The set includes: \$10 tenth-ounce; \$25 quarter-ounce; \$50 half-ounce; and \$100 one-ounce. A fully struck and immaculate group. Glassy fields provide ultimate contrast with icy motifs. On the tenth-ounce piece, the field is dimpled near the eagle, as struck from a long-in-use die. Perhaps the only U.S. Mint design that features an alligator. (Total: 4 coins)

**2000 Silver Eagle, MS70
West Point Issue**

- 4206 2000 Silver Eagle MS70 NGC.** Although struck without a mintmark, the 2000 Silver Eagle was produced at the West Point Mint. Proofs of this year continued to be produced in Philadelphia and bear the P mintmark. This perfectly preserved regular-issue coin is fully struck and essentially untoned. Seldom seen in this top-tier grade. NGC ID# 26JZ, PCGS# 9949

- 4207 Four-Piece 2000-W Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** Each of the four coins are individually housed in identically graded holders. The set includes: **\$10 tenth-ounce**; **\$25 quarter-ounce**; **\$50 half-ounce**; and **\$100 one-ounce**. A pristine and intricately struck quartet that demonstrates unimprovable white-on-black contrast. (Total: 4 coins)
- 4208 2001 Quarter-Ounce Gold Eagle MS70 PCGS.** This is a conditionally rare Registry coin with mint-fresh luster and flawless preservation. The 2001 quarter-ounce Gold Eagle has an MS70 PCGS population of just 28 coins (5/16). NGC ID# 26MJ, PCGS# 9956
- 4209 2001 Half-Ounce Gold Eagle MS70 PCGS.** The 2001 half-ounce Gold Eagle has a small 42-coin population in MS70 at PCGS (5/16). This piece is fully struck and beautifully flawless with mint-fresh, yellow-gold luster. Eye appeal is unsurpassable. NGC ID# 26SV, PCGS# 9957

**2002 Quarter-Ounce Gold Eagle, MS70
Only a Handful This Nice at PCGS**

- 4210 2002 Quarter-Ounce Gold Eagle MS70 PCGS.** A spectacular MS70 specimen of the 2002 quarter-ounce Gold Eagle, from a mintage of 62,027 pieces. This coin exhibits technically perfect yellow-gold surfaces, with sharply detailed design elements and vibrant mint luster throughout. Eye appeal is extraordinary. PCGS has certified a surprisingly small number of coins in the ultimate grade of MS70. Population: 13 in 70 (5/16). NGC ID# 26SA, PCGS# 9961
- 4211 2002 Half-Ounce Gold Eagle MS70 PCGS.** Gorgeous peach-gold surfaces are perfectly preserved without a single blemish. Fully struck with luminous mint luster. A rare offering in a PCGS holder to be sure. Population: 28 in 70 (5/16). NGC ID# 26NN, PCGS# 9962
- 4212 2002 Half-Ounce Gold Eagle MS70 PCGS.** PCGS has certified only 28 2002 half-ounce Gold Eagles in perfect MS70 condition (5/16). This example is flawlessly struck and preserved, showing mint-fresh yellow-gold luster and excellent eye appeal. NGC ID# 26NN, PCGS# 9962
- 4213 Four-Piece 2002-W Gold Eagle Proof Set PR70 Ultra Cameo NGC.** The four coins are separately housed in identically graded holders. The set includes: **\$5 tenth-ounce**; **\$10 quarter-ounce**; **\$25 half-ounce**; and **\$50 one-ounce**. All examples are fully struck and flawless with mirrored fields and luminous devices. The quarter-ounce coin displays rich peripheral lemon-gold toning. (Total: 4 coins)
- 4214 Four-Piece 2005 Platinum Eagle Set MS70 NGC.** Each coin is individually certified in a holder bearing the ultimate obtainable grade. The lot includes a **tenth-ounce \$10**, **quarter-ounce \$25**, **half-ounce \$50**, and **one-ounce \$100**. All four coins are intricately struck, and are flawless aside from a few pinpoint flan imperfections on the quarter-ounce eagle. (Total: 4 coins)
- 4215 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC.** This 2006-W one-ounce Gold Eagle commemorates the 20th anniversary of the modern gold bullion coinage. This technically perfect specimen represents the innovative reverse proof format, with deeply reflective, fully detailed design elements and impeccably preserved frosty fields. NGC ID# 28ZH, PCGS# 89994

- 4216 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC.** The brilliant and glossy raised devices radiate shining gold luster while the matte-finish fields provide a dramatic backdrop that is both precise and pristine. A magnificent, perfectly preserved example of this popular 20th Anniversary reverse proof 2006-W one-ounce Gold Eagle. Flawless in design and execution. NGC ID# 28ZH, PCGS# 89994
- 4217 Four-Piece 2006 Platinum Eagle Set MS70 NGC.** The coins are separately housed in identically and ideally graded holders. The lot includes a **tenth-ounce \$10**, **quarter-ounce \$25**, **half-ounce \$50**, and **one-ounce \$100**. All coins are immaculate and unimprovable. The half-ounce coin displays faint parallel die lines on the field beneath AMERICA. (Total: 4 coins)
- 4218 Four-Piece 2007-W Platinum Eagle Set MS70 NGC.** All four coins are individually housed in Early Releases holders. No Mint packaging accompanies the lot, which includes a **tenth-ounce \$10**, **quarter-ounce \$25**, **half-ounce \$50**, and **one-ounce \$100**. All coins are fully struck and devoid of any imperfections. (Total: 4 coins)
- 4219 2008-W Half-Ounce Gold Buffalo, First Strike NGC.** Faultless surfaces are fully struck and impeccably preserved. The popular American classic Buffalo design is portrayed to full advantage on this First Strike half-ounce gold bullion piece with exquisite mattelike luster. NGC ID# 26RJ, PCGS# 399931

- 4220 Four-Piece 2008-W Gold Buffalo Set PR70 Deep Cameo PCGS.** The matched grade set includes the 2008-W **tenth-ounce \$5**, **quarter-ounce \$10**, **half-ounce \$25**, and **one-ounce \$50**. The coins are separately housed in First Strike holders. All four pieces are fully struck and pristine with luminous motifs and reflective textured fields. Included with the lot is the presentation box of issue, and a certificate of authenticity. (Total: 4 coins)
- 4221 Four-Piece 2008-W Gold Buffalo Set PR70 Deep Cameo ANACS.** The lot includes the **tenth-ounce \$5**, **quarter-ounce \$10**, **half-ounce \$25**, and **one-ounce \$50**. All examples are fully impressed and immaculate. Frosty motifs contrast with bright, layered fields. The coins are housed in separate First Strike ANACS holders, each designated as #004 of 399. A cherry-wood presentation box accompanies the lot. (Total: 4 coins)

**2008-W One-Ounce Gold Buffalo
Superb PR70 Deep Cameo**

- 4222 2008-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** The 2008-W proof one-ounce American Buffalo is a popular issue due to its low mintage of 18,863 pieces. This delightful PR70 specimen offers razor-sharp definition on all design elements and the deeply reflective textured fields contrast profoundly with the richly frosted devices to create a stunning cameo effect. Eye appeal is tremendous. NGC ID# 26RH, PCGS# 393329

**2008-W One-Ounce Gold Buffalo
Pristine PR70 Ultra Cameo**

- 4223 2008-W One-Ounce Gold Buffalo, Fraser Signature, PR70 Ultra Cameo NGC.** The 2008-W Gold Buffalo fifty dollar pieces were produced in two special formats at the West Point facility, burnished and proof, to accompany a substantial regular-issue mintage. The proof mintage was a meager 18,863 pieces and the issue is in great demand, especially in the ultimate grade. This magnificent PR70 specimen offers fully struck design elements and deeply reflective textured fields that contrast profoundly with the frosty devices. Impeccably preserved surfaces add to the enormous eye appeal. PCGS# 91012 Base PCGS# 393329

- 4224 2008-W Half-Ounce Platinum, First Strike, Burnished, MS70 PCGS.** The burnished 2008-W half-ounce Platinum Eagle had a small mintage of 2,253 coins. Of those, only 51 First Strike examples have been certified in perfect MS70 condition at PCGS (5/16). This coin is fully struck and displays luminous platinum-silver luster. A flawless coin. NGC ID# BNKZ, PCGS# 393083 Base PCGS# 393082

- 4225 2009 One-Ounce Gold Ultra High Relief Twenty Dollar.** The acclaimed Saint-Gaudens Ultra High Relief design appears in small format on this coin, much as it was featured on the original reduced diameter, double thickness patterns (Judd-1917) that now reside at the Smithsonian. This delightful example is housed in the original government-issue box with certificate of authenticity. It is accompanied by the separately mailed booklet, still in original shrinkwrap.
From The Eagle One Collection. NGC ID# 26S4, PCGS# 407404

**2009 Gold One-Ounce Ultra High Relief Twenty
First Strike MS70**

- 4226 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, Moy Signature, MS70 PCGS.** A perfect MS70 First Strike coin in a special Edmund C. Moy signature holder. This flawlessly rendered 2009 one-ounce Ultra High Relief gold twenty dollar piece yields stellar eye appeal and satiny luster. This issue was struck in 24-karat gold and gives modern-day collectors an opportunity to acquire an Ultra High Relief rendering of Saint-Gaudens' famous double eagle design. NGC ID# 2TY2, PCGS# 407405

**2009 One-Ounce Gold Ultra High Relief Twenty
MS69 Deep Prooflike**

- 4227 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, MS69 Deep Prooflike NGC.** A virtually flawless, highly reflective yellow-gold example of this famous modern issue, showing a full strike and exhibiting strong eye appeal. The 2009 Ultra High Relief twenty dollar gold piece is struck on a small-diameter planchet that is 4 mm thick, having been modeled after the 1907 Judd-1917 patterns, which were of these dimensions. This is the only way most modern collectors are capable of acquiring Saint-Gaudens' double eagle design in ultra high relief. NGC ID# 26S4, PCGS# 506602

**2009 One-Ounce Gold Ultra High Relief Twenty
MS70 Prooflike**

- 4228 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** A technically perfect example of Augustus Saint-Gaudens iconic double eagle design, this issue was struck on a 27 mm planchet, with twice the thickness of a standard one-ounce American Gold Eagle, reminiscent of the extremely rare gold patterns, Judd-1917, in the Smithsonian Institution. The design elements are fully struck and the impeccably preserved surfaces display bright prooflike reflectivity throughout. Housed in a Director's Medal of Excellence holder from NGC. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief Twenty
MS70 Prooflike**

- 4229 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, MS70 Prooflike PCGS.** Fully struck and reflective, this Prooflike 2009 Ultra High Relief gold twenty dollar gives the budget-conscious collector an opportunity to own a gold coin with Saint-Gaudens famous 1907 double eagle pattern design. The preservation is flawless, and the eye appeal is proportionately high. NGC ID# 26S4, PCGS# 506602

COINS OF HAWAII

1883 Hawaii Ten Cents, MS65 Heavily Melted Condition Rarity

- 4230 1883 Hawaii Ten Cents MS65 PCGS.** The San Francisco Mint struck 250,000 ten cent pieces for the Kingdom of Hawaii in 1883. Many coins were melted after Hawaii officially became a U.S. territory in 1900. Gems like the one here-offered are exceedingly rare. Mottled violet, blue, and olive tones grace each side, though the reverse maintains significant brilliance. Frosty luster emanates from the underlying surfaces. The Charles Barber design is well brought-up. Population: 22 in 65, 15 finer (4/16). NGC ID# 2C54, PCGS# 10979

- 4231 1883 Hawaii Quarter MS66 PCGS. CAC.** A radiantly lustrous Premium Gem example of the 1883 Hawaii quarter dollar, struck at the San Francisco Mint for the island nation. The strike is sharp, and each side displays champagne-gray, olive, and lavender toning. The first 8 in the date is recut. PCGS lists 18 numerically finer representatives (5/16). NGC ID# 2C5B, PCGS# 10987

- 4232 1883 Hawaii Quarter MS66+ PCGS.** Beautifully preserved with nearly Superb Gem quality, this high-end Premium Gem 1883 Hawaii quarter displays satiny luster and a blush of champagne toning. The 1883 Hawaii quarter had a mintage of 500,000 coins, but many were recalled and destroyed after Hawaii became an official U.S. Territory in 1900. PCGS lists 18 finer examples (5/16). NGC ID# 2C5B, PCGS# 10987

- 4233 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, Thick Planchet, AU50 PCGS. M. 2TE-8.** Two stars are seen on the denomination side, and six are located (3 and 3) on the dated side. These tokens were struck by Thomas Hobron, who built a railroad on Maui that connected sugar plantations with the coast. The surfaces are problem-free and even chocolate-brown. The design elements are more evenly brought up than often seen. Listed on page 421 of the 2017 *Guide Book*. PCGS# 515876 Base PCGS# 600515

CERTIFIED MODERN PROOF SET

- 4234 1937 Proof Set PR65 to PR66 NGC.** Individually housed in holders with consecutive certification IDs. The set includes: **cent PR65 Red**, moderate obverse carbon, a small spot below the 7 in the date; **nickel PR66**, light cream-gray toning, a good strike; **dime PR66**, hints of ice-blue and almond-gold patina, intricately impressed; **quarter PR65**, flawless, traces of lilac and gold toning; and a **half dollar PR66**, well struck, light wheat-gold toning. (Total: 5 coins)

HOBO NICKELS

- 4235 12-Piece Lot of Hobo Nickels.** This uncertified lot includes 12 hobo nickels. In our opinion, these nickels are done by a modern carver (or carvers) to imitate the style and designs of known classic carvers. Potential bidders are encouraged to view the online photos for this lot. Total 12 pieces. (Total: 12 coins)

ERRORS

1920 Nickel, Struck on a Cent Planchet, MS61 Brown

- 4236 1920 Buffalo Nickel — Struck on a Cent Planchet — MS61 Brown NGC.** 3.1 grams. Wrong-metal errors are always of interest to error collectors. It is always surprising to see a nickel or other denomination with the Brown surfaces of a bronze coin. This example was caught soon after release. The surfaces are light, even brown with a hair-thin trace of red around the devices. Sharply defined.

- 4237 1921 Standing Liberty Quarter — Obverse Struck Through — AU58 NGC.** Mint errors in the Standing Liberty quarter series are scarce and highly sought-after. This nearly Full Head, barely circulated 1921 shows a diagonal depression in the right (facing) obverse wall, struck through some sort of debris on the die face. The surfaces are satiny and bright. A pleasing entry-level Mint error coin for this series.

1977-D Half Dollar, AU55 Struck on a 40% Silver Planchet

- 4238 1977-D Kennedy Half — Struck on a 40% Silver Planchet — AU55 NGC.** 11.4 grams. This piece certainly has the sheen of a silver coin. The surfaces are bright and untuned, showing just a trace of friction over each side. One has to wonder just how this piece was struck. 40% silver planchets were only used on half dollars struck in San Francisco, yet here is a silver planchet used on a Denver coin.

- 4239 1908 Motto Indian Eagle — Laminated Planchet Obverse — MS64 PCGS.** Gold errors are quite rare and elusive, and gold errors in such high grade are even more challenging. This eagle error shows a prominent, elongated planchet lamination that runs from the obverse rim just above 9 o'clock through the Indian's eye, that was clearly present before striking. Elsewhere the surfaces show beautiful sun-gold patina with bold luster, and a notable absence of impairments. An interesting coin for the gold error specialists. Ex: *Central States Signature (Heritage, 4/2007)*, lot 3882.

End of Session Two

SESSION THREE

COLONIALS

1652 Oak Tree Shilling, XF40
Elusive ANDO Variety, Noe-2, W-440

- 4250** 1652 Oak Tree Shilling, ANDO, XF40 NGC. Noe-2, W-440, Salmon 1-B, R.7. 71.4 grains. Produced on a rocker press, the strike is generally sharp on this pleasing Oak Tree shilling, and the entire tree is well defined. The lustrous pearl-gray surfaces show only minor abrasions, the worst being a diagonal scratch at I in IN. The legends are mostly legible on this well-centered specimen, except for portions of HV on the obverse and E in ENGLAND on the reverse. A few areas of slight granularity are evident on both sides. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2ARN, PCGS# 20

1652 Pine Tree Threepence, AU50
Noe-36, No Pellets at Trunk

- 4251** 1652 Pine Tree Threepence, No Pellets at Trunk, AU50 PCGS. Noe-36, W-640, Salmon 2-B, R.4. The usual early die state, before the obverse was slightly reengraved. This piece displays pleasing steel-gray patina with minimal wear and abrasions. The strike is uneven, leaving the upper obverse poorly defined while sharply rendering the pine tree and lower legend. The reverse is well-struck throughout. Listed on page 41 of the 2017 *Guide Book*. NGC ID# CFSF, PCGS# 45366

1788 Massachusetts Cent, MS64 Brown
Ryder 12-M, Ex: Ryder, Ford
High Condition Census

- 4252** 1788 Massachusetts Cent, Period, MS64 Brown PCGS. Ryder 12-M, W-6350, Low R.4. Ryder 12-M is scarce in all grades and decidedly rare above the XF grade level. This Choice Mint State example is one of the finest known, with glossy auburn-brown surfaces that yield remnants of reddish luster in the protected areas. The centers are a bit soft, not unusual for the issue, though CENT remains clear. A planchet crack (as made) extends on the obverse from the rim above the E in WEALTH to the butt of the arrow, and on the reverse from the rim near the final S to the tip of the lowest arrow. This obverse is the same die as Ryder's obverse 6 of the 1787 coinage, seen here in one of its five additional uses in 1788. This is one of six uses for the reverse die. Ex: Judson P. Brenner Collection (U.S. Coin Company, 6/1916), lot 204; Hillyer Ryder; F.C.C. Boyd; John J. Ford, Jr. Collection (Stack's, 10/2004), lot 148; Jon Hanson; Donald Groves Partrick. NGC ID# 2WNJ, PCGS# 311

1787 Nova Eborac Copper, AU55
Large Head, W-5750

- 4253** 1787 Nova Eborac Copper, Large Head, AU55 NGC. CAC. Breen-985, W-5750, R.6. Ex: Earle / Partrick Collection. At one time, this piece was considered the second finest known, although it was called the third or fourth finest known in the 1968 New Netherlands catalog, where the catalogers wrote:

"Whatever its Condition Census rating, this piece appears to be sharper than the Crosby Plate coin, and may even be better than the Earle-Clarke specimen, lot 778 in our 48th auction, Nov. 24, 1956."

This exceptional example exhibits lovely olive-brown surfaces with maroon patina on the reverse. The strike is a trifle off-center with the wide borders at the upper obverse and lower reverse, and with other peripheral details tight against the edge of the planchet. Ex: Dr. Angus C. Black (New Netherlands, 60th Sale, 12/1968), lot 418; Donald Groves Partrick; (Heritage, 1/2015), lot 5664. NGC ID# 2B4C, PCGS# 484

**1787 Vermont Copper, MS63 Brown
RR-13, Britannia Reverse
Tied for Finest Known**

- 4254** 1787 Vermont Copper, BRITANNIA, MS63 Brown NGC. CAC. RR-13, Bressett 17-V, W-2255, R.1. Early Die State. Abundant mint luster glows from the glossy, chocolate-brown coloration, where hints of faded mint color remain. The obverse is bold from edge-to-edge and well centered. Slight planchet roughness is noted under magnification, but the overall surfaces are pleasing and remarkable for the issue. The reverse is characteristically weak on BRITANNIA and at the date. Even so, this example is far sharper than normally seen. The variety is excessively rare in Select Uncirculated condition. Tied with one other example as the finest-known RR-13 Vermont copper. Ex: Phillip Bennedetti (9/1966); Donald Groves Partrick (Heritage, 1/2015), lot 5765. NGC ID# 2B5C, PCGS# 554

**1787 Fugio Cent, MS64 Brown
UNITED STATES, Cinquefoils
Newman 8-B**

- 4255** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS64 Brown PCGS. N. 8-B, W-6740, R.3. A well struck medium brown near-Gem that retains glimpses of brick-red in protected areas of the obverse. Nearly unabraded, and the two minor flan striations are relegated to the obverse border. Likely from the Bank of New York holdings. The usual die state with prominent clash marks on the reverse. The reverse is misaligned several degrees toward 10:30. Listed on page 89 of the 2017 *Guide Book*. NGC ID# 2B8F, PCGS# 889

HALF CENTS

**1795 Liberty Cap Half Cent, MS61 Brown
Plain Edge, C-4, B-4 Variety**

- 4256** 1795 Plain Edge, Punctuated Date, C-4, B-4, R.3, MS61 Brown NGC. Manley Die State 2.0. The most frequently seen die state, with characteristic buckling in the right obverse field and the die crack through the first T in STATES on the reverse. The central design elements are softly defined and HALF CENT is very faint, as often seen on this issue. The punctuated date and the position of the lowest leaves at N and C on the reverse identify the C-4 variety. The C-4 is very rare in Mint State condition. This pleasing olive-brown representative is well-preserved, with some granularity on the central reverse. Our EAC grade AU50. Census (for the variety): 1 in 61 Brown, 0 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2225, PCGS# 35080 Base PCGS# 1012

1795 No Pole Half Cent, MS63 Brown
Plain Edge, Thin Planchet, C-5a

- 4257** 1795 Plain Edge, No Pole, Thin Planchet, C-5a, B-5a, R.3, MS63 Brown NGC. All examples of C-5 exhibit diagonal cracks on the upper reverse, but the present piece is a relatively early striking, with minimal evidence of buckling near the F in HALF. The wheat-gold surfaces are unperturbed aside from a small planchet flaw on the obverse field near 3 o'clock. The strike is sharp except on the dentils. Slightly off-center toward 2:30, although only dentil width is affected. Among the finest C-5a half cents. C-5 and C-6 share the same obverse die as C-1, but in a latter, lapped state with the pole effaced except for a short stem within the fold of the cap. Our EAC grade AU55.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2225, PCGS# 35083 Base PCGS# 1018

1796 Liberty Cap Half Cent, VG8
With Pole, C-2, B-2

- 4258** 1796 With Pole, C-2, B-2, High R.4, VG8 PCGS. The year 1796 is the key date in the Liberty Cap half cent series. Only 1,390 half cents were struck that year, split between two important *Guide Book* varieties, the No Pole and With Pole motifs. This coin represents the somewhat more available With Pole variety that shows the pole running parallel to Liberty's bustline in the lower right obverse field. Probably no more than 100-120 examples of the With Pole variety survive today in all grades. This pleasing VG8 specimen is well-worn, but a few interior details remain intact on Liberty's hair and the reverse legend is completely legible. Some slight granularity is evident on the chocolate-brown surfaces, making the letters in HALF CENT faint. Our EAC grade Good 5. NGC ID# 2227, PCGS# 35098 Base PCGS# 1027

1802/0 Half Cent, C-2, B-2, Fine 15
Second Reverse *Guide Book Variety*

- 4259** 1802/0 Reverse of 1802, C-2, B-2, R.3, Fine 15 NGC. Manley Die State IV. A shortage of planchets prevented the Mint from striking half cents from 1800-1802, when the leftover dies were overdated and used to strike a small total of 20,266 pieces. The C-2 variety was struck on planchets made from spoiled cents and the wreath on the reverse is similar to the device on the cents of 1796-1807. This pleasing Fine specimen shows the shoulder drapery and the hair over the brow worn nearly smooth, but some interior detail remains on the bust. The chocolate-brown surfaces show some evidence of granularity, but no large or distracting abrasions are present. Our EAC grade VG7. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

1804 Half Cent, MS64 Red and Brown
Plain 4, No Stems, C-13

- 4260** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS64 Red and Brown PCGS. CAC. Manley Die State 2.0 with indistinct dentils on the obverse and upper reverse. Although Cohen lists 13 varieties, C-13 is promptly attributed by its Plain 4 and absent stems. This boldly struck near-Gem retains ample brick-red, although the portrait and fields are gunmetal-gray. Refreshingly free from abrasions. Our EAC grade MS63. PCGS# 35177 Base PCGS# 1064

1806 Half Cent, MS63 Red and Brown
C-4, Large 6, Stems Reverse

- 4261** 1806 Large 6, Stems, C-4, B-4, R.1, MS63 Red and Brown NGC. CAC. Manley Die State I, showing repunching on the 6 in the date. This Select Red and Brown C-4 half cent is boldly struck, although minutely off-centered toward 12 o'clock, where the rim is nearly too thin to discern. Medium brown toning accounts for the Red and Brown designation, although significant Mint red around the relief elements delivers pleasing eye appeal. The reverse is rotated approximately 45 degrees counterclockwise, as is typical of this die marriage. Our EAC grade MS63.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 222J, PCGS# 35201 Base PCGS# 1100

PROOF BRAIDED HAIR HALF CENTS

1846 B-1 Original Half Cent, PR63 Brown
Curious Date Punching

- 4262** 1846 Original B-1, R.6 PR63 Brown PCGS. 84.9 grains. Large Berries reverse. This delightful Original proof half cent displays colorful iridescent toning intermingled with the medium-brown surfaces. Fully mirrored fields surround a sharp strike on the motifs. The 1846 half cents are known for the curious numerals in the date, which are unlike any other half cent issue and a motley assortment of a sloped serif 1, an ungainly fancy 8, a plain 4, and an overlarge 6. Our EAC grade PR60. NGC ID# 26ZE, PCGS# 1284

1855 C-1 Half Cent, PR63 Brown

- 4263** 1855 PR63 Brown PCGS. C-1, B-1, R.5 as a Proof. Ex: Davy Collection. Sharp definition on the tan devices contrast with the reflective mahogany-brown fields on this Select proof, with traces of faded red peering through the toning. The rims are full, wide, and square without any distractions. An obverse lintmark at star 4 is minor, as is a planchet chip beneath the 1 in the date, serving to hallmark this attractive proof. Our EAC grade PR60. PCGS# 35417

LARGE CENTS

1793 Chain Cent, VF25
S-1, AMERI.

- 4264** 1793 Chain, AMERI., S-1, B-1, R.4, VF25 PCGS. Sheldon-1 and its abbreviated AMERI. reverse legend is a distinctive *Guide Book* variety within the coveted Chain cent type. A popular mintage estimate for this variety is 6,350 pieces, most of which has been lost to attrition. Surviving examples are often heavily worn and environmentally impaired, with relatively few pieces known in XF and finer condition. The present coin is a well-detailed VF coin with a notably strong reverse and clear obverse legends. The surfaces are deep burgundy-brown with scattered small ticks and marks. No corrosion or obvious granularity is seen, although a few small bumps are detected around the obverse rim. Finding a visually pleasing S-1 coin in the VF and lower grades is challenging, with the present piece among the finer examples recently seen at auction. Our EAC grade Fine 12. NGC ID# 223G, PCGS# 35432 Base PCGS# 1340

1793 Wreath Cent, XF45
Vine and Bars Edge, S-5, B-6

- 4265** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4, XF45 NGC. Breen Die State II. The large date and LIBERTY and the small heavy bow on the wreath identify the S-5 variety. The S-5 was probably the first Wreath cent variety struck, as the letters in LIBERTY are quite large, similar to the earlier Chain cents, and not like any other Wreath variety. This impressive Choice XF specimen exhibits pleasing olive-brown surfaces, with a few scattered minor contact marks and a number of small planchet flaws in the right obverse field. This piece is well-centered and only light wear shows on the well-detailed design elements. The overall presentation is most attractive. Our EAC grade VF30. Census (for the variety): 1 in 45, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 223H, PCGS# 35447 Base PCGS# 1347

1793 Wreath Cent, Vine and Bars Edge, AU58
S-6, B-7, 'Sprung Die' Variety

4266 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3, AU58 NGC. Breen Die State II. All examples of the S-6, B-7 variety show a slanting bulge from the rim into the obverse field at 9 o'clock. On this coin the bulge is faint and extends just past the hair. On later die states it continues to Liberty's jaw, and eventually bisects the coin, with die cracks forming along the same line. Sylvester Sage Crosby called this the "Warped or Sprung die" variety, and the name has been recognized by collectors until the present day.

This pleasing near-Mint specimen offers smooth olive-brown surfaces, with a few digs and tiny planchet flaws around Liberty's eye the only marks of note. A rim bruise at 4 o'clock on the obverse is largely covered by the holder prong. The design elements are well-detailed and lightly worn and the overall presentation is most attractive. Our EAC grade VF35. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

1793 S-9, B-12 Wreath Cent, VF25
Vine and Bars Edge, Early Die State

4267 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, VF25 PCGS. The horizontal leaf sprig above the date and the large, kidney-shaped bow on the reverse confirm the popular Sheldon-9 variety, always a favorite selection for the one-year Wreath cent type. The S-9 is by far the most-available 1793 variety, with a probable survival of slightly less than 3,000 pieces in all grades. Of these, perhaps as many as one-third are of the S-9 variety, an excellent choice for type collectors. Many survivors show significant problems and varying disturbances, making this relatively unhindered example of special interest to specialists.

Pleasing medium-brown surfaces display faint blue overtones. Both sides show light granularity with porosity on the obverse, yet the raised motifs are well-defined for the grade with some gloss. The date is complete with minor loss of detail at the bottom of 93. A small rim disturbance is noted near the U of UNITED and another at 9 o'clock on the obverse. Struck from an early die state with no clash marks or die cracks discerned. The eye appeal is considerable. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1793 S-13, B-20 Liberty Cap Cent, VG10
Ideal Example of the Type

- 4268** 1793 Liberty Cap, S-13, B-20, Low R.4, VG10 PCGS. The Liberty Cap motif is the scarcest among the three major types of 1793 Cents. The Sheldon-13 is an obtainable example of the elusive type, identified by two beads over the I of LIBERTY on the obverse and a parallel leaf under ME of AMERICA, pointing to the adjacent A. The letters of LIBERTY are close to the border, while a triple leaf cluster sits under the O in OF.

Except for the EN in CENT, the legends are readily legible. Minor planchet streaks are noted through the E in STATES and the R in AMERICA, and although free from relevant abrasions, the surfaces show the moderate granularity that is typical of circulated early copper — especially beneath the cap in the left obverse field and at the wreath center and right edge on the reverse. The portrait is relatively smooth and attractive. The deep chocolate-brown color is consistent over both sides. Overall, this is a perfectly acceptable representative of the scarce Liberty Cap type — one that is within reach of most collectors. Our EAC grade Good 6. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

1814 S-295, B-2 Plain 4 Cent, AU55
Intermediate Die State

- 4269** 1814 Plain 4, S-295, B-2, R.1, AU55 PCGS. CAC. An intermediate die state with an arcing die crack at the lower right obverse. Two distinctive varieties are known for the 1814 cents, the last of their kind. The copper supply was exhausted and the embargos of the War of 1812 delayed a new planchet supply from England. This Choice AU cent has frosty luster with chestnut and chocolate-brown surfaces. Our EAC grade AU50. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

1839 Booby Head Cent, MS64 Red and Brown
N-14, Lustrous and Sharp

- 4270** 1839 N-14, R.3 Booby Head MS64 Red and Brown PCGS. Patchy areas of orange luster visit the reddish-brown surfaces of this Choice Booby Head cent. Lacking an outer berry under TED of UNITED and without a line beneath CENT, the N-14 is the sole Booby Head with a center dot on the reverse between ONE and CENT. A glossy and appealing example with high rims and a sharp strike, the present near-Gem is struck from a late die state with a bold die crack along the tops of STATES OF A, with minor microgranularity visible on both sides with a lens. Our EAC grade MS62. PCGS# 37256 Base PCGS# 1752

1844 N-3 Cent, MS65 Brown
Among the Finest Certified

- 4271** 1844 N-3, R.2, MS65 Brown PCGS. Grellman Die State b. Repunching on the 1 and 8 of the date is strong, with additional repunching on the bottom of the crossbar of the first 4. Numerous die cracks through the legend on the reverse. Considerable orange luster surrounds the stars and date on the obverse, while traces of mint color remain at the reverse margin. Elsewhere, glossy chocolate-brown toning covers the high points of the raised elements and the smooth fields. A faint depression near star 1 and a few tiny nicks on the neck are the sole marks to report on this attractive, sharply struck Gem cent — finest so-graded at PCGS for the variety and one of only two Gem coins at PCGS for the date. Our EAC grade MS62. Population: 2 in 65 Brown, 0 finer (4/16). PCGS# 397725 Base PCGS# 1856

1855 Upright 5s N-4 Cent
Radiant MS66 Red

- 4272 1855 Upright 5s, N-4, R.1, MS66 Red PCGS. Grellman Die State a. Cherry-red and salmon-pink shades dominate this lustrous and nearly unabraded Gem. Minor carbon, including a spot beneath the E in STATES, is all that limits the grade. A few of the upper stars are soft, but the major devices are boldly brought up. The N-4 variety is quickly confirmed by a series of diagnostic lumps near the jawline and at other locations on the portrait. Our EAC grade MS64. PCGS# 406155 Base PCGS# 1909

FLYING EAGLE CENT

1858/7 Flying Eagle Cent, MS63
Large Letters, Snow-1 Overdate

- 4273 1858/7 Large Letters, Snow-1, FS-301, MS63 PCGS. High Leaves, Closed E. This immensely popular overdate variety shows the flag of an underlying 7 at the upper-right corner of the second 8 in the date, and a small triangular dot in the field above the first 8 confirms the attribution. This is a sharp Select example with satiny tan-gold luster and minimal, light abrasions. The Flying Eagle cent specialist should give this piece close consideration. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Proof
Collectible Snow-9 Variety

- 4274 1856 Snow-9 — Reverse Rim Filed — NGC Details. Proof. Rick Snow estimates that Snow-9 was struck during a period from late 1857 to 1860. This is the most frequently encountered 1856 Flying Eagle cent variety, although high demand for the issue fuels strong value. Some examples of this die pairing found their way into circulation, lowering the availability of unworn pieces. The present example never circulated, but faint file marks along the left reverse rim prevent NGC from assigning a numeric grade. The strike is full, and each side shows characteristically satin luster with medium bronze-gold coloration. Few noticeable marks are present in the fields.

From The Rev. Dr. James G. K. McClure Collection.

1856 Flying Eagle Cent, PR62
Fully Struck, Snow-9 Variety

- 4275** 1856 Snow-9 PR62 NGC. The 1856 is the first and rarest date of the small cent denomination. Its fame spread rapidly, and by the late 1850s, it seemed that every numismatist in America wanted at least one example. The U.S. Mint helped meet that burgeoning demand by coining restrikes of the 1856 Flying Eagle cent from Snow-9 proof dies. This fully struck specimen has tan-gold toning with occasional streaks of deeper gray. The surfaces are outstanding from the technical perspective, although minor laminations are noted near the U in UNITED and the eagle's upper wingtip. *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037*

1856 Flying Eagle Cent, PR63
Snow-9, Reverse Struck Through

- 4276** 1856 Snow-9 — Reverse Struck Through — PR63 NGC. A fully struck specimen of this rare and introductory small cent date. The flashy fields are primarily peach-gold though glimpses of lime-green and rose-red are also present. The upper right obverse and the field above the T in CENT display a few tiny lint marks, as made, and a minor retained lamination is west of the O in ONE. A small but interesting and textured strike-through (as coined) is nearly at the reverse center between the CE in CENT. A beautiful representative of this important issue. The Snow-9 proofs were unofficially produced by the Mint in the late 1850s to take advantage of growing collector demand for the famous variety. *Ex: Long Beach Signature (Heritage, 9/2013), lot 6229, which realized \$11,162.50.*

**1856 Flying Eagle Cent, PR64
Snow-9, Proof Striking**

4277 1856 Snow-9 PR64 PCGS Secure. CAC. A short, almost invisible, die line from the top right serif of the I in UNITED to the rim, and a small center dot attached to the underside of the left serif of N in CENT identifies the popular Snow-9 variety. The 1856 Flying Eagle cent was originally produced to demonstrate the proposed size and design for the new small size cents that made their debut as circulating coinage in 1857. Collector demand resulted in the production of restrikes in following years. Rick Snow believes the Snow-9 variety was struck in the late 1850s. Snow-9 is the most available proof variety of the date.

The present coin is an attractive Choice example, with well-detailed design elements and slightly reflective fields that show only minor signs of contact. Hints of original red show through shades of crimson and light brown patina and eye appeal is quite strong. PCGS has graded 50 numerically finer examples (5/16). NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENTS

**1873 Doubled LIBERTY Cent, AU58
FS-101, Important Guide Book Variety**

4278 1873 Doubled LIBERTY, Snow-1, FS-101, AU58 NGC. A sharp and pleasing walnut-brown example of the Snow-1 Doubled LIBERTY cent, with traces of orange at the margin and throughout the reverse. Blue overtones grace the high points of the design. LIBERTY is dramatically doubled, as well as the eye and profile. Only the 1888/7 variety is equally sought by Indian Head cent collectors. This near-Mint example fits well in either a high-end circulated set or in a fine collection of Uncirculated cents. Census: 7 in 58, 23 finer (4/16). NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

**1892 Cent, MS66+ Red
Only One Coin Certified Finer**

4279 1892 MS66+ Red PCGS. CAC. This sharp, high-end Premium Gem 1892 Indian cent displays satiny amber-red luster without any obvious carbon specks or abrasions. Liberty's cheek appears pristine, and a full Superb Gem designation might have been achieved were the luster a little more vibrant. Population: 24 in 66 (1 in 66+) Red, 1 finer. CAC: 3 in 66, 0 finer (4/16). NGC ID# 228L, PCGS# 2183

**1908 Indian Cent, MS66+ Red
Fresh Red Mint Luster**

4280 1908 MS66+ Red PCGS. CAC. If a CAC-designated Registry coin is desired, this Premium Gem Red 1908 Indian cent is the finest available — CAC has endorsed 16 pieces in this grade and none finer. The well-struck design elements are set aglow by vibrant coppery-orange luster and unabraded surfaces. A few microscopic specks are restricted to unobtrusive locations. NGC ID# 2295, PCGS# 2231

1908-S Cent, Coruscating MS66 Red
First Cent Branch-Mint Issue

- 4281 1908-S MS66 Red PCGS.** A small mintage of 1.1 million coins explains this branch mint issue's status as a semikey in the Indian Head cent series. Red Premium Gems are deceptively rare, and only a single MS67 is reported at the two leading certification services combined. This tan-gold example has coruscating frost that heightens its appeal. The design elements show strong strike definition. Carbon spots appear on the shield and the E in ONE, while two small ticks near the tip of the bust are undoubtedly the sole barriers to an even loftier grade. Population: 48 in 66 (1 in 66+) Red, 1 finer (4/16). NGC ID# 2296, PCGS# 2234

PROOF INDIAN CENTS

1864 Copper-Nickel Cent, PR66 Cameo
Impeccable Quality

- 4282 1864 Copper Nickel PR66 Cameo PCGS.** Whispers of soft lilac and ice-blue gather on the strongly cameoed yellow-gold surfaces of this Premium Gem proof. An exacting strike imparts strong definition to the frosty design elements, further enhancing the coin's overall appeal. Both sides are impeccably preserved. Population: 7 in 66 Cameo, 1 finer (4/16).
Ex: *Central States Signature* (Heritage, 4-5/2009), lot 1179. NGC ID# 229E, PCGS# 82265

1868 Cent, PR66 Red
Rarely Seen This Fine
Modest Field-Motif Contrast

- 4283 1868 PR66 Red NGC.** This rose-gold and copper-red Premium Gem proof is modestly contrasted and only a whisker shy of a Cameo designation. Nonetheless, it is rare in PR66 Red and tied for the finest certified in this color category. NGC lists three coins in this grade, PCGS only one (4/16). Proof Indian cent coinage in 1868 amounted to 600 coins that were issued within silver proof sets plus an unknown additional number of pieces sold individually and in minor proof sets. Until 1878, proof mintages were recorded by tallying the number of silver sets sold. Proof copper and nickel coins that were sold apart from the silver sets were left off of official records. The *Guide Book* estimates 750-1,000 proof cents were struck in 1868. Although toned coins are seen with regularity, full Red examples are rare. This Premium Gem Red coin displays sharp design elements and lovely, carbon-free mirroring. NGC ID# 229L, PCGS# 2293

1877 Cent, PR64 Red
In a Green Label Holder

- 4284 1877 PR64 Red PCGS.** It is curious that such a popular issue as the 1877 cent does not have an exact mintage figure known for proofs. Nevertheless, whatever the mintage figure is, it is insufficient for the demand placed on this key date. This piece is struck from the more frequently seen reverse die with the bulged right pendant on the T in CENT. The surfaces retain most of the original, bright orange-red color with faint streakiness. A few tiny carbon spots are scattered over each side and account for the less-than-Gem grade. Ex: *ANA Signature (Heritage, 3/2008)*, lot 200. NGC ID# 229W, PCGS# 2320

1902 Indian Cent, PR67 Red Cameo
Tied for Finest Certified

- 4285 1902 PR67 Red Cameo PCGS. CAC.** A nominal mintage of 2,018 proof Indian cents was accomplished in 1902 and this coin is one of the finest survivors, in terms of both technical quality and eye appeal. Both sides of this extraordinary Superb Gem display beautiful yellow-gold color imbued with subtle hints of light green. A solid strike imparts sharp definition to the design elements save for minor softness on a couple of the feather tips. The frosty devices contrast boldly with the deeply mirrored fields to create a dramatic cameo effect. Both sides are wonderfully preserved. Tied with one other coin for finest certified at either grading service, this piece is a Registry Set essential. Population: 2 in 67 Cameo, 0 finer. CAC: 2 in 67, None finer (4/16). NGC ID# 22AR, PCGS# 82395

LINCOLN CENTS

1909 VDB Cent, MS66+ Red Doubled Die Obverse, FS-1101

- 4286** 1909 VDB Doubled Die Obverse, FS-1101, MS66+ Red PCGS. CAC. Die doubling increases in spread from left to right across LIBERTY. The 190 in the date is also nicely die doubled. A peach-red Premium Gem that boasts a full strike and dynamic cartwheel luster. Virtually unabraded, and only a few microscopic flecks limit the grade. Population: 9 in 66 (1 in 66+) Red, 1 finer. CAC: 8 in 66, 1 finer (5/16). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

1909-S VDB Cent, MS66 Red and Brown Attractive Coloration

- 4287** 1909-S VDB MS66 Red and Brown PCGS. A well-preserved, partially red example of this key Lincoln cent issue. Amber and golden toning on each side display a faint woodgrain pattern when viewed beneath a loupe, although considerable golden luster emerges from beneath. Hints of cherry and green are also seen at certain angles. The strike is slightly soft on the portrait but sharp elsewhere. Population: 52 in 66 Red and Brown, 1 finer (4/16). NGC ID# 22B2, PCGS# 2427

1911 Cent, MS67 Red Registry-Grade Example

- 4288** 1911 MS67 Red PCGS. An almost flawlessly preserved example with bold design elements and satiny luster. Rich coppery-orange peripheral hues blend into lighter golden luster in the centers. Die erosion is seen in the fields but does not affect the sharpness of the strike. Population: 13 in 67 (1 in 67+) Red, 1 finer (4/16). NGC ID# 22B7, PCGS# 2443

1911-D Cent, MS66 Red Only One Coin Finer at PCGS

- 4289** 1911-D MS66 Red PCGS. CAC. A conditionally scarce Premium Gem Red example of this early Denver issue, showing frosty copper-red luster and well-struck design elements. The fields and the edges of the obverse portrait show faint flowlines as a result of worn dies. A single carbon speck is seen near the obverse rim at 3 o'clock. Finer examples of the 1911-D cent are prohibitively rare. Population: 50 in 66 (5 in 66+) Red, 1 finer. CAC: 11 in 66, 0 finer (5/16). NGC ID# 22B8, PCGS# 2446

1916-S Cent, MS65 Red Registry Set Candidate

- 4290** 1916-S MS65 Red PCGS. A conditionally rare Gem Red example of the 1916-S Lincoln cent, among the finest certified at PCGS. Despite evidence of die erosion in the fields, the strike is well-executed. A few tiny specks do not detract, and grade-limiting marks are tiny and scattered. Population: 26 in 65 Red, 0 finer (4/16). NGC ID# 22BR, PCGS# 2494

1917 Lincoln Cent, MS67 Red Glowing Registry Coin

- 4291** 1917 MS67 Red PCGS. The Superb Gem Red certified population of the 1917 Lincoln cent is insufficient to supply the demands of Registry competitors who pursue this popular series. This piece will generate significant collector interest with its vibrant, frosty luster and rich coppery-red color. The strike is bold despite minor die erosion that is evident in the fields. A few pepper-specks do not detract from the eye appeal. Population: 18 in 67 (2 in 67+) Red, 2 finer (4/16). NGC ID# 22BS, PCGS# 2497

**1917 Cent, MS65 Red and Brown
Doubled Die Obverse**

- 4292 1917 Doubled Die Obverse, FS-101, MS65 Red and Brown PCGS.** Plum and violet overtones in the central regions of this Gem 1917 doubled die cent account for the Red and Brown designation, while the peripheries show luminous copper-orange luster. The strike is bold, and the obverse die doubling is clearly evident on the date and IN GOD WE TRUST. There is no evidence of die erosion, and the surfaces have a mattelike texture. This popular *Guide Book* variety is scarce in all Mint State grades, regardless of color designation. The present piece is tied for the finest in Red and Brown at both services. Population: 4 in 65 Red and Brown, 0 finer (4/16). PCGS# 37674 Base PCGS# 92496

**1919-S Cent, MS65 Red
Conditionally Rare**

- 4293 1919-S MS65 Red PCGS.** Coppery-gold on both obverse and reverse, and well-struck for this conditionally difficult issue. Even though post-war mintages of 1919 Lincoln cents were large, this did not translate into more high-grade pieces surviving. The obverse details are bold, while on the reverse E PLURIBUS UNUM, ONE CENT, and the wheat ears are bold, yet, curiously, the central letters of UNITED STATES OF AMERICA are weak and the die shows signs of failure. Miscellaneous ticks are also noted on the reverse of this delightful piece. Population: 19 in 65 Red, 2 finer (4/16). Ex: FUN Signature (Heritage, 1/2006), lot 3090. NGC ID# 22C2, PCGS# 2521

**1935 Lincoln Cent, MS68 Red
Top-Grade Rarity**

- 4294 1935 MS68 Red PCGS.** Glowing, seemingly flawless luster adorns each side of this high-end Superb Gem with copper-orange, gold, and rose-red hues. The strike is sharp, and the eye appeal is astounding. Tied for the finest certified and conditionally rare as such. An essential Registry Set acquisition. None are this fine at NGC. Population: 8 in 68 Red, 0 finer (4/16). NGC ID# 22DB, PCGS# 2641

1943-D/D Lincoln Cent, MS67
Tied for Finest of This Elusive Variety

- 4295** 1943-D/D FS-501 MS67 PCGS. FS-501 is an elusive and dramatic repunched mintmark *Guide Book* variety. The secondary D is bold and is off-set southwest from the primary to such an extent that it gives a mirror-image impression of the Dare Devil D/D logo. Few repunched mintmarks of any issue are so dramatic. This Superb Gem example is tied with seven others as the finest at PCGS and is an essential acquisition for the Registry Set collector. The strike is bold, and the satiny zinc-silver surfaces are remarkably well-preserved. A loupe reveals faint die striations in the fields that contribute to the minutely muted luster. Population: 8 in 67, 0 finer (4/16). NGC ID# 22E6, PCGS# 37819 Base PCGS# 2715

PROOF LINCOLN CENTS

1915 Cent, PR67 Red and Brown
Vivid Coloration
Sole Finest at PCGS in Red and Brown

- 4296** 1915 PR67 Red and Brown PCGS. CAC. Luminous copper-gold, orange, and cherry-red interiors cede to olive, russet, and amber peripheries on this Superb Gem Red and Brown 1915 proof cent. The strike is full, and the eye appeal is outstanding. This is the single finest Red and Brown coin at PCGS; NGC has also seen only one piece this fine (4/16). NGC ID# 22KY, PCGS# 3322

**1916 Cent, PR65 Red
High-Grade Rarity, Low Mintage**

4297 1916 PR65 Red PCGS. The Lincoln cent debuted amid an experiment by the Mint with a matte finish on its proof coins. The visual effect was somewhat dull and lifeless compared to the brilliant, mirrored proofs of previous years, and collector appreciation for the matte finish was less than enthusiastic. Matte proof Lincoln cent coinage in 1909 and 1910 was fair, but in 1911, demand and production began to fall. The 1916 was the final matte proof Lincoln cent struck before the Mint ceased all regular proof coinage. Only 1,050 pieces were produced. Today, the 1916 is the second-rarest matte proof in high grade, trailing only the briefly coined 1909 VDB.

The present Gem Red example is conditionally rare. Hints of amber and green peripheral color accentuate the rich copper-orange surfaces, and the design elements are fully rendered. The matte texture of the luster shows no discernible contact marks. Population: 13 in 65 Red, 3 finer (4/16). NGC ID# 22KZ, PCGS# 3326

**1953 Lincoln Cent, PR67+ Red Deep Cameo
Finest Certified at PCGS**

4298 1953 PR67+ Red Deep Cameo PCGS. A substantial mintage of 128,800 proof Lincoln cents was accomplished in 1953, and the issue is not difficult to locate in lower proof grades. However, the issue is seldom seen with cameo surfaces. The present coin is the finest certified example at PCGS, by virtue of its Plus designation (5/16).

This Plus-graded Superb Gem exhibits well-detailed design elements, with a rich coat of mint frost that contrasts profoundly with the deeply mirrored fields to produce a stunning cameo effect. The original red surfaces are impeccably preserved and overall eye appeal is extraordinary. Population: 7 in 67 (1 in 67+) Deep Cameo, 0 finer (5/16). NGC ID# 22LD, PCGS# 93368

**1953 Lincoln Cent, PR68 Red Ultra Cameo
Single-Finest Certified Example**

4299 1953 PR68 Red Ultra Cameo NGC. A magnificent PR68 Lincoln cent, with blazing original red surfaces that display no mentionable flaws, even on close inspection with a loupe. The design elements are sharply impressed, with a rich coat of mint frost that creates stunning cameo contrast with the deeply mirrored fields. Census: 1 in 68 Ultra Cameo, 0 finer (4/16). NGC ID# 22LD, PCGS# 93368

1970-S Small Date Cent, PR69 Red Deep Cameo
One of Only Two So Fine at PCGS

- 4300** 1970-S Small Date, FS-1402, PR69 Red Deep Cameo PCGS. The proof 1970-S Lincoln cent was produced with both Large and Small dates, most easily differentiated by the height of the 7 in relation to the 9 and 0. The Small Date variety is far scarcer. In the unsurpassed grade of PR69 Red Deep Cameo, PCGS has seen just two Small Date coins compared to 17 Large Date (4/16). The present piece is one of those two finest Small Date representatives, an essential acquisition for the Registry Set competitor. It surpasses the coin from the all-time finest PCGS set by a full grade point. The strike is full, and the liquidlike mirrors are virtually flawless. The frosty design elements provide ample cameo contrast. Eye appeal is superb. This Deep Cameo 1970-S proof is unquestionably as fine as can be had of this issue. NGC ID# 22LZ, PCGS# 38180 Base PCGS# 93426

1990 No S Cent, PR69 Red Ultra Cameo
Tied for Finest Certified, FS-101

- 4301** 1990 No S, FS-101, PR69 Red Ultra Cameo NGC. Schechter and Garrett ranked the 1990 No S proof cent 13th on their list of the *100 Greatest U.S. Modern Coins*. The issue is also featured in the *Cherrypickers' Guide* and the *Guide Book*. Despite its widely publicized status, there are only 100 to 200 examples available to collectors (production totals vary by source). Immaculate surfaces, bottomless, jet-black fields, and frosty devices characterize this phenomenal No S proof cent. NGC and PCGS have yet to see a finer example. Census: 22 in 69 Ultra Cameo, 0 finer (4/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

PROOF TWO CENT PIECES

1866 Two Cent, PR66 Red Deep Cameo Sole Deep Cameo Certified

- 4302 1866 PR66 Red Deep Cameo PCGS.** The 1866 proof two cent piece is not particularly rare in the absolute sense, but contrasted examples are. Only a handful of Cameos are known, and *this Premium Gem Red coin is the sole Deep Cameo certified* (4/16). The field-device contrast is superb, delivered by deep coppery-red mirrors and sharp, frosty design elements. There are no carbon specks or contact marks. Eye appeal is superb. Our Auction Archives show previous appearances of only 11 Cameos in more than two decades, including reappearances. But never before has this Deep Cameo been offered at auction. The Registry Set collector should not pass this piece by. NGC ID# 4YHY, PCGS# 93632

1873 Two Cent Piece, PR64 Red Open 3 Variant

- 4303 1873 Open 3 PR64 Red PCGS.** Questions about the actual striking period for the Open 3 two cent pieces abound, but most collectors simply do not care about the "when," focusing solely on the "what." Both the Closed 3 and Open 3 proofs are highly desired. This flame-red Open 3 near-Gem proof displays moderate mirrors and strong eye appeal. A few minor flecks do not diminish the considerable visual allure. The strike is razor-sharp. Population: 8 in 64 Red, 10 finer (4/16). NGC ID# 2754, PCGS# 3656

THREE CENT SILVER

1872 Silver Three Cent, Prooflike MS65 CAC-Endorsed Final-Year Rarity

- 4304 1872 MS65 NGC. CAC.** The final circulation-strike three cent silver issue had the smallest mintage of the series at 1,000 coins. Survivors are scarce in all grades. This Gem CAC coin displays a bold strike and characteristically prooflike fields. Mottled champagne, olive, and lavender-gray toning attests to the eye appeal. There are no mentionable abrasions. Census: 8 in 65, 5 finer. CAC: 2 in 65, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22ZN, PCGS# 3693

PROOF THREE CENT SILVER

1864 Silver Three Cent, PR67+
Only One Coin Certified Finer

- 4305 1864 PR67+ NGC. CAC.** Modest cameo contrast is seen beneath aquamarine and mint-gold toning on each side of this high-end Superb Gem proof. The strike is full, and the mirrored fields deliver ample eye appeal. The 1864 proof three cent silver is available through PR65, but pieces this fine are rare. Census: 10 in 67 (1 in 67+), 1 finer. CAC: 5 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CA, PCGS# 3714

1866 Three Cent Silver, PR66+ Cameo
Pleasant Contrast and Toning

- 4306 1866 PR66+ Cameo NGC.** A scarce, high-end Cameo example of this otherwise plentiful proof issue, showing frosty, razor-sharp design elements set against deeply reflective fields. The obverse is primarily green-gold, while the reverse has deeper blue and lavender hues. Field-motif contrast is apparent even through the patina. The 1866 proof had a mintage of 725 pieces, but few Cameo examples survive, let alone in such high of a grade as this Plus-graded Premium Gem. Census: 8 in 66 Cameo (1 in 66★ Cameo), 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27CC, PCGS# 83716

THREE CENT NICKELS

1866 Three Cent Nickel, Frosted MS67
Advanced Die State

- 4307 1866 MS67 PCGS. CAC.** In spite of a mintage of 4.8 million pieces, the 1866 three cent nickel is rare in MS66 and exceedingly so finer. This Superb Gem is exceptionally vibrant and frosty, devoid of toning. Struck from severely deteriorated dies, the peripheries show extensive flowlines and both sides are heavily clashed. However, the sharpness of the obverse portrait is unaffected the luster is incredible. Close study with a loupe fails to reveal even minor abrasions. Population: 3 in 67, 0 finer. CAC: 6 in 67, 0 finer (5/16). CAC: 6 in 67, 0 finer (5/16). NGC ID# 22NK, PCGS# 3732

**1885 Nickel Three Cent, MS66
Condition Census Rarity**

4308 1885 MS66 PCGS. CAC. The 1885 three cent nickel claims the lowest circulation-strike mintage of the series: 1,000 coins. In circulated grades, this issue is the key to the series, and Mint State pieces are scarce at any numeric level. This Premium Gem CAC coin is a Condition Census rarity. The strike is sharp, and the champagne-tinted luster appears almost flawlessly preserved. Each side displays a soft, luminous glow. We have previously offered only 10 Premium Gems in a more than 20-year record. The last PCGS CAC coin we handled was lot 2452 of our FUN Signature sale (Heritage, 1/2010), which realized \$29,900. A Superb Gem example has not been seen at public auction since 2005. This remarkable coin simply surpasses expectations of eye appeal and quality. Population: 13 in 66 (1 in 66+), 2 finer. CAC: 4 in 66, 1 finer (4/16). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

**1866 Three Cent Nickel, PR67 ★ Cameo
Lovely Champagne Toning**

4309 1866 PR67 ★ Cameo NGC. A lovely champagne-toned Cameo with sharp, frosty design elements and reflective fields. This is the sole finest Cameo at NGC, even if only by the margin of the plus designation. Cameos in general are elusive in high grade, particularly above the Gem grade level. This piece is most appealing. Census: 2 in 67 (1 in 67 ★) Cameo, 0 finer (4/16). NGC ID# 275L, PCGS# 83762

**1871 Three Cent Nickel, PR66 Deep Cameo
Impeccable Quality**

4310 1871 PR66 Deep Cameo PCGS. While the expanded numbering system now includes a separate PCGS number for Deep Cameo proofs, the numbers are accurate only from the date of the new system, which shows just two pieces with the Deep Cameo designation. Even so, it is doubtful there are many more at the PR66 level or finer. This brilliant example is exceptionally nice even at the Premium Gem level, with glittering, hairline-free mirrors and frost-white devices. The strike is essentially unimprovable. PCGS# 93767

**1874 Three Cent Nickel, PR66 Deep Cameo
The Sole Finest Example at PCGS**

4311 1874 PR66 Deep Cameo PCGS. CAC. Non-Cameo and Cameo examples of this three cent nickel proof issue (more than 700 pieces reportedly struck) are readily available. Deep Cameo specimens, however, are extremely rare. PCGS has seen only two such submissions: one in PR64 Deep Cameo and this Premium Gem (4/16). This amazing proof is fully brilliant, boasting amazing white-on-black contrast between the glassy mirrors and frosted, razor-sharp devices. A lens is required to view the microscopic flecks that preclude an even higher grade. CAC-endorsed. NGC ID# 275V, PCGS# 93770

1877 Three Cent Nickel, PR67 Cameo
Conditionally Rare, Stark Contrast

- 4312 1877 PR67 Cameo NGC. CAC.** The 1877 is the most challenging issue in the proof three cent nickel series. In addition to its small 900-coin mintage, it experiences demand from both date set collectors and proof series enthusiasts, since no circulation strikes were coined during this year. The present CAC-endorsed Superb Gem displays a full strike and frosty design elements. Ample cameo contrast adorns the surfaces. Census: 25 in 67 (1 in 67+, 6 in 67 ★, 1 in 67+★) Cameo, 2 finer. CAC: 13 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 275X, PCGS# 83773

1880 Nickel Three Cent, PR67+ Cameo
Only One Coin Certified Finer

- 4313 1880 PR67+ Cameo NGC. CAC.** This Plus-graded Superb Gem Cameo is the sole second-finest 1880 proof three cent nickel at NGC, and none at PCGS are finer (4/16). The strike is full, and the surfaces display champagne-tinted cameo contrast. There are no distracting marks or hairlines. A suitable Registry Set contender. Census: 6 in 67 (1 in 67+) Cameo, 1 finer. CAC: 8 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5E5S, PCGS# 83776

SHIELD NICKEL

1869 Shield Nickel, MS67
Delicately Toned

- 4314 1869 MS67 NGC.** A well-struck Superb Gem with satiny luster and iridescent pastel toning. A few spindly die cracks are seen around the peripheries, as normal. This lovely 1869 Shield nickel is a conditional rarity, among the few finest certified at NGC. The finest at PCGS is a coin in MS66+. Census: 3 in 67 (1 in 67★), 0 finer (4/16). NGC ID# 22P3, PCGS# 3796

PROOF SHIELD NICKELS

1872 Shield Nickel, PR66+
Sole Ultra Cameo Certified

- 4315 1872 PR66+ Ultra Cameo NGC.** The only Ultra/Deep Cameo certified by either NGC or PCGS (4/16), this high-end Premium Gem proof 1872 Shield nickel is arguably the finest-known example of the issue. The strike is full, and the fields exhibit remarkable depth of mirroring. Cameo contrast is stark, and the surfaces are untuned. The obverse is boldly die doubled on this proof die marriage.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276N, PCGS# 93826

1873 Closed 3 Shield Nickel, PR67 ★ Cameo
The Sole Finest at NGC

- 4316 1873 Closed 3 PR67 ★ Cameo NGC. CAC.** The obverse of this Superb Gem Cameo has merits to an Ultra Cameo designation, although the less-contrasted reverse confirms the Cameo grade. This piece is razor-sharp and has a blush of champagne toning. Eye appeal is superb. All proof 1873 Shield nickels have the Closed 3 logotype in the date. The issue is rare in Superb Gem condition, and this piece is the sole finest at NGC. Census: 5 in 67 (1 in 67 ★) Cameo, 0 finer. CAC: 2 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 276P, PCGS# 83827

1877 Shield Nickel, PR66+ Ultra Cameo
Second-Finest Ultra Cameo Certified

- 4317 1877 PR66+ Ultra Cameo NGC.** Ultra/Deep Cameo 1877 Shield nickels are rare. NGC lists five Ultra Cameos in all grades, including two PR65, one PR66, this PR66+, and a single PR67; PCGS shows only two Deep Cameos, both PR66 (4/16). Thus, the present coin is the sole second-finest known. The strike is bold, and the surfaces are untuned. Stark white-on-black contrast adorns each side. The 1877 is a proof-only issue, in constant demand among date set collectors.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 4YTA, PCGS# 93831

LIBERTY NICKELS

1885 Nickel, Intensely Lustrous MS66 Rare, Key Issue to the Series

- 4318 1885 MS66 PCGS.** Only 1.4 million nickels were struck in 1885, and by the time collectors and the general public noticed it was too late, most had quietly slipped into circulation. This is one of the finest examples we can remember having seen. Intense luster emanates from the nickel-gray surfaces of this key-date representative, and the design elements are well-impressed, except for the usual weakness in the leaves and corn ear left of the bowknot. There are no marks worthy of individual mention. Population: 33 in 66 (3 in 66+), 3 finer (5/16). NGC ID# 2773, PCGS# 3846

1886 Liberty Nickel, MS65+ Few Are Finer at PCGS

- 4319 1886 MS65+ PCGS. CAC.** Even though the 1885 issue is generally considered scarcer than the 1886, the opposite is true in Gem or finer grades. This high-end Gem is untuned with satiny mint luster and a sharp obverse strike. The reverse shows the usual blending on the wreath, where the bowknot lacks definition and the strike on the left ear of corn is soft. Slight repunching is visible on the lower outer loop of the 6 in the date. Population: 49 in 65 (3 in 65+), 8 finer. CAC: 7 in 65, 8 finer (5/16). NGC ID# 277U, PCGS# 3847

1904 Nickel, Glowing MS67 The Single Finest at PCGS

- 4320 1904 MS67 PCGS.** The dazzling, frosty silver luster on this Superb Gem is rarely seen on a Liberty nickel, as it is almost exclusively displayed by the highest-grade examples of a given issue. This 1904 type coin is the sole finest at PCGS (4/16). The strike is bold, and the surfaces are beautifully preserved. Eye appeal far exceeds what is considered typical for this type. NGC ID# 277E, PCGS# 3865

1906 Liberty Nickel, MS66+ Easily Among the Finest Certified

- 4321 1906 MS66+ PCGS.** The smooth, lustrous surfaces of this high-end Premium Gem nickel are exceptional, yet the toning takes center stage as the most memorable attraction. Shades of orange and lemon-gold surround ice-blue and peach toning with two-sided brilliance and color. The 1906 nickels were not particularly well-struck in general — particularly at the bowknot and the left-hand ear of corn on the reverse. That, as well as minor weakness on a few star centers, is all that separates this vibrant nickel from an even higher grade. As it is, none are finer at either service. Population: 6 in 66+, 0 finer (4/16). NGC ID# 277H, PCGS# 3867

1906 Liberty Nickel, MS66+ Among the Finest Certified Examples

- 4322 1906 MS66+ PCGS. CAC.** This Plus-graded Premium Gem is tied with several other coins for finest certified at both leading grading services. The design elements are sharply detailed in most areas, but a touch of the usual softness is evident on the lower wreath. The well-preserved surfaces show a few hints of lavender-gray and pale gold toning, with vibrant mint luster underneath. Population: 28 in 66 (6 in 66+), 0 finer. CAC: 8 in 66, 0 finer (4/16). NGC ID# 277H, PCGS# 3867

1912-S Nickel, MS66 None Certified Finer

- 4323 1912-S MS66 PCGS.** An elusive Premium Gem example of this key branch mint issue. Each side shows characteristically satin luster with the usual golden-gray hue. The corn ear to the left of the wreath bow is softly struck, as is normal for the issue. Only a couple of tiny ticks are seen on Liberty's cheek. This piece is conditionally scarce and among the finest certified. Population: 37 in 66 (1 in 66+), 0 finer (4/16). NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS66
Lightly Toned Registry Coin**

- 4324 1912-S MS66 PCGS.** A hint of iridescence complements the golden-gray, satiny luster of this Premium Gem 1912-S Liberty nickel. The strike is soft on the left-hand corn ear and on the hair at Liberty's forehead, as usual, but the stars are well-defined. No distracting abrasions are seen. The 1912-S is seldom encountered in MS66 and is unknown in MS67. Population: 37 in 66 (1 in 66+), 0 finer (4/16). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS66
Delicate Pastel Toning**

- 4325 1912-S MS66 PCGS.** Satiny luster on this Premium Gem 1912-S Liberty nickel displays soft champagne-gray toning on the obverse with lavender and light golden hues over the reverse. Strike sharpness is above-average for the issue, and there are no serious abrasions. This piece is among the finest certified of this key-date issue, ideal for Registry purposes. Population: 38 in 66 (1 in 66+), 0 finer (4/16). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

**1886 Nickel, PR67 Cameo
Among the Finest Certified**

- 4326 1886 PR67 Cameo NGC.** CAC. The key date status of the circulation strike 1886 Liberty nickel heightens demand for the proofs of this year. The present Superb Gem Cameo proof is among the finest certified. Field-motif contrast is apparent beneath light golden toning, and the strike is razor-sharp. Eye appeal such as this is seldom seen on proofs of this year. Census: 6 in 67 (1 in 67 ★) Cameo, 0 finer. CAC: 5 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 277U, PCGS# 83884

**1891 Liberty Nickel, PR66 Deep Cameo
Traces of Ice-Blue and Champagne Toning**

- 4327 1891 PR66 Deep Cameo PCGS.** CAC. Dustings of ice-blue and champagne color accentuate the stark field-device contrast of this Premium Gem Deep Cameo proof. Exemplary detail characterizes the frosty motifs, and the fields reveal only a few trivial lines when studied beneath a loupe. The 1891 proof Liberty nickel survives in ample numbers but with only a few qualifying for the Deep Cameo category. Population: 9 in 66 (3 in 66+) Deep Cameo, 0 finer. CAC: 6 in 66, 0 finer (5/16). NGC ID# 548V, PCGS# 93889

**1893 Liberty Nickel, PR67+ Cameo
None Certified Finer**

- 4328 1893 PR67+ Cameo PCGS.** CAC. This Plus-graded Superb Gem is an exceptional survivor from a proof mintage of 2,195 pieces. The design elements are sharply detailed and richly frosted, providing intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is extraordinary. Population: 19 in 67 (3 in 67+) Cameo, 0 finer. CAC: 13 in 67, 0 finer (4/16). NGC ID# 2783, PCGS# 83891

BUFFALO NICKELS

**1913 Type One Buffalo Nickel, MS68
Registry-Grade Condition Rarity**

- 4329 1913 Type One MS68 NGC.** Luminous, frosty luster glistens on each side of this remarkable Type One Buffalo nickel. The strike is bold, and the preservation is nearly perfect. Lovely iridescent toning graces each side. This Type One Philadelphia coin is among the finest certified and is rare as such. Census: 13 in 68 (3 in 68★), 0 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22PW, PCGS# 3915

**1913 Type Two Buffalo Nickel, MS67
Delightful Registry Coin**

- 4330 1913 Type Two MS67 NGC. CAC.** Tinges of lilac surround the ice-blue centers of this splendid Superb Gem. The bold strike, including a full horn and split tail on the reverse and nearly full braid on the obverse, complements surfaces that are essentially flawless, with incredible eye appeal. Among the finest certified. Census: 11 in 67 (5 in 67★), 0 finer. CAC: 8 in 67, 0 finer (4/16). Ex: Dallas Signature (Heritage, 10/2009), lot 269. From The Soquel Creek Collection. NGC ID# 22PZ, PCGS# 3921

**1916 Buffalo Nickel, MS67
Only One Numerically Finer at NGC**

- 4331 1916 MS67 NGC.** The 1916 Buffalo nickel was a well-produced issue and high-grade circulation-strike coins are often confused with matte proofs. This stunning Superb Gem exhibits fully struck design elements and vibrant mint luster under vivid shades of ice-blue and greenish-gold toning. Census: 11 in 67 (1 in 67★), 1 finer (4/16). From The Soquel Creek Collection. NGC ID# 22RA, PCGS# 3930

**1919-S Nickel, Satiny MS65
Elusive So Well-Preserved**

- 4332 1919-S MS65 PCGS.** The 1919-S Buffalo nickel is a rarity in Gem condition, and finer coins are exceedingly so. The date commands a premium even in low circulated grades, but only in MS65 does it finally become truly difficult to locate. By 1919, the San Francisco Mint's legacy of poor quality control was well-underway, causing many 1919-S nickels to be struck with incomplete details. Regardless of preservation, flatly struck Buffalo nickels of any date are difficult to certify in MS65. This lightly toned, champagne-colored Gem is better struck than typical, but mild weakness on the bison's shoulder and the hair above the Indian's braid persists. The satiny surfaces are free of major abrasions, and eye appeal is pleasing. Population: 34 in 65 (2 in 65+), 2 finer (4/16). NGC ID# 22RN, PCGS# 3943

**1920 Buffalo Nickel, MS67
None Certified Finer**

- 4333 1920 MS67 NGC.** The 1920 Buffalo nickel is an available date in most grades, but MS67 examples are decidedly rare, and the issue is unknown in finer grades. This spectacular Superb Gem exhibits well-detailed design elements and impeccably preserved lustrous surfaces with a few hints of greenish-gold and ice-blue toning. Census: 4 in 67, 0 finer (4/16).
From *The Soquel Creek Collection*. NGC ID# 22RP, PCGS# 3944

**1923 Buffalo Nickel, MS67
None Certified in Numerically Finer Grades**

- 4336 1923 MS67 NGC.** Despite the huge mintage of 35.7 million pieces, the 1923 Buffalo nickel is slightly more elusive in the higher ranges of Mint State than some other Philadelphia issues. This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster on both sides. Census: 9 in 67 (1 in 67★), 0 finer (4/16).
From *The Soquel Creek Collection*. NGC ID# 22RV, PCGS# 3949

**1921 Nickel, Brilliant MS67
Better Philadelphia Date**

- 4334 1921 MS67 PCGS.** The Philadelphia Mint reduced Buffalo nickel output by 52.4 million coins between 1920 and 1921. Despite the significantly lower mintage, 1921 nickels are accessible through MS66. The date becomes rare in Superb Gem, where this coin ranks among the finest certified at PCGS and NGC. This 1921 representative is sharply impressed with radiant, frosty luster. A couple of microscopic flecks define the grade. Registry enthusiasts should recognize the importance of this offering. Population: 28 in 67, 0 finer (4/16). NGC ID# 22RT, PCGS# 3947

**1924 Buffalo Nickel, MS67
Tied for Finest Certified**

- 4337 1924 MS67 NGC. CAC.** Fully struck, the surfaces are nearly perfect with pleasing luster and lovely, variegated sea-green, ice-blue, yellow-gold, and reddish-tan coloration over both sides. This beautiful Superb Gem is tied with three others as finest-certified at NGC. Six others have been so graded at PCGS (4/16).
Ex: Central States Signature (Heritage, 4/2006), lot 1075, where it brought \$21,850.
From *The Soquel Creek Collection*. NGC ID# 22RX, PCGS# 3951

**1921 Buffalo Nickel, MS67+
Sharply Detailed and Attractively Toned**

- 4335 1921 MS67+ NGC.** The 1921 Buffalo nickel is often seen with a sharp strike and this high-end Superb Gem does not disappoint in this area. All design elements are sharply detailed, and the impeccably preserved lustrous surfaces are blanketed in attractive shades of champagne-gold and ice-blue toning. Census: 14 in 67 (1 in 67+, 3 in 67★, 1 in 67+★), 0 finer (4/16).
From *The Soquel Creek Collection*. NGC ID# 22RT, PCGS# 3947

**1924-D Nickel, Toned MS65+
Above-Average Strike**

- 4338 1924-D MS65+ PCGS. CAC.** The profound strike softness with which examples of this issue were typically produced contributes to the scarcity of high-grade survivors. The present high-end Gem exhibits a minor degree of weakness on the bison's head and shoulder, as well as on portions of the obverse portrait, though the strike seems above-average for the issue. The Indian's braid, the date, the bison's horn and tail, and the lettering are all sharply defined. Excellent surface preservation firmly substantiates this coin's Gem status. Iridescent champagne, lavender, and ice-blue toning encompasses each side, adding to the eye appeal. PCGS has graded just eight specimens numerically finer. CAC: 20 in 65, 1 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22RY, PCGS# 3952

**1924-D Buffalo Nickel, MS65+
Only One Finer Coin at NGC**

- 4339 1924-D MS65+ NGC. CAC.** The 1924-D Buffalo nickel is a better date in the series and most really high grade examples come from a hoard released by the Connecticut State Library in the 1990s. This Plus-graded Gem exhibits well-detailed design elements and well-preserved lustrous surfaces with a few hints of golden-tan and lavender-gray toning. Census: 20 in 65+, 1 finer. CAC: 21 in 65, 1 finer (4/16).
From The Soquel Creek Collection. NGC ID# 22RY, PCGS# 3952

1924-S Nickel, Lightly Toned MS64

- 4340 1924-S MS64 NGC. CAC.** This Choice 1924-S Buffalo nickel is surprisingly well-preserved for the issue, although the deficient strike on the central devices likely contributes to its sub-Gem grade. Satiny luster displays light golden toning. Finer examples of this San Francisco issue are seldom seen. CAC: 9 in 64, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22RZ, PCGS# 3953

**1925 Nickel, Top-Grade MS67
Beautiful Rainbow Toning**

- 4341 1925 MS67 PCGS.** The 1925 Buffalo nickel is a common date overall, but Superb Gems are conditionally rare. This MS67 piece is among the finest certified. The strike is bold, and the beautifully preserved, rainbow-toned surfaces display softly frosted luster that glistens beneath a light. The colors blend over each side and offer astounding eye appeal. Population: 17 in 67, 0 finer (4/16). NGC ID# 22S2, PCGS# 3954

**1926-S Buffalo Nickel, MS61
Elusive, Low-Mintage Issue**

- 4342 1926-S MS61 NGC.** The 1926-S Buffalo nickel claims the lowest business strike mintage of the series, at 970,000 pieces, and Mint State examples are quite scarce. The present coin is a well-struck MS61 example, with some weakness on the reverse, due to worn dies. The surfaces are lustrous under vivid gold and violet toning.
Ex: FUN Signature (Heritage, 1/2011), lot 4453.
From The Soquel Creek Collection. NGC ID# 22S7, PCGS# 3959

**1926-S Buffalo Nickel, MS63
Seldom Encountered in Finer Grades**

- 4343 1926-S MS63 NGC.** A well-known condition rarity in the series, the 1926-S is decidedly scarce in XF or finer grades, and a rarity in all Mint State grades. This Select Mint State specimen has a typical weak strike. The satin surfaces exhibit light gray luster with subtle gold toning near the borders.
Ex: Rosemont Signature (Heritage, 4/2011), lot 3166.
From The Eagle One Collection. NGC ID# 22S7, PCGS# 3959

**1926-S Buffalo Nickel, MS64
Low-Mintage Key**

4344 1926-S MS64 NGC. CAC. The 1926-S Buffalo nickel boasts a meager mintage of just 970,000 pieces, the lowest business-strike production of the series. The low mintage may have gone unnoticed by contemporary collectors, as few high-quality specimens were saved. Today, the 1926-S is an elusive issue in high grade and an acknowledged key to the series.

Like most examples seen, this attractive Choice specimen shows a touch of softness on the bison's shoulder and the hair above the braid. The dies (especially the reverse) show signs of overuse and decay, which probably accounts for the lack of crisp detail, rather than insufficient striking pressure. The well-preserved surfaces are lustrous and lightly toned. NGC has graded 13 numerically finer examples (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22S7, PCGS# 3959

**1927-D Nickel, Sharp MS65
Struck From Fresh Dies
Elusive This Well-Preserved**

4345 1927-D MS65 NGC. CAC. Although plentiful in MS63 and MS64, the 1927-D Buffalo nickel becomes distinctly elusive at the Gem grade level, and finer pieces are rare. This CAC coin displays an impressively bold strike for the period from fresh dies that lack significant erosion in the fields and recesses. Warm golden toning graces unabraded, satiny surfaces. Census: 30 in 65 (1 in 65+), 6 finer. CAC: 18 in 65, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 22S9, PCGS# 3961

**1927-S Nickel MS64+
Iridescently Toned Surfaces**

4346 1927-S MS64+ NGC. CAC. Attractive iridescent toning in shades of saffron, jade, and fire-red graces each side of this near-Gem 1927-S Buffalo nickel. This piece shows a decent strike, and only a sprinkling of light marks precludes an even finer grade. NGC has graded 28 examples as MS65 or better (4/16).

Ex: FUN Signature (Heritage, 1/2013), lot 3493.

From The Soquel Creek Collection. NGC ID# 22SA, PCGS# 3962

**1934 Buffalo Nickel, MS67+
None Certified Finer**

4347 1934 MS67+ NGC. CAC. The 1934 Buffalo nickel is an available date from a large mintage of over 20 million pieces, but neither grading service has seen a finer specimen than the coin offered here. This high-end Superb Gem is sharply detailed, with brilliant, unmarked fields and vibrant mint luster. Census: 11 in 67 (1 in 67+, 5 in 67★, 1 in 67+★), 0 finer. CAC: 5 in 67, 0 finer (4/16).

Ex: FUN Signature (Heritage, 1/2013), lot 3496.

From The Soquel Creek Collection. NGC ID# 22SL, PCGS# 3972

**1936-S Buffalo Nickel, MS67+ ★
Top Registry Set Candidate**

- 4348** 1936-S MS67+ ★ NGC. CAC. A needle-sharp strike is exceeded only by the exquisite coloration of this vibrant Registry Set candidate. No 1936-S has attained a higher numeric grade at either service, while this high-end example is the sole coin with the triple awards of the NGC Plus, NGC Star, plus CAC endorsement. A crescent of vivid orange-gold toning merges with the lilac-infused bright-nickel center on the obverse, while the reverse is spectacularly toned in multicolor iridescent shades. Census: 30 in 67 (4 in 67★), 1 in 67+★, 0 finer. CAC: 8 in 67, None finer (4/16). From *The Soquel Creek Collection*. NGC ID# 22SU, PCGS# 3979

**1937 Buffalo Nickel, MS68 ★
Tied for Finest at NGC**

- 4349** 1937 MS68 ★ NGC. Lemon-gold and cherry-red bands encompass the powder-blue centers. The mint luster is comprehensive, and the strike is intricate save for the unavoidable slight blending on the hair above the braid. The 1937 is plentiful in Mint State, but emerges as an important conditional rarity at the MS68 level. Census: 8 in 68 (3 in 68★), 0 finer (4/16). Ex: *Central States Signature* (Heritage, 5/2007), lot 1648; *FUN Signature* (Heritage, 1/2009), lot 858. From *The Soquel Creek Collection*. NGC ID# 22SX, PCGS# 3980

**1937-D Three-Legged Nickel, MS64
Attractively Toned, Nicely Struck**

- 4350** 1937-D Three-Legged, FS-901, MS64 NGC. Iridescent cherry-red, lime-green, and wheat-gold toning adorn this colorful and lustrous near-Gem. The strike is above average, and neither side displays any noticeable marks. The diagnostics for the key variety are irrefutable, and include the granular back leg and the series of tiny die lumps beneath the flank. From *The Soquel Creek Collection*. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS64
Sharp Strike, Smooth Satiny Appeal**

- 4351** 1937-D Three-Legged, FS-901, MS64 NGC. The Indian's braid knot and upper hair detail is strong, although as always, a few areas on the reverse are slightly weak from the single die pair that was used to create the famous variety. A string of raised die lumps (rust pits) extend between the fore and hind legs, curving up from the mound top to the top of the left rear leg. Lilac accents join golden highlights and satiny luster for nice eye appeal. One or two minor nicks and some planchet roughness on the Indian's neck determine the near-Gem grade. NGC reports only 82 numerically finer examples of this classic Buffalo nickel anomaly (4/16). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS64+
Bold Strike, Iridescently Toned**

- 4352** 1937-D Three-Legged, FS-901, MS64+ NGC. CAC. Cherry-red, jade-green, and cream-gray adorn this well-struck and unabraded mint error nickel. All diagnostics are evident, such as the missing foreleg, the trail of die dots beneath the flank, and the granular back leg. A number of examples were saved but the present near-Gem is much nicer than the typical circulation find, and is particularly unusual for its colorful toning. Ex: *Houston Signature* (Heritage, 11/2012), lot 3926. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D/S Buffalo Nickel, MS68
Exceptional Guide Book Variety**

- 4353** 1938-D/S FS-511 MS68 NGC. While San Francisco struck no 1938-dated Buffalo nickels, Denver did, and several S-mint reverse dies had their mintmarks punched-over for use in Colorado. This is a stunning MS68 representative of the most prominent of the overmintmarks. Light yellow-green outer toning gives way to light blue and violet colors through the centers. Amazingly lustrous and a visual delight. Census: 6 in 68 (1 in 68★), 0 finer (4/16). From *The Soquel Creek Collection*. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKEL

1916 Buffalo Nickel, PR67+
High-End Registry Set Rarity

4354 1916 PR67+ PCGS. CAC. As made possible by its paltry 600-coin mintage, the 1916 matte proof Buffalo nickel is the scarcest issue in the proof series. Most surviving representatives reside in the PR64 to PR66 range. This high-end Superb Gem is conditionally rare, and finer coins are far out of reach for most collectors. It is the first Plus-designated PR67 we have offered, and the added CAC green label further heightens its appeal. The last CAC-endorsed PR67 PCGS coin we offered was lot 3655 of the Summer FUN Signature sale (Heritage, 7/2014), which realized \$8,812.50. The last PR68 coin we offered was in lot 1004 of the Houston Signature sale (Heritage, 12/2008), which realized \$43,125. This in-between PR67+ CAC PCGS coin should command strong bidding at auction.

The strike is full, and the matte luster gives each side a lovely, subdued glow. Sun-gold toning yields interior tinges of sky-blue and violet, delivering outstanding eye appeal. There are no bothersome abrasions. Population: 32 in 67 (2 in 67+), 7 finer. CAC: 11 in 67, 1 finer (4/16). NGC ID# 278V, PCGS# 3993

JEFFERSON NICKELS

1939-S Nickel, MS66+ Full Steps
Reverse of 1938

4355 1939-S Reverse of 1938 MS66+ Full Steps PCGS. The wavy steps on Monticello are distinctive of the earlier Reverse of 1938 hub. This well-struck, high-end Premium Gem displays satiny gray luster with few noticeable contact marks. The rarity of this issue in MS66 and the fact that it is unknown in MS67 make the present Plus-graded coin immensely appealing from a Registry collecting standpoint. Population: 23 in 66 (4 in 66+) Full Steps, 0 finer (4/16). NGC ID# 22TB, PCGS# 84006

1941-S Nickel, Iridescent MS67 Full Steps
Strongly Rendered and Near-Flawless

4356 1941-S MS67 Full Steps PCGS. Pale violet and powder-blue patina colors a significant portion of this Superb Gem Full Steps nickel. Rainbow iridescence enlivens the other areas, mainly around the legends and within the design recesses. Frosty mint luster flows over each side, characteristic of a San Francisco strike. Strongly rendered and nearly flawless. A top-graded Registry essential. Population: 6 in 67 Full Steps, 0 finer (4/16). NGC ID# 22TJ, PCGS# 84012

1945-P Nickel, MS67 Full Steps
Among the Finest Certified

4357 1945-P MS67 Full Steps PCGS. 30th Anniversary Green Label Holder. The 1945-P silver-alloy nickel is rare in Superb Gem condition with Full Steps. This piece is a prime Registry Set acquisition and displays exceptionally clean, frosty surfaces that are devoid of toning. Only a couple of tiny ticks below Monticello prevent an even finer grade. Population: 12 in 67 (2 in 67+) Full Steps, 0 finer (4/16). NGC ID# 22TX, PCGS# 84025

**1945-P Nickel, Lightly Toned MS66 Full Steps
FS-801, Doubled Die Reverse, Tied for Finest**

- 4358 1945-P Doubled Die Reverse, FS-801, MS66 Full Steps PCGS.** Much of the reverse lettering is boldly die doubled on this popular variety. Examples are extremely rare in PCGS-certified Full Steps, and the present coin is tied with one other as the finest; NGC has not attributed even a single FS-801 example in Full Steps (4/16). A couple of other doubled reverses are known for this issue, but FS-801 is the most prominent and sought-after, particularly with Full Steps. This piece displays a bold strike and frosty mint luster. Toning in the central regions is light golden and it deepens to lavender and blue-gray hues near the borders. A few tiny marks do not detract. High-end examples of this *Guide Book* variety have become immensely sought-after for inclusion in Registry Sets. PCGS# 38506 Base PCGS# 84173
-

**1949-S Nickel, MS67 Full Steps
Top-Grade Rarity**

- 4359 1949-S MS67 Full Steps PCGS.** The 1949-S is an extremely rare date in Superb Gem Full Bands, and Registry Set competitors face a significant challenge in locating a top-grade example. This piece is tied with only two others as the finest at PCGS (4/16). The strike is impressively sharp, and the nickel-gray surfaces have a distinct champagne hue over satiny luster. There are no significant abrasions, as the grade suggests. The last MS67 Full Steps example we offered was lot 3889 in the FUN Signature sale (Heritage, 1/2014), which realized \$15,275. The present coin should encounter similar demand. NGC ID# 22UD, PCGS# 84040
-

SMS JEFFERSON NICKEL

1964 SMS Nickel, MS68 Full Steps
Rare Special Strike, Tied for Finest

4360 1964 SMS MS68 Full Steps PCGS. The 1964 SMS nickel is among the rarest of all Jeffersons, and its coinage was unknown to the collecting public for nearly three decades after it was struck. The first known auction appearance of an example was in Stack's Public Auction Sale (1/1993), lot 693, which included a cent-half dollar set of SMS 1964 coins. The cataloger wrote of the coins:

"Nearly all show evidence of die refinishing at the Mint. The strike on all the coins is far sharper than is seen even on the Special Mint Sets. We suspect that these were struck as an experiment to determine the sort of finish the Mint would use from 1965 to 1967."

The set was consigned by Lester Merkin, who is presumed to have acquired the pieces directly from Eva Adams, the Mint Director from 1961-1969. Today, fewer than two dozen 1964 SMS nickels are believed known, with a PCGS certified population of just 18 coins. None are listed at NGC. This piece is razor-sharp, with the characteristic faint die striations in the fields. Each side displays a blush of light golden toning, and the preservation is virtually flawless. Population: 6 in 68 Full Steps, 0 finer (4/16). NGC ID# 56E9, PCGS# 84170

PROOF JEFFERSON NICKELS

1960 Jefferson Nickel, PR69
Virtually Perfect Deep Cameo Specimen

4361 1960 PR69 Deep Cameo PCGS. The virtually perfect surfaces of this incredible Jefferson nickel show delicate hints of pale greenish-gold toning, but the sharply detailed, frosty design elements still contrast profoundly with the deeply reflective fields. The white-on-black cameo flash is stunning when this coin is tilted in the light. Population: 7 in 69 Ultra Cameo, 0 finer (4/16). NGC ID# 22YJ, PCGS# 94192

EARLY HALF DIMES

1792 Judd-7 Half Disme, VG Details Historic First-Circulating Federal Issue

- 4362 1792 Half Disme, Judd-7, Pollock-7, R.4 — Tooled — PCGS Genuine. VG Details.** The Mint Act of 1792 authorized the first Federal issue of the United States, and approximately 1,500 half dimes were struck even though the first Mint building was yet to be built. The coins were struck in the cellar of Philadelphia sawmaker John Harper. The importance of the event transcended the need for circulating coinage in the new nation — the mintage was insignificant in terms of satisfying the need for “hard money,” but it was of great importance as the first step in that direction. The fact that George Washington himself supplied the coin and bullion for the mintage and Thomas Jefferson took delivery of the half dimes when struck confirms the groundbreaking significance of the moment.

Among the 200 to 300 pieces that remain of the mintage, a few are pristine and Uncirculated — undoubtedly saved as souvenirs of the moment, or handed off to dignitaries both in the United States and abroad as a political gesture. Others actually circulated, and many of those are compromised by damage or excessive wear. A good many were holed for suspension, then later plugged. The present coin displays many abrasions and scratches, some of which were smoothed and removed to account for the net PCGS grade. The area by the eagle’s right (facing) wing shows the most overt smoothing. Pleasing old-silver color remains, and the remaining devices are relatively well-defined for the net VG level. Regardless of condition, a 1792 half disme is one of the most important keepsakes of the earliest days of the country and rightfully the subject of intense collector interest in any state of preservation.

1794 Half Dime, Choice XF Rare V-2, LM-2 Die Marriage

- 4363 1794 V-2, LM-2, R.5, XF45 PCGS.** This piece is evenly struck with strong central definition and complete dentils around the peripheries. Deep gunmetal-gray patina blankets the surfaces. This issue is highly popular as the first half dime coinage of the United States Mint. Production is estimated to have totaled 7,756 coins struck during the first quarter of 1795. NGC ID# 22ZU, PCGS# 38582 Base PCGS# 4250

1795 Flowing Hair Half Dime, AU53 Popular V-5, LM-8 Variety

- 4364 1795 V-5, LM-8, R.3, AU53 PCGS.** 3 berries left, 4 berries right, no berries under either wing. A popular Flowing Hair type coin. This example is softly struck on both sides, as often seen for the heavily die cracked variety. Golden-gray surfaces retain some mint luster, while the uneven strike renders some of the motifs sharply, and other parts of the design with virtually no detail at all. Marks and abrasions are few. Considerable eye appeal remains despite incompleteness at Liberty’s forehead, the lowest hair curls, and the eagle’s wings. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 Flowing Hair Half Dime, AU58 V-6, LM-9, Late Die State Example

- 4365 1795 V-6, LM-9, R.4, AU58 PCGS.** The LM-9 variety was part of a famous hoard of more than 100 Mint State 1795 half dimes discovered in the late 1870s, along with examples of the LM-8 and LM-10 varieties. While all ten varieties of Flowing Hair half dimes are scarce, the LM-8, 9, and 10 are somewhat more available in finer grades as a result of the hoard. This near-Mint LM-9 is struck from a late state of the dies, with a bold bisecting die crack from the rim above Y to the nose, face, and neck through the 7, to the bottom rim. A small cud exists at the junction of the crossbar and upright of the 7. A glass reveals bold die clashing on both sides of this sharply defined, attractively toned early half dime. A few small marks exist but no adjustment marks are present. Gold highlights add splendid eye appeal to the natural, warm-gray surfaces. PCGS# 38593 Base PCGS# 4251

1795 V-4a, LM-10 Half Dime, MS65
Late Obverse Die State
Prominent Rim Cud Above TY-Star 9

- 4366** 1795 V-4a, LM-10, R.3, MS65 NGC. The year 1795 was the second and final for the Flowing Hair motif. The eight 1795 15 Star obverse dies, used in 10 die pairings, were made before Tennessee joined the Union as its 16th state on June 1, 1796. The reported mintage for the 1795 half dimes is 10 times that of the 1794, making it the preferred choice for type collectors. LM-10 is a fairly plentiful variety. This is a desirable late-die-state example, referred to as V-4a in the Daniel Valentine reference, showing a prominent rim cud connecting TY and star 9. Glowing mint luster on both sides with rose-gold centers blends into a subtle interplay of delicate blue and violet shades at the rims of this stunning Gem. Both the obverse hair and eye and the eagle on the reverse show a razor-sharp wealth of sculptural detail. Census (all varieties included): 8 in 65 (1 in 65 ★ Prooflike), 13 finer (4/16).
Ex: Walling Collection Sale (Stack's, 3/1996), lot 239; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98111 (as PCGS MS64 CAC). NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

SEATED HALF DIMES

1840-O With Drapery Half Dime, MS64
The Sole-Finest Certified

- 4367** 1840-O Drapery MS64 PCGS. Design modifications to the half dime in 1840 included an entire reworking of the obverse portrait, with the primary difference being the addition of drapery to the field below Liberty's right (facing) elbow. This new With Drapery type was introduced at the New Orleans Mint after much of production needs for this denomination had been met, with the result that only 240,000 With Drapery coins were struck. By contrast, that facility produced 695,000 No Drapery half dimes before the transition.
The With Drapery variant is by far the scarcer of the two, and is a major series rarity in Mint State, regardless of grade. This Choice example is one of only three Uncirculated pieces reported at PCGS, and also stands as the sole finest With Drapery 1840-O half dime encapsulated by either major grading service (4/16). Liberty's head and the stars exhibit better than average detail, and satiny surfaces seem to glow beneath a patina of blended olive-gold and lavender-gray hues. A heavy die crack bisects the obverse from 7 to 1 o'clock, and a radial break extends from the reverse rim at 7 o'clock. NGC ID# 232X, PCGS# 4327

1845 Seated Liberty Half Dime, MS67
Vividly Toned Condition Rarity

- 4368 1845 MS67 PCGS.** This is a bold and beautiful Superb Gem condition rarity. The 1845 Seated half dime is available in lower Mint State grades, but the population declines significantly in Gem and finer condition. This piece displays frosty luster beneath shades of champagne, lilac, and aquamarine toning, with the latter hue most prevalent around the peripheries. Several thread-like strike-throughs appear on the obverse upon close examination. Population: 7 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 2337, PCGS# 4335

1859 Half Dime, MS67+
The Eliasberg-Gardner Coin

- 4369 1859 MS67+ PCGS. CAC. V-2.** Ex: Eliasberg. The Mint used a new obverse hub for half dimes in 1859, designed by Mint assistant engraver Anthony Paquet, showing slight differences including hollow star centers, thinner arms, and a flatter base that extends just beyond the foot to the right. Gold, evergreen, and coffee shades weave through the stars and date of this high-end Superb Gem. The reverse exhibits azure throughout, and the CAC approval attests to the visual appeal of this lustrous, near-Condition Census example. Population: 36 in 67 (24 in 67+), 5 finer. CAC: 15 in 67, 2 finer (5/16).
Ex: Eliasberg Collection (Bowers & Merena, 5/1996), lot 1006; purchased by Eugene Gardner from Joseph O'Connor (12/2003); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98162. NGC ID# 233W, PCGS# 4371

1860-O Half Dime, MS67
Coin Facts Plate Coin

- 4370 1860-O MS67 PCGS.** The plate coin for the 1860-O half dime page at PCGSCoinFacts.com. Light autumn-gold and sea-green toning adorns the margins of this exquisite Superb Gem. Intricately struck and thoroughly lustrous with essentially pristine surfaces. None are certified finer at either service. Population: 4 in 67, 0 finer (5/16). NGC ID# 2348, PCGS# 4378

1864 Half Dime, Semiprooflike MS67
Tied for Finest Certified

- 4371 1864 MS67 PCGS.** The 1864 half dime is elusive in Mint State, and this Superb Gem is a rare Condition Census example. Tied with two others as the finest at PCGS, this champagne-tinted Registry coin displays modestly reflective fields with prominent clash marks on each side. Most of the relief elements are sharp, the exceptions being the lower-left portion of the obverse rock and the upper-left portion of the reverse wreath. NGC ID# 234E, PCGS# 4384

1865 Half Dime, MS68
Sole Finest Certified
Ex: Gardner

- 4372 1865 MS68 NGC.** A single set of dies was employed to strike 13,000 half dimes in 1865. Silver coinage was virtually unseen in Eastern circulation during the Civil War, explaining the low mintage. The upper portion of Liberty is brilliant and contrasts markedly against the ice-blue toning that covers much of the obverse. The reverse exhibits a violet center surrounded by a thick band of blue. This visually impressive Superb Gem is made all the more desirable by its status as the single-finest certified example (4/16) along with the Gardner pedigree.
Ex: Boys Town and Mamiye Collections (Bowers & Merena, 3/1998), lot 516; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS67 NGC with CAC approval), lot 98178. NGC ID# 234G, PCGS# 4386

1866 Half Dime, Sharply Struck MS67
Among the Finest Known

- 4373 1866 MS67 PCGS.** Freckles of golden-brown and ocean-blue adorn the margins of this sharply impressed postwar Superb Gem. The fields display clashmarks but are otherwise pristine. A meager 10,000 pieces were struck, since silver coin was driven from circulation by unbacked fractional currency. Population: 4 in 67 (2 in 67+), 0 finer (5/16).
Ex: FUN Signature (Heritage, 1/2010), lot 655. NGC ID# 234J, PCGS# 4388

**1867 Half Dime, MS67+ ★
Single Finest at NGC**

- 4374 1867 MS67+ ★ NGC.** The 1867 is the key to the Seated Liberty half dime set thanks to its ultra-low mintage of 8,000 coins. One would have to go back to 1802 to find a smaller reported mintage of half dimes for a given year. Concentric rings of vivid color surround the central figure, transitioning from blue to violet, magenta, and gold. The aesthetic appeal is unbeatable, as affirmed by the Star designation. Clashing is visible throughout, with the interior outline of the wreath plainly seen in the right field. The reverse features a lustrous, silvery center encircled by crescents of auburn and blue-green. Reverse clashing is less evident, and a few scattered ticks are noted above LF of HALF. This MS67+ ★ representative is the sole finest non-Prooflike example at NGC. There is one MS67 at PCGS (4/16).
Ex: Boys Town and Mamiye Collections (Bowers & Merena, 3/1998), lot 519; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS65 NGC with CAC approval), lot 98181. NGC ID# 234L, PCGS# 4390

PROOF SEATED HALF DIME

**1858 Seated Liberty Half Dime, PR66
Few Seen Finer**

- 4375 1858 PR66 NGC.** The 2017 *Guide Book* gives a mintage of 300 pieces for the 1858 Seated Liberty half dime, in the first year of the Mint's commercial proof offerings. This delightful Premium Gem exhibits sharply detailed design elements and deeply mirrored fields on both sides. The impeccably preserved surfaces are enhanced by vivid shades of burnt-orange and cobalt-blue toning. Census: 13 in 66 (1 in 66★), 2 finer (5/16). NGC ID# 235N, PCGS# 4437

EARLY DIMES

**1796 JR-1 Dime, Pleasing XF45
Problem-Free and Original**

- 4376 1796 JR-1, R.3, XF45 NGC.** The first year of regular issue dimes is represented by six die pairs used to strike just 22,135 pieces. Obviously, the new Mint struggled with die damage. The JR-1 variety is seen on about half of the surviving examples. Struck from a middle state of the dies, this Choice XF example shows the 96 of the date recut southeast and, not unexpectedly, die clashing on both sides. Reddish-gold highlights visit the sharply defined bluish-gray surfaces. An excellent example of the first-year type, seldom seen in Choice collector grade and free of problems other than the normal Mint anomalies. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

**1797 16 Stars Dime, JR-1, VG10
Outstanding Color and Surfaces**

- 4377 1797 16 Stars, JR-1, R.4, VG10 NGC. CAC.** The usual die state, showing a heavy die break on the lower obverse that separates the date from the bust, but not so advanced that the date is unreadable. This JR-1 dime is evenly worn with pleasing olive-gray patina and problem-free surfaces. The obverse border dentils are complete, but the reverse dentilation is worn away. All peripheral legends are clear.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

1797 Draped Bust Dime, AU50
16 Stars, Pointed 9, JR-1

4378 1797 16 Stars, JR-1, R.4, AU50 PCGS. Variety JR-1 has a 16 star obverse and a Pointed 9 in the date. The additional star represents Tennessee's entry into the Union and was only used to strike a limited number of coins in 1797, making it a single-year type. This middle die state example features a sizeable die break at the lower obverse from the rim below star 2 to the rim in front of Liberty's bust. The Small Eagle reverse was last used in 1797, when 25,261 dimes were reportedly struck at the Mint. That figure likely includes an unknown number of coins dated 1796. Around 200 or so examples are believed extant in all grades.

This pleasing AU representative displays even steel and violet-gray patina with splashes of bluish-green coloration. Liberty's hair strands are razor-sharp, as are the eagle's wing and breast feathers despite a touch of friction. Several stars are recut and show inconsequential softness. The overall appeal is unquestionable. Population: 5 in 50, 18 finer (4/16). NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

1801 JR-1 Dime, AU50
High-Grade Rarity

4379 1801 JR-1, R.4, AU50 PCGS. The 1801 dime was reportedly struck to the extent of 34,640 coins. Breen wrote in his 1988 *Complete Encyclopedia*, "The date 1801 is the least rare of the 1800-4 group in worn condition, but both vars. are Ex. rare in VF or higher grades, and in mint state so rare that their existence was long controversial." Varieties JR-1 and JR-2 share a common obverse and are distinguished by the size of the A in STATES. The JR-1 or Wide A variant is more available than its counterpart, though only 200 to 250 pieces are believed extant, and they prove very rare this fine.

All 1801 dimes were struck from pitted dies, explaining the lackluster appearance of even high-grade examples. Design detail on this piece is typical for the issue. Each problem-free side features golden-gray hues with minimally distracting abrasions. An impressive AU Draped Bust dime that will be exceedingly difficult to improve upon. Population (both varieties): 4 in 50, 8 finer (4/16). NGC ID# 236J, PCGS# 38756 Base PCGS# 4471

**1804 Dime, Choice Fine
JR-2, 14 Stars Reverse
Draped Bust Key**

- 4380** 1804 14 Stars Reverse, JR-2, R.5, Fine 15 NGC. The 1804 is a much better date. The *Guide Book* mintage of 8,265 pieces is only a small fraction of its 1805 and 1807 successors. Two die marriages are known, and are of nearly equal rarity. They are separately collected due to differing reverse star counts. JR-2 is the mint-blundered variety with 14 reverse stars. This steel-gray example has bold obverse legends. Within E PLURIBUS UNUM, only the third U is faint. The tops of UNITED STATES show some fading, as do the left-side stars. The obverse has a few hair-thin marks but the overall eye appeal is impressive for the variety.
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 236P, PCGS# 38767 Base PCGS# 4475

BUST DIMES

**1823/2 Small E's Dime, MS64
JR-1, Gorgeous Original Surfaces**

- 4381** 1823/2 Small E's, JR-1 MS64 PCGS. CAC. Three die pairs are known for the 1823/2 dime, used to strike a modest mintage of 440,000 coins. The Small E's variety, JR-1, has the E in STATES positioned below the T. Gorgeous blue, gold, and violet patina embraces this Choice Capped Bust dime. Each side is well-detailed with areas of localized softness over stars 8 and 13, and at the centers. Original examples are extremely rare at this grade level, where CAC has seen two MS64 submissions and a single Gem finer. Population (all varieties): 10 in 64 (1 in 64+), 2 finer (4/16). NGC ID# 36ZH, PCGS# 38802 Base PCGS# 4498

**1835 Dime, JR-1, Sharp MS65
Semiprooflike Fields**

- 4382** 1835 JR-1, R.1, MS65 NGC. This early-die-state Gem is razor-sharp with modest reflectivity in the fields — an ideal type coin. Hints of champagne toning grace otherwise brilliant surfaces, and there are no significant abrasions. The 1835 Capped Bust dime is elusive this well-preserved, making the appeal of the piece even greater. Census (all varieties included): 22 in 65, 6 finer (4/16). NGC ID# 237F, PCGS# 38879 Base PCGS# 4527

SEATED DIMES

1838 Small Stars Dime, MS66+ Among the Finest Available

- 4383 1838 Small Stars, Doubled Die Reverse, F-101, FS-801, MS66+ PCGS.** Fortin-101, an early die state of the Small Stars variety. Doubling is evident on the O(NE), D(DIME), and some of the left wreath leaves. Iridescent blue-green toning blankets the surfaces of this impeccably preserved Superb Gem. The reverse features beautiful apricot-orange and lavender accents. A fully struck and virtually unmarked Small Stars dime that is simply a marvel to behold. Both Breen (1988) and Greer (1992) estimate that 30,000 Small Star dimes were struck. However, the frequency with which examples appear at auction has led Gerry Fortin to peg the mintage closer to 200,000 pieces. Such estimates have no bearing on the rarity of this piece, as few coins even approach the quality of this wonderful Premium Gem.

Purchased from Jason Carter (11/2004) to Eugene H. Gardner; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98229. NGC ID# 2TVT, PCGS# 145483 Base PCGS# 4569

1838 No Drapery, Large Stars Dime, MS66 Two Finer Examples at PCGS, Ex: Gardner

- 4384 1838 No Drapery, Large Stars, F-110, R.4, MS66 PCGS.** The 1838 No Drapery, Large Stars dime is a collectible first-year type, showing 13 hand-punched stars around the upper obverse border. Premium Gem is about the highest grade most collectors can realistically hope to locate, as finer examples are extremely rare and fetch ever-strong prices when they appear at auction. Sharply struck and attractive, this Premium Gem shows blended violet, lilac, blue, and orange hues over each carefully preserved side. Vibrant luster glistens through the patina, rounding out the appeal. Star 1 nearly touches the rock on this variety, and a die crack runs from the lower-right obverse rim below Liberty's sandal through the base to the lower gown. The reverse is a late die state of the Partial Drapery reverse with a weak die clash mark behind the E in DIME. Fortin rates the variety as an R.4. Population: 21 in 66, 2 finer (4/16). *Ex: Purchased by Eugene Gardner from Jason Carter (11/2001); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98231. PCGS# 537665 Base PCGS# 4568*

1888-S Dime, Lustrous MS66 Original Toning, Condition Census

- 4385 1888-S F-101, R.3, MS66 NGC. CAC.** A scarce issue in any Mint State grade. This Premium Gem CAC coin is among the finest at NGC. The strike is bold, and the frosty surfaces illuminate splashes of lavender-gold, gray, and aquamarine toning. Eye appeal is outstanding. It is almost impossible to imagine a finer example of this better San Francisco issue. Census: 4 in 66, 0 finer. CAC: 3 in 66, 0 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. PCGS# 538783 Base PCGS# 4701*

PROOF SEATED DIMES

1868 Dime, Toned PR66+ Cameo Only 600 Proofs Produced

- 4386 1868 PR66+ Cameo PCGS. CAC.** A relatively low mintage of only 600 proof dimes was accomplished in 1868, and surviving pieces exhibiting any degree of cameo contrast are elusive in any grade, with Gem or finer representatives genuinely rare. This coin is the sole Plus-graded of just five PR66 Cameo examples at PCGS, and there is only one numerically finer (5/16). Vivid sea-green, violet-orange, and royal-blue hues engulf each side, while the seemingly perfect surfaces complement crisply struck design elements. NGC ID# 23CS, PCGS# 84761

1874 Arrows Dime, Colorful PR66

- 4387 1874 Arrows, F-101, R.3, PR66 NGC.** The 1874 is one of only two proof issues in the Legend Obverse, Arrows at Date type. This PR66 NGC coin displays a bold strike and deeply mirrored fields. The obverse has lovely mint-green, gold, rose, and sea-green hues, while the reverse exhibits ocean-blue margins around an amber-orange and lavender interior. The obverse fields have a few faint marks hidden amid mint-made polishing lines. Census: 15 in 66, 2 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23DJ, PCGS# 539034 Base PCGS# 4770*

1883 Seated Dime, PR68 Cameo
Magnificently Toned, Finest at PCGS in Cameo

- 4388 1883 PR68 Cameo PCGS. Fortin-103.** Two varieties are known for the proof 1883 dime. Fortin-103 shows a level date positioned further right and a partial first S in STATES. This amazing specimen, from a mintage of 1,039 proofs, features pristine surfaces and a razor-sharp strike. Brilliant centers turn to apricot-orange, violet, and cobalt-blue at the borders on each side. The fields display mirrored reflectivity to contrast boldly with the richly frosted devices, earning the all-important Cameo designation. The field-device contrast is complete on both sides in spite of the magnificent toning, which dominates the borders yet yields to the immaculate silver and gold-toned centers. Population: 1 in 68 Cameo, 0 finer (5/16). NGC ID# 23D8, PCGS# 84780

1885 Seated Dime, PR68 Cameo
Colorful, Deep Mirrors

- 4389 1885 PR68 Cameo NGC. F-101, R.3.** This beautiful proof Cameo is among the finer-known representatives of this late-series Seated dime issue. The strike is incomplete at Liberty's foot but razor-sharp elsewhere. The devices contrast strongly against the mirrored fields. Light golden hues encompass the central regions, yielding to violet and deep russet around the peripheries. Census: 7 in 68 Cameo (3 in 68 ★ Cameo), 1 finer (5/16). NGC ID# 23DA, PCGS# 84782

1885 Seated Liberty Dime, PR68
Strong Registry Set Contender
Ex: Kaufman

- 4390 1885 F-101, R.3, PR68 NGC. Ex: P. Kaufman.** Olive-blue highlights around the obverse periphery and throughout the reverse enliven the otherwise antique-copper appearance of those areas. The center of the obverse, however, is toned in reddish-gray hues. Both sides reveal the expected reflectivity in the fields at direct angles of observation, and the razor sharp strike also confirms this coin as a proof. Like the 1884 (to which it compares favorably in terms of rarity), the 1885 is an otherwise common date that becomes decidedly rare at the finer levels of Superb Gem preservation. Census: 3 in 68, 0 finer (5/16).
Ex: Central States Signature (Heritage, 5/2003), lot 5927; Baltimore Signature (Heritage, 7/2003), lot 6597. NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

1886 Seated Dime, PR66 Deep Cameo
Finest Deep Cameo at Either Service

- 4391 1886 PR66 Deep Cameo PCGS. F-103.** Three-dimensional cameo contrast exists between the snow-white devices and the glassy, deep-mirrored fields. A glittering, brilliant Premium Gem in Deep Cameo format — the only such coin at either service — the coin's nearly faultless surfaces are exceeded only by the sharpness of the strike, which is full to the max. The eye appeal is outstanding. Population: 1 in 66 Deep Cameo, 0 finer (5/16). PCGS# 94783

BARBER DIMES

1893-O Dime, Gorgeous MS67
Ex: Gardner, Condition Census Coin

- 4392 1893-O MS67 PCGS.** The 1893-O dime, from a mintage of nearly 1.8 million pieces, is difficult to locate in all levels of preservation. Indeed, all O-mint Barber dimes produced from 1893 to 1897 are semikey and key-date issues. Both sides of this gorgeous Superb Gem 1893-O dime are awash with strong mint luster. Light reddish-gold toning gravitates to the obverse border, ceding to deeper hues at the reverse margin, where it is joined with cobalt-blue and purple. The design elements are sharply impressed, including the lower left portion of the reverse wreath. Impeccably preserved surfaces round out the outstanding eye appeal. Population: 3 in 67, 1 finer (5/16). Ex: *David Lawrence Rare Coins* (12/2009); *Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015, as MS67 NGC), lot 98352. NGC ID# 23DR, PCGS# 4801

1895 Dime, Frosty MS66+
Low-Mintage Key Issue

- 4393 1895 MS66+ PCGS. CAC.** Both sides of this Premium Gem dime are thickly and evenly coated with a frosted overlay of grayish patina and a slight tinge of charcoal and gold. The strike is uniformly bold throughout. The only distraction is a tiny, hair-thin luster graze appearing on the cheek when the coin is tilted at a certain angle. While picayune, this minor mark appears to have limited an even finer grade. On a positive note, it may help to identify the coin for future catalogers. The 1895 is a key date in the Barber dime series, from a mintage of only 690,000 circulation strikes. It is the lowest-mintage Barber dime struck in the Philadelphia Mint, and the only P-mint issue with a mintage lower than 1 million coins. Ex: *Central States Signature* (Heritage, 4/2008), lot 2268; *David Lawrence Rare Coins* (4/2009) to *Eugene H. Gardner*; *Eugene H. Gardner, Part IV* (Heritage, 10/2015), lot 98355. NGC ID# 23DV, PCGS# 4806

1897-O Dime, Peripherally Toned MS66+
Lovely Eye Appeal

- 4394 1897-O MS66+ PCGS. CAC.** The 1897-O Barber dime is a slightly better date in Uncirculated condition. This high-end Premium Gem is conditionally rare, and finer coins are exceedingly so. The strike is bold, and each side displays satiny, original luster. Light champagne interiors cede to natural sea-green, amber, gold around the peripheries. Population: 13 in 66 (1 in 66+), 5 finer. CAC: 6 in 66, 4 finer (4/16). NGC ID# 23E4, PCGS# 4813

1900 Barber Dime, Colorful MS67
Strong Eye Appeal, Registry Set Opportunity

- 4395 1900 MS67 PCGS. CAC.** This final-year 19th century issue typically comes sharply detailed with attractive luster, as displayed on this Superb Gem. A generous mintage of 17.6 million coins makes it a relatively available date up to and including Gem condition. Premium Gems are rare, and MS67 coins are extremely rare and highly sought-after. This Superb Gem is immensely appealing with deep blue and rose peripheral toning, and lighter gold shading toward the centers. Blazing luster shines through the patina, illuminating essentially unmarked fields. Although the coin is tied with a small group for the finest certified, it must be considered among the finest of the lot because of its strong visual appeal. Population: 6 in 67 (1 in 67+), 0 finer. CAC: 8 in 67, 0 finer (5/16). Ex: *FUN Signature* (Heritage, 1/2002), lot 5927; *FUN Signature* (Heritage, 1/2005), lot 4024; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98291. NGC ID# 23EC, PCGS# 4821

**1900-S Barber Dime, MS66
A Four-Owner Coin**

4396 1900-S MS66 PCGS. CAC. Ex: Eliasberg. Aside from the delicate gold toning over satiny silver luster, this sharply defined coin indicates the quality craftsmanship at the San Francisco Mint more than 100 years ago. Both sides enjoy bold design motifs and pristine surfaces. Minuscule die defects appear inside the lower loop of each 0 in the date. J.M. Clapp purchased this coin directly from the San Francisco Mint. The Clapp Estate sold his collection to Louis Eliasberg, and Gene Gardner was the successful bidder at the Eliasberg Collection sale in 1996. Just four collectors have owned this coin since the day it was made in 1900!

Purchased directly from the San Francisco Mint; J.M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 5/1996), lot 1268; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98293. NGC ID# 23EE, PCGS# 4823

**1909-S Barber Dime, MS67
One of the Finest Known**

4397 1909-S MS67 PCGS Secure. CAC. With a mintage of just 1 million pieces, the 1909-S Barber dime is a slightly better date in the upper circulated grades and becomes genuinely scarce in Mint State. Gem or finer representatives are rarely seen. This magnificent Superb Gem is tied with just two others as the finest at PCGS; the finest at NGC are only three MS66 coins (5/16). The strike is boldly executed, and the frosty surfaces yield luminous luster. Vivid lemon-gold and mint-green peripheral hues frame dusky lavender-gray centers, with no mentionable abrasions observed. This is one of two distinct Superb Gems we have ever handled, finer than the Lily Nicole specimen. The Registry competitor should not let this piece pass by. CAC: 2 in 67, 0 finer (5/16).

Ex: ANA Signature (Heritage, 8/2007), lot 1634; Los Angeles Signature (Heritage, 8/2009), lot 510. NGC ID# 23FE, PCGS# 4853

PROOF BARBER DIME

**1895 Dime, PR68 Cameo
Pristine Surfaces, Deeply Contrasted**

4398 1895 PR68 Cameo NGC. Each side of this marvelous Superb Gem Cameo Barber dime is brilliant and deeply contrasted with seemingly limitless fields, though blushes of golden-orange patina grace Liberty's thickly frosted portrait. As one would expect of a proof in this remarkable grade, the surfaces are pristine and show razor-sharp detail on the devices. The Mint struck 880 proofs and issued them in sets alongside the famous Morgan dollar proofs of that year, furthering their interest factor. Census: 5 in 68 Cameo, 0 finer (4/16). NGC ID# 23G8, PCGS# 84879

MERCURY DIMES

**1917-D Dime, MS65 Full Bands
Elusive This Well-Preserved**

4399 1917-D MS65 Full Bands PCGS. This Gem Full Bands 1917-D Mercury dime is in a scarcely seen level of preservation. The strike is well-executed, and the satiny surfaces display a blush of rose-gold toning. A few trivial grazes on Liberty's cheek are not out of line for the grade. Population: 40 in 65 Full Bands, 14 finer (5/16). NGC ID# 23H3, PCGS# 4913

**1920-S Dime, MS65 Full Bands
Peripherally Toned, Frosty Centers**

4400 1920-S MS65 Full Bands PCGS. Discerning collectors will have little trouble locating an acceptable Full Bands representative of the 1920-S dime. However, widespread demand puts tremendous pressure on Choice and finer coins. Gems like this are conditionally rare. Dappled russet patina around the edges cedes to brilliant, fully frosted centers, where the motifs display bold detail. A hint of the usual softness occurs peripherally, including 20 in the date. Population: 34 in 65 (1 in 65+) Full Bands, 12 finer (4/16). NGC ID# 23HD, PCGS# 4933

**1920-S Dime, MS66 Full Bands
Tied for Finest at NGC**

- 4401 1920-S MS66 Full Bands NGC.** In Full Bands, the 1920-S is a scarce date above MS64. This Premium Gem rarity is tied with five others as the finest at NGC (5/16). The strike is fully rendered, and the dies show satiny luster with finely textured fields that still have die finishing lines visible. The surfaces are essentially untoned and devoid of mentionable abrasions. A registry-grade condition rarity. NGC ID# 23HD, PCGS# 4933

**1921 Dime, MS65 Full Bands
Eye-Catching Luster**

- 4402 1921 MS65 Full Bands NGC. CAC.** Glistening, frosty luster illuminates brilliant, Gem-quality surfaces on this key-date Mercury dime. Despite minor die erosion in the peripheral fields, the strike is bold. The fasces bands are fully rounded. The low 1.23 million-coin mintage of the 1921 dime is a result of silver dollar production. Beginning in February 1921, most of the Mint's resources were transferred from subsidiary denominations to silver dollar coinage under the dictates of the Pittman Act of 1918. Census: 60 in 65 Full Bands, 28 finer. CAC: 15 in 65, 17 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HE, PCGS# 4935

**1921-D Dime, MS66
Nearly Full Bands Definition**

- 4403 1921-D MS66 NGC. CAC.** A conditional rarity, this Premium Gem 1921-D Mercury dime is among the finest without Full Bands at NGC. The strike is bold throughout the peripheries, and the preservation is exceptional, but the fasces bands are not fully separated. A blush of olive-gold toning graces each side, much more deeply on the reverse. Census: 10 in 66, 0 finer. CAC: 4 in 66, 1 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HF, PCGS# 4936

**1921-D Dime, MS65 Full Bands
Few Available This Fine**

- 4404 1921-D MS65 Full Bands NGC. CAC.** A sharply struck Gem example of this key Denver issue, showing satin luster beneath dappled olive-gold and aquamarine toning. Full Bands examples of this date are seldom seen in MS65 and rarely finer. With a mintage of barely more than 1 million coins, the 1921-D is the scarcest regular issue in the series after the 1916-D. Census: 39 in 65 (1 in 65+) Full Bands, 17 finer. CAC: 11 in 65, 9 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HF, PCGS# 4937

**1921-D Dime, MS65+ Full Bands
Exemplary Quality**

- 4405 1921-D MS65+ Full Bands NGC. CAC.** One of only two Plus-graded Gems at either service, this high-end 1921-D Mercury dime displays full design rendering throughout the central devices and peripheral legends. Glistening, brilliant luster illuminates the fields, and the eye appeal is outstanding. A tiny tick on Liberty's cheek appears to be the only surface imperfection. Census: 41 in 65 (2 in 65+) Full Bands, 17 finer. CAC: 11 in 65, 9 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HF, PCGS# 4937

**1925-D Dime, MS66 Full Bands
High-Grade Rarity**

- 4406 1925-D MS66 Full Bands NGC. CAC.** Most Full Bands examples of the 1925-D Mercury dime grade only MS63 or MS64. Gems are scarce, and this Premium Gem is conditionally rare. Metal flow lines in the fields denote a late die state, but the central sharpness is not overly affected — the fasces bands remain fully separated. A major rarity with the CAC green label. Census: 14 in 66 Full Bands, 4 finer. CAC: 6 in 66, 2 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HN, PCGS# 4951

**1927-S Dime, MS65 Full Bands
Brilliant Luster, Sharp Devices**

4407 1927-S MS65 Full Bands NGC. CAC. Like other denominations of this year and mint, the 1927-S dime is elusive with a sharp strike. Such pieces are especially scarce in Gem or finer condition. This CAC-endorsed MS65 coin displays impressively bold detail and brilliant, satiny luster. Light clash marks from the reverse olive branch are seen in the left obverse field along Liberty's profile. Census: 4 in 65 Full Bands, 2 finer. CAC: 3 in 65, 7 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HW, PCGS# 4965

**1928-S Dime, MS66+ Full Bands
Only One Coin Finer at NGC**

4408 1928-S MS66+ Full Bands NGC. CAC. Small Mintmark. One of two Plus-designated Premium Gems in Full Bands at NGC and PCGS combined. The CAC green label further enhances the appeal. This 1928-S dime is boldly struck and brilliant with exceptional preservation. Faint metal flow lines in the fields mask light clash marks around Liberty's profile. This issue is something of a rarity so well-preserved. Census: 12 in 66 (2 in 66+) Full Bands, 1 finer. CAC: 8 in 66, 3 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23HZ, PCGS# 4971

**1930-S Dime, MS67 Full Bands
Registry Set Quality**

4409 1930-S MS67 Full Bands PCGS. This frosty, untoned 1930-S dime is among the finest certified, showing sharp Full Bands definition and exceptional eye appeal. A single small tick on Liberty's jaw appears to be all that precludes virtual perfection. The 1930-S is an available date in Full Bands, but Superb Gem examples are rarely seen. Population: 18 in 67 (3 in 67+) Full Bands, 0 finer (4/16). NGC ID# 84NT, PCGS# 4981

**1945-S Micro S Dime, MS67 Full Bands
Toned Registry Coin**

4410 1945-S Micro S, FS-512, MS67 Full Bands NGC. Splashes of teal accent champagne and olive-gold toning on each side of this Superb Gem Full Bands example, giving character to the frosty surfaces. The strike is bold, and there are no mentionable abrasions. The Micro S 1945-S Mercury dime is a widely popular *Guide Book* variety but is seldom seen in Superb Gem Full Bands. Census: 6 in 67 Full Bands, 0 finer (4/16). NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

**1936 Dime, Beautifully Toned PR67+
First Proof Issue in the Series
Ex: Gardner**

4411 1936 PR67+ PCGS. The year 1936 marks the resumption of proof coinage after a two-decade-long hiatus. A total of 4,130 Mercury dime proofs were made. This Superb Gem survivor is outstanding. Only the upper-right obverse maintains its brilliance, while the remaining surfaces boast wonderful purple, magenta, sunburst-orange, and golden patina. Minor flecks are scattered over each side, but they fail to diminish the eye appeal. Comparable Superb Gem proofs are scarce, especially with such beautiful toning, and finer coins are extremely rare. Population: 71 in 67 (3 in 67+), 2 finer (5/16). Ex: Purchased by Eugene Gardner from Aspen Park Rare Coins (11/2006); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98381. NGC ID# 27DG, PCGS# 5071

1936 Mercury Dime, PR68
Extraordinary Brilliant Proof, None Finer

4412 1936 PR68 PCGS. Just seven dates comprise the entire proof series for Mercury dimes, making for intense competition among Registry Set enthusiasts and series specialists to obtain the finest examples known. Coins that achieve the finest grade invariably display characteristics of not only high quality, but a certain “éclat” — a flash of brilliance to raise their visual impact above all others.

This extraordinary Superb Gem proof offers the expected pristine surfaces and full strike, with a faint rainbow iridescence that is discerned at the obverse border. The silver surfaces show no imperfections or compromise whatsoever. Just four pieces have attained such recognition by PCGS and NGC combined. A prize for the connoisseur in search of only the finest Mercury dime proofs. Population: 2 in 68, 0 finer (4/16). NGC ID# 27DG, PCGS# 5071

ROOSEVELT DIMES

1948-S Dime, MS68 Full Bands
Tied for Finest Certified

4413 1948-S MS68 Full Bands PCGS. A conditionally rare Registry coin, tied with just two other MS68 Full Bands examples as the finest at PCGS (4/16). The strike is bold, and the frosty luster is beautifully preserved. The reverse and much of the obverse are brilliant, although a crescent of crimson, forest-green, and golden-russet toning graces the right obverse border. Eye appeal is excellent. NGC ID# 23KT, PCGS# 85090

1950 Dime, MS68 Full Bands
Vividly Toned Obverse, Tied for Finest

4414 1950 MS68 Full Bands PCGS. This remarkable Registry-grade 1950 Roosevelt dime displays a sharp strike and frosty, unabraded luster. Vivid forest-green and crimson border toning gives the obverse significant eye appeal, while the reverse is largely brilliant. Roosevelt’s nose and chin show mint-made “shelf” marks, induced when the coin was ejected from the press. Population: 4 in 68 Full Bands, 0 finer (4/16). NGC ID# 23KX, PCGS# 85094

PROOF ROOSEVELT DIME

1951 Roosevelt Dime, PR67 Deep Cameo

4415 1951 PR67 Deep Cameo PCGS. The 1951 proof Roosevelt dime claims a mintage of 57,500 pieces, but examples with Deep Cameo surfaces are seldom encountered. This spectacular Superb Gem displays sharply detailed, frosty design elements and profoundly contrasted deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 4 in 67 Deep Cameo, 3 finer (5/16). Population: 4 in 67 Deep Cameo, 3 finer (5/16). NGC ID# 27EK, PCGS# 95226

PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, PR65 First-Year Proof

- 4416 1875 PR65 PCGS.** This attractive Gem exhibits well-detailed design elements and deeply reflective fields, under pleasing shades of cerulean-blue and greenish-gold toning. The surfaces are well-preserved and overall eye appeal is outstanding. Only 1,200 proof examples were struck in 1875, the first year of the denomination. Population: 20 in 65, 13 finer (5/16). NGC ID# 27GZ, PCGS# 5303

1875 Twenty Cent, PR64 Cameo Attractively Toned With Pleasing Contrast

- 4417 1875 PR64 Cameo PCGS. BF-1, R.1.** Champagne and lavender hues grace the mirrored fields of this Cameo Choice proof 1875 twenty cent piece. Both sides shows measurable contrast, although the reverse is less toned-over. The 1875 proof is an available issue in most grades, but Cameos are elusive. This piece is highly appealing for the grade. Population: 20 in 64 Cameo, 15 finer (4/16). NGC ID# 23X7, PCGS# 85303

1876 Twenty Cent, Colorful PR64 Sharp, Outstanding Eye Appeal

- 4418 1876 PR64 NGC. CAC. BF-2, R.2.** A comfortably affordable median grade for this proof twenty cent issue, but on this piece showing far greater eye appeal than is typical. The coin shows a bold strike and watery fields that display splashes of rose-gold, mint-green, lavender, and ocean-blue toning. Frosty design elements offer modest cameo contrast even through the rich patina. The 1876 proof is in demand among date collectors due to the scarcity of high-grade circulation strikes of this year. Census: 72 in 64, 36 finer. CAC: 10 in 64, 9 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27H3, PCGS# 5304

1877 Twenty Cent Piece, PR65 Rarest Proof-Only Date

- 4419 1877 PR65 NGC. BF-1, R.3.** Cherry-red, olive-green, and ocean-blue patina invigorates this precisely struck and satiny Gem. Free from evident flaws, and scarce due to a scant production of 510 pieces. The field reflectivity is consistent aside from a muted area on the right obverse. Commercial mintages of the denomination were curtailed after two years, purportedly due to confusion with quarters. The final two years of the series, 1877 and 1878, are proof-only. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent, Gem Proof Desirable Proof-Only Date

- 4420 1877 PR65 NGC. CAC. BF-1, R.3.** The 1877 is the rarer of the two proof-only dates for the briefly issued twenty cent series. Just 510 pieces were produced, and Gems are rare. This fully struck and coruscating specimen displays dappled honey-gold, rose-red, ice-blue, and lime-green patina. CAC Census: 5 in 65, 7 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent Piece, PR64 Cameo Only 510 Pieces Struck

- 4421 1877 PR64 Cameo NGC.** The 1877 twenty cent piece is a challenging proof-only issue, from a minuscule mintage of 510 pieces. Some of these coins went unsold, to be melted after the end of the year. Perhaps as much as 60% of the mintage survives today because the coins were originally distributed to collectors who carefully preserved them over the years. Still, the 1877 is seldom found in high grade, with cameo surfaces. The present coin is an attractive Choice example, with sharply detailed design elements in most areas. The top of the eagle's legs show some minor incompleteness, due to lapping. A faint die crack connects most of the stars on the right. The deeply reflective fields contrast boldly with the frosty devices. Census: 23 in 64 Cameo (1 in 64★ Cameo), 27 finer (5/16). NGC ID# 27H4, PCGS# 85305

**1878 Twenty Cent Piece, PR64
Final-Year, Proof-Only Key**

- 4422 1878 PR64 NGC. CAC.** The Mint struck only 600 twenty cent pieces in 1878, all in proof format, to satisfy collector demand. The denomination was discontinued entirely the following year. This impressive Choice example offers well-detailed design elements and deeply reflective fields that show few signs of contact. Highlights of greenish-gold and cerulean-blue toning add to the outstanding eye appeal.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

**1796 B-1 Quarter, Good 6
Famous Numismatic Rarity**

- 4423 1796 B-1, R.4, Good 6 NGC.** B-1 is the first regular issue die variety of the quarter denomination. It is scarcer than its B-2 successor, and significant as an example of the one-year Small Eagle type. The present example has distinct stars and legends. The obverse dentils are generally sharp, while the reverse dentils are worn. No marks are noticeable, though both sides are lightly hairlined and the coin appears slightly wavy. Open areas are stone-gray, while obverse design crevices display tan-brown toning.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RA, PCGS# 38919 Base PCGS# 5310

**1796 B-2 Quarter, Good 6
Key Early Silver Type**

- 4424 1796 B-2, R.3, Good 6 NGC.** Tompkins Die State 2/1. The 1796 quarter is a rare single-year type with a meager mintage of 6,146 pieces. This lightly hairlined cream-gray example appears unabraded, since the unobtrusive parallel lines near OF and the eagle's head were undoubtedly on the planchet prior to the strike. The date is bold and the legends are fully readable, although a few letters in UNITED STATES OF are somewhat faint.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

**1796 B-2 Quarter, Fine 15
Collectible Small Eagle Type Coin**

- 4425 1796 B-2, R.3, Fine 15 PCGS.** Tompkins Die State 1, obverse unlapped. In 1796, the bulk of the silver bullion deposited at the Mint was in the form of ingots, but with varying fineness. The tedious process of refining and assaying the bullion to legal coinage standards hindered the early Mint's efficiency. Silver coinage that was accomplished in 1796 was largely of dollars, in accordance with the orders of depositors, and only token quantities of the dimes, quarters, and halves were struck. With the young American economy operating almost exclusively on Spanish silver coinage, direct commercial need for small denomination federal silver was minimal if existent at all. Of the 6,146 quarter dollars struck in 1796, many were saved in Mint condition as examples of the first U.S. coinage of that denomination. Others circulated, sometimes extensively. Surviving examples in all grades are among the most sought-after United States quarters known.

This eye-appealing Fine 15 example displays an even strike and grade-consistent wear. Olive-gray toning blankets both sides, delivering an old-time appearance that many collectors actively seek but seldom find. There are no mentionable imperfections. An outstanding Small Eagle type coin. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

1805 Quarter, B-2, AU50
Attractively Toned Type Coin

4426 1805 B-2, R.2, AU50 NGC. CAC. Tompkins Die State 5/2, showing a heavy retained cud at stars 10 through 13; the reverse is heavily clashed. B-2 is a fairly plentiful variety overall but elusive in XF and finer condition. The present AU CAC coin will capture type collector attention. Light high-point friction gives the relief elements light grayish patina, while the fields are partially reflective with gold, olive, green, and lavender-gray toning. The strike is even and well-centered but weak above the eagle's head on the reverse. A swath of struck-in die grease is seen from the ICA in AMERICA to the TED in UNITED. A pleasing Draped Bust quarter with old-time appeal.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313

1806/5 B-1 Quarter, MS64+
Repurposed Dies of 1805 (B-4)

4427 1806/5 B-1, R.2, MS64+ PCGS. CAC. Before the obverse and reverse dies of 1805 Browning-4 were reused in 1806, a 6 was punched over the 5 in the obverse die, creating this overdate variety. There were only a few instances when previously used dies were modified for further coinage and re-annealed. Others include 1806/5 half dollars, and similar quarter eagles. The reason for such modification of previously used dies may have been a lack of available die steel, but why didn't the Mint simply continue using the unmodified dies as was done so often in the early days of Philadelphia Mint operations? The 1806/5 B-1 quarter is a plentiful variety, although few survive as fine as this example. The central details are sharp with the usual peripheral weakness. Both sides exhibit Choice surfaces beneath a speckling of light, golden-brown toning. Population : 5 in 64 (2 in 64+), 3 finer (4/16). NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

BUST QUARTERS

1822 Capped Bust Quarter, AU Details
Rare 25 Over 50, B-2 Variety

4428 1822 25 Over 50C, B-2, R.5 — Improperly Cleaned — NGC Details. AU. A modest mintage of 64,080 Capped Bust quarters was accomplished in 1822, in four different warrants delivered throughout the year. Only two die varieties are known for the date. This coin represents the rare B-2 variety, easily identified by the blundered 25 over 50 in the denomination. Die evidence suggests the B-2 coins were struck after their B-1 counterparts. Steve Tompkins believes Warrant number 905, including 8,572 quarters, consisted of B-2 coins (and possibly some B-1's) as these coins were delivered on December 20, 1822. The blundered reverse die was actually engraved in 1818, but was never used until 1822.

The present coin is an attractive specimen that shows just a touch of wear on the well-detailed design elements. The lightly abraded surfaces display pleasing shades of lavender and pale gold toning, but the luster has been dimmed by a light cleaning, long ago. A thin scratch along Liberty's jaw is the only mark of note.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 4E53, PCGS# 38970 Base PCGS# 5333

1822 Capped Bust Quarter, MS65
Sought-After B-2, 'Blundered Reverse' Variety
Tied for Finest at PCGS

4429 1822 25 Over 50C, B-2, R.5, MS65 PCGS. A small mintage of 64,080 Capped Bust quarters was struck in 1822, with two die varieties known for the date. This coin represents the scarcer B-2 variety, easily recognized by the blundered 25/50 denomination on the reverse. This blundered reverse, attributed to Chief Engraver Robert Scot by Walter Breen, is one of the most famous die cutting errors in American numismatics.

Research by Steve Tompkins indicates the reverse die was actually produced in early 1818, but never used until 1822. The number punches are from the same set as those used in 1818, and the size and number of dentils is consistent with coins from that period. The master die incurred some damage on the underside of the scroll in 1818, and the eagle's claw broke off the master hub in 1919, features that show on all dies cut after those dates, but do not appear on this coin. It seems safe to assume that the elderly Scot, who would pass away the following year and had notoriously weak eyesight, produced this die in 1818, along with the seven reverse dies that were actually used that year, and set it aside because of the defect. The die was used to strike a small number of coins in 1822, possibly the 8,572 pieces in Warrant number 905, delivered on 12/20/1822. It was resurrected in 1828 to strike the B-3 die marriage of that year. The obverse die was previously used to strike the B-1 variety of 1822. Curiously, both proof and business-strike examples of the B-2 variety are known.

Perhaps because the B-2 is so scarce, early catalogers seem to have overlooked the blundered reverse. It is not mentioned in Haseltine's Type Table in 1881, the first serious attempt to classify the series by die variety. Philadelphia numismatist John Colvin Randall, who may have done much of the research for the Type Table, had identified two varieties of the 1822 quarter by the time he sold his collection through W. Elliot Woodward in 1885, though he did not specifically mention the blundered reverse. One of his coins was purchased by T. Harrison Garrett and later identified as the B-2 variety, when it was sold in 1980. Present-day collectors prize examples of the distinctive blundered reverse, with recent sales including the MS66 NGC specimen that realized \$195,500 in lot 564 of the Palm Beach Signature (Heritage, 3/2006). PCGS has graded five examples of the B-2 in Mint State grades, with this coin tied with the Gene Gardner MS65 specimen as the finest seen at that service. NGC has graded only three examples of the B-2 in Mint State grades, through their Variety Plus program, one in MS63, one in MS65, and the Eliasberg/Palm Beach Signature coin in MS66 (4/16).

The present coin is a delightful Gem, with well-detailed design elements that show just a touch of the usual softness on the stars and eagle's talons. Attractive shades of lavender-gray, powder-blue, and golden-brown toning enhance the terrific eye appeal, with vibrant mint luster underneath. The surfaces are immaculately preserved. This coin should find a home in the finest collection or Registry Set. NGC ID# 4E53, PCGS# 38970 Base PCGS# 5333

1825/4/(2) B-2 Quarter, Attractive MS64
Unrecognized Prooflike Fields

Robert Patterson, Mint Director 1806-1824

4430 1825/4/(2) B-2, R.2, MS64 NGC. Alternatively called an 1825/4 or 1825/3 overdate, the likelihood that the true underdigits are a 4 and a 2 is strong, making the correct overdate an 1825/4/2. The present richly toned example is struck from an early state of the dies, with much prooflikeness in the fields beneath the deep toning. Viewed at the proper angle, shades of cobalt blue, lavender, and rose-gold suggest longtime album storage. The strike is a bit soft on some high points but all of the stars are sharp. This attractive, original near-Gem quarter approaches the Condition Census for the variety and is sure to please the most perceptive bidder. Census: 8 in 64, 5 finer (4/16). NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

PROOF BUST QUARTER

1820 Capped Bust Quarter, PR64, B-4
Only Known Proof of This Variety
Ex: Earle / Norweb

4431 1820 B-4, Small 0, unique as a proof, PR64 PCGS Secure. CAC. Ex: Norweb. Before the Mint began their program of commercial proof offerings in 1858, no records were kept of how many proof coins were made during any particular year. In the early days, before about 1840, proofs were struck whenever some government official, such as the Secretary of State, requested specimen coins for diplomatic presentations, or when well-connected collectors, like Robert Gilmore, Jr., made special arrangements to procure the coins for their collections. As we understand the process today, when the Mint received these orders, the workmen polished a business-strike die, perhaps polished specially selected planchets, and struck the desired coins on the screw press normally used to produce medals. Thus, if the Mint received requests for proofs at different times during the year, they were struck from whatever dies were on hand at the time, resulting in several different die varieties of proof coins of the same date and denomination. This is the case for the extremely rare proof quarters of 1820.

Only four examples of the 1820 Capped Bust proof quarter are known today, representing three different die varieties. The coin offered here is an example of the B-4 variety, with a small 0 in the date and small obverse stars. The same reverse die was used on the 1821 B-1 and B-3 varieties, and die state evidence suggests the B-4 business-strike coins were actually struck in 1821, after these other two emissions. This single proof example may have been struck in 1821 as well, if no suitable 1821-dated dies were available.

The present coin possesses an unbroken pedigree over the last century, at one time being a highlight of such celebrated gatherings known as the George Earle Collection and the famous collection of Ambassador and Mrs. R. Henry Norweb. In the Norweb Collection, this coin was accompanied by a remarkable specimen of the 1820 B-2 variety that Walter Breen believed was a one-sided proof, but that coin has now been certified as an MS64 business-strike by NGC. Breen also thought the present coin might be a one-sided proof because of some frosty luster on the reverse, but PCGS has determined this coin is definitely a proof striking.

This coin exhibits a stunning play of colors, with vivid shades of iridescent champagne-gold, cerulean-blue, and lavender patina blanketing the pleasing surfaces of both sides. The fields display areas of bright reflectivity under the toning. Some evidence of die rust can be seen in the obverse field near star 3, and on the reverse near the lowest leaves, adding credence to the idea that the coin was struck in 1821. The devices are sharply detailed throughout, adding to the incredible visual appeal. This combination of extreme rarity, high technical grade, and spectacular aesthetic appeal, with great historic interest and an extensive pedigree, makes this coin one of the most impressive offerings of the current sale. Population: 1 in 64, 2 finer (4/16).

Roster of 1820 Proof Quarters

- 1. PR66 PCGS. B-1.** Long Beach Signature (Heritage, 9/2005), lot 2639, which realized \$218,500 (as PR67 NGC); D. Brent Pogue Collection, Part I (Stack's/Bowers, 5/2015), lot 1061, which realized \$188,000.
- 2. PR64 NGC. B-1.** Auction '89 (Superior, 7/1989), lot 566; Long Beach Signature (Heritage, 5/2008), lot 306, realized \$97,750.
- 3. PR63 uncertified. B-2.** National Numismatic Collection, Smithsonian Institution, formerly in the Mint Cabinet.
- 4. PR64 PCGS. B-4.** George Earle Collection (Henry Chapman, 6/1912), lot 3052; Hillyer C. Ryder; Wayte Raymond; Louis Eliasberg duplicates, (New Netherlands, 6/1957), lot 1146; Norweb Collection (Bowers and Merena, 3/1988), lot 1532; Auction '90 (Superior, 8/1990), lot 1069; Baltimore ANA (Heritage, 7/1993), lot 5246; Whitney P. Summerland Collection (Bowers and Merena, 3/1994), lot 1245; Pre-Long Beach Elite Auction (Superior, 9/2008), lot 180; Philadelphia Signature (Heritage, 8/2012), lot 5114; Regency Auction XIII (Legend, 9/2015), lot 117. **The present coin.**

Additional Appearances:

A. Brilliant Proof. B-1. Thomas Cleneay Collection (S.H.& H. Chapman, 12/1890), lot 1330.

B. Brilliant Proof. B-1. Richard B. Winsor Collection (S.H.& H. Chapman, 12/1895), lot 592.

C. Proof. B-1. George Earle Collection (Henry Chapman, 6/1912), lot 3051.

D. Proof. B-1. A specimen displayed by Howard Newcomb at the 1914 ANS Exhibition.

E. Proof. B-1. World's Greatest Collection (Numismatic Gallery, 3/1945), lot 69.

Note: The B-2 specimen in the Anderson-Dupont, Norweb, and Goldberg's May 2003 sales has traditionally been called a one-sided proof, but it is now certified as MS64 NGC. This coin was also mistakenly identified as the Browning, Col. Green example in several references, but that coin is in the Eric P. Newman Collection, graded MS63. PCGS# 528377 Base PCGS# 5365

SEATED QUARTERS

1849 Seated Liberty Quarter, MS65 Tied for Finest Certified, Ex: Newman

- 4432 1849 MS65 NGC.** Although the Philadelphia Mint coined 340,000 quarter dollars in 1849, most of those coins were hoarded and eventually melted by bullion speculators because of the rise of silver prices in relation to gold because of the abundance of gold found in California. The actions of those bullion speculators created a prize for present-day numismatists as few Mint State examples of this issue survive.

The silver centers of each side blend into russet and charcoal-gray on the reverse, and into concentric rings of pale green, gold, sky-blue, and amber on the obverse. The strike is quite sharp throughout both sides, and there are few marks for the assigned grade, with copious eye appeal. Census: 2 in 65, 0 finer (5/16).

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part III (Heritage, 11/2013), lot 33366. NGC ID# 23T2, PCGS# 5413

1851 Quarter, Toned MS65 Elusive Melt Rarity in Mint State Ex: Gardner

- 4433 1851 MS65 PCGS. Briggs 1-B.** The silver melts of the 1850s were occasioned by an overvaluation of silver as reckoned in gold, due to the Gold Rush that began in earnest in 1849. The mintage figures are largely irrelevant, but what is relevant is how rare this date is in Mint State — much less Gem condition. The patina of the present coin is lovely but unusual, appearing as though a bisecting vertical line down the middle of the obverse separates that side into two halves, more golden-gray and silver on the left side and gold, blue, and lilac on the right side. The reverse adopts a more traditional approach, showing rings of pastel concentric toning. The strike is uniformly sharp and the surfaces attractive throughout. Population: 5 in 65, 1 finer (5/16).

Ex: Purchased by Eugene Gardner from Jason Carter (4/2005); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98421. NGC ID# 23T6, PCGS# 5417

1852 Seated Quarter, MS65 Impressive Strike and Surfaces

- 4434 1852 MS65 PCGS. Briggs 2-B.** The 1852 Seated quarter is an elusive Philadelphia issue from the first part of the series and is rarely seen in Mint State. This Gem example is sure to excite knowledgeable students of the series. Bold motifs and broad rims are accentuated by satiny luster with delicate rose-gold and lavender hues gracing each side. A lack of distraction abrasions confirms the lofty grade. Population: 4 in 65, 3 finer (5/16). NGC ID# 23T8, PCGS# 5419

1854-O Huge O Quarter, Choice VF FS-501, Outstanding Color and Surfaces

- 4435 1854-O Huge O, Briggs 1-A, FS-501, VF35 PCGS. CAC.** A remarkably appealing example of this conditionally scarce *Guide Book* variety, showing original battleship-gray patina with hints of olive-gold and lavender-blue in the fields. The design elements have nearly XF sharpness, and the surfaces are problem-free. The Huge O mintmark is believed to have been engraved by hand at the New Orleans Mint on a die that arrived without the appropriate O. Population: 9 in 35, 13 finer. CAC: 2 in 35, 2 finer (5/16). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

1858 Seated Liberty Quarter, MS67
Tied for Finest at PCGS

4436 1858 MS67 PCGS. Briggs 2-B. The 1858 Seated quarter saw a generous mintage of nearly 7.4 million coins, although the strike quality of such a large production varies widely, from poor to exceptional. This Superb Gem is “as good as it gets” but it is plenty good enough, with bright fields tending toward semiprooflikeness on each side, a trait evident even through the toning. Rich rose and golden-brown patina appears throughout, surrounded by a ring of blue at the rims. The only evident strike softness is confined to the uppermost stars on the obverse. Tied for the finest graded at PCGS. Population: 2 in 67, 0 finer (4/16). NGC ID# 23TH, PCGS# 5445

1860-S Quarter, XF45
Only One Finer at PCGS

4437 1860-S XF45 PCGS. Briggs 1-A. Struck on the eve of the Civil War in San Francisco, the 1860-S quarter saw a meager mintage of 56,000 pieces, although likely for reasons unrelated to that distant conflict. This frosty Choice XF example shows some scattered abrasions consistent with moderate circulation, but a long, lateral scrape from Liberty’s knee is the only singular mark. Wear and strike weakness combine to soften the central details. Only one Mint State coin is reported on the certified population reports, an MS61 PCGS example, recently sold in lot 98372 of the Gardner Collection, Part II where it realized \$55,812.50. Population: 4 in 45, 2 finer (5/16). NGC ID# 442R, PCGS# 5453

**1869-S Quarter, Vibrant MS64
Extremely Elusive Any Finer
Ex: Gardner**

- 4438 1869-S MS64 PCGS. CAC. Briggs 1-A.** Glowing, lustrous silver-white surfaces show a thin ring of rose around the margins, more prominent on the obverse. Numerous die cracks connect the peripheral elements on that side. The strike is quite sharp overall, although several of the stars lack central details. Great eye appeal appears on this conditionally scarce example of a low-mintage date.

When we sold this piece last year, Gene Gardner commented: "This coin is a perfect match for Larry Briggs' description of the Briggs 1-A. The only exception comes when he notes that "AU-UNC coins have pale subdued washed out luster." Not true of this lovely, vibrant coin. The MS66 appears to be the Eliasberg coin — the finest known — even though the coin is considerably whiter now than the coin described in that catalog. But the current coin may still qualify for the Condition Census." Purchased from *Legend Numismatics* (8/2000), to Eugene H. Gardner; Eugene H. Gardner Collection, Part IV (*Heritage*, 10/2015), lot 98461. NGC ID# 442N, PCGS# 5475

**1874-S Arrows Quarter, MS66+
Brilliant, Frosted Mint Luster**

- 4439 1874-S Arrows MS66+ PCGS. CAC.** Frosted, untuned mint luster sets this Premium Gem Arrows type quarter aglow with a radiant cartwheel effect. Unless viewed beneath a loupe the fields appear flawless, and only a few faint grazes on the high points of Liberty's figure preclude a Superb Gem designation from PCGS. A few of the right-hand stars lack complete definition, but the remainder of the design elements are sharply rendered. Population: 35 in 66 (2 in 66+), 5 finer. CAC: 8 in 66, 1 finer (5/16). NGC ID# 23VY, PCGS# 5495

**1876-CC Quarter, Frosty MS65+
Few Known Finer**

- 4440 1876-CC MS65+ PCGS. CAC. Briggs-Unlisted.** Frosty luster gives this lightly toned 1876-CC quarter pleasing eye appeal. The lower obverse and upper reverse dentils are weakly defined, but the central devices show better sharpness. This piece lacks any distracting abrasions, and the delicate sea-green, lavender, and champagne-gray hues that grace each side are visually appealing. Population: 26 in 65 (3 in 65+), 9 finer. CAC: 3 in 65, 4 finer (4/16). NGC ID# 23V3, PCGS# 5502

**1876-S Quarter, MS66
Ex: Eliasberg, Gardner**

- 4441 1876-S MS66 PCGS Secure. CAC. Ex: Eliasberg.** Type Two Reverse. Pearl-gray and pale lilac tones on the obverse show accents of orange, the latter color spreading on the reverse to dominate the color palette. Described in the Eliasberg catalog as: "MS-65, prooflike. A splendid specimen struck from highly polished dies, not quite the equivalent of a Philadelphia Mint Proof, but far and away more prooflike than typically seen." The 1876-S quarter is a rarity in MS66, and none are known finer. Population: 6 in 66, 0 finer. CAC: 2 in 66, 0 finer (5/16). Ex: Louis E. Eliasberg, Sr.; Eliasberg Collection (*Bowers and Merena*, 4/1997), lot 1517; later, purchased by Eugene Gardner from Joseph O'Connor (8/2010); Eugene H. Gardner Collection, Part III (*Heritage*, 5/2015), lot 98363; ANA Signature (*Heritage*, 8/2015), lot 4675. NGC ID# 23V4, PCGS# 5503

1877-S Over Horizontal S Quarter, MS67 ★
The Finest Certified FS-501

- 4442 1877-S S Over Horizontal S, Briggs 4-D, FS-501, MS67 ★**
NGC. Prior to examination of this piece at NGC, the finest that service had graded was just MS65. Likewise, PCGS has graded a single MS65 and one MS66 (4/16). This example from the McClure Collection is far finer than any previously encountered example of the variety. Both sides feature a bold strike with full star, shield, and head details on the obverse, and strong feather, shield, and claw details on the reverse. The original horizontal S mintmark is sharp and clear. Frosty mint luster shines through the gorgeous champagne, lavender, gold, and blue toning over both surfaces. This stunning Superb Gem will make a fine addition to a top-rated Seated Liberty quarter collection.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23V7, PCGS# 145562 Base PCGS# 5507

1878-S Quarter, Toned MS64
Rare in High Grade

- 4443 1878-S MS64 PCGS.** With a mintage of 140,000 pieces, the 1878-S Seated quarter is a better date in all grades but is particularly elusive in Mint State. This Choice example is high-end for the issue, showing satiny luster shining through mottled sun-orange and tan-gray toning. The strike is bold, and a lack of obvious abrasions delivers excellent eye appeal. Finer pieces are rare and far out of reach for most collectors. Population: 4 in 64, 5 finer (5/16). NGC ID# 23VA, PCGS# 5510

1880 Seated Quarter, MS67+
Beautiful Old-Time Toning

- 4444 1880 MS67+ PCGS. CAC. Briggs 1-A.** The 1880 is scarce in the better Mint State grades. Cobalt-blue, beige-gold, and lavender patination adorns both sides of this lovely Superb Gem. Partially prooflike fields highlight the frosty, well-struck motifs when the coin is tilted slightly beneath a light source. An impeccably preserved, highly appealing coin. Population: 17 in 67 (1 in 67+), 1 finer. CAC: 9 in 67, 0 finer (4/16).
Ex: Long Beach Signature (Heritage, 5/2009), lot 632. NGC ID# 23VC, PCGS# 5512

1882 Seated Liberty Quarter, MS67 ★
Vivid, Multicolor Toning

- 4445 1882 MS67 ★ NGC. Briggs 2-B.** Both sides of this impeccably preserved Superb Gem are blanketed in vivid shades of sea-green, russet, and violet toning, with deeply mirrored fields underneath. The design elements are sharply detailed in most areas, but some of the star centers are a little flat. Overall eye appeal is tremendous. Census: 9 in 67 (1 in 67★), 5 finer (4/16). NGC ID# 23VE, PCGS# 5514

PROOF SEATED QUARTERS

**1845 Seated Liberty Quarter, PR64+
Only Six or Seven Examples Known**

4446 1845 PR64+ PCGS. CAC. Briggs 5-E. The proof 1845 Seated quarter is an extreme rarity and significantly underrated as such. The mintage is unknown, but has been estimated at about six pieces in the past. Walter Breen listed only five auction appearances in his *Proof Encyclopedia*. We believe at least seven individual coins have survived, including a piece in the Smithsonian Institution, formerly from the complete set in the Mint Cabinet Collection. This figure is consistent with the number of proof dimes and half dollars confirmed to exist of this date — eight and seven coins, respectively — as one would expect for an issue which was apparently distributed in complete denomination sets.

The combined PCGS and NGC certified population lists 14 examples in all grades, this figure reflecting a significant number of resubmissions. The present Choice example displays bold motifs and mirrored fields. Subtle cameo contrast on each side is observed amid shades of golden-gray, violet, olive-brown, and pine-green toning. There are no distracting marks. Only three coins are known finer. Population: 4 in 64 (1 in 64+), 0 finer. CAC: 4 in 64, None finer (5/16). NGC ID# 23W8, PCGS# 5539

**1862 Seated Liberty Quarter, PR65+
Rare Cameo Example**

4447 1862 PR65+ Cameo PCGS. CAC. Champagne to golden-brown patina graces the margins of this gleaming PR65+ specimen, while the mirrored fields have excellent contrast with white-frosted and sharply impressed central devices. This Civil War-era issue is a Cameo condition rarity in the Gem range. Population: 3 in 65 (1 in 65+) Cameo, 4 finer. CAC: 4 in 65, 1 finer (4/16). NGC ID# 2A4Z, PCGS# 85558

**1863 Quarter, Multicolor PR65
Elusive High-End Example**

4448 1863 PR65 NGC. CAC. Briggs 4-D. QUAR. DOL. is lightly die doubled on this proof die pairing. With its small 460-coin mintage, the 1863 proof quarter is elusive in high grades. This Gem CAC coin displays razor-sharp detail and reflective mirroring with modest cameo contrast on the obverse. The obverse fields are colored in shades of orange-gold, violet, and ocean-blue, while the reverse shows bluish-gray borders around a champagne interior. Census: 14 in 65, 13 finer. CAC: 5 in 65, 4 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23WR, PCGS# 5559

1864 Quarter, Elusive PR65
Delightful Multicolor Toning

- 4449** 1864 PR65 NGC. CAC. Briggs 3-C. The 1864 proof quarter is elusive, as its small 470-coin mintage suggests. Examples are most frequently seen in PR63 or PR64, and Gems are rare. This colorfully toned CAC PR65 representative displays razor-sharp motifs with original sun-gold, violet, and ocean-blue toning over each side. The obverse is noticeably contrasted, and eye appeal surpasses expectations. Census: 13 in 65, 14 finer. CAC: 2 in 65, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23WS, PCGS# 5560

1865 Quarter, Elusive PR66+
Outstanding Original Toning

- 4450** 1865 PR66+ PCGS. CAC. A razor-sharp, high-end Premium Gem 1865 proof quarter that might have garnered a Cameo designation were it not for vivid violet, sun-orange, and ocean-blue toning that blankets each side. Even so, modest contrast emerges from beneath the patina. This CAC-endorsed proof is conditionally scarce, and finer pieces will prove rare and expensive. Population: 23 in 66 (1 in 66+), 3 finer. CAC: 5 in 66, 0 finer (4/16). NGC ID# 23WT, PCGS# 5561

1865 Seated Liberty Quarter, PR67 ★ Cameo
Outstanding Quality, Final No Motto Issue

- 4451** 1865 PR67 ★ Cameo NGC. Briggs 3-B. Only 500 proof Seated Liberty quarters were struck at the Philadelphia Mint in 1865, the final year of the No Motto design. The proof die is recognized by some evidence of die rust on the obverse and the recut letters in QUAR. DOL. on the reverse. This issue is seldom seen with cameo contrast.

The present coin is a magnificent Superb Gem, with razor-sharp definition on all design elements, including the star centers and eagle's claws. The devices have a rich coat of mint frost that creates an intense cameo effect with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Census: 4 in 67 Cameo (2 in 67★ Cameo), 2 finer (4/16). NGC ID# 23WT, PCGS# 85561

**1874 Seated Liberty Quarter, PR65
Two-Year Arrows Design**

4452 1874 Arrows PR65 NGC. Briggs 5-D. All 1874 quarters show the popular, short-lived Arrows design. This delightful Gem exhibits sharply detailed design elements and deeply reflective fields, under vivid shades of greenish-gold and cerulean-blue toning. The surfaces are impeccably preserved and eye appeal is terrific. Only 850 proofs were struck. Census: 40 in 65, 35 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 23XS, PCGS# 5575

**1880 Seated Liberty Quarter, PR68
Pristine Surfaces, Spectacular Toning**

4453 1880 PR68 NGC. A generous mintage of 1,335 proof Seated Liberty quarters was accomplished in 1880, to accompany a small business-strike production of 13,600 examples. Two different dies were used to strike the proof mintage, and this coin exhibits the Type 1 Reverse, identified by the short cut in the left shield lines. The Type 1 Reverse was also used to strike business-strike examples.

This magnificent PR68 specimen offers sharply detailed design elements and flawless, deeply mirrored fields, under vivid shades of greenish-gold and cerulean-blue toning. The surfaces are impeccably preserved and eye appeal is extraordinary. Census: 5 in 68 (1 in 68+), 0 finer (5/16). NGC ID# 23XC, PCGS# 5581

**1885 Quarter, PR67 Deep Cameo
One of Three So Graded at PCGS**

4454 1885 PR67 Deep Cameo PCGS. CAC. Quarters from this decade are recognized for their low mintages, so collectors often look to proofs to fill the dates in their sets. The 1885 had a slightly higher production of 13,800 business strikes plus 930 proofs, but even that total is small in the grand scheme of things, and high-grade representatives are scarcer than other lower-mintage issues. Proofs at this grade level with Deep Cameo contrast are extremely rare. This all-brilliant Superb Gem exhibits thickly frosted devices against incredibly deep mirrors. The aesthetic quality is unsurpassed. Population: 3 in 67 (1 in 67+) Deep Cameo, 0 finer (5/16). NGC ID# 23XH, PCGS# 95586

BARBER QUARTERS

**1893-S Barber Quarter, MS66
Exceptional Color**

4455 1893-S MS66 PCGS. Mintmark far right, one of three different positions noted by David Lawrence. The 1893-S quarter is scarce in Mint State and most such pieces grade MS64 or lower. This Premium Gem example is far finer than most collectors will ever lay eyes on. The strike is bold throughout and the surfaces are free of distracting abrasions. Vibrant mint luster illuminates deep ocean-blue peripheral toning and warm gold and violet central hues. Population: 4 in 66 (1 in 66+), 2 finer (5/16). NGC ID# 23XY, PCGS# 5606

**1898 Quarter, Sharp MS67
Few Certified This Fine**

4456 1898 MS67 PCGS. CAC. This is a needle-sharp, lustrous Superb Gem with deep olive-gold toning over each side. A loupe fails to reveal even minute abrasions. The 1898 Barber quarter is a plentiful date in the absolute sense, popular for type purposes. However, this MS67 coin is conditionally rare, and finer pieces are prohibitively so. Population: 7 in 67, 1 finer. CAC: 5 in 67, 2 finer (4/16). NGC ID# 23YD, PCGS# 5619

**1901-S Quarter, Good 4
Circulation Cameo**

- 4457** 1901-S Good 4 PCGS. This pleasing lower-grade 1901-S Barber quarter displays deep gunmetal-gray toning in the fields with light tan-gray relief elements that deliver a pleasing circulation-cameo effect. The obverse rim is complete, although the reverse rim merges faintly with QUARTER DOLLAR. The central devices are boldly outlined. This key San Francisco issue is highly sought-after as one of the three “stoppers” in the Barber quarter series. NGC ID# 23YR, PCGS# 5630

**1902-S Barber Quarter, MS66
Attractively and Originally Toned**

- 4458** 1902-S MS66 PCGS. The scarcity of the 1902-S Barber quarter is recognized in the upper circulated grades, and Mint State examples are particularly elusive. This Premium Gem is finer than is typically available. The strike is razor-sharp throughout and the frosty surfaces are beautifully preserved. The obverse glows with original amber, gold, and olive hues, while the reverse is a little brighter, showing similar shades around the periphery but pastel lavender and turquoise in the center. Population: 9 in 66, 2 finer (5/16). NGC ID# 23YU, PCGS# 5633

PROOF BARBER QUARTERS

**1894 Quarter, PR67 Cameo
Well-Contrasted and Well-Preserved**

- 4459** 1894 PR67 Cameo PCGS. This spectacular Superb Gem proof displays well-detailed design elements with a richly frosted texture that contrasts boldly with the deeply reflective fields. The well-preserved surfaces are enhanced by shades of greenish-gold and cerulean-blue toning. The eye appeal is top-notch. Population: 5 in 67 (1 in 67+) Cameo, 0 finer (5/16). NGC ID# 2429, PCGS# 85680

**1898 Quarter, PR67 Ultra Cameo
Superb White-on-Black Contrast**

- 4460** 1898 PR67 Ultra Cameo NGC. CAC. Frosty, ice-white design elements give this Superb Gem Ultra Cameo proof type coin immense eye appeal. The fields showcase watery mirroring and have hints of olive toning on the reverse. Razor-sharp definition of the stars and eagle further heightens the eye appeal. The 1898 proof is a fairly plentiful issue in the series, but the high quality and visual appeal of Ultra Cameo examples makes them inherently popular for type purposes. Census: 15 in 67 Ultra Cameo, 27 finer. CAC: 3 in 67, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242D, PCGS# 95684

**1901 Quarter, Toned PR67
Significant Field-Motif Contrast**

- 4461** 1901 PR67 PCGS. This high-end Superb Gem proof type coin shows heavy mint frost of the relief elements contrasting against deep, watery mirroring in the fields. The coin might have qualified for a Cameo designation were it not for a blanket of warm amber-gold toning that accents much of each side. The eagle's right (facing) talons are a trifle soft, but the strike is otherwise bold. The 1901 has the distinction of being the first proof Barber quarter issue of the 20th century, an issue of obvious importance to type collectors. It is conditionally scarce at the Superb Gem grade level, with or without cameo contrast. Population: 9 in 67 (1 in 67+), 3 finer (5/16).
Purchased from David Lawrence Rare Coins (11/1999); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98609. NGC ID# 242G, PCGS# 5687

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS63 Full Head Debut Series Key, Delicately Toned

4462 1916 MS63 Full Head NGC. The 1916 Standing Liberty quarter is the debut issue of Hermon MacNeil's "gateway and Liberty" design, showing Liberty striding forward through the gateway of the country with a shield, prepared for war. The small 52,000-coin mintage has long garnered the issue key-date recognition in all grades, as production was not commenced until December of 1916. The Standing Liberty quarter was originally intended to premier earlier in the year alongside Weinman's Winged Liberty Head dime, but delays in the production of MacNeil's design precluded regular coinage of the new quarter until the final few weeks of the year. Partly to avoid public hoarding of this low-mintage issue, the 1916 was quietly dispersed into circulation alongside the first of the 1917-dated pieces in early January. As a result, few Mint State coins were saved at the time of issue, and high-grade examples are scarce today.

This Select Full Head representative displays as much detail as was ever engraved into the 1916 dies, with satin luster and hints of light golden border toning. A few scattered marks are consistent with the grade and none are singularly bothersome. Includes a laminated NGC Photo Proof, which has a brief history of the 1916 Standing Liberty quarter, enlarged color photos of this coin, and its grade and certification number. NGC ID# 2AMV, PCGS# 5705

1917-D Type One Quarter, MS67 Full Head Conditionally Rare

4463 1917-D Type One MS67 Full Head PCGS. Rich, frosty-white luster cascades over impeccably preserved features. The strike is also flawless with needle sharp definition in all areas. While the 1917 Type One is rightly considered to be a type coin in most grades, its D-mint counterpart — here represented — is anything but common in the finer Mint State levels. Population: 23 in 67 (2 in 67+) Full Head, 1 finer (4/16). Ex: ANA Signature (Heritage, 8/2001), lot 6000. NGC ID# 2432, PCGS# 5709

1919-D Quarter, Sharp MS65 Strong Silver Luster

4464 1919-D MS65 PCGS. CAC. This Denver date is well-known among Standing Liberty specialists as undervalued and very scarce in Gem condition. The present example is wonderfully lustrous and well-preserved, with brilliant silver sheen that overwhelms the occasional pale-gold and russet accents. The head is not full, but perhaps 60 to 70% detailed, and the lower shield shows blending on three of the rivets. The inner shield border is complete. The sash and Liberty's waist show nice definition, as do the eagle's breast, wing feathers, and edges of the wings. The coin is a bit concave at the date, but the quibbles about strike are nearly universal for the 1919-D issue and insignificant given the more important attributes of the exceptional surface quality, luster, and eye appeal. Rare this nice and CAC-endorsed. Population: 54 in 65 (1 in 65+), 30 finer. CAC: 8 in 65, 3 finer (4/16). NGC ID# 243C, PCGS# 5730

1919-D Quarter, MS63 Full Head Elusive This Well-Struck

4465 1919-D MS63 Full Head PCGS. The 1919-D is a semikey issue in Full Head, and such coins are major rarities at the Gem level. This Select Full Head coin remains within the grasp of the average collector. A hint of champagne toning graces the satiny surfaces, and grade-limiting abrasions are minor. A couple of shield rivets and the top half of the date show the usual strike softness, although Liberty's head is better defined. Population: 21 in 63 Full Head, 42 finer (4/16). From The Eagle One Collection. NGC ID# 243C, PCGS# 5731

**1919-D Quarter, MS64 Full Head
Rare in Full Head**

4466 1919-D MS64 Full Head PCGS. In terms of actual auction appearances, the 1919-D is among the greatest strike and condition rarities in the Standing Liberty quarter series. In Full Head, only the 1918/7-S and the 1927-S are seen less often, and in Gem or finer Full Head, the 1919-D is the fourth-rarest issue in the series; the overdate, 1927-S, and 1920-S have slightly lower auction appearance rates in MS65 Full Head and finer.

This satiny, near-Gem Full Head example balances technical quality, eye appeal, and affordability all in one coin. Liberty's head, the date, and the stars are especially sharp. Lemon-gold and lavender-gray toning warms the satiny surfaces, and a couple of marks on the knee and inner shield are the only mentionable abrasions. Population: 25 in 64 (3 in 64+) Full Head, 17 finer (4/16). NGC ID# 243C, PCGS# 5731

**1919-S Quarter, Well-Struck MS66+
Glistening Luster, Sharp Date**

4467 1919-S MS66+ PCGS. CAC. A remarkably well-preserved and conditionally rare 1919-S quarter with glowing luster. The obverse displays light golden toning while the reverse is brilliant. The date and eagle's feathers are uncommonly bold, although Liberty's head is a trifle shy of full. The availability of this issue in such high of a grade is so small that this Plus-graded CAC coin readily stands out against its peers. Population: 13 in 66 (2 in 66+), 1 finer. CAC: 4 in 66, 1 finer (4/16). NGC ID# 243D, PCGS# 5732

**1920-S Quarter, Top-Grade MS67
Extremely Rare So Fine**

4468 1920-S MS67 NGC. CAC. The certified tally of 1920-S quarters declines rapidly in succeeding grades above MS64, and the date is extremely rare at the Superb Gem level. This CAC coin is among the finest non-Full Head examples known. Liberty's head is a trifle weak, but the boldness of the shield, date, eagle, and stars is exceptional for this San Francisco issue. Brilliant, frosty luster delivers the finishing touches on the eye appeal. A couple of hidden grazes near Liberty's arm are all that limit the grade. Census: 6 in 67 (1 in 67★), 0 finer. CAC: 4 in 67, 0 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 243G, PCGS# 5738

**1920-S Quarter, MS64 Full Head
Elusive in Full Head
Mint-Fresh Luster Gives Ample Eye Appeal**

4469 1920-S MS64 Full Head NGC. CAC. To the unaided eye, this Full Head 1920-S quarter appears finer than MS64, although a loupe reveals faint slide marks over the high points of the devices that limit the grade. Glistening, brilliant luster delivers impressive eye appeal, and the head and date are surprisingly well-defined. Only the shield rivets and the eagle's breast feathers show mentionable softness. A visually finer coin may not exist below the Gem grade level. Census: 23 in 64 Full Head, 11 finer. CAC: 2 in 64, 2 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 243G, PCGS# 5739

1923-S Quarter, Frosty MS66
Nearly Full Head Detail

4470 1923-S MS66 PCGS. CAC. A beautifully preserved, frosty 1923-S with very nearly Full Head detail. This Premium Gem boasts lavender-gray and champagne toning with above-average central definition. The high points of Liberty's leg are devoid of the usual small marks, and only a couple of tiny ticks on the upper shield preclude an even finer grade. Seldom seen so well-preserved. Population: 38 in 66 (1 in 66+), 6 finer. CAC: 14 in 66, 1 finer (4/16). NGC ID# 243K, PCGS# 5744

1923-S Quarter, MS66+ Full Head
Sole Plus-Graded Premium Gem at NGC
Rare So Fine With CAC Endorsement

4471 1923-S MS66+ Full Head NGC. CAC. The rate of auction appearances for Full Head 1923-S quarters is more or less evenly split between coins in MS64, MS65, and MS66, while Superb Gems are rare. The present coin stands apart as the only Plus-graded MS66 Full Head piece at NGC, and with the added appeal of the CAC green label, it resides so close to the next highest grade that is it virtually at an intermediate tier between MS66 and MS67. Only a pair of MS66+ Full Head coins at PCGS are arguably comparable. A small tick on Liberty's thigh and a small graze on the knee are all that preclude a Superb Gem designation. Luster is crisp and satiny, and Liberty's head is sharp. Even the shield lines and rivets display above-average detail. Few finer coins exist. Census: 26 in 66 (1 in 66+) Full Head, 6 finer. CAC: 10 in 66, 3 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243K, PCGS# 5745

**1924 Quarter, MS67 Full Head
Top-Grade Registry Coin**

- 4472 1924 MS67 Full Head PCGS.** Superb Gem 1924 Standing Liberty quarters are more or less evenly split between Full Head and non-Full Head designations, both being conditionally rare. This satiny example just makes Full Head classification. The date, shield, and stars are bold, and the eagle's breast is well-defined. Pastel shades of champagne and lavender-gray tony grace each side, while the obverse shows additional splashes of olive and amber-red in the margins. Population: 14 in 67 (1 in 67+) Full Head, 0 finer (4/16). NGC ID# 243L, PCGS# 5747

**1924-S Quarter, Beautifully Lustrous MS66+
Eye Appeal Almost Transcends the Grade**

- 4473 1924-S MS66+ NGC. CAC.** This Plus-graded, CAC-endorsed Premium Gem should prove highly popular when it crosses the auction block. Not only are finer examples major rarities, but this high-end 1924-S quarter displays a degree of eye appeal and design sharpness that is scarce on non-Full Head examples. Luminous, frosty luster adorns the largely unabraded surfaces, while weakness on Liberty's ear and on several shield rivets is all that hinders a full strike. A tiny tick on the eagle's wing above the head is the only discernible abrasion. Neither side has mentionable toning. Census: 18 in 66 (1 in 66+), 6 finer. CAC: 10 in 66, 3 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 243N, PCGS# 5750

**1924-S Quarter, MS67
Superb Surfaces, Few Known So Fine**

- 4474 1924-S MS67 NGC.** This Superb Gem 1924-S quarter boasts far sharper design definition than is typical of the issue — the only noticeable weakness is seen on a couple of the shield rivets and on Liberty's head in the region of the ear hole. The date, stars, and eagle's feathers display pleasing sharpness. Each side is unabraded and satiny with light golden toning. The rarity of the 1924-S in Superb Gem condition is underappreciated, with barely more than a dozen Full Head and non-Full Head pieces combined known this fine. Census: 5 in 67 (1 in 67+), 1 finer (5/16). NGC ID# 243N, PCGS# 5750

**1924-S Standing Liberty Quarter, MS67
Brilliant, Lustrous Surfaces**

- 4475 1924-S MS67 NGC.** From a mintage of 2.8 million pieces, the 1924-S Standing Liberty quarter is an elusive issue at the MS67 grade level. This impressive Superb Gem exhibits well-detailed design elements and virtually pristine brilliant surfaces that radiate vibrant mint luster on both sides. Eye appeal is terrific. Census: 5 in 67 (1 in 67+), 1 finer (5/16). NGC ID# 243N, PCGS# 5750

**1924-S Quarter, MS65 Full Head
Multicolor Patina**

- 4476 1924-S MS65 Full Head PCGS.** A richly toned Full Head Gem, this 1924-S quarter displays several intermingled shades. The predominant colors are golden-orange and golden-brown, with splashes of emerald-green also appearing. The shield displays minor incompleteness of strike, but the head, date, and stars are sharp. Population: 34 in 65 (1 in 65+) Full Head, 11 finer (4/16). *From The Eagle One Collection.* NGC ID# 243N, PCGS# 5751

1926-D Quarter, MS65 Full Head
Series Key in Full Head
An Outstanding, CAC-Endorsed Example

4477 1926-D MS65 Full Head NGC. CAC. The 1926-D is among the Holy Grails of the Standing Liberty quarter series in Gem Full Head, even though the 1927-S and the 1918/7-S are even rarer. The '26-D has a reputation as "classic" flat head, in the terminology of J.H. Cline, and he estimated that as many as half of the Full Head coins listed on the population charts are merely resubmissions of previously graded coins. In all grades, CAC has endorsed only seven Full Head 1926-D quarters, including four MS64, two MS65, and a single Premium Gem finer (4/16).

The McClure coin is a fresh example, never before offered at auction. It boasts brilliant, frosty luster and a truly remarkable strike. The shield rivets show a hint of softness, being the only elements of the design not sharply rendered. Liberty's head is bold. A loupe reveals a few tiny ticks but none out of line for the grade. Eye appeal is outstanding. Census: 8 in 65 Full Head, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243S, PCGS# 5757

1926-S Quarter, MS65+ Full Head
Glistening Luster, Conditionally Rare
Eye Appeal Exceeds Expectations

4478 1926-S MS65+ Full Head NGC. CAC. The 1926-S is nearly as scarce in Full Head as the more famous 1926-D. The certified population figures suggest the two dates are about even, but it is likely that a lower percentage of the '26-S coins reported at NGC and PCGS are resubmissions, whereas the '26-D seems to have a higher number of resubmissions inflating its grading service totals. Auction appearance rates are low for both dates, but the 1926-S is the slightly more often seen of the two. Nonetheless, Gem or finer Full Head coins are rarely offered.

The present piece is CAC-endorsed and also boasts the coveted Plus designation, which makes it the finest 1926-S Full Head quarter we have offered in more than four years. It is the only Plus-graded Full Head coin at NGC and the only Plus-graded Gem at either service. Luster is remarkably frosty and brilliant, delivering impeccable eye appeal when coupled with the bold strike and outstanding preservation. The Standing Liberty quarter connoisseur should give this piece special attention. Census: 16 in 65 (1 in 65+) Full Head, 4 finer. CAC: 3 in 65, 3 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243T, PCGS# 5759

1927-D Quarter, MS66 Full Head
Underappreciated Condition Rarity

4479 1927-D MS66 Full Head NGC. CAC. The 1927-D quarter is often overlooked in discussions of semikey dates, as Full Head coins are moderately available through MS65. But in MS66 Full Head, this low-mintage (976,000 coins) Denver issue is a distinct rarity, and finer pieces are prohibitively scarce. The present CAC coin is beautifully preserved and frosty with brilliant luster. Liberty's head is sharply struck, although the shield rivets and the lowest two obverse stars exhibit some usual softness. There are no mentionable abrasions. Census: 9 in 66 Full Head, 3 finer. CAC: 4 in 66, 0 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243V, PCGS# 5763

1927-S Quarter, Lightly Toned MS66
Rarely Seen So Fine
Classic Series Key

4480 1927-S MS66 NGC. CAC. There are many dates in the Standing Liberty quarter series that are rare in Mint State Full Head, but the 1927-S is one of the few issues that is also scarce in non-Full Head Uncirculated grades. The 1927-S had a small mintage of only 396,000 pieces. In perspective, this was fewer coins than there were residents of San Francisco in 1927. Any Uncirculated survivor is a prize acquisition for the series enthusiast, although Premium Gems are especially scarce; it has been almost seven years since we last offered a Superb Gem example of this classic S-mint key.

The present CAC coin is something special. This piece has never before been offered at auction, and the soft olive-gold toning over each side is original. Frosty luster illuminates the fields and unabraded surfaces. Were it not for a couple of tiny ticks on Liberty's knee, an even finer grade might have been achieved. Liberty's head and the shield rivets show typical weakness, although the overall strike is above-average for the issue. Census: 23 in 66, 4 finer. CAC: 8 in 66, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 243W, PCGS# 5764

**1929-D Quarter, MS65+ Full Head
Original Toning, Outstanding Quality**

- 4481 1929-D MS65+ Full Head NGC. CAC.** The 1929-D has emerged as something of a rarity in high-grade Full Head, and collector demand has increased proportionately. This Plus-graded Gem boasts frosty luster and original olive-gold toning. Complete shield rivets and sharp eagle's feathers complement the bold Full Head. The coin is free of major abrasions and will appeal to collectors who appreciate a blush of toning. Census: 20 in 65 (1 in 65+) Full Head, 9 finer. CAC: 10 in 65, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2443, PCGS# 5775

**1930-S Quarter, MS67 Full Head
Remarkable Quality and Eye Appeal
Green Label Holder, Green CAC**

- 4482 1930-S MS67 Full Head PCGS. CAC.** This is one of those glowing, virtually flawless coins that would make even the most seasoned Standing Liberty quarter collector feel envy. CAC-approved in a green label holder, this Superb Gem Full Head 1930-S displays vibrant, frosty luster with warm golden toning and exceptionally clean surfaces. A few wisps of lavender appear on each side. The strike is bold, and eye appeal is incredible. Population: 26 in 67 (1 in 67+) Full Head, 1 finer. CAC: 18 in 67, None finer (4/16). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

**1932-D Quarter, MS65
Lovely Capstone Example**

- 4483 1932-D MS65 PCGS. CAC.** John Flanagan's Washington quarter was first issued in 1932. The Philadelphia Mint coined an unremarkable total of 5.4 million coins, while the San Francisco and Denver facilities accomplished low mintages of 408,000 and 436,800 pieces, respectively. The 1932-D is now widely recognized as the capstone date in the series, edging out the somewhat lower mintage 1932-S. The disparity in availability between the two dates becomes particularly pronounced in Uncirculated grades.

Aside from scattered wisps of russet patina over the upper portion of the obverse, each side is brilliant with copious satin luster. Design detail is strong despite mild incompleteness on the leftmost part of the motto. Marks are scant, and the eye appeal is tremendous. Population: 82 in 65 (3 in 65+), 2 finer (4/16). NGC ID# 2448, PCGS# 5791

**1938-S Quarter, MS67+
Top-Grade Coin at PCGS**

4484 1938-S MS67+ PCGS. CAC. For Registry purposes, this Plus-graded 1938-S Washington quarter is unsurpassed in a PCGS holder. The strike is sharp, and the satiny surfaces yield a hint of pale champagne toning. The obverse appears pristine, while two small ticks on the reverse eagle are apparently the only grade-limiting factors. Population: 91 in 67 (6 in 67+), 0 finer. CAC: 12 in 67, 0 finer (5/16). NGC ID# 244P, PCGS# 5807

**1946-D Washington Quarter, MS67+
Tied for Finest at PCGS**

4485 1946-D MS67+ PCGS. CAC. The 1946-D Washington quarter can be found in MS67 condition with a little patience, but finer specimens are almost unobtainable. This Plus-graded Superb Gem displays sharply detailed design elements and vibrant mint luster throughout, with attractive highlights of sea-green and magenta toning. Population: 66 in 67 (2 in 67+), 0 finer. CAC: 20 in 67, None finer (5/16). NGC ID# 245F, PCGS# 5831

**1950-D/S Quarter, MS66
Registry Set Contender**

4486 1950-D/S FS-601 MS66 PCGS. CAC. The upper serif of the errant S is visible at the top of the primary D mintmark. The D is strike doubled, as usual. This Premium Gem 1950-D/S quarter displays a bold strike and exceptional preservation. Both sides has a hint of cream-gold color that is accentuated by peppered russet overtones near the borders. Population: 14 in 66 (1 in 66+), 2 finer. CAC: 6 in 66, 1 finer (5/16). NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

PROOF WASHINGTON QUARTER

**1950 Washington Quarter, PR68 Cameo
Tied for Finest at PCGS**

4487 1950 PR68 Cameo PCGS. The 1950 proof Washington quarter is seldom encountered with Deep Cameo surfaces. This impeccably preserved PR68 example exhibits sharply detailed, frosty design elements that seem to float on the liquid mirrored fields, creating a dramatic black-on-white flash when the coin is tilted in the light. Population: 7 in 68 Cameo, 0 finer (4/16). NGC ID# 27VA, PCGS# 85982

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Fine 15
First Year of Design, O-101, T-7

4488 1794 O-101, T-7, High R.3, Fine 15 PCGS. A small mintage of 23,464 Flowing Hair half dollars was achieved in 1794, the first year silver coins were struck by the U.S. Mint. Eleven die varieties are known for the date. The present coin represents the O-101 variety, with star 1 piercing the center of the curl and the berries arranged in a 10x11 pattern on the reverse. This Fine 15 example exhibits slate-gray surfaces that are free of large or distracting abrasions. Some interior detail remains intact in Liberty's hair and the eagle's wings, but much of the finer detail is worn smooth. A characteristic die crack runs from the rim to the leaf below the first S in STATES. The overall presentation is quite pleasing. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101a Half Dollar, VG10
Popular Early Type Coin

4489 1794 O-101a, T-7, High R.3, VG10 NGC. Splashes of navy-blue are more prominent on the reverse. The right obverse field displays hints of caramel-gold toning. The wings and tailfeathers are well defined, and Liberty exhibits partial hair detail. Both sides lack any consequential marks, although the reverse field is lightly granular near 6 o'clock. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF25
Rich Original Toning

4490 1794 O-101a, T-7, High R.3, VF25 NGC. CAC. Tompkins Die State 1/5. Die cracks through the F in OF and the upper right portion of the wreath confirm the late Overton die state. A pleasing ocean-blue and olive-gray example of the first half dollar issue. The only mentionable abrasions are a few thin lines on the cheek and below the chin. Minor adjustment marks within Liberty's hair are of mint origin. Although 1794 dollars are priced out of reach for most collectors, half dollars and half dimes with the same design are affordable. The Flowing Hair type lasted only two years before it was replaced by the longer-lived Draped Bust design. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1795 O-112 Half Dollar, VF30
Recut Date, Attractively Toned**

- 4491** 1795/1795 2 Leaves, O-112, T-20, R.4, VF30 PCGS. Tompkins Die State 2/1. Two leaves beneath each wing. The wide repunching on the date is less visible on this example of O-112 than on some, but the die pair is readily identifiable by bold recutting on B of LIBERTY and the berry configuration on the reverse. Pale-blue and gold toning adds eye appeal to the natural, warm-gray patina on both sides. Sharp central definition on the motifs balances slight weakness at the bottoms of the date numerals and at the lower obverse dentils. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

**1795 Half Dollar, XF40
Two Leaves, O-117**

- 4492** 1795 Two Leaves, O-117, T-3, R.4, XF40 PCGS. The berries are arranged 9 x 8, and the lowest curl touches star 1 and continues straight through the point. The area below the chin is unfinished. Overton-117 is a scarce variety, and this XF40 probably falls just outside the Condition Census. Dove-gray color overall yields to lavender hues over the high points, where moderate blending is evident. Nevertheless, design definition is strong throughout. Numerous adjustment marks appear on the reverse. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

**1796 15 Stars Half Dollar, O-101, AG3
Original Light Gray Toning**

- 4493** 1796 15 Stars, O-101, T-1, R.5, AG3 NGC. Amato-Unlisted Original light-gray toning covers both sides of this small eagle half dollar, each of which exhibits the normal wear associated with a large silver coin that has served its purpose circulating in the channels of commerce. Despite its extensive circulation it retains ample design detail for the assigned grade, especially on the obverse. Indeed, the latter's level of preservation may qualify as full Good as Liberty displays some hair, ribbon, ear, and eye detail, and all date digits, letters in LIBERTY, and stars show. On the reverse, only the lower part of the right (facing) wing, the 2 in the fraction, and a few letters are heavily worn. A large, as-made laminated planchet void on each side identifies the coin, as does a light scratch left of star 12. The usual crack from the rim through the drapery and last three stars is visible.

This is a nice lower-grade example of one of the most coveted type coins in U.S. numismatics. It is also a new discovery since our 1796-1797 half dollar reference was published in December 2012. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

1797 O-101a Half Dollar, Good 6
Rarest U.S. Silver Type
Problem-Free Surfaces

4494 1797 O-101a, T-1, High R.4, Good 6 NGC. CAC. Amato-
Unlisted. The Draped Bust, Small Eagle half dollar is the rarest U.S. silver type coin. The *Guide Book* reports a combined mintage of 3,918 pieces for all 1796 and 1797 varieties, and perhaps fewer than 300 examples of that production have survived. The present straw-gold and ice-blue example has refreshingly few marks. The date is bold, and the other legends are clear aside from the fraction denominator and the final few letters in AMERICA. A few light adjustment marks, as coined, are apparent on Liberty's neck.

The 1797 O-101a die state is attributed by the die crack from the rim between D and S that extends through the laurel wreath to the upper part of the eagle's wing. An important opportunity to acquire this early silver rarity that is always in demand. Original, problem-free surfaces at this grade level are infrequently seen. This piece is a new discovery since the December 2012 Heritage-published reference *The Draped Bust Half Dollars of 1796-1797*. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24EC, PCGS# 39265 Base PCGS# 6060

1801 Draped Bust Half, XF40
Popular O-101 Variety

4495 1801 O-101, T-2, R.3, XF40 PCGS. The 1801 Draped Bust half dollar claims a mintage of 30,289 pieces, with only two die varieties known for the date. A large die defect between E and R in AMERICA identifies the slightly more available O-101 variety. The lines in the drapery and hair curls are intact on this pleasing XF specimen, and the slate-gray surfaces are free of large or distracting abrasions. From The Eagle One Collection. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Half Dollar, O-101, AU50
Better Date in High Grade**

- 4496** 1801 O-101, T-2, R.3, AU50 NGC. After a brief hiatus beginning in 1797, the Mint resumed half dollar coinage in 1801 with a mintage of 30,289 pieces. Most of these, however, experienced extensive circulation, and the typical survivor grades only VF or lower. This AU coin is conditionally rare, and finer Mint State pieces are exceedingly so. Large die lumps around the arrowheads on the reverse are diagnostic of the Overton-101 die pairing, the more plentiful of the two 1801 varieties in high grade. The strike is even and well-centered but weak above the eagle's head. Blue, violet, and olive toning appears around the borders, leaving the interiors steel-gray. There are no obvious distractions, and the design elements are well-detailed. Census (both varieties included): 4 in 50, 11 finer (4/16). NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Draped Bust Half Dollar, VF35
Scarcer O-102 Variety**

- 4497** 1801 O-102, T-1, High R.4, VF35 PCGS. The 1801 Draped Bust half dollar is a low-mintage issue with only two die varieties known for the date. This coin represents the scarcer O-102 variety, with the base of the first A in AMERICA embedded in the wing feathers. This Choice VF specimen shows only light wear on the right side of the drapery and some interior detail remains intact on the left. The lightly abraded surfaces are toned in shades of golden-brown and blue-steel.
From The Eagle One Collection. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

**1802 Half Dollar, Choice XF
O-101, The Only Die Pair**

- 4498** 1802 O-101, T-1, R.3, XF45 PCGS. Tompkins Die State 1/1. The Choice XF grade of this example is at the upper end of survivors that are even moderately available from the low, 29,290-piece mintage, all of which were struck from a single die pair. Liberty's hair strands are sharply defined except at the highest points, where wear from the brief circulation appears. Deep, gunmetal-blue shades at the borders encircle the obverse, with pleasing silver-gray tones elsewhere. Traces of mint luster peek from protected areas. Abrasions are few on the obverse, and slight planchet roughness among the field stars on the reverse requires a glass for viewing.
From The Eagle One Collection. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**1802 Draped Bust Half, MS60
O-101, Uncirculated Early-Date Rarity
Second-Finest Known**

4499 1802 O-101, T-1, R.3, MS60 PCGS. Tompkins Die State 1/1. A single die pair produced 29,890 half dollars in 1802, resulting in one of the great Mint State rarities of the early Bust half series. A challenging issue even in circulated grades, the 1802 half dollars were stalwarts of domestic commerce, and nearly the entire mintage circulated heavily. The master dies were the same for 1801 and 1802 half dollars. The 1802 shares the same reverse as the scarce 1801 O-102 half, with the base of A in AMERICA embedded in the wing feathers. It is the only die pair for the year.

This Uncirculated representative displays lightly mottled olive-gold, rose, and slate-gray iridescence, through which traces of satin luster shine at most angles. The impression is nicely centered on both sides, and the central features are crisply detailed. There are no adjustment marks on either side. With just two other certified Mint State coins known, this example ranks high on any Condition Census of 1802 half dollars — a coin that would be a centerpiece of any Bust half collection. Auction catalogs have long touted the rarity of this issue in high grades, although it remains underrated even today. No other date from the early series 1794 to 1807 shows fewer Mint State representatives on the combined population reports. Repeat ... none! Population: 1 in 60, 1 finer (4/16).

Ex: Sold privately to Ray F. Spring by New England Rare Coin Company (3/1996); FUN Signature (Heritage, 1/2002), lot 6905; The Eugene H. Gardner Collection, Part III (Heritage, 5/2015 as MS60 NGC), lot 98440. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**1805 O-112 Half Dollar, AU50
Concentric Bands of Toning**

4500 1805 O-112, T-2, R.2, AU50 PCGS. Iridescent navy-blue, olive-green, and canary-gold form concentric bands across this sharply detailed and lightly abraded representative. Evenly struck except for the uppermost stars on the reverse. This delightful, album-toned example is suitably positioned at the low end of the Condition Census for the die marriage, and in our opinion may rank higher based on the outstanding eye appeal and sharply defined, minimally abraded surfaces.

From The Eagle One Collection. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**1806 Draped Bust Half, AU53
Pointed 6, No Stem, O-109 Variety**

4501 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU53 PCGS. CAC. A landmark mintage of 839,576 Draped Bust half dollars was struck in 1806, with 28 die varieties known for the date. The present coin represents the popular *Guide Book* O-109 variety with a pointed 6 in the date and no stem through the claw on the reverse. This lightly circulated AU53 example retains traces of original mint luster under attractive shades of lavender, gray, and champagne-gold toning. Population: 14 in 53, 60 finer. CAC: 4 in 53, 18 finer (5/16). NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**1806 O-118a Half Dollar, AU53
Pointed 6, With Stem**

- 4502** 1806 Pointed 6, Stem, O-118a, T-24, R.3, AU53 PCGS. CAC. Extensive die cracks and internal cuds on the reverse represent the imminent end of the reverse die, described as Overton-118a and more accurately by Tompkins Die State 2/6. Lustrous gold toning at the rims recedes to pale-gold at the centers of this remarkably well-struck half considering the advanced state of the dies. The obverse die shows heavy die clashing and faint cracks at stars 2 and 3, yet five later varieties make use of the obverse die. An attractive, CAC-endorsed example with only light abrasions and great eye appeal. *From The Eagle One Collection.* NGC ID# 24EJ, PCGS# 39322 Base PCGS# 6071

**1806 O-118a Half Dollar, MS61
Pointed 6, Stem, Late Die State**

- 4503** 1806 Pointed 6, Stem, O-118a, T-24, R.3, MS61 ANACS. Tompkins Die State 2/6. Deep autumn-brown and gunmetal-gray shades embrace this coruscating and refreshingly unabraded Mint State Draped Bust half dollar. The strike is sharp on the field stars, with only minor weakness on a few obverse stars, the hair ribbon, and the left (facing) wing near the shield. Struck from the latest die state that we have seen for this marriage, with bold obverse clash marks, and innumerable cracks and small breaks on the reverse. A desirable Uncirculated example certain to please the specialist. Housed in an early generation ANACS holder. NGC ID# 24EJ, PCGS# 39322 Base PCGS# 6071

**1807 Draped Bust Half, Brilliant MS61
Scarce Overton-105a Advanced Die State**

- 4504** 1807 Draped Bust, O-105a, T-4, R.4, MS61 NGC. Tompkins Die State 4/5. A brilliant and lustrous example of the late die state of dies, with heavy die breaks and die clashing on both sides. Several small lumps and internal cuds accompany the die cracks on the reverse. Slight central weakness of strike shows blending on a few of the top hair strands and on the eagle's left (facing) wing, although the strike is sharp in other areas. Flashy silver luster forms bold cartwheels when the coin is rotated in light. Very scarce in Brilliant Uncirculated both as type and for the late die state Overton-105a subvariety. NGC ID# 24EM, PCGS# 39344 Base PCGS# 6079

BUST HALF DOLLARS

**1807 50 Over 20 Bust Half
Near-Mint O-112, Large Stars**

- 4505** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 PCGS. An unabraded Borderline Uncirculated example from the first year of the Capped Bust design, this is the familiar Overton-112 variety with a blundered denomination. On the obverse, the 1 is sharply higher than the 807, poorly placed when replacing the broken 1 from O-111. The pearl-gray centers and chestnut-gold margins exhibit noticeable mint luster. Population: 36 in 58, 21 finer (5/16). *From The Eagle One Collection.* NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1807 Capped Bust Half, AU50
O-113, Sole Small Stars Variety

- 4506** 1807 Capped Bust, Small Stars, O-113, R.2, AU50 PCGS. CAC. The intermediate die state shows a long arcing die crack of O-113a above UNITED and through STATE, but it lacks the other qualifying crack at the top of S OF AMER. Fully pleasing surfaces retain noticeable luster beneath splendid gold, turquoise, and iridescent toning on both sides. Less plentiful than any of the Large Stars varieties, this die combination retains considerable demand as the only Small Stars representative. Population: 7 in 50, 17 finer. CAC: 2 in 50, 5 finer (5/16).
Ex: FUN Signature (Heritage, 1/2011), lot 3582.
From The Eagle One Collection. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

1807 Half Dollar, O-113, AU58
Small Stars, Intermediate Die State

- 4507** 1807 Capped Bust, Small Stars, O-113, R.2, AU58 PCGS. Capped Bust half dollars were struck for the first time in 1807, an important consideration for type purposes. A small mintage (estimated at 750,000 pieces) was accomplished, with four die varieties known for the date. The present coin represents the O-113 die marriage, the only Small Stars obverse variety.
This attractive near-Mint specimen is from an intermediate state of the dies, showing some of the cracks from the point of the bust to the stars on the left described for O-113a. The surfaces are deeply toned in grayish-brown and charcoal, showing scattered minor abrasions on both obverse and reverse. Characteristic softness is noted on the central design elements of both sides. Population (for the variety): 2 in 58 (1 in 58+), 5 finer (4/16).
Ex: Dallas Signature (Heritage, 10/2012), lot 4309. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

1811/10 O-101 Half, AU58
Still-Lustrous Surfaces, Dotted Date

- 4508** 1811/10 O-101, R.1, AU58 PCGS. Pale-blue toning at the rims surrounds golden-gray centers of this briefly circulated overdate half. The dot between 18 and 11 is bold, although other evidence of the underdigits is faint. As usual, the left-side stars are flat and the right-side stars show full central detail. A few small nicks do not distract from the near-Mint quality of the coin, which retains plenty of its original silver luster.
From The Eagle One Collection. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1813 Bust Half, Lustrous Toned MS62
O-108, Scarce Variety Any Finer

- 4509** 1813 O-108, R.3, MS62 PCGS. Liberty's profile is widely strike-doubled. Olive-gold toning with rose highlights covers the finely grained surfaces of this lustrous Bust half. The O-108 is a scarce variety in the series when in Mint State, with just three examples listed in the Spring, 2016 Steve Herrman census above AU58. The current coin at MS62 ranks second behind a single MS63 example. Sharply struck with no significant abrasions and generous eye appeal that suggests a finer grade.
From The Eagle One Collection. NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

1814 Half Dollar, O-104, MS64
Scarce This Fine

- 4510** 1814 O-104, R.4, MS64 PCGS. The scarce early die state, with a faint die crack at star 3 just beginning but no cracks visible on the reverse. This Choice example displays brightly lustrous, smooth surfaces with shades of champagne-gold and lilac-gray hues. Few signs of contact exist, although the strike is weak at Liberty's cap and the top-most stars. The reverse is correspondingly incomplete at the lower regions, yet eye appeal is outstanding. A Condition Census coin for the variety.
Ex: FUN Signature (Heritage, 1/2014), lot 4399.
From The Eagle One Collection. PCGS# 39478 Base PCGS# 6105

1815/2 O-101a Half Dollar, AU50
Necessary for a Date Set

- 4511** 1815/2 O-101a, R.3, AU50 NGC. The late die state of the 1815/2 is somewhat scarcer than the earlier Overton-101 variety, confirmed by a rising die crack that runs through 50 C on the reverse. The trade-off is a slightly less visible view of the overdated 2, which fades in later states of the die pair — the sole die marriage for the entire 47,150-piece mintage. This About Uncirculated example saw brief circulation with light rub on the cheek and eagle's wings. Shades of orange and sea-green toning cover both sides while substantial mint luster remains. There are no significant marks to report. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1817/3 O-101a Half Dollar
Near-Mint, Late Die State

- 4512** 1817/3 O-101a, R.2, AU58 PCGS. This is the slightly more-available later die state of the 1817/3 overdate with an ascending crack across the top of the denomination. Bronze-gold and violet patina grace much of each side, where the luster is essentially uninterrupted. Just a touch of rub across the high points was discerned several years ago by PCGS when the coin was holdered in an early-generation blue label holder. A nearly full strike remains visible across both sides.
From The Eagle One Collection. NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

**1817 Capped Bust Half, O-109, MS63
Vivid Multicolor Toning**

- 4513** 1817 O-109, R.2, MS63 PCGS. Richly toned in shades of greenish-gold, lilac, and violet-gray, this well-detailed Select example shows only minor signs of contact. Vibrant mint luster shines through the toning and eye appeal is outstanding. Both the O-108 and O-109 varieties show the O in OF and the C in AMERICA broadly recut on the reverse, but the position of star 13 on the obverse (distant from the curl on O-109) differentiates the two varieties. Population: 21 in 63 (1 in 63+), 21 finer (5/16). From *The Eagle One Collection*. NGC ID# 24F6, PCGS# 39501 Base PCGS# 6109

**1820 O-105 Half Dollar, MS62
Large Date, Square Base/Knob 2**

- 4514** 1820 Square Base 2, Large Date, Knob, O-105, R.1, MS62 PCGS. Sharing the same obverse as the scarce O-104 variety, this O-105 Square Base/Knob 2 example is best identified by the reverse. The D in UNITED is properly aligned (not too low as on the O-104) and a triple dentil opposite the leftmost pair of olive leaves on the reverse confirms the O-105 variety. Rose highlights visit the powder-gray surfaces with silver luster shining through. The strike is sharp with just a few small marks, none of which are really significant. Population (all Square 2, Large Date, Knob 2 varieties): 5 in 62, 8 finer (4/16). NGC ID# 24FD, PCGS# 39567 Base PCGS# 6122

**1822/1 Half Dollar, O-101, MS66
High Condition Census**

- 4515** 1822/1 O-101, R.1, MS66 NGC. This so-called 1822/1 variety shows an apparent underdigit amid the lower portion of the second 2, on this coin very faintly due to die erosion and metal flow lines. O-101 is a plentiful variety, but the present coin is a remarkable and conditionally rare Premium Gem. It is tied with an MS66 PCGS coin as the finest certified of the variety and is Condition Census-quality for the 1822 half dollar as a whole. NGC lists only a single MS67 coin finer, an O-105 representative (4/16).

This remarkable Capped Bust half dollar is also appealing as a type coin. Regardless of date or variety, MS66-quality Capped Bust halves are infrequently offered at auction. This piece displays a razor-sharp, even strike and vibrant cartwheel luster. Warm golden toning graces each side, and only a few faint grazes on the cheek are worthy of mention. An outstanding Bust half dollar and a virtually irreplaceable O-101 representative. NGC ID# 24FH, PCGS# 39604 Base PCGS# 6130

**1826 Capped Bust Half, O-110, MS65
Original, Multicolor Toning**

- 4516** 1826 O-110, R.2, MS65 NGC. CAC. Recutting shows inside the upper loop of the 8 in the date and the arrowheads are virtually touching on the reverse, identifying the popular O-110 variety. This spectacular Gem is sharply detailed in most areas, with just a trace of softness on the eagle's claws and some flatness on some star centers. The well-preserved surfaces radiate vibrant mint luster under shades of greenish-gold and lavender toning. Census: 1 in 65, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FM, PCGS# 39679 Base PCGS# 6143

**1828 Large Letters Half, Stunning MS65 ★
O-115, Powerful Eye Appeal**

- 4517** 1828 Square Base 2, Small 8s, Large Letters, O-115, R.2, MS65 ★ NGC. A razor-sharp Gem with terrific eye appeal. The O-115 is a relatively available Square Base 2 variety, confirmed by angled die defect lines in the field between the scroll at E of E PLURIBUS and the eagle's left (facing) wing. Golden luster glows from the centers of this vibrant half, deepening to rich caramel-gold shades framed by calico rim toning. Lavender and steel-blue shades blanket the reverse. The surfaces are remarkably mark-free. Ranking high in the Condition Census for the variety according to Steve Herrman's Spring 2016 listing, this stunning coin, in our opinion, clearly outranks all others in eye appeal and the technical quality suggests a finer grade is possible. Census (for the variety): 3 in 65 (1 in 65★), 2 finer (4/16). NGC ID# 24FR, PCGS# 39769 Base PCGS# 6151

**1829 Small Letters O-112 Half, MS65 Prooflike
Fully Reflective Fields on Both Sides**

- 4518** 1829 Small Letters, O-112, R.1, MS65 Prooflike NGC. NGC recognizes prooflike surfaces on Bust halves, but only on a limited basis when the reflectivity of the fields is exceptional. This richly toned 1829 is one of five pieces to receive such recognition (four in Prooflike, one in Deep Prooflike) and it is the finest of those five coins by two grading points (4/16). In previous years, such pieces were described in catalogs as proofs, although that distinction is rarely encountered today. Shades of sea-green and cobalt-blue flow over both sides of this mirrored Gem, sharply struck from the O-112 die pair with parallel die lines visible below star 13. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

**1830 Half Dollar, O-101, MS64+
Luminous Surfaces**

- 4519** 1830 Small O, O-101, R.1, MS64+ NGC. CAC. The 1830 half dollar has many plentiful varieties, including Overton-101, which are often represented in type collections. This high-end near-Gem displays original, frosty luster and a blush of champagne-gray toning. Die fatigue appears around the peripheries, but the stars and legends are sharp. Were it not for a few grazes on Liberty's cheek, a full Gem assignment might have been given. NGC lists 46 finer examples, including likely resubmissions (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**1831 Capped Bust Half, MS65
Popular O-109 Variety**

- 4520** 1831 O-109, R.1, MS65 PCGS. The 18 is higher than 31 in the date and the last two pales in the first gule are welded together, identifying the O-109 variety. This delightful Gem displays well-detailed design elements and lustrous, well-preserved surfaces with highlights of lavender and champagne-gold toning. Population: 61 in 65 (2 in 65+), 4 finer (5/16). NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

1831 O-118 Half Dollar, MS65**Top of the Census**

- 4521** 1831 O-118, R.3, MS65 NGC. CAC. A new addition to the Condition Census for the O-118 and possibly the finest known of the variety. We offered the only other listed MS65 example (according to the Spring, 2016 edition of Steve Herrman's Census) in our March, 2004 Portland, OR Signature auction. The current coin is sharper on the scroll — which is always weakly struck for the variety — and the motifs are exceedingly sharp throughout both sides of this lustrous Gem. Bronze-gold and blue toning rolls across the frosty and nearly mark-free, silver surfaces. CAC endorsed with impressive quality and eye appeal. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 24FV, PCGS# 39855 Base PCGS# 6159

1835 Capped Bust Half, MS65
Tied For Finest O-103, Ex: Newman

- 4522** 1835 O-103, R.2, MS65 NGC. CAC. Ex: "Col." E.H.R. Green/ Eric P. Newman Collection. This delightful Gem appears to be tied for top spot in the Condition Census for the variety. The central devices are sharply struck. The reverse die, it may be noted, emerged unscathed from its earlier use on the 1834 O-119. The richly toned, intensely lustrous obverse features iridescent shades of golden-brown, lavender, and lilac toning. The silver-gray reverse is more lightly toned with pastel colors and iridescence through most of the legend. Three dots alongside star 2 are mint made, thought by students to have been imparted by the mechanism used to eject coins from the coining chamber of the screw press. The overall eye appeal of this 1835 half dollar is remarkable. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (*Heritage*, 11/2013), lot 33460. NGC ID# 24FZ, PCGS# 39929 Base PCGS# 6168

REEDDED EDGE HALF DOLLARS

1836 GR-1 Reeded Edge Half Dollar, AU50
Semireflective, Border-Toned Surfaces

- 4523** 1836 Reeded Edge, GR-1, R.2, AU50 PCGS. There is only one documented die variety of the 1836 Reeded Edge half dollar, and this example is a late die state with a short rim break at the dentils to the right of the final S in STATES. This lovely piece displays light, silver-gray surfaces within a frame of peripheral gold and blue toning. A trace of high-point wear is evident on the cheek and elsewhere. The reported mintage of 1,200 pieces is questioned by some researchers, but the 1836 Reeded Edge is always in demand as one of the first half dollars produced on the Mint's new steam-powered press, with a low mintage regardless of the exact number of pieces coined. Ex: *ANA Signature (Heritage, 10/2012)*, lot 4349. From *The Eagle One Collection*. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half, GR-1, AU55+
Unique Plus-Graded AU Coin

- 4524** 1836 Reeded Edge, GR-1, R.2, AU55+ NGC. CAC. The famous Reeded Edge variety of the 1836 half dollar, the debut of Christian Gobrecht's design work on this denomination. The mintage of the 1836 Reeded Edge half is unknown, although the *Guide Book* lists a low estimate of 1,200+. This high-end Choice AU coin displays sharp detail and satiny surfaces with bits of luster near the borders. Areas of olive, golden-gray, and lavender-blue toning appear over each side. From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1837 Reeded Edge Half, MS66
Finest GR-22 Example

4525 1837 GR-22, R.2, MS66 PCGS. Pearlescent silver luster glows beneath a soft-gray patina with reddish-gold accents at the margins of this appealing Reeded Edge half. The coin is sharply struck at the centers, although diagnostic die fatigue causes weakness in some of the stars and at the cap. Likewise, the tops of CE in CENTS are weak from peripheral die wear.

The GR-22 variety is known for subtle die clashing, seen on this coin beneath Liberty's chin and at the peak of the right (facing) wing. Weakness at the reverse dentils suggests a late die state. Dick Graham's 2012 reference lists the Condition Census for the variety, with two MS66 coins at the top of the six "finest known," although Steve Herrman's Spring 2016 census suggests that this exact coin is the sole finest of the variety. PCGS lists six pieces at this MS66 level with one finer coin for the 1837 issue without regard for the variety (5/16). NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

1838 GR-15 Half Dollar, MS64+
Lustrous and Border Toned

4526 1838 GR-15, R.3, MS64+ NGC. CAC. Ex: "Col." E.H.R. Green. Golden-brown and powder-blue margins frame the pearlescent-silver fields and devices. The lustrous surfaces are smooth with just a few faint grazes on the left obverse. Well-struck at the centers, the peripheral elements show moderate roller marks, as made. An original Reeded Edge half with remarkable eye appeal and an unimprovable provenance. Census: 5 in 64+, 23 finer. CAC: 16 in 64, 5 finer (4/16).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.00; Eric P. Newman Numismatic Education Society Collection (Heritage, 11/13), lot 33686. PCGS# 531096 Base PCGS# 6177

SEATED HALF DOLLARS

1839 Seated Liberty Half Dollar, MS65
First-Year Issue, With Drapery
Tied for Finest at NGC

4527 1839 With Drapery, WB-102, MS65 NGC. CAC. A substantial mintage of more than 1.9 million Seated Liberty half dollars was accomplished in 1839, split between the earlier No Drapery and later With Drapery motifs. The With Drapery examples, like the present coin, show an extra three folds of drapery below Liberty's elbow and a slightly smaller rock. The 1839 is an underrated issue as a date, and With Drapery Gems are very rare.

The present coin is a well-detailed Gem, with just a touch of softness on the eagle's claw and some star centers. The surfaces are well-preserved and brightly lustrous, under attractive shades of greenish-gold and magenta toning. Overall eye appeal is outstanding. We expect intense competition from type collectors and series specialists when this lot is called. Census: 4 in 65, 0 finer. CAC: 2 in 65, None finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

1840-(O) WB-101 Half Dollar, MS62
Popular No Mintmark Variety

4528 1840-(O) Medium Letters, WB-101, MS62 NGC. Die Pair 4, R.3. The Missing O mintmark variety is, in fact, a "mule" of dies from two different coinage series (a Seated half obverse with an 1839 (type of 1838) Reeded Edge Bust half reverse). Two 1840 New Orleans varieties have this distinction, and each is rare in Mint State. This sharply struck example is especially attractive, with soft luster beneath lilac and golden-gray overtones. The 8 is slightly repunched northeast, and an amazing network of radial die cracks traverse the reverse. The cracks exceed the Bugert reference photo both in number and extent.

Ex: Long Beach Signature (Heritage, 6/2015), lot 3965. NGC ID# 24GP, PCGS# 572003 Base PCGS# 6233

**1845/1845-O Seated Liberty Half, MS66+
Single-Finest Certified Example, FS-303**

- 4529** 1845-O Doubled Date, WB-108, Die Pair 1, FS-303, MS66+ NGC. CAC. From a mintage of more than 2 million pieces, the 1845-O Seated Liberty half dollar is a relatively available issue as a date. Some interesting varieties have been documented, however, like this fascinating doubled date example. All four numerals in the date are strongly doubled on this sought-after *Cherrypickers* variety. In later die states, the drapery below Liberty's elbow becomes attenuated and eventually vanishes, due to die polishing. The drapery is still easily visible on this specimen. The design elements are sharply detailed throughout and the well-preserved surfaces show a mix of satiny mint luster and some minor prooflike reflectivity. Attractive shades of lavender-gray and pale gold toning enhance the strong visual appeal. Census (for the variety): 1 in 66+, 0 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24H4, PCGS# 409886 Base PCGS# 6249

**1847 Seated Half, Lustrous MS65
WB-103, Rarely Encountered in Gem Condition**

- 4530** 1847 Repunched Date, WB-103, MS65 PCGS. The 7 in the date is recut north. A few faint die cracks link the left stars one to the next, and a pair of light cracks frame the date. Additional cracks traverse the reverse legend and arrowheads. Despite a mintage of nearly 1.2 million pieces, this 1847 Philadelphia half is a well-known condition rarity in Gem or finer grades. Vibrant silver luster cascades over the frosty surfaces of this example, with a blush of light reddish-gold toning at the centers of each side. The strike is uncompromisingly bold throughout. A small mark on Liberty's cheek is noted, but otherwise the fields and devices are smooth and problem-free. NGC ID# 24HA, PCGS# 572055 Base PCGS# 6257

**1849 WB-101 Seated Half, MS64
Scarcely Found Any Finer**

- 4531** 1849 WB-101 MS64 PCGS. CAC. Despite a plentiful mintage, the 1849 is surprisingly elusive in finer grades, presumably the result of melting by speculators. The bullion content of silver coins exceeded face value by late 1849, as bountiful California gold mines wreaked havoc with the nation's bimetallic monetary system. This is a lustrous and lightly toned Choice half that shows a few minor obverse field marks and displays a sharp strike save for the eagle's left (facing) ankle. Housed in a green label holder. Population: 24 in 64, 2 finer. CAC: 9 in 64, None finer (4/16). Ex: ANA Signature (Heritage, 8/2010), lot 4957. NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262

**1850 Seated Half, Sharp MS64
Rarely Seen Finer**

4532 1850 WB-101 MS64 NGC. The 1850 half dollar is elusive in Mint State, and Gem examples are extremely rare. This sharp near-Gem displays semireflective fields without detracting abrasions. Each side is toned in warm rose-gold hues. The reverse shows a heavy die clash in the lower-right portion of the shield, and both sides have light peripheral die cracks. Census: 6 in 64 (1 in 64+), 1 finer (4/16). NGC ID# 24HG, PCGS# 572074 Base PCGS# 6264

**1851 Half Dollar, Sharp MS64
WB-103, Repunched Date**

4533 1851 Repunched Date, WB-103, MS64 PCGS. CAC. The remnant of an errant 1 is seen in the field to the left of the primary 1 in the date. This Choice 1851 half dollar is razor-sharp and displays satiny luster with olive-gray, gold, and bluish toning. A few small ticks are all that prevent Gem classification. This issue is seldom seen in MS64, and finer coins are rare. Population (all varieties included): 23 in 64, 3 finer. CAC: 1 in 64, 2 finer (4/16). PCGS# 572080 Base PCGS# 6266

**1851-O Seated Liberty Half Dollar, MS65+
Only Two Finer Coins at PCGS**

4534 1851-O WB-101, Die Pair 4, R.3, MS65+ PCGS. CAC. The obverse has a die crack through the right side of star 5 and another delicate crack in the field over Liberty's right foot, reaching toward the inside point of star 13. The Large O mintmark is high and left, centered over the F in HALF and close to the arrow feather.

With the massive influx of gold from California in the early 1850s, the value of silver rose to the point that the silver value was about 7% greater than face value of the half dollar, meaning that the coins were hoarded and melted for profit. Despite a mintage of 402,000 1851-O half dollars, few survive today.

This amazing Gem is one of a handful of specimens certified at this exalted grade level. It is fully original and sharply struck with frosty silver luster beneath lovely gray and iridescent toning. Population: 20 in 65 (1 in 65+), 2 finer. CAC: 3 in 65, 2 finer (5/16). PCGS# 572082 Base PCGS# 6267

1852 Seated Half, Golden-Toned MS65
Luminous Surfaces

4535 1852 WB-101 MS65 NGC. CAC. Golden-brown toning is consistent throughout except for hints of magenta and navy-blue near the rims. Lustrous and uncommonly preserved for a No Motto half. Well-struck save for minor blending on the stars near 12 o'clock. Interesting parallel and diagonal die lines cross the field within the reverse shield, as made. Census: 3 in 65, 4 finer. CAC: 2 in 65, 0 finer (4/16).

Ex: *Chicago Signature* (Heritage, 8/2011), lot 3970. NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

1854-O WB-101 Arrows Seated Half, MS65
High-Grade New Orleans Example

4536 1854-O Arrows, WB-101, Die Pair 4, R.3, MS65 NGC. Struck from the only use of the obverse die in its early die state, paired with the very late die state of the reverse die in its third and final use. As expected, the obverse is razor-sharp, yet the reverse is almost equally bold despite the advanced die state. Both sides are semireflective with attractive lilac-gray toning and reddish-orange highlights. A pronounced rim die cud exists at the intersection of two cracks beneath HALF and DOL. More than 5.2 million pieces were struck, yet fewer than two dozen pieces exist at NGC at the Gem or finer levels. Census (all 1854-O varieties): 13 in 65, 10 finer (4/16).

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

1856/56-O Seated Liberty Half, MS66
Finest WB-103 and Tied for Finest of the Issue

4537 1856-O Repunched Date, WB-103, Die Pair 15, R.3 MS66 PCGS. CAC. An original, lustrous Premium Gem with the 56 in the date recut north, while the undertype is sharply visible below the upper serif of the 5 and below the knob of the 6, identifying the WB-103 variety. Well-detailed with bright silver luster beneath the natural, smoky-gray toning, the coin shows fleeting highlights of champagne-gold and no mentionable distractions even under close inspection with a loop. It is the finest certified specimen of the WB-103 by far — appropriately CAC endorsed — and, importantly, this 1856-O is tied as the finest-known at either service regardless of variety. We expect lively competition from series specialists when the lot is called. Population (all varieties): 3 in 66, 0 finer. CAC: 2 in 66, 0 finer (4/16). NGC ID# 24HP, PCGS# 413722 Base PCGS# 6288

**1859-S WB-102 Half Dollar, MS65
Medium S, Obvious Condition Rarity**

4538 1859-S Medium S, WB-102, Die Pair 6, R.3, MS65 PCGS. A full strike covers both sides of this frosty, lightly toned San Francisco issue. Liberty's hair strands are sharp, as are all 13 star centers — a situation we do not see often for this S-Mint date or die variety. Light golden-gray toning shows a few patchy-tan accents, with bold cartwheel luster adding to the overall eye appeal. The mintage was 556,000 pieces, yet few were saved numismatically and most of the issue succumbed to attrition.

Gem examples are particularly rare. To date, PCGS and NGC combined report only a dozen or so pieces, with some possible duplications. Bill Bugert's comment is well-taken: "These halves are not routinely seen on the market and collecting all of the die marriages will be challenging." Eight varieties are known, but only two die pairs utilize the Medium S mintmark. Population (all varieties): 4 in 65, 3 finer (4/16). NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

**1863 WB-101 Seated Liberty Half, MS65
Lightly Toned, Frosted Example**

4539 1863 WB-101 MS65 PCGS. CAC. Struck during the bleakest part of the Civil War when all coinage disappeared from circulation, yet few pieces were numismatically saved. The survival of a Gem Uncirculated silver dollar from 1863 is a minor miracle, particularly when the coin is sharply struck and minimally toned with frosty cartwheel luster. A few small ticks on Liberty's left (facing) arm and in the adjacent field are tiny and of little concern. Light die striations are noted on both sides, as made. Population: 9 in 65, 5 finer. CAC: 3 in 65, 3 finer (4/16). PCGS# 572155 Base PCGS# 6309

**1866 Motto Seated Half, MS66
WB-Unlisted, Misplaced Digit Beneath 8**

4540 1866 Motto MS66 PCGS. A richly frosted example, with rose-red and olive-gray accents over pearlescent-silver surfaces. The strike is sharp across the lustrous Gem surfaces. Abrasions and marks are limited to a few minimal occurrences, none of which are distracting. An interesting anomaly in the dentils beneath the 8 in the date is almost assuredly the top loop of a misplaced digit — most likely an 8 or a 6. This MPD is not listed in either the 1993 Wiley-Bugert reference or the most recent edition of *Cherrypicker's*. The lower reverse shows possible die doubling most visible at ALF DO of the denomination. PCGS reports just two finer examples regardless of variety. NGC ID# 2VTG, PCGS# 6319 Base PCGS# 6319

1867 Half Dollar, MS66
Remarkable Quality and Appeal
Condition Census

- 4541 1867 WB-101 MS66 PCGS.** This is undoubtedly one of the hidden highlights in this sale, a Condition Census 1867 Seated Liberty half dollar. This issue had a moderately substantial mintage of more than 449,000 pieces, but Uncirculated survivors are scarce. The certified population figures show a concentration of coins in the MS64 to MS65 grade range, although we believe those figures are slightly inflated by resubmissions. The 1867 half dollar is seldom offered at auction in any Mint State level.

This piece is one of only three MS66 pieces at PCGS, and that service shows only the Gardner MS68 coin finer. The finest at NGC is a single MS65 (5/16). This delightful Premium Gem showcases sun-gold interiors within plum-red, jade-green, and sky-blue peripheries. The strike is sharp, and close study with a loupe fails to reveal a single mentionable flaw. Luster is frosty and original. The staggering eye appeal must be seen in person to be fully appreciated.

Ex: Long Beach Signature (Heritage, 5/2008), lot 698, which realized \$27,600. PCGS# 572177 Base PCGS# 6321

1870-CC Seated Liberty Half, XF40
Elusive First-Year Key

- 4542 1870-CC WB-101, Die Pair 1, R.6, XF40 NGC.** The Carson City Mint struck a small mintage of 54,617 half dollars in 1870, the first year of coinage operations at the famous Western facility. The 1870-CC is scarce-to-rare in all grades today. Like many examples of this issue, this attractive XF specimen exhibits well-detailed design elements, with only partial drapery below Liberty's elbow, due to excessive die polishing. The surfaces are lightly abraded, with pleasing shades of lavender-gray and amber toning. Census: 7 in 40, 19 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

1872 Half Dollar, MS66
Radiant Mint Luster

- 4543 1872 WB-101 MS66 PCGS.** A mintage exceeding 880,000 pieces and uninspiring *Guide Book* values hinder collector recognition of the 1872 Seated half dollar as a scarce date. High-end circulated coins are infrequently seen, and the issue is genuinely rare at any Mint State level. This Premium Gem is tied with four others at PCGS as finest certified. Luster glistens over the frosty, untouched surfaces while yielding lovely orange-gold, lavender, and deep blue toning. The strike is boldly rendered, and a few tiny ticks are restricted to the high points of Liberty's legs. An outstanding opportunity for the astute Seated half specialist. NGC ID# 24K7, PCGS# 572201 Base PCGS# 6333

**1873-CC Seated Liberty Half Dollar, MS63+
Popular With Arrows Variant**

- 4544 1873-CC Arrows MS63+ NGC. WB-Unlisted, Die Pair 7.** A weight change was mandated for U.S. subsidiary silver coinage partway through the year in 1873 and coins with the new standard were struck with arrows at the date. A small mintage of 214,560 With Arrows Seated Liberty half dollars was accomplished at the Carson City Mint that year. The With Arrows coins are seen more often than their No Arrows counterparts, but both issues are quite elusive, especially in high grade.

This Plus-graded Select example offers well-detailed design elements, with some interesting die cracks through the olive leaves on the reverse. Large Arrows at the date, with the left arrow higher than the right, and an Open 3. The lightly marked original surfaces are patinated in shades of lavender-gray and greenish-gold, with traces of satiny mint luster underneath. Census: 4 in 63 (1 in 63+), 7 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

**1875-CC WB-102 Seated Half Dollar, MS65
Just One Finer at NGC**

- 4545 1875-CC Repunched Mintmark, WB-102, Die Pair 8, R.4, MS65 NGC. CAC.** A frosty, lustrous example of this popular Carson City issue. More than 1 million pieces were struck and most circulated heavily in the West. Slight weakness at some of the star centers and on Liberty's topmost hair strands is noted, yet the strike is otherwise sharp. Pale-rose and lilac toning at the centers deepen to grayish-blue accents at the rims. A few tiny ticks on the portrait do not distract from the appeal of this CAC-endorsed coin. MS65 examples of the 1875-CC are seldom seen, and just three numerically finer coins are reported at PCGS and NGC combined. Census (all varieties): 4 in 65, 1 finer. CAC: 3 in 65, none finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. PCGS# 572228 Base PCGS# 6350

**1876-S WB-102 Half Dollar, Frosty MS66
Only One Finer at Either Service**

- 4546 1876-S Open Bud, Very Small S, WB-102, Die Pair 28, R.3, MS66 NGC.** Remarkably, the mintage of more than 4.5 million pieces from the San Francisco Mint in 1876 yields only a handful of surviving coins in Premium Gem or finer grades. This highly lustrous, rainbow-toned example is one of the chosen few, with dramatic multicolor hues at the obverse margin around the vibrant, gold-toned center. The reverse complements the obverse with the same palette of colors, although of a more-reserved intensity but equally lustrous. Just one coin is numerically finer at both services combined. Census (all varieties): 3 in 66, 1 finer (4/16). NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

**1877-CC Half Dollar, MS65+
Sole Plus-Graded Gem at NGC**

- 4547** 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 15, R.2, MS65+ NGC. CAC. Type Two Reverse (Closed Bud). This is the sole Gem 1877-CC to earn the Plus designation from NGC, an important distinction with just one coin numerically finer at the service. CAC gives the coin its endorsement as well. Silver mint luster flows brightly beneath attractive lilac and grayish-blue toning. The large mintage of more than 1.4 million pieces required 12 listed die pairs in the Bugert reference, a number that we believe will increase as more coins are seen. Sharply struck with exceptional eye appeal. Census: 18 in 65 (1 in 65+), 8 finer. CAC: 7 in 65, 1 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. PCGS# 572250 Base PCGS# 6356

**1880 Seated Half, MS67
Impeccable Surface Preservation**

- 4548** 1880 Closed Bud, WB-102, MS67 NGC. The years from 1879 through 1890 saw incredibly skimpy half dollar mintages at the Philadelphia Mint (and no half dollar mintages elsewhere) as the nation's coin factories concentrated on increasing the glut of unpopular, largely unused Morgan dollars mandated by cronyism and politics (pardon the redundancy) in the form of the Bland-Allison Act of 1878. The Philadelphia Mint struck 8,400 business strikes and 1,355 proofs in 1880. This specimen was obviously laid away at the time of issue and carefully preserved, as it shows virtually no evidence of contact. Amber-gold central coloration joins the steel-blue rim toning on the obverse, while the reverse offers a mint-green center and blue margins. The strike is impeccable, while falling just short of absolute. This piece is one of seven MS67 coins at NGC, with none finer (4/16).
Ex: Dallas Signature (Heritage, 11/2006), lot 838; Long Beach Signature (Heritage, 2/2007), lot 3507; FUN Signature (Heritage, 1/2012), lot 3598. NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

**1891 Seated Liberty Half, MS66
Mirrored Fields**

- 4549** 1891 WB-101 MS66 PCGS. CAC. Although not designated as such, this Premium Gem example from the last issue of Liberty Seated half dollars exhibits prooflike surfaces due to strongly mirrored fields. Faint toning is present in hues of tan and gray. The strike is sharp overall, with minor incompleteness at the upper obverse and the lower portion of the eagle. Population: 14 in 66 (3 in 66+), 2 finer. CAC: 11 in 66, 1 finer (5/16). PCGS# 572276 Base PCGS# 6373

PROOF SEATED HALF DOLLARS

1867 Half Dollar, PR66+ Cameo
None Graded Numerically Finer at PCGS

4550 1867 PR66+ Cameo PCGS. WB-101, with a high, upward-sloping date. Prominent die polish lines occur at the lower left reverse. Coated in a thick layer of mint frost, the motifs contrast markedly against the glassy, apparently limitless fields throughout this Premium Gem Cameo proof. On the obverse, central brilliance progresses to concentric bands of golden-orange, magenta, violet, and blue. The reverse is almost entirely untoned, aside from splashes of peripheral rose. Immediately eye-catching with lots to admire and little to critique upon close inspection.

The Mint produced 625 proof Seated halves in 1867, supporting a business-strike mintage of 449,300 pieces. The coins struck for circulation are extremely rare in near-Gem condition or better, putting added pressure on proofs from collectors seeking high-grade examples of this early With Motto date. Population: 6 in 66 (2 in 66+) Cameo, 0 finer (5/16).

Ex: *Old West and Franklinton Collections* (*American Numismatic Rarities*, 8/2006), lot 629; *Eugene H. Gardner Collection, Part IV* (*Heritage*, 10/2015), lot 98724. NGC ID# 27U2, PCGS# 86425

1870 Half Dollar, PR65
Beautifully Toned

4551 1870 PR65 NGC. CAC. WB-101. A plentiful proof issue that is almost never seen in Cameo grades. This Gem CAC 1870 proof half dollar is too deeply toned to deliver field-motif contrast, but the vivid sun-orange, violet, and ocean-blue toning that blankets each side is visually pleasing. The strike is bold, and the fields display reflective mirroring. Census: 14 in 65, 11 finer. CAC: 3 in 65, 2 finer (4/16). From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 27U5, PCGS# 6428

1873 Arrows Half Dollar, PR66 ★
Conditionally Rare, One-Sided Cameo

- 4552 1873 Arrows PR66 ★ NGC. WB-106.** In 1873, the Mint made two changes to the Seated Liberty half dollar. Arrows were added on either side of the date to signify an increase in silver weight from 12.44 gm (the standard since 1853) to 12.50 gm, and the date logotype was changed partway through the year to widen the 3 so it would not be mistaken for an 8. Proof 1873 half dollars struck in the early, lighter standard show the Closed 3 date type, and those struck in the heavier 12.5 gm standard show the modified Open 3 in the date. Neither issue is available in high grade. This With Arrows, Open 3 proof is among the finest non-Cameos at NGC, showing a full strike and mirrored fields. Warm sun-gold toning appears over much of each side, although ribbons of blue and violet grace the right-hand peripheries. A few stray lines in the right obverse field determine the grade. The obverse of this piece displays considerable cameo contrast, although the reverse does not warrant such a designation. Census: 9 in 66 (2 in 66★), 0 finer (5/16). NGC ID# 27UU, PCGS# 6434

1875 Seated Half, Brilliant PR66
Splendid Silver Mirrors

- 4553 1875 PR66 PCGS. CAC. WB-101.** An essentially white coin, with undisturbed Premium Gem surfaces and the merest whisper of pale gold color at the reverse center and right-hand rim. The strike is pinpoint sharp. The 2017 *Guide Book* mintage is 700 proofs, although Walter Breen believed somewhat fewer proofs were struck. The Arrows were removed in 1875, but the silver content maintained at the new 1873 and 1874 standard. Population: 9 in 66, 3 finer. CAC: 2 in 66, 3 finer (4/16). NGC ID# 27U9, PCGS# 6436

BARBER HALF DOLLARS

1893 Barber Half Dollar, MS66
Original Surfaces, CAC-Approved

- 4554 1893 MS66 PCGS. CAC.** The Mint nearly doubled Barber half dollar production in 1893, but collectors set aside fewer examples as the excitement of the new design wore off. This lustrous Premium Gem displays multiple layers of toning that include gray, rose, sky-blue, and lavender obverse hues, while the reverse has a light overlay of golden-brown patina. Well-struck devices show minor incompleteness on the eagle's high points, but each side is devoid of obvious abrasions. Population: 13 in 66 (2 in 66+), 1 finer (4/16). *Ex: Central States Signature (Heritage, 5/2004), lot 7500; Public Auction Sale (Stack's, 11/2004), lot 381; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS65 PCGS with CAC approval), lot 98739.* NGC ID# 24LK, PCGS# 6465

1896-O Barber Half, MS66
Totally Original Surfaces
Single-Finest Coin at NGC

4555 1896-O MS66 NGC. CAC. The 1896-O Barber half dollar claims a smallish mintage of 924,000 pieces and many numismatists consider it the most challenging issue of the series in high grade. Few examples were saved by contemporary collectors making the 1896-O scarce, even in collectible circulated condition. The single-finest certified example is the PCGS MS67 Eliasberg specimen, which sold for \$88,125 as lot 4075 of the ANA Signature (Heritage, 8/2015). At the MS66 level, only a few examples are known, including the Thaine B. Price coin and the Duckor/Gardner specimen, which have both sold at auction several times in the last two decades, for prices up to \$51,750. This entirely original and completely fresh Premium Gem will now join them as the third known MS66 specimen, and the single-finest coin at NGC (4/16).

The impeccably preserved original surfaces of this remarkable Premium Gem are blanketed in attractive shades of golden-brown and lavender-gray toning, with vibrant, satiny mint luster underneath. The design elements are especially well-detailed for a New Orleans issue, with just a touch of the usual softness on the eagle's claw. Overall eye appeal is terrific. Off the market since at least 1932, this coin should find a home in the finest collection or Registry Set. Census: 1 in 66, 0 finer. CAC: 2 in 66, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24LW, PCGS# 6475

1897-O Half Dollar, MS66
Series Key Issue in High Grade

4556 1897-O MS66 PCGS. The 1897-O Barber half is one of the key issues from the first decade of the series, struck in the amount of only 632,000 pieces, and series specialists eagerly seek examples in all grades. This Premium Gem is one of only nine such certified between NGC and PCGS combined. There is one MS68 NGC piece numerically finer, and PCGS shows one MS66+, two MS67, and one MS68 finer (5/16). This piece shows satin luster over lightly toned surfaces with traces of gold and powder-gray accenting much untuned silver-gray area remaining. A loupe reveals a thin scrape through the left shield border on the reverse, and an obverse mark angling up from the forward bust truncation on the neck. The obverse show light clash marks. This piece should be the subject of spirited bidding. NGC ID# 24LZ, PCGS# 6478

1897-S Barber Half Dollar, MS66
Sharply Detailed, Richly Toned Example

4557 1897-S MS66 NGC. CAC. With its low mintage of 933,900 pieces, the 1897-S Barber half dollar is a challenging issue, especially in high grade. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the immaculate surfaces are visited by vivid highlights of lavender, greenish-gold, and amber toning. Vibrant mint luster shines through the patina. Census: 3 in 66, 3 finer. CAC: 3 in 66, 5 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24M2, PCGS# 6479

1898-S Barber Half, MS65
Heavily Exported Issue

- 4558 1898-S MS65 NGC.** The 1898-S Barber half dollar is an elusive, underrated issue, despite its substantial mintage of 2.3 million pieces. A number of coins were sent to the Philippines after the U.S. acquired the islands in the Spanish-American War. This attractive Gem is sharply detailed in most areas, but the eagle's claw and shield point show a touch of the often-seen softness. The well-preserved, lustrous surfaces are enhanced by shades of lavender-gray and greenish-gold toning. Census: 9 in 65, 6 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24M5, PCGS# 6482

1900-O Half Dollar, MS65
Elusive in High Grade

- 4559 1900-O MS65 PCGS.** Despite a mintage of more than 2.7 million coins, the 1900-O Barber half dollar saw limited survival in Mint State. Any such coin is scarce, and Gems are genuine rarities. This New Orleans issue is known for its weak strike and often insipid luster. The present coin is typical in the first sense but above-average in the second — the fields are especially lustrous and softly shimmer when rotated beneath a light. The strike is weak, most noticeably on the eagle's body and the right side of the shield. The interiors show light champagne toning, while the peripheries have deeper amber-gold and ocean-blue color. A small, shallow planchet void is discernible on Liberty's cheek, as struck. Population: 7 in 65, 4 finer (4/16). NGC ID# 24MA, PCGS# 6487

1900-S Half Dollar, MS64+
Few Known Finer

- 4560 1900-S MS64+ NGC. CAC.** The 1900-S Barber half is elusive in Mint State and rare finer than MS64. This Plus-graded Choice example will appeal to a range of budget-conscious collectors who find Gems to be just out of reach. The eagle's right (facing) wing junction and shield corner are soft, but the talons and obverse stars are sharp. Satiny luster displays light golden toning on each side. A loupe reveals some pale greenish hues near the borders, and there are a few faint luster grazes that limit the grade. Census: 11 in 64 (1 in 64+), 8 finer. CAC: 8 in 64, 6 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 57PC, PCGS# 6488

1901 Half Dollar, MS66
Toned Type Coin

- 4561 1901 MS66 PCGS. CAC.** A popular 20th century type coin, the 1901 Barber half dollar is usually available through MS65. However, this Premium Gem is a condition rarity, and finer coins are far out of reach and prohibitively rare for most collectors. Lavender-gray hues intermingle with aquamarine toning on each side, and the satiny surfaces are free of bothersome abrasions. The eagle's right (facing) talons show slight softness, as usual. Population: 5 in 66, 2 finer. CAC: 2 in 66, 2 finer (4/16). NGC ID# 24MC, PCGS# 6489

1901-S Half Dollar, Luminous MS65
Rare So Fine, Exceptional Luster

- 4562 1901-S MS65 PCGS. CAC.** The 1901-S is the rarest of the first-year 20th century Barber halves, and it also boasts the lowest mintage of the three at barely more than 847,000 pieces. Circulated examples demand a premium in all grades, and Mint State coins are rarely seen. This CAC-endorsed Gem PCGS coin is among the most impressive examples we have offered in recent years. Modestly reflective fields and unabraded surfaces contribute immensely to the eye appeal, even while strike weakness is seen on the eagle and on the highest points of the obverse portrait. Champagne coloration along with pale mint-green peripheral toning on the obverse complete the visual appeal. Population: 6 in 65, 6 finer. CAC: 5 in 65, 2 finer (4/16). NGC ID# 5EPB, PCGS# 6491

1902 Barber Half, MS66
Outstanding Originality
Rare This Fine

- 4563 1902 MS66 PCGS. CAC.** Daubs of olive toning appear near the borders, leaving most of this Premium Gem 1902 half dollar with faintly iridescent, ivory luster. There are no significant abrasions. Moderate strike weakness occurs on the high points of the obverse portrait and on the right shield corner and wing junction of the reverse. The 1902 is occasionally seen through MS65, but MS66 coins are rare. Population: 5 in 66 (1 in 66+), 1 finer. CAC: 3 in 66, 0 finer (4/16). NGC ID# 24MF, PCGS# 6492

1902-O Barber Half Dollar, MS67
Tied for Finest Certified

- 4564 1902-O MS67 NGC.** The 1902-O is usually found with substandard luster, but not on this piece. The surfaces are bright and semireflective with extraordinary flash and immediate eye appeal. As is characteristic of the issue, this piece is weakly defined on the head of the eagle, the top of the shield, the juncture of the shield and right wing, and the right claw. Yet, the obverse exhibits above-average sharpness. The visual appeal of the coin is immediate and unforgettable and the technical quality is unsurpassed. The certified population for the 1902-O is scant in Mint State and pieces grading finer than MS65 are extremely rare. Census: 2 in 67, 0 finer (5/16). Ex: FUN Signature (Heritage, 1/1998), lot 6940; FUN Signature (Heritage, 1/2005), lot 4230. From The Greensboro Collection, Part V. NGC ID# 24MG, PCGS# 6493

1904-O Barber Half Dollar, MS65
None Finer at NGC

- 4565 1904-O MS65 NGC.** The 1904-O Barber half dollar is an elusive issue in any Mint State grade, almost unobtainable above the MS65 level. This spectacular Gem offers well-detailed design elements and lustrous, well-preserved original surfaces, under rich shades of magenta, sea-green, and amber toning. Ample mint luster shines through the patina. Census: 4 in 65, 0 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5EPG, PCGS# 6499

**1904-S Barber Half Dollar, MS64
Prime Condition Rarity in High Grade**

4566 1904-S MS64 NGC. CAC. From a low-mintage of 553,038 pieces, the 1904-S Barber half dollar is an elusive issue in the series and Mint State examples are especially difficult to locate. Probably fewer than a dozen examples survive in MS65, or better, condition, and prices go up dramatically with every grading point, making this attractive Choice specimen an excellent balance of quality and value. The design elements are sharply detailed in most areas, with just a trace of the often-seen softness on the shield point. The well-preserved original surfaces are lightly toned in shades of champagne-gold and lavender, with vibrant mint luster underneath. Census: 3 in 64, 4 finer. CAC: 4 in 64, 5 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24MP, PCGS# 6500

**1907-O Barber Half, MS66+
Ex: Shireman, Price**

4567 1907-O MS66+ PCGS. CAC. Ex: Shireman/Price. An unusually sharp and frosty example of this conditionally rare New Orleans issue, showing luminous surfaces with lovely lavender-gray, olive-gold, and aquamarine toning. Finer coins are prohibitively rare, and the eye appeal of this piece is ample. The notable pedigree adds to the desirability. Population: 7 in 66 (1 in 66+), 2 finer. CAC: 7 in 66, 4 finer (4/16). Ex: Dr. Thaine B. Price Collection (Akers, 5/1998), lot 172, which realized \$6,050. NGC ID# 24N2, PCGS# 6510

**1908-D Half Dollar, MS66+
The Amazing Norweb-Price Specimen**

4568 1908-D MS66+ PCGS Secure. CAC. Ex: Duckor/Price/Norweb. Pristine surfaces are frosty and brilliant, with full mint frost beneath delicate gold toning. Only a few trivial blemishes have prevented a higher grade. Slight weakness is evident at the arrow feathers and claw, with all other design definition bold. A few dark spots on the reverse provide pedigree identification.

The Norweb cataloger wrote: "Although the 1908-D is not one of the scarcest varieties in the Barber series, in this elegant preservation the piece must be deemed elusive." A decade later, David Akers wrote: "This is a fairly common issue that is easily obtained below the Gem level, but Gem quality examples are certainly very scarce."

Gem and finer examples of the 1908-D Barber half dollar are elusive but more available than most other issues. PCGS has graded 46 submissions of this issue in MS65 or finer, making it an ideal coin for the type collector. Population: 15 in 66 (3 in 66+), 4 finer. CAC: 10 in 66, 3 finer (5/16).

Ex: Norweb Collection (Bowers and Merena, 11/1988), lot 3645; Dr. Thaine B. Price (David Akers, 5/1998), lot 175.; Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3224. NGC ID# 24N5, PCGS# 6513

1910 Half Dollar, MS66
Outstanding, Shimmering Luster

- 4569 1910 MS66 PCGS. CAC.** The 1910 Barber half dollar is one of the less recognized but more important Philadelphia Mint issues in the series, with a mintage of only 418,000 coins. With just seven similarly graded pieces at PCGS and none finer (5/16), the present Premium example is of great importance to Registry Set competitors. Aside from the usual weakness at the junction of the shield and right (facing) wing, the motifs are well-defined. This piece is fully lustrous with frosty surfaces that exhibit a faint trace of speckled gold toning. Population: 8 in 66 (1 in 66+), 0 finer. CAC: 3 in 66, 0 finer (5/16).
Ex: FUN Signature (Heritage, 1/2009), lot 3905. NGC ID# 24NB, PCGS# 6519

1912-D Barber Half, MS66+
Registry-Grade Example

- 4570 1912-D MS66+ PCGS. CAC.** This Premium Gem 1912-D Barber half dollar is among the finest examples of this date certified and is conditionally rare as such. The surfaces yield satiny luster which glows in a soft champagne hue, illuminating the boldly rendered design elements. Close study with a loupe fails to reveal any bothersome abrasions. Population: 17 in 66 (3 in 66+), 1 finer. CAC: 12 in 66, 0 finer (5/16). NGC ID# 24NH, PCGS# 6525

1914-S Half Dollar, Luminous MS66
Boldly Rendered, Among the Finest

- 4571 1914-S MS66 PCGS. CAC.** In Gem or better condition, the 1914-S Barber half is virtually as scarce as the 1913-S, even though the later issue had a significantly higher mintage (992,000 versus 604,000 coins). Moreover, the 1914-S is underappreciated in the upper levels of preservation, having long been in the shadow of its Philadelphia counterpart, a recognized key date.

This is a terrific piece with smooth, virtually unblemished surfaces (a few tiny marks can be found, but only with a magnifier). The striking details are remarkably strong on each side and the bright, satiny mint luster is virtually free from toning, save for a hint of champagne color glistening overall. An outstanding, high-grade 1914-S half, among the finest certified by either service. Population: 9 in 66 (1 in 66+), 0 finer. CAC: 9 in 66, 0 finer (5/16).

Ex: John C. Hugon Collection; FUN Signature (Heritage, 1/2005), lot 4268. NGC ID# 24NP, PCGS# 6531

PROOF BARBER HALF DOLLARS

1892 Half Dollar, Toned PR66+
First-Year Type Example

- 4572 1892 PR66+ PCGS. CAC.** The first year of Barber half dollar production experienced the highest proof mintage of the series (1,245 coins), making this issue ideal for type representation. The present coin boasts a full strike and deep, glassy fields. Splashes of ocean-blue, turquoise, amber, and pale gold toning encompass much of each side, precluding a Cameo designation, but providing equally strong eye appeal. Population: 25 in 66 (2 in 66+), 19 finer. CAC: 4 in 66, 4 finer (5/16). NGC ID# 24NU, PCGS# 6539

1893 Half Dollar, PR66
Original Toning, Modest Obverse Contrast

- 4573 1893 PR66 NGC. CAC.** A conditionally rare Premium Gem example of this early proof Barber half dollar, showing razor-sharp, frosty design elements and deeply reflective fields. Modest cameo contrast emerges from deep toning on the obverse. This piece shows hues of sun-gold, violet, ocean-blue, and lavender-gray, with mint-green also seen in the reverse peripheries. Eye appeal and surface quality are exceptional. Census: 31 in 66 (1 in 66+), 20 finer. CAC: 3 in 66, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NV, PCGS# 6540

1894 Half Dollar, PR66+
Pleasant Toning and Eye Appeal

- 4574 1894 PR66+ NGC. CAC.** The 1894 proof half dollar is fairly plentiful in the context of the series, but Superb Gem examples are rare. This high-end PR66 coin remains within the grasp of many collectors. The fields are deeply reflective, and the satiny motifs are well-struck. The obverse displays sun-gold toning with daubs of blue around the borders, while the reverse has mostly mint-green and lemon-gold color. Census: 25 in 66+, 23 finer. CAC: 11 in 66, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24NW, PCGS# 6541

1898 Half Dollar, PR66
Uniformly Toned and Original

- 4575 1898 PR66 NGC. CAC.** A pleasing, CAC-endorsed 19th century proof type coin, showing bold design elements and subtle cameo contrast beneath the toning. The obverse has sun-gold color that deepens to reddish hues around the borders, while the reverse displays a more uniform patina of the same hues. The fields are flashy, and there are no distracting marks or hairlines. Census: 28 in 66 (1 in 66★), 26 finer. CAC: 5 in 66, 3 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24P2, PCGS# 6545

1899 Barber Half, PR66+ Deep Cameo
Exceptional Contrast, All-Brilliant

- 4576 1899 PR66+ Deep Cameo PCGS. CAC.** The megadeep, mirrored fields and arctic mint frost on this stunning coin yield the desired silver-on-black contrast that is so admired in the proofs of this era, up until the semibrilliant proof coinage of 1902 and later. The proof half dollar production in 1899 was a conservative 846 coins. The silver-white surfaces on the present piece display no discernible color or meaningful distractions, with a full strike throughout and tremendous eye appeal. This stunning proof is among the half dozen or so finest certified Deep Cameos at PCGS, and in fact there is only one other Plus-graded Premium Gem example, and only a few finer pieces. Population: 8 in 66 (2 in 66+) Deep Cameo, 5 finer. CAC: 2 in 66, 0 finer (4/16). NGC ID# 24P3, PCGS# 96546

1900 Barber Half Dollar, PR67
One Finer Coin at PCGS

- 4577 1900 PR67 PCGS.** Vivid shades of burnt-orange, lavender, sea-green, and blue toning visit the impeccably preserved surfaces of this spectacular Superb Gem. The design elements are sharply detailed and the fields are deeply mirrored, with terrific eye appeal. From a proof mintage of 912 pieces. Population: 5 in 67, 1 finer (4/16). NGC ID# 24P4, PCGS# 6547

1902 Half Dollar, PR67+ CAC
Finest Submission at PCGS

- 4578 1902 PR67+ PCGS. CAC.** The year 1902 saw the Mint introduce a brilliant finish for proof coinage, limiting the contrast found on the 777 proof half dollars struck. What this amazing Superb Gem lacks in contrast, however, it makes up for in eye-appealing toning. The obverse showcases blue, rose-violet, and peach-gold patina with substantial brilliance in the centers, while the reverse is more richly and evenly toned in similar hues. The level of preservation is unsurpassed. Population: 9 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 24P6, PCGS# 6549

**1905 Half Dollar, Toned PR66
Seldom Seen CAC Coin**

- 4579 1905 PR66 NGC. CAC.** Cameo proofs from the 1905 half dollar issue are extremely rare. As a result, collectors more often focus on obtaining high numerically graded coin rather than contrasted pieces. This CAC-endorsed Premium Gem is such a coin. The strike is bold, and the fields are deeply reflective. Both sides exhibit deep olive, gold, lavender, and blue toning. Eye appeal is superb. Census: 27 in 66 (1 in 66+), 16 finer. CAC: 10 in 66, 9 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24P9, PCGS# 6552

**1905 Barber Half, PR67
Fully Struck With Rich Patina**

- 4580 1905 PR67 PCGS.** One of the few finest survivors of this midseries Barber half entry, the present Superb Gem 1905 half dollar displays a rich palette of olive, gray, and iridescent (but pastel) aqua, lilac, and violet, along with a full proof strike even on the upper-right shield corner. Population: 15 in 67 (1 in 67+), 1 finer (4/16).
Ex: July Signature (Heritage, 7/2013), lot 3184. NGC ID# 24P9, PCGS# 6552

**1906 Barber Half Dollar, PR68
Among the Finest Known**

- 4581 1906 PR68 NGC.** This Superb Gem is among the finest known of the issue, of which 675 pieces were coined. The silvery surfaces show just a slight golden cast on both sides. There is considerable field-device contrast, although insufficient for an official designation. The nearly full strike brings up details not normally seen, even on lesser proofs — the tiny fold of skin at the top of Liberty's eyelid is plain — but there is a bit of softness on the top right (facing) eagle's wing. This is the only distraction we see, as the fields and devices are seemingly free of even the most picayune impairments. Census: 5 in 68 (1 in 68★, 1 in 68+★), 0 finer (5/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 2025. NGC ID# 24PA, PCGS# 6553

**1909 Barber Half Dollar, PR68
None Finer at PCGS**

- 4582 1909 PR68 PCGS. CAC.** A number of magnificent proof Barber half dollars survive today, many that hail from a small hoard of original proof sets released into the marketplace after the advent of certified grading. While it is impossible to state with certainty whether the present piece comes from that hoard, the stunning quality and visual appeal of the coin attest to decades of careful preservation.

This lovely example displays a vivid blend of cobalt-blue, lavender, and yellow-gold patina. All of the design elements are crisp, and they present a surprising level of contrast at the proper angle to the light. The specimen's impeccably preserved surfaces reveal no mentionable marks. Population: 8 in 68, 0 finer. CAC: 4 in 68, 0 finer (4/16).

Ex: FUN Signature (Heritage, 1/2012), lot 3269. NGC ID# 24PD, PCGS# 6556

WALKING LIBERTY HALF DOLLARS

1917-S Walker, MS64 Obverse Mintmark

- 4583 1917-S Obverse MS64 PCGS. CAC.** This satiny 1917-S Obverse Mintmark half dollar displays remarkable sharpness on the devices with a hint of champagne toning over each side. There are no significant abrasions, and eye appeal is excellent for the grade. Finer examples of this issue are elusive, with PCGS having seen only 42 such submissions (4/16). CAC: 21 in 64, 8 finer (4/16). NGC ID# 26G7, PCGS# 6572

1918-D Half Dollar, MS64 Seldom Seen Finer

- 4584 1918-D MS64 PCGS.** Most Mint State 1918-D Walkers are clustered in the MS63 to MS64 range. Finer pieces are rare. This collectible near-Gem displays well-struck design elements and satiny luster with a hint of light golden toning. A few unobtrusive marks limit the grade. PCGS has seen 31 numerically finer submissions (5/16). NGC ID# 24PW, PCGS# 6575

1919 Walking Liberty Half, MS65 Low-Mintage Philadelphia Issue

- 4585 1919 MS65 NGC.** The 1919 Walking Liberty half dollar is an elusive Philadelphia Mint issue, from a low mintage of 962,000 pieces. This attractive Gem is sharply detailed for an early series issue, with definite separation between Liberty's thumb and fingers, and considerable emerging detail on the eagle's leg. Shades of golden-brown and lavender-gray toning visit the well-preserved surfaces, with vibrant mint luster underneath. Census: 32 in 65, 12 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24PY, PCGS# 6577

1919-D Walking Liberty Half, AU58 Nice Luster and Toning

- 4586 1919-D AU58 PCGS. CAC.** The Denver Mint struck a smallish total of 1.1 million Walking Liberty half dollars in 1919 and few examples were saved by contemporary collectors. Attractive near-Mint specimens, like the present coin, are prized by present-day numismatists. The slightest trace of actual wear is seen on the high points of the well-detailed design elements, and the lightly abraded surfaces retain much of their original mint luster. Dusky hints of golden-brown toning add to the considerable eye appeal. NGC ID# 24PZ, PCGS# 6578

1920-D Walking Liberty Half Dollar, MS66
None Certified Finer

4587 1920-D MS66 NGC. CAC. With an adequate mintage of more than 1.5 million pieces, the 1920-D Walking Liberty half dollar is surprisingly difficult to locate in Mint State grades. In fact, the 1920-D is unknown in grades above MS66, but its elusive nature is largely unheralded, outside of series specialists.

The present coin is a spectacular Premium Gem, with a much better-than-average strike that shows significant emerging detail on Liberty's head and wreath hand. The virtually pristine surfaces are brilliant, with radiant mint luster on both sides. Eye appeal is tremendous. This delightful specimen is the single-finest certified example at NGC, and only six coins have been seen at PCGS at this exalted grade level (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R4, PCGS# 6581

1920-S Walking Liberty Half Dollar, MS65+
Challenging Strike-Rarity

4588 1920-S MS65+ NGC. CAC. From a substantial mintage of more than 4.6 million pieces, the 1920-S Walking Liberty half dollar is something of a strike rarity and a surprisingly challenging issue in high grade. As Jeff Ambio notes in his series reference "the difficulty of locating even a boldly struck 1920-S has been somewhat understated in the past." Fortunately, this high-end Gem is a happy exception to the rule, as the usual trouble spots are at least well-detailed, with some slight separation between the thumb and fingers on Liberty's wreath hand, and some emerging detail apparent on the feathers of the eagle's leg. The well-preserved, brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 40 in 65 (2 in 65+), 11 finer. CAC: 15 in 65, 4 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R5, PCGS# 6582

1921 Walking Liberty Half Dollar, MS65
Sought-After, Low-Mintage Key

4589 1921 MS65 NGC. Only 246,000 Walking Liberty half dollars were struck at the Philadelphia Mint in 1921, the second-lowest production total of the series. As one might expect, the 1921 is an elusive date in all grades today, but some other issues are slightly less available in high grade. It seems likely that a small number of high-quality examples were saved by contemporary collectors who noticed the low mintage.

This spectacular Gem exhibits a bold strike, with some definite separation showing between Liberty's thumb and fingers on the wreath hand. The well-preserved brilliant surfaces radiate vibrant mint luster, with no mentionable distractions. This lot represents an important opportunity to acquire one of the key dates of the series in high technical grade and matching visual appeal. Census: 33 in 65, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R6, PCGS# 6583

1921-D Walking Liberty Half, MS65+
In-Demand, Low-Mintage Issue

4590 1921-D MS65+ NGC. CAC. The 1921-D Walking Liberty half dollar boasts the lowest business-strike mintage of the series, at a meager 208,000 pieces. Relatively few examples were saved by contemporary collectors, making the 1921-D an elusive issue in high grade. Only six coins have been certified at NGC and PCGS combined in grades above MS65 (4/16), making this Plus-graded Gem an excellent balance of value and quality, and an important buying opportunity.

The present coin offers well-detailed design elements, with a touch of the usual softness on Liberty's head and wreath hand. The impeccably preserved brilliant surfaces radiate vibrant mint luster, with a few delicate highlights of golden-tan toning. Eye appeal is outstanding for this important key issue. Census: 18 in 65 (1 in 65+), 3 finer. CAC: 11 in 65, 2 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, Glistening MS66
One of Three Known in This Highest Grade
First Offered at Auction in More Than Two Decades

4591 1921-S MS66 NGC. The 1921-S Walking Liberty half dollar is one of the greatest rarities in the series. Although the 1919-D — and only the 1919-D — is slightly rarer in Gem condition, the '21-S still boasts the lowest absolute population in Mint State. Taking into account a likely number of resubmissions, there are possibly fewer than 200 Uncirculated coins certified, with the bulk concentrated in MS63 and MS64. Finer examples are highly coveted but rarely acquired.

The low mintage of the 1921-S (548,000 pieces) is still slightly more than the combined mintages of its Philadelphia and Denver counterparts. These paltry production figures have long been attributed in part to the economic downturn that culminated in the Great Depression, but the crumbling of the economy did not become a measurable factor in silver coinage until a few years later. Small denomination silver coinage in 1920 was massive. Postwar commercial demand put pressure on the Mint to operate on 24- and 16-hour schedules to meet coinage orders. The dramatic decline of production in 1921 was due to the Pittman Act of 1918, which mandated the melting and recoinage of millions of silver dollars. These resource-consuming silver dollars went into production in February 1921. By the end of the calendar year, the three operating Mints combined had struck more than 86 million of them. Substantial dollar coinage continued well into the 1920s, while demand for small silver denominations was largely fulfilled by reserves that the Mint had stockpiled back in 1920.

The main effect that the Great Depression had on the 1921-S Walker was in removing the ability of most would-be collectors from saving high-end examples of the half dollar denomination, which was more than an hour's wage for many working class people during the 1930s. The 1921-S experienced extensive circulation that limited the Mint State survival rate to its paltry level today.

Concerning the 1921-S in *Collecting & Investing Strategies for Walking Liberty Half Dollars*, Jeff Ambio writes: "Coins that grade MS-65 or finer are exceedingly rare, MS-66s are virtually unobtainable and Superb Gems are unknown." These words ring true when one realizes that the last Premium Gem sold at auction was an NGC coin more than two decades ago, (Heritage, 11/2003), lot 6877, which realized some \$87,400. The only other MS66 coin on record is a PCGS example that was first certified before the turn of the millennium and is now housed in the current highest-rated PCGS Registry Set.

The present NGC coin is only the third Premium Gem 1921-S half dollar known, and it is the first piece certified this fine in more than two decades. One glance at the luminous, frosty surfaces, and the immense visual appeal and surface quality are immediately apparent. The specialist will notice some characteristic weakness on Liberty's head and branch hand, as well as on the eagle's trailing leg, but the overall quality and eye appeal are enormous for the issue. With both of the others MS66 coins long off the market, this is a remarkable opportunity for the collector to acquire this never-before-offered top-grade Registry coin. This piece undeniably warrants a record-breaking bid.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R8, PCGS# 6585

**1923-S Walking Liberty Half, MS65+
Conditionally Very Rare in Finer Grades**

4592 1923-S MS65+ NGC. CAC. The 1923-S was the only Walking Liberty half dollar produced by any of the U.S. Mints from 1922-1926. As a result, the coins were readily absorbed in the channels of commerce and many examples of the 1923-S circulated widely. Today, the 1923-S is much more difficult to locate in high grade than its substantial mintage of 2.1 million pieces would suggest.

This Plus-graded Gem exhibits well-detailed design elements, with better-than-average detail on Liberty's wreath hand. The brilliant surfaces show no mentionable imperfections and vibrant mint luster radiates from both sides. Eye appeal is terrific. Census: 25 in 65+, 6 finer. CAC: 8 in 65, 8 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24R9, PCGS# 6586

**1928-S Walker, Frosty MS64
Attractive Luster**

4593 1928-S MS64 NGC. CAC. Only the San Francisco Mint coined half dollars in 1928. This Choice example displays frosty white luster and minimally abraded surfaces — only some minor marks along Liberty's leg and a single tick on the stomach limit the grade. Slight strike weakness in the centers is typical of the issue. Census: 153 in 64 (4 in 64+), 43 finer. CAC: 18 in 64, 19 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24RB, PCGS# 6588

**1937-S Half Dollar, MS67
Essential Registry Offering**

4594 1937-S MS67 PCGS. CAC. A largely brilliant obverse shows speckled toning around the borders. The reverse features swathes of violet, blue, and orange patina that surround lightly patinated centers. The devices are well-struck with the usual central softness on the hand and gown lines. An essential Registry offering. Population: 37 in 67 (2 in 67+), 0 finer (4/16). CAC: 19 in 67, None finer (4/16). NGC ID# 24RT, PCGS# 6603

**1938 Walking Liberty Half, MS67+
Exceptional Quality and Eye Appeal**

4595 1938 MS67+ PCGS. CAC. A speckling of multiple colors creates a rainbow glow at the upper right obverse, intensifying near the rim where caramel-gold shades take over. The reverse is richly toned in thick overlays of russet and umber shades. Aside from the blatant eye appeal, the technical surface quality is excellent with only minor blending at the branch hand and the eagle's leg feathers. CAC endorsed and Plus-graded by PCGS — among the finest known. Population: 3 in 67+, 1 finer. CAC: 26 in 67, none finer (4/16). NGC ID# 24RU, PCGS# 6604

FRANKLIN HALF DOLLARS

1950 Franklin, MS67 Full Bell Lines Tied for Finest Certified

- 4596 1950 MS67 Full Bell Lines NGC.** A lustrous, magnificently preserved Superb Gem, among the finest 1950 Franklin halves certified. The strike is full, and the cartwheel effect is superb. The reverse is essentially brilliant, but the obverse displays rich olive-gold toning with occasional accents of teal-green and rose. An ideal Registry Set acquisition. Census: 3 in 67 Full Bell Lines, 0 finer (4/16). NGC ID# 24SW, PCGS# 86656

1952-S Half Dollar, MS67 Full Bell Lines Among the Three Finest Certified

- 4597 1952-S MS67 Full Bell Lines PCGS.** This 1952-S Franklin half with Full Bell Lines designation displays generous luster that runs over both sides, but its calling card is the incredibly vivid, multicolor patina. The strike and subsequent preservation are both equally impressive, and a pair of faint scrapes on the lower bell area do not significantly interrupt the progress of the sharp bell lines. This issue can be located with Full Bell Lines through Gem, but the population declines markedly in Premium Gem. PCGS and NGC report a meager three MS67 Full Bell Line submissions, all at PCGS, and none finer (4/16). NGC ID# 24T5, PCGS# 86663

1962 Franklin Half Dollar, MS66 Full Bell Lines None Finer at PCGS

- 4598 1962 MS66 Full Bell Lines PCGS.** This spectacular Premium Gem Franklin dollar exhibits sharply detailed design elements with Full Bell Lines definition. The immaculate, mostly brilliant surfaces radiate vibrant mint luster on both sides, with a few hints of golden-tan toning. Eye appeal is extraordinary. Population: 12 in 66 Full Bell Lines, 0 finer (5/16). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR67+ Brilliant Surfaces, Tied for Finest at PCGS

- 4599 1950 PR67+ PCGS.** One of two Plus-graded PCGS coins at the PR67 level with none finer (4/16), this brilliant silver-white coin is earmarked for a top-grade Registry Set. The fields are untoned and deeply reflective, while the lightly frosted central devices offer the suggestion of cameo contrast. A haze-free, sharply struck representative — unsurpassed at PCGS, and among the finest we have ever handled of the first-year Franklin half proofs. NGC ID# 27VA, PCGS# 6691

1950 Franklin Half Dollar, PR66+ Cameo First Proof Franklin Half

- 4600 1950 PR66+ Cameo PCGS. CAC.** A Plus-graded Premium Gem representative of the first proof Franklin half dollar issue, from a mintage of 51,386 pieces. The design elements are sharply detailed throughout, with a rich coat of mint frost that creates a stunning cameo effect against the deeply mirrored fields. Well-preserved brilliant surfaces add to the outstanding eye appeal. Population: 56 in 66 (4 in 66+) Cameo, 18 finer. CAC: 29 in 66, 11 finer (5/16). NGC ID# 27VA, PCGS# 86691

1950 Franklin Half Dollar, PR67
Rare Cameo Example

- 4601** 1950 PR67 Cameo PCGS. The Philadelphia Mint resumed proof coinage in 1950 for the first time since 1942. Unfortunately, many proofs were struck from overused dies and high-grade examples with cameo contrast are only occasionally available. This delightful Superb Gem displays needle-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. Population: 18 in 67 (2 in 67+) Cameo, 0 finer (5/16). NGC ID# 27VA, PCGS# 86691

1955 Franklin Half Dollar, PR68 Deep Cameo
None Finer at PCGS

- 4602** 1955 PR68 Deep Cameo PCGS. The 1955 proof Franklin half dollar is a better-preserved issue than many earlier dates because the Mint switched to the new flat-pack packaging that year. This magnificent PR68 example displays razor-sharp definition on all design elements and the richly frosted devices contrast dramatically with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Population: 30 in 68 Deep Cameo, 0 finer (5/16). NGC ID# 27VF, PCGS# 96696

SMS KENNEDY HALF DOLLAR

1967 Kennedy Half Dollar, SP68 Deep Cameo
Special Mint Set Specimen

- 4603** 1967 SMS SP68 Deep Cameo PCGS. The Mint issued Special Mint Sets from 1965 through 1968 in lieu of proof sets. The half dollars were struck on 40% silver-clad planchets, like their regular-issue counterparts. This magnificent SP68 example offers sharply detailed, frosty design elements that contrast dramatically with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is off-the-charts. Population: 12 in 68 Deep Cameo, 0 finer (5/16). NGC ID# 24WJ, PCGS# 96847

PROOF KENNEDY HALF DOLLAR

1964 Kennedy Half Dollar, PR67+ Deep Cameo
Scarcer Accented Hair Design

- 4604** 1964 Accented Hair, FS-401, PR67+ Deep Cameo PCGS. Two prominent strands of hair form a "V" shape above Kennedy's ear, identifying the Accented Hair variety. This motif was used on the first proof strikings of the Kennedy half dollar in 1964, but production was stopped early-on because Mrs. Kennedy objected to some of the design elements in the hair. Only about 2% of the total proof production for the year featured the Accented Hair motif, about 100,000 pieces, all-told. This Plus-graded Superb Gem exhibits sharply detailed design elements with a rich coat of mint frost that contrasts profoundly with the virtually flawless, deeply mirrored fields. Population: 25 in 67 (1 in 67+) Deep Cameo, 11 finer (5/16). PCGS# 145627 Base PCGS# 96801

EARLY DOLLARS

1794 Flowing Hair Dollar, B-1, BB-1, VG10 Low-Mintage, First-Year Key Unlisted in Logies

4605 1794 B-1, BB-1, R.4, VG10 NGC. Bowers-Borckardt Die State III. Authorized by the Mint Act of 1792, the 1794 Flowing Hair dollars were the first regular-issue silver coins struck at the United States Mint (the famous 1792 half dimes were struck in John Harper's cellar before the Mint building was ready for operations and the 1792 Dimes were patterns). The long delay in striking silver coins was due to many factors, including legal and financial problems with key personnel who could not provide the exorbitant bonds required by the Mint Act, lack of silver bullion deposits, and inadequate equipment. Most of these issues were resolved by 1794, when Congress reduced the sureties required for the chief coiner and assayer, and Mint Director David Rittenhouse personally supplied 1,734.50 troy ounces of refined silver ingots for the mintage of the inaugural silver dollars.

Unfortunately, the Mint's equipment remained inadequate to the task, as the largest available coin press was designed to strike coins of only half dollar diameter. Still, there was great pressure to produce silver dollars without delay, as much for national prestige as for economic necessity. It was decided to proceed with silver dollar coinage on the smaller coin press, despite the difficulties encountered. As a result, the dies were unevenly spaced in the press, and almost all 1794 dollars show dramatic weakness in the date and the stars on the left and the corresponding area on the reverse. About 2,000 silver dollars were struck in 1794, but several hundred examples were considered unfit for circulation and never issued. The remaining 1,758 coins were delivered on October 15, 1794. Further coinage of silver dollars was not attempted until 1795, when a larger, more powerful coin press was built.

In *The Flowing Hair Silver Dollars of 1794*, Martin Logies provides an extensive census of the 1794 dollars known to present-day collectors, identifying 134 different specimens. As might be expected, this coin was not listed in Logies' exceptional study. The Reverend Doctor James G.K. McClure began collecting coins in his childhood, perhaps as early as the late 1850s, and maintained his collection until his death in 1932. He acquired his coins in an era when even important issues like the 1794 dollar were often minimally described in auction catalogs and images of lots for sale were seldom provided. As a result, modern researchers, like Jack Collins and Martin Logies, have little to go on when trying to trace the coins in these early offerings. McClure's collection was carefully stored, and never publicly offered after his death, so there are no later appearances to document the history of this piece. Its early history remains an intriguing mystery.

This pleasing American classic shows the characteristic weakness on the lower left stars, but the date is bolder than usually seen on 1794 dollars. The surfaces are well-worn, but the central devices retain significant interior detail in Liberty's hair and the eagle's wings. A number of planchet flaws are seen on, or near, the reverse rims, but no signs of planchet adjustment marks are evident. The dove-gray surfaces are highlighted by areas of darker slate patina and show no large or distracting abrasions.

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 24WY, PCGS# 39972 Base PCGS# 6851

1795 B-1, BB-21 Dollar, VF25
Perfect Flowing Hair Type Candidate

- 4606** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF25 NGC. This Flowing Hair, Two Leaves dollar is the perfect candidate for inclusion in a type set because of the variety's availability across the grade spectrum and its high production quality. Many examples, this VF25 coin included, come strongly impressed with bold central detail and crisp stars. Attractive battleship-gray patina includes olive and blue elements peripherally. A small dig in front of the nose will help identify this coin in future sales, but it does not detract in the slightest. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, VF30
Two Leaves, B-1, BB-21

- 4607** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 NGC. Attractive golden-gray toning covers both sides of this BB-21 example, one of the readily available die marriages for the date. Only the BB-27 variety appears more often, although it is the Three Leaves type. BB-21 is by far the most-available Flowing Hair dollar with Two Leaves beneath each wing. This example is smoothly worn with traces of remaining mint luster. There are no serious abrasions, but a trio of minor rim bumps at 3, 4, and 7 o'clock on the obverse is noted. The eye appeal is substantial. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, XF45
B-6, BB-25, Bowers Encyclopedia Plate Coin

- 4608** 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, XF45 PCGS. Ex: Miller. Traces of reddish-gold mint luster remain among the stars and reverse devices of this attractive, silver-gray Choice XF dollar. The obverse was lapped to remove clash marks, shortening Liberty's curls in the process. The current example is Bowers Die State III, with a cluster of four leaves beneath the first S of STATES and the lower-most curl ending in a point between two points of star 1. Abrasions are minor on both sides, with vestiges of a few faint adjustment marks at the lower obverse rim (now faint and not significant), and a tiny planchet flaw near the third curl serves to pedigree the piece. Moderate wear on the eagle's breast is grade-consistent. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

1795 Flowing Hair Dollar, VF25
Popular B-5, BB-27 Variety

- 4609** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 NGC. Bowers-Borckardt Die State II. A "bar" in the left obverse field, near the top curl, identifies the more available BB-27 variety. This pleasing VF25 example is well-centered and retains much interior detail in Liberty's hair and the eagle's wings but, like many coins of this variety, the strike is a little soft in the centers. The pleasing lavender and slate-gray surfaces are lightly abraded, with no sign of planchet adjustment marks. A few rim bumps show between 9 and 10 o'clock on the obverse. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1796 B-4, BB-61 Dollar, AU53
Small Date, Large Letters

- 4610** 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU53 NGC. Bowers Die State I with three detached forehead curls. This variety and the 1796 B-6, BB-64 are listed in the *Guide Book* as "1796 Small Date, Large Letters." It is believed that only three examples are known of the Rarity-8 1796 Bolender-6 marriage, so a Bolender-4 is the only practical alternative for those who collect by *Guide Book* variety. This is a partially lustrous representative with light to medium powder-blue and chestnut-gold toning. The sole mentionable abrasions are a line in the right obverse field near Liberty's mouth, and a thin vertical mark on Liberty's chest.
Ex: Albany Collection / Long Beach Signature (Heritage, 9/2002), lot 7755; St. Louis Central States Signature (Heritage, 5/2005), lot 7558; Long Beach Signature (Heritage, 6/2015), lot 4046. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 B-5, BB-65 Dollar, XF40
Large Date, Small Letters Type Coin

- 4611** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 PCGS. Bowers Die State III. The sole variety with a Large Date, the BB-65 is well-known for its Small Letters reverse with an omnipresent internal die break at CA of AMERICA. The variable-size die break touches both letters and nearly reaches the border on this middle die state example, with a slight bulge below its lower edge. The present piece displays light, silver-gray surfaces with traces of champagne toning. Aside from a few minor, grade-consistent abrasions, the surfaces of this piece are exceptional for a 1796 dollar.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1527; New York Signature (Heritage, 2/2014), lot 5184. From The Eagle One Collection. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 Small Eagle Dollar, VF25
B-3, BB-71, 10x6 Stars

- 4612** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 NGC. CAC. Bowers Die State III. A pleasing Small Eagle type coin with deep, original toning. The obverse has sea-green, russet, lavender, and golden-gray hues, while the reverse displays a more uniform blue-gray appearance. The strike is even, and bold detail remains for the grade. A few scattered marks are consistent with the VF level, including one on Liberty's nose.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 B-3, BB-71 Silver Dollar, XF40
10x6 Stars, Large Letters

- 4613** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 PCGS. Die State III. A die crack extends from the reverse rim at 1 o'clock across the tops of OF and continues above the M in AMERICA. Clash marks are prominent from the wreath on the field near the profile. None of these die state characteristics are noted in the Bowers Early Dollar Encyclopedia. Dusky chestnut-gold and ice-blue toning drapes this attractively detailed and unblemished example.
Ex: Central States Signature (Heritage, 4/2014), lot 4527. From The Eagle One Collection. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1798 Silver Dollar, Choice AU
Heraldic Eagle, Wide Date
Scarce B-22, BB-104 Variety

- 4614** 1798 Large Eagle, Pointed 9, Wide Date, B-22, BB-104, R.4, AU55 NGC. Bowers Die State IV. This impressive, scarcer-variety early dollar displays dappled cream-gray and golden-brown toning. Nicely struck and partly lustrous. Adjustment marks on the central obverse are conspicuous but completely as struck. Abrasions are minimal aside from a few tiny pellet-shaped marks above the arrowheads, on the upper right shield, and on the reverse rim at 5:30. NGC ID# 24X6, PCGS# 40021 Base PCGS# 6877

1798 Large Eagle, Pointed 9 Dollar, AU50
B-23, BB-105, Wide Date

- 4615** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU50 PCGS. Bowers Die State III. Generally slate-gray, though a hint of almond-gold toning is present. The well defined surfaces display pockets of luster. Neither side shows any remotely relevant marks, though the rims have a couple of trivial imperfections. Ex: *San Francisco Signature* (Heritage, 3/2014), lot 10452. From *The Eagle One Collection*. NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877

1798 Draped Bust Dollar, AU55
Large Eagle, Pointed 9, B-13, BB-108

- 4616** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU55 PCGS. Bowers-Borckardt Die State II. A die flaw between star 13 and the bust easily identifies the popular B-13 variety. This Choice AU specimen exhibits well-detailed design elements and lightly abraded surfaces that retain traces of original mint luster. The obverse shows a number of planchet adjustment marks, most prominent on the bust. Attractive shades of golden-brown and lavender toning enhance the considerable eye appeal. NGC ID# 24X6, PCGS# 40025 Base PCGS# 6876

1798 Large Eagle Dollar, Choice XF
B-27, BB-113, Early Die State

- 4617** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, XF45 PCGS. Bowers Die State I, uncracked. This is a sharply detailed Large Eagle type dollar with deep original patina in olive-gray hues. The strike is bold and wear is slight. A loupe fails to reveal any unsightly surface imperfections. Collectors seeking a totally original, problem-free type or date representative without breaking the bank will find this coin immensely appealing. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

1798 Draped Bust Dollar, AU53
Large Eagle, B-27, BB-113

- 4618** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU53 NGC. Golden-tan toning predominates, although viewed in light the minimally marked surfaces display colorful iridescence with steel-blue, rose, and other hues combining for excellent eye appeal. Sharp definition remains on the motifs and the rims are strong despite a minimal off-center strike west (mostly seen on the reverse). The obverse portrait is machine doubled — a characteristic we have seen before on the BB-113 — most visible on the right profile and eye. An attractive and interesting Heraldic Eagle dollar, with no distractions. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

1798 B-26, BB-114 Dollar, AU50
Ex: Warren Miller Collection

- 4619** 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5, AU50 PCGS. Ex: Miller. Bowers Die State V. A sharp and attractive example despite the late die state. Early failure of the reverse die (used only for the one die pair) contributes to the rarity of the BB-114. The obverse die appears on no less than seven varieties, with BB-114 being its second use. This example is sharply struck and retains a generous amount of golden mint luster on both sides. Attractive shades of blue and gold enhance glossy tan toning. Marks are limited to light lines beneath the patina. David Bowers estimates no more than 35 to 60 pieces exist in all grades, nearly all in XF or lesser condition. About Uncirculated coins or finer are rare, putting the present coin within the Condition Census for the variety, where it is listed at #4 on the Bowers roster of notable specimens. NGC ID# 24X6, PCGS# 40031 Base PCGS# 6873

1798 Heraldic Eagle Dollar, XF40
B-9, BB-121, Pointed 9, Close Date

- 4620** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, XF40 PCGS. Bowers Die State IV. The renowned "Amateur Diecutter's Reverse," so-called because of the curious arrangement of field stars, as if the diecutter could not decide between an Arc or Line star pattern. A scarcer Heraldic Eagle variety, the BB-121 is only moderately available in the context of the many 1798 die pairs. Traces of mint luster remain beneath attractive tan-gold toning. Some light adjustment marks on the obverse are softened by wear but visible with a glass. Sharp definition remains despite the late die state with numerous cracks and die rust. NGC ID# 24X6, PCGS# 40038 Base PCGS# 6873

1798 Large Eagle Dollar, XF40
B-14, BB-122, Pointed 9

- 4621** 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, XF40 NGC. CAC. Bowers Die State VI. This Large Eagle Draped Bust dollar is boldly detailed and has great pewter and tan-gray color. The strike is even and well-centered. Heavy die breakage along the left-hand obverse margin is diagnostic of this late die state; star 7 and the L in LIBERTY are weakened by the die failure. The surfaces are smooth and problem-free. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24X6, PCGS# 40039 Base PCGS# 6873

1799 Draped Bust Dollar, AU55
8x5 Stars, B-23, BB-159

- 4622** 1799 8x5 Stars, B-23, BB-159, R.3, AU55 NGC. Bowers-Borckardt Die State II. This impressive Choice AU Draped Bust dollar represents a distinct subtype that appeared only in 1799, featuring eight stars to the left and five stars to the right. That particular layout is normally associated with the gold coins of the late 1790s. The mostly brilliant surfaces exhibit light champagne toning with a few scattered grade-consistent marks on both sides. Only the slightest trace of actual wear is evident on the well-detailed design elements and the surfaces retain much original mint luster. Census (for the variety): 4 in 55, 5 finer (4/16). Ex: Boston Signature (Heritage, 8/2010), lot 5113 NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

1799 B-11, BB-161 Dollar, AU53
Late Die State, 'No Berries' Reverse

- 4623** 1799 7x6 Stars, B-11, BB-161, R.3, AU53 PCGS. Bowers Die State "IV." A die break beneath the beak adds to the reverse die's travails described in the earlier, listed die states, where the break forms a small cud and appears to be an extension of the larger crack from the left border past the right side of D of UNITED. At least four sets of "wave" clash marks are present above the date. This delightful steel-gray, jade-green, and tan-gold early dollar displays partial luster and is free from detrimental abrasions. Both the BB-160 and BB-161 varieties are examples of the *Guide Book*-listed "No Berries" reverse, with virtually all traces of the berries on the olive branch removed by die lapping. A scarce variety in AU53 condition. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1799 Silver Dollar, Choice AU
7x6 Stars, B-10, BB-163

- 4624** 1799 7x6 Stars, B-10, BB-163, R.2, AU55 NGC. Bowers Die State I. Actually, an intermediate die state, with a faint obverse die crack through stars 11 to 13 but none of the reverse cracks from a more advanced state of the dies. A lightly toned, still-lustrous About Uncirculated example with sharp definition on all of the motifs. Nicely centered with sharp dentils on both sides, this BB-163 is normally seen only in lesser grades. A Choice and attractive example of the type. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

1799 B-17, BB-164 Dollar, XF45
Middle Die State, Attractive Toning

- 4625** 1799 7x6 Stars, B-17, BB-164, R.2, XF45 PCGS. CAC. Bowers Die State III with delicate cracks. Both sides of this Choice XF dollar exhibit delightful toning, the obverse with ivory at the center, gradually progressing through blue-green, gold, violet, and steel-blue in concentric bands. The reverse is generally light grayish-brown with peripheral iridescence. Both sides have scattered grade-consistent handling marks. CAC endorsed. Ex: *New York Signature* (Heritage, 2/2014), lot 5189. From *The Eagle One Collection*. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

1799 Dollar, Toned AU50
7x6 Stars, Scarce B-21, BB-169

- 4626** 1799 7x6 Stars, B-21, BB-169, R.3, AU50 PCGS. Ex: Miller. Bowers Die State III. Faint cracks on the obverse and reverse identify the middle state of the dies. Star 2 is noticeably repunched and the obverse stars both left and right appear bunched toward LIBERTY, useful pick-up points since BB-169 is the sole use of the obverse die. Most examples of the variety show considerable wear and are only seen in lower grades, increasing the importance of this About Uncirculated example. Reddish-brown toning with blue overtones cover the fields and devices, with silver-gray areas on the high points of the motifs and hints of silver luster in protected areas. Marks are minimal, with sharp definition on the raised elements plus strong rims and dentils. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

1800 Dollar, Choice XF
B-19, BB-192, AMERICA I

- 4627** 1800 AMERICA I, B-19, BB-192, R.2, XF45 PCGS. Bowers Die State II, clashed with the wavelike impression of the reverse clouds visible above the date. This piece has mainly lavender-gray color but with areas of olive throughout. The strike is bold and even, and wear is slight. A few old, linear marks on Liberty's neck are the only mentionable flaws. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

1800 B-19, BB-192 Dollar, AU53
Popular AMERICA I *Guide Book* Variety

- 4628** 1800 AMERICA I, B-19, BB-192, R.2, AU53 PCGS. CAC. Bowers Die State III, with die clash above 00 and a die crack through the top of LIBERTY. Moderate luster penetrates the rich battleship-gray patina. Upon magnification, a few small ticks are detected on the portrait but none distract, and the surfaces are generally smooth and problem-free. An evenly struck and pleasing representative of this eminently identifiable *Guide Book* variety. Population: 6 in 53, 14 finer (4/16). Ex: *Royal Oak Collection / Denver Signature* (Heritage, 8/2006), lot 3695; *FUN Signature* (Heritage, 1/2010), lot 3565; *FUN Signature* (Heritage, 1/2011), lot 3958. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

1800 Dollar, B-14, BB-194, AU53
Dotted Date, *Guide Book Variety*

- 4629** 1800 Dotted Date, B-14, BB-194, R.3, AU53 PCGS. Ex: Miller. Intermediate Bowers Die State II/III. The requisite die cracks are present for Die State III, but no die clashing is visible at OF on the reverse. This coin comes from the Warren Miller Collection, the #1 All-Time Finest PCGS Registry Set for Early Dollars With Major Varieties (Circulation Strikes 1794-1803). Lightly toned, plentiful silver luster remains beneath a thin covering of golden-tan toning on both sides. A sharp strike survives despite the brief circulation. Light abrasions are visible with a lens, but there are no adjustment marks or significant distractions. The BB-194 "Dotted Date" is a major *Guide Book* variety, a collector favorite and always in demand for its curious die breaks and flaws that appear at the date numerals. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

1801 B-2, BB-212 Dollar, XF45
Smooth, Cream-Gray Surfaces

- 4630** 1801 B-2, BB-212, R.3, XF45 PCGS. Bowers Die State II. Double collar clash marks appear at Liberty's bust. BB-212 shows the first 1 positioned far from the hair curl, the arrowhead between U and N, and the leaf tip points to the left foot of the I in AMERICA. Representatives of this die pair are obtainable through most grade levels, though Bowers notes they are "quite rare in AU or finer." This cream-gray Choice XF Draped Bust dollar shows pale golden accents. The highest points exhibit a trace of friction, but design detail is crisp. Smooth surfaces are void of overt imperfections. A lovely early dollar type. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

1802/1 Draped Bust Dollar, AU55+
Narrow Date, B-4, BB-232

- 4631** 1802/1 Narrow Date, B-4, BB-232, R.3, AU55+ NGC. CAC. Bowers-Borckardt Die State II. According to Mint records, 41,650 Draped Bust dollars were struck in 1802, but most numismatists believe 1802-dated coins were also produced in 1803, based on the relatively large number of extant specimens in today's market. Eight die varieties are known for the date, including five varieties struck from overdated obverse dies from 1801, and the very rare proof novodels that were struck many years later. This coin represents the popular BB-232 overdate variety, with the 1 in the date firmly touching the curl and the point of the leftmost arrowhead under the left edge of the left serif of N in UNITED. The BB-232 is usually seen in lower circulated grades, but a few have been certified in Mint State. This was the only use of the obverse die, but the reverse was used to strike at least five other varieties between 1801 and 1803 (possibly six, if the enigmatic BB-253 variety of 1803 actually exists).

The present coin is a Plus-graded Choice AU specimen that shows just a trace of wear on the well-detailed design elements. The pleasing lavender-gray surfaces show only scattered, minor abrasions, with no sign of planchet adjustment marks. Census (for the variety): 1 in 55+, 4 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 24XC, PCGS# 40092 Base PCGS# 6898

1802 B-6, BB-241 Narrow Date Dollar, MS62
Attractive Iridescent Originality

4632 1802 Narrow Date, B-6, BB-241, R.1, MS62 PCGS. Bowers Die State III, with the dies lightly lapped — the usual state of the dies. The T of LIBERTY is footless, an easy way to confirm the variety. While PCGS and the *Guide Book* identify BB-241 as the Narrow Date, the Bowers reference calls it the Close Perfect Date variety. The 2 in the date is distant from the bust, and there is a gap between the 18 and 02. Gene Gardner acquired the coin raw in a 1998 Stack's sale, where it was described as "Choice Brilliant Uncirculated, one of the finest known." Over the years, several Mint State examples of BB-241 have emerged, making the variety the an ideal selection for type and, in fact, the most available Draped Bust dollar of any date or variety 1798 to 1803.

Even though several Uncirculated examples of the Narrow Date variety are known, few can match the bold strike and sharp, iridescent appeal of this early dollar. The surfaces radiate mint luster beneath translucent tangerine-gold and silver-lilac toning. Each strand of Liberty's hair is sharp, and the eagle's plumage is fully defined. The field stars display crisp points and central definition. Smooth, nearly unmarked surfaces evoke strong eye appeal. Population (Narrow Date variety): 7 in 62, 15 finer (4/16). Ex: Public Auction Sale (Stack's, 12/1998), lot 1417; The Eugene H. Gardner Collection Part III (Heritage, 5/2015 as MS61 PCGS CAC), lot 98559. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1803 Draped Bust Dollar, XF45
B-5, BB-252, High, Thin-Top Small 3

4633 1803 Small 3, B-5, BB-252, R.3, XF45 NGC. Bowers Die State I. The centers show slight weakness — diagnostic for the BB-252 variety — and a lumpy spur off the curve of the D in UNITED. Gunmetal-blue accents at the margins surround pleasing, caramel-gold centers with traces of silver luster showing through. The Small 3 in the date was entered much too high on this variety, making attribution simple. Spacing of the obverse stars is irregular, some too close together, some too far apart as if the die cutter eyeballed their placement without much of a plan. Light abrasions and lines are the sole marks on both sides. Census (all Small 3 varieties): 56 in 45, 68 finer (4/16). NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

GOBRECHT DOLLARS

1836 Gobrecht Dollar, Evenly Toned PR50
Judd-60 Original, Die Alignment I, State E

4634 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR50 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). DTS State E, with the curved rim nick above the A in STATES, but showing little or none of the die chip below the R in DOLLAR. The Mint's account books show that all Judd-60 Gobrechts were struck in the last week of December. This is a pleasing example that displays even gray toning across each side. The strike details are strong with only the slightest friction seen over the high points of the design. While all Gobrecht dollars are labeled by tradition as proofs, there is only minimal reflectivity evident on even the highest graded coins. This piece, with its slight handling and toning, shows even less brightness than usual with most of the reflectivity seen limited to the reverse fields. NGC ID# BLWV, PCGS# 11225

1836 Restrike Gobrecht Dollar, Toned PR63
Judd-60, Die Alignment III

4635 1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR63 NGC. Silver. Plain Edge. Die Alignment III (head of Liberty opposite the N in ONE after a coin turn). Die State A. This state is characterized by the strong peripheral die cracks around the reverse lettering, specifically through ITED, STATES O, and LLAR, but there is no evidence of rust pitting at the bottom of A or E in STATES. This is the same die state as State B for the Name Below Base Judd-58 dollars. All DA III 1836 dollars are restrikes. These pieces were struck between 1863 and 1865. Saul Teichman has estimated that only two dozen or so DA III coins are known. This is an impressively mirrored coin, with much deeper reflectivity than seen on the dollars actually struck in 1836. The brightness in the fields helps enliven the medium blue toning seen on the reverse and the reddish-golden reverse. Fully struck in all areas. Only limited in grade by light hairlining. There are no other post-production problems worthy of mention on this beautiful Gobrecht dollar. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 26YX, PCGS# 11227

1838 Gobrecht Dollar, PR64
Plain Edge, Judd-85
Fewer Than 12 Examples Known
Previously Unknown and Off the Market Since 1932

4636 1838 Name Omitted, Judd-85 Restrike, Pollock-94, High R.7, PR64 NGC. Silver. Plain Edge. Stars Obverse, No Stars Reverse. Die Alignment III (the center of Liberty's head is opposite the N in ONE). Christian Gobrecht's Seated Liberty design, stars around the obverse periphery, C. GOBRECHT F. removed from base. On the reverse, after a coin turn, the eagle flies level in a starless field. Struck in silver with a plain edge.

The short Gobrecht dollar series is one of the most interesting and complex fields of study in American numismatics. The series comprises only three dates (1836, 1838, and 1839), but Gobrecht dollars are known in a bewildering array of die varieties, die alignments, compositions, and edge treatments. The coins were struck (and restruck) at different times, for different purposes, but they have always been among the most elusive and sought-after issues in the U.S. series.

The present coin represents the Judd-85 variety of 1838 (see design specifications above). Original Gobrecht dollars of the Judd-84 variety (which use the same dies as this coin, but with a reeded edge) were struck as patterns in 1838, but the Judd-85 issue is a later restrike, produced for sale to collectors. All Judd-85 examples were struck in Die Alignment III and show die cracks on the reverse through the letters ITE in UNITED, MERI in AMERICA, and LAR in DOLLAR. The earliest known appearance of the variety was in Mint Director Henry Linderman's collection, suggesting he had these pieces struck during one of his terms in office (1867-1869 or 1873-1878). NGC and PCGS have combined to certify 11 examples of Judd-85 in all grades (4/16), and USPatterns.com estimates fewer than 12 specimens are extant. We have compiled a roster of the seven pieces known to us below.

This coin is a spectacular Choice specimen, with razor-sharp definition on all design elements and deeply mirrored fields. The die cracks on the reverse are barely detectible, suggesting this piece was one of the first Judd-85s struck. Some parallel die polish lines are evident on the obverse, rising diagonally from left to right. This coin is from DTS Die State A, without the crack at Liberty's wrist. A dramatic swathe of emerald-green toning enhances the obverse, while the reverse shows a few delicate highlights of pink. Dr. McClure began his collection as a boy, possibly in the late 1850s. Records have not been found, but it is entirely possible that he acquired this coin directly from the Mint, as one of Linderman's restrikes. It has been retained by his family since his death in 1932 and will be completely fresh to present-day collectors. Thanks to John Dannreuther, P. Scott Rubin, Saul Teichman, and USPatterns.com for invaluable assistance with this description.

Roster of 1838 Gobrecht Dollars, Judd-85

Gobrecht dollar varieties were often misattributed by catalogers in their various auction appearances, causing much confusion for pedigree researchers. The low quality of images in earlier appearances makes plate matching problematic, and many descriptions leave out vital information about edge treatment (plain or reeded), etc. We would not be surprised to learn the following roster includes some duplication and omissions.

1. **PR66 Star NGC.** Auction '80 (Paramount, 8/1980), lot 801; Auction '84 (Paramount, 7/1984), lot 735; L.R. French Family Collection (Stack's, 1/1989), lot 17; David Queller; Lemus Collection (Heritage, 1/2009), lot 1521, realized \$149,500; Rarities Night (Stack's Bowers, 8/2012), lot 11492; Rosemont Signature (Heritage, 8/2013), lot 5704.
2. **PR65 PCGS.** George Earle Collection (Henry Chapman, 6/1912), lot 2197; unknown intermediaries; Auction '90 (Superior, 8/1990), lot 1147; Simpson Collection.
3. **PR65 NGC.** Possibly an old family collection from the 19th century; Fall Sale (Kagin's, 11/1987), lot 3250; Long Beach Auction (Pacific Coast Auction Galleries, 6/1989), lot 750; Ancient, Foreign and United States Coins Auction (Christie's, 9/1990), lot 141; Long Beach Signature (Heritage, 2/2013), lot 3862, realized \$123,375.
4. **PR64 NGC.** Reverend Dr. James G.K. McClure, before 1932; McClure estate; **the present coin.**
5. **PR63 PCGS.** Beverly-Hilton Auction (Kagin's, 1/1975), lot 576; Kenneth Goldman; Dr. Julius Korein, M.D.; American Numismatic Society. Plate coin in the Ivy Press *Gobrecht Dollars* reference.
6. **PR62 PCGS.** S.S. Forrest, Jr. Collection (Stack's, 9/1972), lot 989; Auction '81 (Paramount, 7/1981), lot 1274; Auction '86 (Paramount, 7/1986), lot 1741; Worrell Collection (Superior, 9/1993), lot 1308; Dr. Julius Korein, M.D.; American Numismatic Society.
7. **Very Choice Brilliant Proof, Uncertified.** L.K. Rudolf Collection (Stack's, 5/2003), lot 2095.

Twenty-one additional coins have been found that cannot be positively traced to the above pedigrees.

1839 Original Gobrecht Dollar, PR63
Judd-104, Very Early State A Striking

4637 1839 Name Omitted, Judd-104 Original, Pollock-116, R.3, PR63 NGC. CAC. Silver. Reeded Edge. Die Alignment IV (medal turn, the head Liberty is opposite the F in OF). DTS State A, but we do not see evidence of the normally seen light die clashing in the crook of the elbow and / or below the elbow that was caused by die clashing early in striking. This would position this coin as one of the first 1839s, all of which were struck in the final week of 1839. The eagle is also free from the pebbly die rust seen on Restrikes. The fields are shallowly mirrored and Liberty's foot is unusually sharply struck. Normally Name Removed dollars do not show this degree of definition on the foot. Another unusual feature on this coin, and another indicator of its early striking period is the near-readability of Gobrecht's name on the base. Reverse die cracking is seen in the usual places: very faintly at the tops of ITE, MER, and bottom of LAR. Possibly only 20 circulated and 18 or so Uncirculated examples may exist of State A Originals. This piece was examined by John Dannreuther at Central States and his conclusions are:

1. This is the earliest Judd-104 he has examined.
2. There is a die line above the T, but it is very faint. This leads to the conclusion that at least some State A dollars do have this die line. (Previously it was thought to be evident starting on State B coins.)
3. The strike on this piece is the strongest seen to date on a Judd-104.

Both JD and Craig Sholley speculated about this coin perhaps being a Master Coin. Their conclusion is probably not, but that "no" could change to a "yes" if the coin could be connected to Matthew Stickney. This piece presents lovely, even golden toning with no obvious defects on either side. Exceptional quality.

SEATED DOLLARS

1861 Seated Dollar, MS63 Elusive in Mint State

- 4638 1861 MS63 NGC. CAC.** The 1861 Seated dollar is a slightly scarcer issue, as are many dates from the Civil War period, and is especially elusive in Mint State. This Select example is undeniably original with rich luster shining through deep olive-gold and russet-amber toning on the obverse and a light champagne hue on the reverse. The strike is bold, and a few trivial abrasions are hidden beneath the patina. Census: 11 in 63, 19 finer. CAC: 3 in 63, 5 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24Z4, PCGS# 6951

1862 Silver Dollar, MS63 Delightful Toning, Rare So Fine

- 4639 1862 MS63 NGC. CAC.** Here is a razor-sharp 1862 Seated dollar in the seldom seen grade of MS63. The obverse displays deep, original toning in shades of olive, amber, russet, rose, and forest-green, while the reverse has a dusky champagne-gray hue. A touch of reflectivity in the fields adds to the eye appeal. This issue had the lowest mintage of the Civil War period at just 11,540 coins. Uncirculated survivors are understandably scarce and highly sought-after. Census: 14 in 63 (1 in 63+), 22 finer. CAC: 5 in 63, 5 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24Z5, PCGS# 6952

1870-CC Dollar, Choice XF Original Patina, Sharp Detail

- 4640 1870-CC XF45 PCGS.** The 1870-CC is the most plentiful Carson City Seated dollar, but problem-free coins with original surface coloration are seldom seen. This Choice XF representative displays bold detail and fairly smooth surfaces. Each side is tan-gray with olive-russet overtones in portions of the fields. Eye appeal is pleasing. NGC ID# 24ZE, PCGS# 6964

1872-CC Silver Dollar, XF40 Collector-Grade Piece

- 4641 1872-CC XF40 PCGS.** Just a little too worn to grade AU but notably sharp for the XF level. This piece is uniformly patinated in gold-tinted steel-gray hues and lacks any significant abrasions or other distractions. The 1872-CC Seated dollar is seldom seen in XF condition, and finer pieces are scarce. The budget-conscious collector will give this coin strong consideration. NGC ID# 24ZK, PCGS# 6969

1872-S Seated Dollar, Original MS61 Low Mintage, Mint State Rarity

- 4642 1872-S MS61 NGC. OC-1.** The 1872-S Seated dollar is the last available S-mint issue in the series (no examples of the 1873-S are known to survive). As such, the 1872-S offers a special cachet beyond what the low mintage of 9,000 coins would indicate. Most examples were either melted or circulated extensively. This MS61 dollar is softly lustrous with semiprooflike reflectivity beneath light patina in shades of gold, gray, and pale blue. Scattered marks on each side include a thin, straight scrape hidden in the eagle's left (facing) wing. Census: 2 in 61, 11 finer (5/16). *Ex: ANA Signature (Heritage, 8/2014), lot 4663.* NGC ID# 24ZL, PCGS# 6970

1873-CC Seated Dollar, VF Details Attractive Color

- 4643 1873-CC — Obverse Damage — NGC Details. VF.** The 1873-CC is one of the two least often seen Carson City Seated dollars in any condition. This VF-level example is quite pleasing to the naked eye, showing attractive tan-gray surfaces and bold detail. A loupe reveals a scattering of microscopic ticks in the right obverse field that preclude a numeric grade from NGC. The budget-conscious collector should give this piece ample consideration. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 24ZN, PCGS# 6972

1873-CC Seated Liberty Dollar, VF30
Most Elusive Carson City Seated Dollar

4644 1873-CC VF30 PCGS. OC-1. High R.4. The 1873-CC is the rarest Carson City Seated dollar, and the second rarest branch mint issue of the entire design behind the nearly impossible 1870-S. The mintage of 2,300 coins was higher than the 1871-CC, but fewer examples survive. It seems likely that some of the 1873 mintage was melted to provide bullion for Trade dollars, which were struck for the first time that year. For all four years of issue, the Carson City Mint produced less than 20,000 Seated dollars, and more than half of those were coined in 1870.

This Impressive VF30 example has pleasing light gray surfaces with the usual trivial surface marks. The only imperfection of any consequence is a small rim bruise at 6:30 on the reverse and a minor planchet lamination below the right facing claw. Population: 5 in 30, 52 finer (4/16). NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLARS

1851 Seated Liberty Dollar, PR63
Prized Proof Restrike Issue

4645 1851 Restrike PR63 NGC. CAC. OC-P4, Low R.7. The most recent research from Dick Osburn and Brian Cushing suggests either two or three restrike periods exist for the 1851 proofs, with no Original proofs confirmed. Based on the die marriage of this example, it was most likely struck in 1865 or possibly 1866, utilizing the reverse die used to strike most of the 1865 proof Seated dollars. The obverse die shows a fully unfinished area under Liberty's chin, with diagnostic die marks on the 5 and 1 of the date and at the obverse rim below star 1.

The research goes on to estimate 12 proofs exist from this die pair, although the present coin was unknown to Osburn-Cushing. Sharply struck and dramatically toned, the obverse of this Select proof is rainbow-toned in shades of gunmetal-blue, orange, magenta, lemon-gold, and olive-green. Mottled cobalt-blue, gold, and powder-gray toning forms the pleasing reverse patina. A few light lines beneath the vivid toning do little to diminish the outstanding eye appeal. The strike, while uniformly sharp, shows slight blending at Liberty's top-most hair strands. CAC endorsed for both technical and visual quality. Census: 3 in 63, 5 finer. CAC: 3 in 63, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2524, PCGS# 6993

1852 Seated Dollar, Toned PR66
The Single-Finest Certified Proof Example
Reportedly One of Two-Known Original Proofs

4646 1852 Original PR66 NGC. OC-P1, R.8. Osburn-Cushing Die State a/a. There is ongoing debate among researchers whether or not all 1852 proof Seated dollars are Restrikes, or if a few Original proofs were actually coined in 1852. The most recently published opinion on the subject comes from Seated dollar authorities Dick Osburn and Brian Cushing on their website, seateddollarvarieties.com, where they propose that a handful of original proofs were struck of the rare 1852 Seated dollar, and that two examples are confirmed – the present coin, and the coin in the ANS collection:

“We’ve confirmed the existence of two examples of the original proof, so probably 5 or fewer were originally minted. One of the two known examples is the coin which resides in the reference collection of the American Numismatic Society ... The second coin is graded PR66 by NGC, and is currently the finest known 1852 proof, original or restrike. This coin was sold by Heritage in their 2015 Central States Numismatic Society signature auction as part of a collection known as the Virginia Cabinet. Heritage handled the coin again in the 2016 Winter FUN auction. Its provenance is unknown.”

The bold statement, no doubt, will rekindle discussion regarding the existence of original vs. restrike proofs. Mint records do not lend support to either argument, as official proof production was not recorded until 1858, and small quantities of Restrikes produced by the so-called “Midnight Minters” in the late 1850s and early 1860s were necessarily excluded from official reports.

Heritage numismatist and cataloger David Stone recently located correspondence dated March 29, 1852 between collector M. A. Stickney and Mint assayer William E. DuBois, on the subject of 1851 and 1852 silver coinage. DuBois wrote:

“I must apologize for not having attended to your request for the specimens of 1851; while waiting for the completion of the set, I forgot the whole matter. I have now the silver dollar, half dollar, quarter dollar, and half dime, of 1851; the remainder you will have to get from circulation. In fact there is no longer any attention paid here to securing master coins or pieces of high polish, since Mr. Eckfeldt’s decline and decease, and since the business of the Mint has become so pressing. The pieces I have just named, of 1851, are not master coins; merely new and clean specimens. Of the silver coins of 1852, the dollar and half dollar are not yet issued, and I do not know when they will be; if they are, it will be merely for the name of the thing.”

DuBois then wrote an addendum to the letter:

“There is every prospect of a new issue of silver this year; and probably a new gold dollar with a hole in it; the Engraver is now at work on dies for the latter.”

The only complete 1852 proof sets known to have existed at one point are the Col. Robert C. H. Brock - J. P. Morgan set, now in the ANS, and the eight-piece Richard B. Winsor set, which is believed to be a later appearance of Joseph J. Mickley’s six-piece silver proof set, offered in W. Elliot Woodward’s 1867 sale of that collection. It is theoretically plausible that these two sets were acquired intact directly from the Mint in 1852, but the timeline also allows for the possibility that they were assembled by their original owners in the early 1860s, to complete date runs of proof sets in their owners’ collections (collector demand was, after all, much of the reason restrikes were produced to begin with). The Winsor catalog listed that set’s cent as being “uncirculated,” not a proof, which supports the likelihood that at least part of that set was in fact assembled.

In early listings, 1852 proof dollars were simply listed as being proof, with no distinction as either Original or Restrike. A study of the die characteristics of 1852 proof dollars reveals the possibility of as many as six different die pairs, composed of several reverse dies paired to a single obverse. Some of the reverse dies used for the 1852 are the same as those used to strike proof 1851 dollars, all of which were coined during the restrike period.

Just one die marriage is from the 1840 reverse hub, lending credence to the theory that coins struck from that reverse die are possibly original proofs produced for 1852, as well as for other early proof issues. The research by Dick Osburn and Brian Cushing support such a scenario. Significantly, the ANS coin is the only other 1852 proof from the 1840 reverse die that can be attributed to the striking of original proofs. Walter Breen – and others – question the accuracy of that assessment, stating that the “original” die pair may have actually been kept in storage until the late 1850s and then used for Restrikes. Further research is needed to solve the mystery definitively.

It is thought that only specimens that show the 1852 obverse paired with the 1840 reverse – such as the present coin – have the proper die marriage to be original proofs, and that only two coins are known with this qualifying die pair. More importantly, this magnificent 1852 proof dollar ranks as the sole finest certified example of all 1852 proofs reported by NGC and PCGS combined (4/16), either as a restrike or an original. The design elements boldly stand above the deeply mirrored recesses, and would warrant a Cameo designation were it not for deep original toning that blankets both sides in cobalt-blue, aqua-gray, and lavender-gold hues. No contact marks are present, and any faint hairlines in the fields are well-hidden by the rich patina. Eye appeal is outstanding.

Osburn and Cushing’s discovery that the coin was struck from the correct die pair (OC-P1) to qualify as a possible Original proof was not known at the time of our earlier description of the coin, when it was offered as part of the Virginia Cabinet Collection at the 2015 Central States Signature Auction (Heritage, 4/2015, lot 5149). Then, the coin was holdered as a Restrike by NGC. It has since been reholdered appropriately without the restrike description. NGC ID# CHGE, PCGS# 6994

1852 Seated Liberty Dollar, PR64 ★ Previously Unknown Restrike

4647 1852 Restrike PR64 ★ NGC. CAC. The Mint had little inclination to strike the higher denominations of silver coinage in 1851 and 1852, with the price of silver out of balance with gold amid an onslaught of bullion from the California gold fields. New legislation was in the works, and it soon remedied the imbalance with the Coinage Act of 1853. In the meantime, only nominal mintages of silver dollars were struck.

Collectors and bullion specialists soon recognized the rarity of 1851 and 1852 dollars. Several individuals corresponded regularly with Mint officials and received personal attention to their requests for the latest Mint issues. Among them was M. A. Stickney, who was well connected with the Mint but experienced first-hand the difficulty of obtaining an 1852 dollar. His attempts in 1852 and 1853 were unsuccessful. Trying again in 1854, Mint assayer William E. DuBois responded to Stickney's request on May 2, 1854:

"... in exchange for \$23 received from you, vis:
Silver coins of the current year.
Two three-dollar gold pieces (just out),
Silver dollars of 1856, 8 & 9 master specimens,
Gold coin of Nero.
Gold dollar of 1836.
No silver coins of 1852 are on hand here."

Not to be dissuaded, Stickney tried to make a deal with Henry M. Brooks, to which Mr. Brooks replied on January 8, 1858:

"You have written me several times in reference to the 1852 dollar which is in my collection. You mentioned wishing to exchange the 1796 half or the 1836 dollar — now, I have both those pieces and should not, of course, wish to make such an exchange, but I will make you this proposition. I will let you have the 1852 dollar for the dollar of 1804..."

Stickney eventually got an 1852 silver dollar, which was part of the June, 1907 Henry Chapman sale of the Stickney Collection as lot 808, described as "Original. Fine. Extremely rare." Purchased by Elder, it brought \$250, a princely sum.

One can only imagine what Stickney would have offered for the present coin — a shimmering, near-Gem Restrike proof with the NGC Star designation. Glassy-mirrored and rainbow toned, lime-gold hues meld with fuchsia-red, ocean-blue, and violet shades for a memorable display of obverse color. The reverse is likewise mirrored with slightly more sedate shades of khaki-gold, violet, and blue. A few minor planchet marks are noted on the portrait with a few pinpoint spots of deep-blue toning, yet the piece is sharply struck with outstanding eye appeal.

We believe this is the first appearance at public auction for the coin, having been carefully preserved in the McClure cabinet for many decades. Struck from the Osburn-Cushing OC-P2 die pair, a reverse of 1856 was employed — one of the few appearances on an 1852 dollar with this reverse die, identifying it as most likely from the first group of restrikes that occurred in late 1858 or early 1859. Examples are extremely rare with this die marriage. The Osburn-Cushing website lists only one other example.

In all, perhaps as many as 75 restrikes are thought to exist, although the exact number is unknown and varies by source. PCGS CoinFacts estimates just 30 to 35 pieces known. This coin is from the early Osburn-Cushing Die State a/a. We are extremely fortunate to have two proof 1852 dollars in this auction, each extremely rare in its own right — the sole-finest Original proof, and a near-finest Restrike. Both coins are numismatic treasures of high importance and rarity.

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2525, PCGS# 6995

**1858 Seated Liberty Dollar, PR63
Important Proof-Only Issue**

4648 1858 PR63 NGC. CAC. OC-P1, Low R.4. For reasons that are unclear to present-day researchers, Seated Liberty dollars were only produced in proof format in 1858. The lack of business-strikes is puzzling, but the proofs were struck to satisfy increased collector demand, which had prompted the Mint to begin its program of commercial proof offerings that year. The mintage of proof dollars was not recorded, but modern scholars estimate around 300 examples were struck. Thankfully, the issue has a relatively high survival rate, and examples can be located today with some patience, for a healthy price.

The present coin is an attractive Select specimen, with sharply detailed design elements and deeply reflective fields. The lightly marked surfaces are blanketed in shades of powder-blue, lavender-gray, and emerald-green toning. A handsome example of this first commercial proof issue. Census: 18 in 63, 21 finer. CAC: 4 in 63, 6 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252C, PCGS# 7001

**1860 Silver Dollar, PR63
Collectible Proof Seated Dollar**

4649 1860 PR63 PCGS. OC-P1. Osburn-Cushing Die State a/a. Diagnostic die lines in the reflective recesses of the shield confirm the proof status of this Select dollar, struck during one of the first years of marketing proofs to the public at a premium over face value. The Mint's estimate of how many proofs to strike was high, and many of the 1,330 proof dollars went unsold at the end of the year. The coin is untoned save for a thin haze of pale grayish-gold patina. Faint, delicate lines do little to diminish the mirrored fields that surround sharply struck, lightly frosted motifs. Population: 39 in 63, 54 finer (4/16). NGC ID# 252E, PCGS# 7003

**1863 Seated Dollar, PR63
Beautifully Toned**

4650 1863 PR63 NGC. CAC. Proof set sales declined during the Civil War due to the price structure that the Mint put forward for purchasing them. If paper currency was used as payment for the set, the price was higher than if coin was used. Since silver and gold were actively hoarded during this period, the number of proof sets purchased declined. This Select 1863 proof dollar displays full detail and deeply reflective fields. Grade-limiting hairlines appear in the fields but are mostly hidden by vivid toning. The obverse has lavender, forest-green, crimson, and russet hues, while the reverse displays more traditional lavender and blue peripheries around a sun-gold center. Census: 26 in 63, 61 finer. CAC: 3 in 63, 17 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 23BS, PCGS# 7006

**1863 Dollar, Colorful PR66
Low Total-Mintage Issue**

4651 1863 PR66 NGC. CAC. As paper money became devalued during the Civil War, the Mint charged significant premiums for proof sets purchased with greenbacks. In 1864, the New York collector Samuel Wetmore purchased a proof set (including gold) for \$101.25 in currency, as documented in the Chapman correspondence at the American Numismatic Society.

Scattered russet tones cover the lower portion of the obverse, while shades of sea-green evenly grace the portrait. Uniform almond-brown color blankets the reverse with pleasing splashes of fire-orange and blue near the lower lettering as the coin is tilted. The strike shows unsurprisingly full definition throughout. Census: 6 in 66 (1 in 66+★), 5 finer (4/16).

Ex: *Pinnacle Rarities* to Eugene H. Gardner (6/2007); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98582. NGC ID# 23BS, PCGS# 7006

**1864 Silver Dollar, Toned PR63
Elusive CAC Example**

4652 1864 PR63 NGC. CAC. This Select proof 1864 Seated dollar is visually almost identical to the 1863 proof in the McClure Collection. The obverse has forest-green, lavender, and gold toning with deeper russet also seen along the lower border. The reverse has lavender and sky-blue toning over the interior with sun-gold and mint-green peripheral hues. Sharpness of strike is exceptional, and the fields are deeply mirrored. A few minor hairlines are masked by the patina. Census: 22 in 63, 76 finer. CAC: 4 in 63, 15 finer (4/16).

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 252J, PCGS# 7007

**1865 Seated Dollar, PR63
Delightful Multicolor Toning**

4653 1865 PR63 NGC. CAC. A razor-sharp, reflective 1865 proof dollar, showing incredible rainbow toning on the reverse and deeper russet, olive, gold, and amber-red on the obverse. The coloration is original and effectively masks a few hairlines in the fields that limit the grade. The 1865 had the final really low proof mintage of the series at 500 pieces. A number of survivors are known, but the toning on this piece is singularly appealing. CAC: 2 in 63, 12 finer (4/16).

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 252K, PCGS# 7008

1866 Seated Liberty Dollar, PR66
First Year With Motto

4654 1866 Motto PR66 NGC. OC-P2. Only 725 proof Seated Liberty dollars were struck in 1866, the first year of the Motto design. Two proofs are known with the No Motto reverse, but most numismatists believe they were struck as numismatic delicacies at a later date. Dick Osburn and Brian Cushing have identified two proof die varieties for the 1866 With Motto production. This coin represents the OC-P2 variety, with the date placed further to the right and a die line under GOD in the motto. The obverse was also used on the extremely rare No Motto variety of this date, while the hardy reverse was used to strike at least one proof variety of each year from 1866 to 1870.

The present coin is a delightful Premium Gem, with sharply detailed design elements and deeply reflective fields, under vivid shades of greenish-gold and cerulean-blue toning. The well-preserved surfaces are free of mentionable distractions and overall eye appeal is tremendous. Census: 6 in 66 (1 in 66★), 2 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 5GDV, PCGS# 7014

1867 Dollar, Sharp PR64

4655 1867 PR64 NGC. The scarcity of circulation-strike 1867 Seated dollars in high grade makes the proof variant attractive for date representation. This Choice example is fully struck and deeply reflective. A mottled pattern of milky-gray and cream-gold toning over each side masks a few scattered hairlines in the fields that limit the grade. Eye appeal is pleasing. Census: 59 in 64, 9 finer (4/16). From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252N, PCGS# 7015

1867 Seated Dollar, PR65 Cameo
Starkly Contrasted

4656 1867 PR65 Cameo NGC. This razor-sharp Gem proof Cameo yields stark white-on-black contrast with fully mirrored fields. A few stray lines are hardly perceptible, and the eye appeal is outstanding. The coin appears brilliant at first glance but actually has a faint suggestion of champagne color. Cameo 1867 proof dollars are scarce in all grades and rare at the Gem level. Census: 13 in 65 Cameo (1 in 65★ Cameo), 9 finer (4/16). NGC ID# 252N, PCGS# 87015

**1868 Seated Liberty Dollar, PR66
Only 600 Pieces Struck**

4657 1868 PR66 NGC. CAC. OC-P1. Only 600 proof Seated Liberty dollars were struck in 1868. A single reverse die was used in combination with two obverse dies to accomplish the proof mintage. This coin represents the OC-P1 variety, with the remains of an errant 18 showing on the rim below the primary digits. This was the only use of the obverse die, but the reverse was used to strike at least one proof variety of every year from 1866 through 1870.

This remarkable Premium Gem exhibits sharply detailed design elements and deeply mirrored fields throughout. The immaculate surfaces are richly patinated in vivid shades of emerald-green, cerulean-blue and lilac toning, with fantastic eye appeal. Census: 4 in 66, 3 finer. CAC: 2 in 66, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252P, PCGS# 7016

**1869 Seated Dollar, PR64+
Magnificent Color and Sharpness**

4658 1869 PR64+ NGC. CAC. Proof silver dollars of 1869 are scarce in Gem condition, making this high-end Choice coin ideal for the budget-conscious collector. Both sides display lovely multicolor toning that comes alive in the mirrored fields when tilted against a light. The strike is razor-sharp, and the only things preventing a full Gem assignment are a few light hairlines that are well-hidden beneath the patina. Census: 52 in 64 (1 in 64+), 32 finer. CAC: 1 in 64, 7 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252R, PCGS# 7017

**1870 Seated Liberty Dollar, PR64+
Attractive Toning, Moderate Contrast**

4659 1870 PR64+ NGC. CAC. OC-P1. According to Mint records, a generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1870. One obverse die was combined with three different reverses to strike these proofs. This Plus-graded Choice specimen is sharply detailed throughout and shows the light doubling on the banner that identifies the OC-P1 variety. The well-preserved surfaces are toned in shades of greenish-gold and electric-blue, with deeply mirrored fields underneath. Moderate field-device contrast is evident on both sides. Census: 48 in 64 (1 in 64+), 28 finer. CAC: 8 in 64, 4 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252S, PCGS# 7018

**1871 Dollar, Colorful PR64
Rare With CAC Approval**

4660 1871 PR64 NGC. CAC. The 1871 proof Seated dollar is slightly scarcer in high grade than its mintage of 960 pieces would suggest. CAC-approved examples are rare. This Choice representative displays reflective fields and bold design elements that offer modest cameo contrast on the obverse. Concentric yellow-gold, blue, violet, and sun-orange toning accentuates each side. Census: 31 in 64, 26 finer. CAC: 5 in 64, 6 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252T, PCGS# 7019

1872 Seated Liberty Dollar, PR65
Vivid, Multicolor Toning

4661 1872 PR65 NGC. CAC. OC-P1, R.2. A fairly generous mintage of 950 proof Seated Liberty dollars was accomplished in 1872, to accompany the series-record business-strike production of more than 1.1 million pieces. A single pair of dies was used to strike all the proofs. The obverse die was only used to strike the proofs and is easily identified by a die line in the recessed area between vertical stripes 5 and 6 in the shield. The reverse die was doubled, with the doubling most prominent on IN in the motto and under the left (facing) wing of the eagle. This reverse was also used to strike all the proof dollars in 1873. In their website, *A Register of Liberty Seated Dollar Varieties*, Dick Osburn and Bryan Cushing estimate about 60% of the original proof mintage survives today in all grades.

This remarkable Gem is spectacularly toned in vivid shades of emerald-green and cobalt-blue, with sharply detailed design elements and deeply reflective fields under the patina. No mentionable distractions are evident and eye appeal is terrific. Census: 15 in 65, 8 finer. CAC: 5 in 65, None finer (4/16).

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 252U, PCGS# 7020

1873 Seated Dollar, PR64
Attractively Toned

4662 1873 PR64 NGC. CAC. The final-year proof Seated dollar is a trifle scarcer in high grade than some of the preceding issues in the series. This near-Gem is fully struck and deeply mirrored. Both sides yield vivid sun-gold toning with lavender and blue accents around the peripheries. A thin hairline across Liberty's lap limits the grade, although it blends with a few faint planchet lines (mint-made) elsewhere on Liberty's figure. Census: 44 in 64, 20 finer. CAC: 7 in 64, 2 finer (4/16).

From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

1873 Trade Dollar, MS66
Single-Finest Certified at NGC

4663 1873 MS66 NGC. The Trade dollar was authorized by the Coinage Act of February 12, 1873 and the Philadelphia Mint produced a smallish total of 396,900 business-strike examples that year. Most of the coins were used in the China trade, where they competed with the Mexican pesos, which were not as readily accepted after the changeover from the old eight reales pieces. High grade examples are very rare in today's market.

This spectacular Premium Gem is among the finest survivors of this important first-year mintage. The design elements are sharply detailed in most areas, with just a touch of softness on the right (facing) eagle's claw. The well-preserved surfaces radiate vibrant mint luster, under attractive shades of greenish-gold and lavender-gray toning. Census: 1 in 66, 0 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252W, PCGS# 7031

1873-S Trade Dollar, MS65
Only One Finer Coin at NGC

4664 1873-S MS65 NGC. Trade dollars were struck for the first time in 1873 and the San Francisco Mint was the primary coining facility for the denomination throughout its short life as a business-strike issue (1873-1878). Struck to act as an acceptable medium of exchange in trade with the Far East, the 1873-S claims a nominal mintage of 703,000 pieces. The great majority of the coins fulfilled their intended purpose and were later melted in China and India. Probably none were saved by contemporary collectors and the survival of a few high-grade specimens, like the present coin, was just a matter of chance.

This attractive MS65 example exhibits well-detailed design elements, with just a touch of the usual flatness on Liberty's head. The well-preserved surfaces display satiny mint luster, under medium intensity layers of lavender, gray, and golden-brown toning. Only a handful of survivors can match the quality of this remarkable first-year Gem. Census: 2 in 65, 1 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 252Y, PCGS# 7033

1874-CC Trade Dollar, MS62
In an Old Green Label Holder

4665 1874-CC MS62 PCGS. Micro CC. The 1874-CC is a readily accessible Carson City Trade dollar in circulated grades, but availability declines and demand rises in Mint State. This MS62 coin shows brilliant, satiny luster and a bold strike. Light, scattered marks account for the grade but have minimal visual impact. Housed in an old green label holder. NGC ID# 2532, PCGS# 7035

1877 Trade Dollar, MS65
Extremely Rare Any Finer

4666 1877 MS65 PCGS. The status of this date as a common date is well-known, but like many issues in the Trade dollar series, the 1877 becomes conditionally rare at the Gem grade level. This example is boldly struck (even on the head of Liberty) and remarkably well-preserved. Original, satiny luster underlies varying shades of toning on both sides, with the margins exhibiting deep russet and olive hues and the central regions showing lighter golden and mint-green colors. A few vivid tinges of coppery-red and forest green are intermingled in between. For the collector seeking a high-end, fully original type representative of the Trade dollar design, few coins would be better suited than this piece. Population: 11 in 65 (1 in 65+), 2 finer (5/16). NGC ID# 253C, PCGS# 7044

1878-CC Trade Dollar, MS63+
Low-Mintage, Final Carson City Issue

4667 1878-CC MS63+ NGC. CAC. Only 97,000 Trade dollars were struck at the Carson City Mint in 1878, the last year the denomination was produced in business-strike format. It is likely that many of these coins were never distributed, as records show 44,148 Trade dollars were melted at the famous Western facility on July 19, 1878, by order of Treasury Secretary John Sherman. As a result, the 1878-CC is an elusive, sought-after issue, especially in Mint State grades.

This Plus-graded Select example exhibits well-detailed design elements and lightly marked, lustrous surfaces, under medium intensity shades of lavender and greenish-gold toning. Census: 8 in 63+, 7 finer. CAC: 1 in 63, 5 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

1875 Trade Dollar, PR66 New Type Two Reverse

4668 1875 PR66 NGC. CAC. Type One Obverse, Type Two Reverse. Only 700 proof Trade dollars were struck in 1875. The Type Two reverse (with no berry under the eagle's claw) was introduced this year to address striking problems noticed by Chief Coiner A. Loudon Snowden. Mint State business-strikes of this date are quite elusive, putting considerable pressure on the small supply of proofs.

This delightful Premium Gem offers well-detailed design elements, with just a touch of the often seen flatness on the stars on the right. The well-preserved surfaces are blanketed in vivid shades of greenish-gold and cobalt-blue toning, with deeply reflective fields underneath. Eye appeal is terrific. Census: 4 in 66, 5 finer. CAC: 2 in 66, None finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YL, PCGS# 7055

1876 Trade Dollar, PR64+ Lightly Toned and Attractive

4669 1876 PR64+ NGC. CAC. Type One Obverse, Type Two Reverse. A golden-toned, reflective example of this Centennial-year proof Trade dollar issue. Proof sales in 1876 experienced a modest spike from the previous year up to 1,150 pieces, as the Centennial International Exposition was held in Philadelphia that year and many attendees made time to tour the Mint building and acquire souvenirs. This high-end near-Gem is boldly struck and has no noticeable imperfections. Census: 45 in 64 (2 in 64+), 22 finer. CAC: 5 in 64, 3 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YM, PCGS# 7056

1877 Trade Dollar, PR65 Outstanding Preservation

4670 1877 PR65 NGC. CAC. After the near-record proof dollar coinage in 1876, the 1877 proof Trade dollar had a modest 510-coin mintage that contributes to this date's scarcity in high grade today. The present example displays a sharp strike and reflective fields with warm sun-gold toning that shows hints of lavender throughout. No obvious distractions are identified. Census: 14 in 65 (1 in 65★), 9 finer. CAC: 7 in 65, 3 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YN, PCGS# 7057

1878 Trade Dollar, PR66
Beautifully Toned, Conditionally Rare

- 4671 1878 PR66 NGC. CAC.** Although the Western branch mints continued to strike Trade dollars in early 1878, the Philadelphia Mint was devoted to the new Morgan type from the outset, save for 900 proof Trade dollars that were struck for collectors. This was the first proof-only issue in the series. The present example displays a sharp strike and reflective fields. The obverse is bathed in lovely ocean-blue, violet, orange, and mint-gold hues, while the reverse displays sun-gold toning overall with a thin crescent of blue and lavender along the upper border. This issue is rare this fine, and the present coin is tied with one other as the finest at CAC. Census: 14 in 66, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YP, PCGS# 7058

1879 Trade Dollar, PR66
Delightful Coloration

- 4672 1879 PR66 NGC. CAC.** The 1879 proof-only Trade dollar is plentiful in the absolute sense but seldom seen in Premium Gem condition. This CAC-endorsed example displays a bold strike and frosty devices with a deeply reflective backdrop in the fields. The obverse displays colorful violet, ocean-blue, sun-gold, crimson, and forest-green toning, while the reverse reflects more uniform amber coloration with hints of lavender-blue around the periphery. Census: 28 in 66, 8 finer. CAC: 9 in 66, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR66 Cameo
Lightly Toned Example With Contrast

- 4673 1879 PR66 Cameo PCGS Secure.** The 1879 proof Trade dollar is seldom encountered in PR66 condition, with Cameo surfaces. This spectacular Premium Gem displays sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices. Delicate shades of golden-brown toning enhance the well-preserved surfaces, creating outstanding eye appeal. Population: 10 in 66 Cameo, 6 finer (4/16). NGC ID# 27YR, PCGS# 87059

1881 Trade Dollar, PR67 Cameo
Striking Black-and-White Contrast
Proof-Only Issue

- 4674 1881 PR67 Cameo NGC.** Treasury Secretary John Sherman halted circulation-strike Trade dollar production on February 22, 1878. Thereafter, the Philadelphia Mint struck proofs exclusively, a practice that would continue officially through 1883. In 1881, the Mint manufactured 960 specimens, most of them with minimal contrast and poor detail on Liberty's head and the stars. This spectacular PR67 Cameo representative is one of the few well-produced 1881 Trade dollar proofs. Each side is wholly untoned, strikingly contrasted, and fully defined. Impeccably preserved surfaces are essentially void of contact. Census: 11 in 67 Cameo (1 in 67+★ Cameo), 3 finer (5/16). NGC ID# 27YT, PCGS# 87061

**1882 Trade Dollar, PR65
Lovely Toning**

- 4675 1882 PR65 NGC. CAC.** This CAC-endorsed Gem is finer than the typical 1882 proof Trade dollar, showing a bold strike and deeply reflective fields beneath rich, original toning. The obverse displays lavender, ocean-blue, and lemon-gold, while the reverse has a blended lavender-blue appearance. There are no perceptible hairlines or marks. This is an old-time-looking coin for the traditional proof Trade dollar collector. CAC: 6 in 65, 11 finer (4/16). *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# 27YU, PCGS# 7062

**1882 Trade Dollar, PR64+ ★ Cameo
Proof-Only Mintage of 1,097 Coins**

- 4676 1882 PR64+ ★ Cameo NGC.** The Trade dollar was only produced in proof format in 1882, with a mintage of 1,097 pieces. This spectacular high-end Choice example has expectedly fully struck and frosty devices, producing blinding white-on-black cameo flash against the glassy fields.
Ex: Long Beach Signature (Heritage, 9/2011), lot 4150. NGC ID# 27YU, PCGS# 87062

**1882 Trade Dollar, PR64+ Deep Cameo
Sharp Strike, Delicately Toned**

- 4677 1882 PR64+ Deep Cameo PCGS.** Granted the PCGS Plus for its high-end quality at the near-Gem level, this attractive proof-only Trade dollar displays gleaming, deeply mirrored fields with richly frosted motifs. The strike is pinpoint-precise on all but star centers 5 and 6, which are a bit rounded but retain some definition. A few delicate hairlines are scattered across the evenly toned, pale ivory-gold surfaces. The mintage of 1,097 pieces makes the issue available in lesser grades, but it is notably scarce this fine. Population: 13 in 64 (3 in 64+) Ultra Cameo, 26 finer (4/16). NGC ID# 27YU, PCGS# 97062

MORGAN DOLLARS

**1878-CC Morgan Dollar, MS66
Vibrant Luster, Few Coins Finer**

- 4678 1878-CC MS66 PCGS.** Vibrant, frosty luster illuminates mostly brilliant surfaces on this Premium Gem 1878-CC Morgan dollar, showing tinges of amber toning along the upper obverse and lower reverse borders. The strike is sharp and eye appeal is excellent. The debut Carson City Morgan is occasionally seen in this grade, but finer representatives are decidedly rare. PCGS lists six Superb Gems finer (4/16). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66+
Important First-Year Issue**

- 4679 1878-CC MS66+ PCGS.** The Morgan dollar design was introduced in 1878 and the Carson City Mint produced more than 2.2 million examples with the new motifs. The dies were not received until April of 1878, and all the coins were struck with the seven tail feathers reverse that shows parallel arrow feathers. This Plus-graded Premium Gem is sharply detailed in most areas but, like many examples of this issue, the area around the eagle's talons lacks definition. The well-preserved surfaces radiate vibrant mint luster and show a few hints of golden-tan toning. While the 1878-CC can be found in MS66 condition without much difficulty, examples in finer grades are very rare. PCGS has graded six numerically finer specimens (5/16). NGC ID# 253M, PCGS# 7080

**1879-CC Morgan Dollar, MS63
Elusive Carson City Issue**

- 4680 1879-CC MS63 PCGS.** From a mintage of 756,000 pieces, the 1879-CC is the second-rarest Morgan dollar from the Carson City Mint. This attractive Select specimen offers well-detailed design elements and vibrant, cartwheel mint luster on both sides. The reverse is remarkably free of distractions, but the obverse shows the expected number of minor scrapes and contact marks for the grade. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS62
Popular Capped Die, VAM-3A Variety**

- 4681 1879-CC Capped Die, VAM-3A, Top 100, MS62 PCGS.** The scarcer VAM with die gouges near the first A in AMERICA. This interesting variety was created when a larger CC mintmark was juxtaposed over a partially effaced smaller one. The Capped Die variety is less available than the "perfect mintmark" variety, especially in Mint State grades. The present coin is sharply struck, with fine detail present on the hair and eagle's breast. The fields show few handling marks, but a scratch on Liberty's cheek probably limits the grade.
Ex: Cincinnati Central States (Heritage, 4/2009), lot 2950, which realized \$4,025. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1880-CC Morgan, MS65 Deep Mirror Prooflike
VAM-6, 8 Over Low 7**

- 4682 1880-CC 8 Over Low 7, VAM-6, MS65 Deep Mirror Prooflike PCGS.** A Top 100 Variety. Similar to the VAM-5 overdate but with the 7 set lower behind the 8. VAM-6 is scarce in any Deep Mirror Prooflike grade, but this Gem example is conditionally rare. The surfaces are untoned and show stark white-on-black contrast with a few tiny, scattered ticks as allowed by the grade. Some minor strike weakness is seen on the central eagle and on the hair above Liberty's ear. Population: 8 in 65 Deep Mirror Prooflike, 1 finer (4/16). PCGS# 41136 Base PCGS# 97105

**1880-CC Morgan Dollar, MS66+
Well-Preserved and Lustrous**

- 4683 1880-CC MS66+ PCGS. CAC.** A Plus-graded Premium Gem from a small Carson City mintage of 591,000 pieces, this coin offers well-detailed design elements and well-preserved creamy surfaces that radiate vibrant mint luster on both sides. A few spidery die cracks are evident in the letters of the reverse legend and through the eagle's right (facing) wing. PCGS has graded 33 numerically finer examples (5/16). NGC ID# 2542, PCGS# 7100

**1883-O Dollar, MS66 Deep Mirror Prooflike
Stark Cameo Eye Appeal**

- 4684 1883-O MS66 Deep Mirror Prooflike PCGS.** The 1883-O is a plentiful issue in the absolute sense, but high-end Deep Mirror Prooflike examples are scarce. This Premium Gem is tied with 17 others as the finest at PCGS (4/16). White-on-black cameo contrast is starkly apparent on each side, and the frosty design elements are boldly struck. Hints of light golden toning are seen around the extreme outer peripheries, leaving the centers brilliant. NGC ID# 254J, PCGS# 97147

**1883-S Dollar, Distinctive MS64
Rarely Encountered Finer**

- 4685 1883-S MS64 PCGS.** Gunmetal-blue rims surround visually distinctive lavender-bronze toning on the semiprooflike obverse, while the reverse is a brilliant silver-white with a trace of gold at the margins. In the context of the Morgan dollar series, the 1883-S is scarce in Choice Uncirculated condition and rare any finer. Here, a few light marks account for the assigned near-Gem grade although the strike is sharp and none of the abrasions are heavy or distracting. PCGS reports just 19 coins in a numerically finer grade (4/16). NGC ID# 254K, PCGS# 7148

**1885-CC Morgan Dollar, MS67
VAM-3, Bold Obverse Toning**

- 4686 1885-CC MS67 NGC.** The main attraction is the Superb Gem condition of this low-mintage Carson City dollar, which displays stunning gold, lavender, and ocean-blue toning enhanced by frosty luster that pours through the rich patina. The reverse is frosty as well, but brilliant, with sparse gold and blue toning at the rims. Second billing goes to a sharp strike and the interesting VAM-3 variety, with a left-leaning mintmark, die cracks around the outside legend, and a series of die scratches in front of Liberty's eye that distinguish the variety. Census: 87 in 67 (5 in 67★), 5 finer (4/16). NGC ID# 254S, PCGS# 7160

**1886-O Silver Dollar, MS63+
Appealing for the Grade**

- 4687 1886-O MS63+ PCGS.** A slightly better date in Mint State, the 1886-O Morgan dollar becomes elusive above MS63. This Plus-designated Select example displays frosty luster with a hint of champagne color. There are no obvious abrasions, although faint luster grazes on Liberty's cheek limit PCGS' assessment. The eagle's breast and the hair above Liberty's ear show a touch of strike softness. NGC ID# 254W, PCGS# 7168

**1887-S Morgan Dollar, MS64 Deep Mirror Prooflike
One Finer Coin at PCGS**

- 4688 1887-S MS64 Deep Mirror Prooflike PCGS.** The 1887-S Morgan dollar is a slightly better date, from a mintage of 1.7 million pieces. The issue is seldom seen with prooflike surfaces, however. This sharply detailed Choice specimen offers deeply reflective prooflike fields that contrast profoundly with the frosty devices. A few minor hairlines and contact marks define the grade. Population: 24 in 64 Deep Mirror Prooflike, 1 finer (5/16). NGC ID# 2554, PCGS# 97181

**1887-S Dollar, MS64 Deep Mirror Prooflike
Only One Finer Example at Either Service**

- 4689 1887-S MS64 Deep Mirror Prooflike NGC.** The rarity of the 1887-S in Deep Mirror Prooflike format is well-documented in the references. Miles Standish suggests less than 2% of the certified total for the 1887-S are in prooflike or Deep Mirror Prooflike, with just one piece in full Gem condition. This attractively toned near-Gem is iridescent on the obverse in rainbow shades, with gold toning at the margins on the reverse. Both sides are sharply struck with a few small bagmarks on the deeply reflective surfaces and frosty devices. Housed in a former generation NGC holder. Census: 8 in 64 Deep Mirror Prooflike, 0 finer (4/16). NGC ID# 2554, PCGS# 97181

1889-CC Dollar, Choice XF
Elusive CAC Coin

- 4690** 1889-CC XF45 NGC. CAC. A lightly circulated example of this key Carson City issue, showing steel-gray obverse color and multihued toning on the reverse. The 1889-CC is a rarity in the Morgan dollar series. Low-end circulated examples are the most available, as few coins were kept from extensive circulation. This Choice XF representative will please a number of collectors. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU55
Key Branch Mint Issue

- 4691** 1889-CC AU55 PCGS Secure. The 1889-CC Morgan dollar claims a low mintage of 350,000 pieces and most of the coins were released into circulation in the 19th century. Few were saved by contemporary collectors and the issue is one of the keys to the series in high grade. This pleasing Choice AU specimen shows only a touch of wear and the lightly abraded surfaces retain much of their original mint luster. A few hints of greenish-gold toning visit the rims. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58
Smooth, Partially Lustrous Surfaces

- 4692** 1889-CC AU58 NGC. Barely a trace of high-point friction is seen on this near-Mint 1889-CC Morgan dollar, and moderate amounts of satiny luster remain in the protected regions of the fields. A hint of champagne toning warms otherwise brilliant surfaces, and there are no significant abrasions seen. The overall quality is unusual for an 1889-CC dollar, and any example in this grade is elusive. This key Carson City issue is most frequently seen in well-circulated condition. Mint State coins are highly sought-after and expensive. This attractive, high-end AU representative should garner significant interest when it crosses the auction block. NGC ID# 2559, PCGS# 7190
-

1891-CC Morgan Dollar, MS66
Only One Numerically Finer at PCGS

4693 1891-CC MS66 PCGS. From a mintage of 1.6 million pieces, the 1891-CC Morgan dollar was widely circulated at the time of issue, and many specimens were probably melted under the provisions of the Pittman Act in 1918. The 1891-CC was not as well-represented as many other issues in the Treasury releases of the 1960s, and only 5,687 examples were leftover for the GSA sales. As a result, high grade examples are decidedly elusive in today's market. This delightful Premium Gem is well-preserved and brightly lustrous, with sharply detailed design elements and outstanding eye appeal, a suitable candidate for the finest collection or Registry Set. Population: 34 in 66 (5 in 66+), 1 finer (4/16). NGC ID# 255H, PCGS# 7206

1891-O Silver Dollar, MS65
Exceptional Surfaces, Vibrant Luster

4694 1891-O MS65 PCGS. This frosty Gem 1891-O Morgan dollar just glows with radiant, untuned luster. There are no mentionable abrasions, and a finer grade might have been achieved were the devices better struck — weakness is seen on the eagle's breast and the hair above Liberty's ear. Eye appeal is exceptional. Gem-quality 1891-O dollars are scarce, and none are graded finer at PCGS (4/16). NGC ID# 255J, PCGS# 7208

1891-S Silver Dollar, MS66+
Conditionally Scarce

4695 1891-S MS66+ PCGS. CAC. The 1891-S is seldom seen in MS66, and finer coins are major rarities. This Plus-graded Premium Gem displays a bold strike and frosty, brilliant luster. A few faint grazes on the obverse are all that preclude a full MS67 designation. PCGS reports only eight finer representatives. CAC: 27 in 66, 4 finer (4/16). NGC ID# 255K, PCGS# 7210

1892 Silver Dollar, MS65+
Extremely Rare Any Finer

4696 1892 MS65+ PCGS. CAC. A well-struck 1892 dollar with frosty, brilliant luster and a vibrant cartwheel effect. A few faint grazes on Liberty's jaw appear to be all that preclude a full Premium Gem grade. This CAC-endorsed Gem is conditionally scarce, and finer pieces are extremely rare. A mintage of barely more than 1 million pieces further heightens the appeal. PCGS lists five Premium Gems finer (4/16). NGC ID# 255L, PCGS# 7212

1892-CC Dollar, MS65
Seldom Encountered Finer

- 4697 1892-CC MS65 PCGS.** Mint State 1892-CC dollars become elusive at the Gem grade level and are rarely seen finer. This frosty, untuned MS65 coin shows a bold strike with surfaces that appear high-end for the grade. Despite a mintage exceeding 1.3 million coins, no large quantities of the 1892-CC Morgan were represented in the GSA sales of the early 1970s, accounting for the date's scarcity in high grade today. PCGS lists only 32 finer coins (4/16). NGC ID# 255M, PCGS# 7214

1893 Silver Dollar, MS65
Satin Luster, Rarely Seen Finer

- 4698 1893 MS65 PCGS.** This Gem 1893 Morgan is undeniably high-end for the grade, and the satiny, champagne-tinted luster is visually pleasing. Trivial incompleteness on the hair curls above Liberty's ear is characteristic of this semikey Philadelphia issue. Liberty's cheek and the adjacent field are largely untouched. PCGS lists only six numerically finer representatives (4/16). NGC ID# 255R, PCGS# 7220

1893 Morgan Dollar, MS65+
Low-Mintage Philadelphia Issue

- 4699 1893 MS65+ PCGS.** The 1893 Morgan dollar is an elusive issue from a low mintage of 378,000 pieces. Most of the mintage seems to have been released into circulation at an early date and, despite some numismatic interest because of the low production total, few examples were saved by contemporary collectors. Only a few bags turned up in the Treasury releases of the 1960s. As a result, the 1893 is very rare in grades above MS65. This Plus-graded Gem displays sharply detailed design elements throughout. The 3 in the date is repunched and Liberty's chin is lightly die doubled. Lovely orange-red and navy-blue toning visits the borders of this thoroughly lustrous Gem. PCGS has graded six numerically finer examples (4/16).
Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1560. NGC ID# 255R, PCGS# 7220

**1893-CC Dollar, Lustrous MS62
In an Old Green Label Holder**

4700 1893-CC MS62 PCGS. This Uncirculated final-year Carson City Morgan displays radiant, frosty cartwheel luster with a few hints of golden toning here and there. The strike is razor-sharp, standing in stark contrast to many 1893-CC dollars that are weakly defined. This piece has a few scattered ticks, as is consistent with the grade. Housed in an old green label holder. NGC ID# 255S, PCGS# 7222

**1893-O Morgan Dollar, MS62
Unusually Vibrant Luster**

4703 1893-O MS62 NGC. The 1893-O Morgan dollar had a mintage of just 300,000 pieces, struck during the beginning stages of economic uncertainties that peaked a few years later. This Mint State example displays vibrant, frosty luster and minimal abrasions for the grade. The central devices are slightly soft, as usual. Light golden toning appears around the outer peripheries. NGC ID# 255T, PCGS# 7224

**1893-CC Dollar, MS62
Vibrant Mint Luster**

4701 1893-CC MS62 NGC. Dazzling cartwheel luster and thickly frosted design elements captivate the eye as this Mint State 1893-CC Morgan is tilted beneath a light. Scattered light abrasions on the obverse and central strike weakness on both sides limit the grade, but the eye appeal of this MS62 Carson City dollar persists. Warm golden toning forms a halo around each side. This is the final Carson City issue in the series and is in high demand as such. NGC ID# 255S, PCGS# 7222

**1893-O Morgan Dollar, MS62 Prooflike
Low-Mintage New Orleans Issue**

4704 1893-O MS62 Prooflike PCGS. From a low mintage of 300,000 pieces, the 1893-O Morgan dollar is seldom encountered with prooflike surfaces. This impressive MS62 example offers well-detailed design elements and moderately reflective fields with the expected number of minor contact marks for the grade. The brilliant centers yield to vivid crescents of greenish-gold, burnt-orange, and magenta at the rims. NGC ID# 255T, PCGS# 7225

**1893-CC Morgan Dollar, MS62 Prooflike
Final Issue From the Carson City Mint**

4702 1893-CC MS62 Prooflike NGC. A small mintage of 677,000 Morgan dollars was struck during 1893, the final year of coinage operations at the Carson City Mint. This attractive MS62 example exhibits unusually reflective prooflike fields that contrast boldly with the well-detailed frosty design elements. The surfaces show the expected number of minor contact marks for the grade. Census: 40 in 62 Prooflike, 17 finer (4/16). NGC ID# 255S, PCGS# 7223

**1893-S Morgan Dollar, VF20
Problem-Free Collector Coin**

4705 1893-S VF20 PCGS. The 1893-S Morgan dollar claims the lowest mintage of the series, at a meager 100,000 pieces. The lightly abraded slate-gray surfaces of this pleasing VF specimen are free of significant distractions and two thirds of Liberty's hair lines remain intact, though there is some wear on the eagle's breast and wing feathers. This coin will be a welcome addition to a fine collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VF20
Collectible Key-Date Coin**

4706 1893-S VF20 NGC. Amber and russet toning appears around the peripheries of this mid-grade 1893-S Morgan dollar, leaving the interiors with a pleasing golden-gray hue. The surfaces are slightly glossy, and wear is even. The VF level is among the most popular grades for the 1893-S, balancing affordability with detail and quality. NGC ID# 255U, PCGS# 7226

**1894 Dollar, Satiny MS63
Better Philadelphia Issue**

4707 1894 MS63 NGC. A well-struck example with satiny luster and a hint of champagne toning. A few light grazes are seen on Liberty's cheek, but the overall preservation is better than expected for the grade. The 1894 Morgan dollar boasts a small mintage of 110,000 coins. Only the 1893-S has a lower circulation-strike production. NGC ID# 255V, PCGS# 7228

**1894-O Morgan Dollar, MS63
Challenging Issue in High Grade**

4708 1894-O MS63 PCGS. The 1894-O Morgan dollar is not too difficult to locate in lower Mint State grades, but it is quite elusive at the Gem level. This attractive Select specimen offers well-detailed design elements and brilliant surfaces that show a few scattered minor signs of contact. Especially vibrant mint luster adds to the outstanding eye appeal. NGC ID# 255W, PCGS# 7230

**1895-O Silver Dollar, AU58+
Frosty Luster**

4709 1895-O AU58+ PCGS. True wear is difficult to discern on this high-end near-Mint 1895-O Morgan, although scattered light grazes and slide marks give the impression that the coin was at some point subject to brief commercial use. The frosty, untuned surfaces are highly lustrous, and the design elements are well-struck. With a small mintage of 450,000 coins, the 1895-O is a favorite New Orleans issue in the Morgan dollar series. Mint State examples are seldom seen. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, MS65+
Condition Census, Tied for Finest at CAC
Third-Rarest Morgan in Mint State

4710 1895-O MS65+ NGC. CAC. More so even than in 1894, silver dollar coinage in 1895 was minimal. Other than 880 proofs that were struck for collectors, no silver dollars were issued from the Philadelphia Mint, and San Francisco and New Orleans produced only 400,000 and 450,000 coins, respectively. Most of the reason for Morgan dollar coinage in previous years had been congressional legislation that mandated the purchase and coinage of vast amounts of silver bullion. This legislation was in the form of the Bland-Allison Act from 1878 to 1890, and from 1890 to late 1893, it was the Sherman Silver Purchase Act. When the latter legislation was repealed in November 1893, the Mint's silver purchases plummeted, and coinage of Morgan dollars declined proportionately. The *Annual Report of the Director of the Mint*, dated June 1895, stated:

"Since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the purchase of silver bullion by the Government has been restricted to the silver contained in gold deposits, small fractions of silver for return in fine bars, the amount retained in payment for charges, surplus silver bullion returned by the operative officers of the mints on the annual settlement of their accounts and the close of the fiscal year, and the uncurrent and mutilated domestic silver coin ..."

Silver coinage in 1895 was primarily focused on subsidiary denominations, particularly the quarter and half dollar, which experienced commercial demand despite economic erosion following the Panic of 1893. Silver dollars circulated to some extent in the Southern and Western states, but hundreds of millions of unused coins were stored at the mints and at the Treasury Building in Washington D.C. Storage was the fate of most 1895-O Morgans — which were eventually melted — although many were paid out into circulation around the time of issue. Worn examples are plentiful today.

In Mint State, the 1895-O is among the rarest issues in the series. Michael Standish, in *Morgan Dollar — America's Love Affair With a Legendary Coin*, writes: "the 1895-O is the third-rarest Morgan dollar in Uncirculated condition. Only Mint State examples of the 1892-S and 1893-S are rarer." The '95-O is significantly rarer than the 1895-S, despite similar mintages. A number of 1,000-coin bags of 1895-S dollars survived the Pittman Act melts of 1918 and were paid out in the '40s and '50s, but no such luck befell the 1895-O. Modern population data seem to support rumors that up to a few hundred 1895-O dollars were released from Treasury vaults in the 1950s, but no bag quantities have ever even been suggested to exist.

Modern auction appearances of this date are few and far between above MS62, and they drop off sharply at the Gem level. Our Auction Archives show only six previous offerings of a Gem-graded 1895-O, including reappearances. The last such offering was a PCGS coin in lot 5210 of our Philadelphia Signature sale (Heritage, 8/2012), which realized \$164,500. The present piece is Plus-graded and CAC-endorsed. This is the first time it is known to have ever been offered at auction. The strike is above-average for the issue, and the surfaces display the characteristic satin luster of 1890s New Orleans dollars. Much of each side displays cream-gold and champagne toning but with crescents of blended multicolor hues along the left-hand peripheries. The preservation is remarkable, as a loupe readily confirms.

The certified population of this key New Orleans issue is extremely small in MS64, and Gems like this are headlining rarities. This is the sole second-finest at NGC, which lists one MS65, this MS65+, and an MS66. PCGS reports six Gems (two in MS65+), an MS66, and an MS67 (4/16). The chance to acquire any of these rare, Condition Census examples is a lifetime goal for many collectors. But the opportunity to acquire a fresh, never-before-seen representative such as the McClure coin may only occur once in a lifetime. CAC: 5 in 65, 0 finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 255Y, PCGS# 7236

1895-S Morgan Dollar, MS64

- 4711 1895-S MS64 PCGS Secure.** The 1895-S Morgan dollar is not especially difficult to locate in MS64 condition, but finer grades are definitely elusive. This attractive Choice example displays sharply detailed design elements and lightly marked lustrous surfaces, under pleasing shades of lavender-gray toning. PCGS has graded 41 numerically finer examples (4/16). NGC ID# 255Z, PCGS# 7238

**1896-O Silver Dollar, MS63
Rarely Encountered Finer**

- 4712 1896-O MS63 PCGS.** Despite a mintage of 4.9 million coins, the 1896-O Morgan dollar is seldom seen in high grade. Large quantities of the date were dumped into circulation shortly after their issue. This satiny Select Mint State coin displays brilliant luster and minimal abrasions for the grade. The hair above Liberty's ear is slightly weak, as usual, but the strike is otherwise pleasing. PCGS has seen only 32 numerically finer representatives (4/16). NGC ID# 27ZU, PCGS# 7242

**1896-O Morgan Dollar, MS63+
Most Challenging Issue in High Grade**

- 4713 1896-O MS63+ PCGS Secure.** For a variety of reasons, including weak strikes, insipid mint luster, and excessive surfaces marks, the 1896-O Morgan dollar is considered the most difficult issue of the series to locate in high grade. This Plus-graded Select specimen exhibits surprisingly well-detailed design elements, with just a touch of the typical softness on the hair above the ear and the eagle's breast. The lightly marked surfaces radiate vibrant mint luster and eye appeal is unusually strong. PCGS has graded 32 numerically finer examples (5/16). NGC ID# 27ZU, PCGS# 7242

**1897 Morgan Dollar, MS67
Solid Registry Set Candidate**

- 4714 1897 MS67 PCGS.** An adequate mintage of more than 2.8 million Morgan dollars was struck at the Philadelphia Mint in 1897 and the delightful Superb Gem is among the finest survivors. The design elements exhibit razor-sharp definition throughout and the virtually pristine surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. Population: 32 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 27P5, PCGS# 7246

**1897-O Dollar, Lustrous MS63+
Seldom Seen Finer**

- 4715 1897-O MS63+ PCGS.** Satiny, untuned luster illuminates minimally abraded surfaces on this high-end Select 1897-O Morgan dollar. Slight strike softness on the high points of the central devices is typical of the issue. The 1897-O had a mintage of more than 4 million coins, but Mint State pieces are surprisingly elusive. Above MS63, this date is exceedingly scarce. NGC ID# 2565, PCGS# 7248

**1899-O Micro O Dollar, MS64+
Rare Mint State VAM-4 Example**

4716 1899-O Micro O, VAM-4, MS64+ PCGS. CAC. A Top 100 Variety. The 1899-O Micro O Morgan dollar is a rarity in Mint State. VAM-4 is one of the rarer die varieties that feature the Micro O mintmark, showing distinctive die lines within the eagle's tailfeathers. All varieties included, PCGS has seen six Micro O submissions in MS64 (three in MS64+) and three finer. NGC lists two in this grade and none finer. Only one VAM-4 coin has been attributed finer than this piece: an MS65 PCGS example (5/16).

Previous Mint State offerings of any Micro O variety in our auctions are extremely few. All varieties combined, we have handled only eight Uncirculated Micro O dollars. Of these, only two are comparable to the present coin: an MS64 PCGS VAM-31 in our FUN Signature sale (Heritage, 1/2014), lot 5967, which realized \$49,937.50, and an MS65+ PCGS VAM-5 in our FUN Signature sale (Heritage, 1/2015), lot 4199, which realized \$32,900. We have not handled a Mint State VAM-4 coin since 2004, which was a piece graded only MS62.

This Plus-graded, CAC-endorsed Choice VAM-4 Micro O dollar yields frosty mint luster with a hint of light golden toning around the peripheries. A few light grazes determine the grade but only minimally affect the eye appeal. A well-struck and attractive Micro O dollar. NGC ID# 256C, PCGS# 133947 Base PCGS# 87260

**1900-S Morgan Dollar, MS67
Single-Finest Certified at NGC**

4717 1900-S MS67 NGC. CAC. A respectable mintage of 3.5 million Morgan dollars was achieved at the San Francisco Mint in 1900, with the great majority of the coins delivered after September 1. Most of the mintage was stored at the Mint until the 1930s, when bag quantities were initially paid out. Sizeable periodic releases continued through the 1950s, and the 1900-S was also well-represented in the great Treasury releases of the 1960s. Many of the coins went into circulation or were used to service the casino gambling industry in Nevada, but a significant number of high-quality specimens were preserved by numismatists over the years.

The present coin is one of the finest survivors of this popular turn-of-the-century issue. The design elements are well-detailed and the impeccably preserved surfaces radiate vibrant mint luster, under vivid shades of magenta and greenish-gold toning. Census: 1 in 67, 0 finer. CAC: 1 in 67, None finer (4/16).

From The Rev. Dr. James G. K. McClure Collection. NGC ID# 256H, PCGS# 7270

1901 Morgan Dollar, MS63
Elusive This Well-Preserved

4718 1901 MS63 NGC. With a substantial mintage of 6.9 million pieces, the 1901 Morgan dollar is not difficult to locate in circulated grades, but the issue is as challenging as any in the series at the MS65 level. It seems likely that most of the mintage was either released into circulation at the time of issue, or destroyed under the provisions of the Pittman Act in 1918. This attractive Select specimen exhibits sharply detailed design elements and pleasing surfaces that radiate vibrant mint luster from both sides. Only a few minor signs of contact are evident and subtle hints of golden-tan toning enhance the attractive overall presentation. NGC has graded 23 numerically finer examples (4/16). NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS63
Rare Any Finer

4719 1901 MS63 NGC. Although the 1901 Morgan dollar claims a substantial mintage of 6.9 million pieces, the issue is one of the most difficult to locate in high grade. The master hub was changed in 1901, and coins struck from dies prepared with the new hub were usually lightly impressed. Most of the coins were either released into circulation near the time of issue or melted under the provisions of the Pittman Act in 1918. Few examples were left by the time of the great Treasury releases of the 1960s. All of these factors contribute to the scarcity of high-grade coins today.

This attractive Select example exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear and the eagle's breast. The pleasing surfaces radiate vibrant mint luster and show a few scattered, grade-consistent contact marks on both sides. NGC has graded 23 numerically finer examples (5/16). NGC ID# 256J, PCGS# 7272

**1901-S Dollar, Scarce MS66
Extremely Rare Any Finer**

- 4720 1901-S MS66 PCGS.** A well-preserved example of this conditionally elusive San Francisco issue, showing brilliant, frosty luster and a relatively clean cheek. Slight strike weakness is seen on the hair above Liberty's ear, as usual. The reverse has faint planchet striations extending upward from the eagle's left (facing) wing. A pleasing example with few superiors. Population: 38 in 66 (3 in 66+), 3 finer (4/16). NGC ID# 256L, PCGS# 7276

**1903-S Morgan Dollar, MS64+
Challenging Issue in Finer Grades**

- 4721 1903-S MS64+ NGC. CAC.** The 1903-S Morgan dollar claims a smallish mintage of 1.2 million pieces and the issue becomes quite elusive in grades above MS64. This Plus-graded Choice specimen exhibits sharply detailed design elements and frosty mint luster, under shades of lavender-gray and golden-brown toning. NGC has graded 50 numerically finer examples (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 256T, PCGS# 7288

**1904-S Morgan Dollar, MS63
Late Series Key**

- 4722 1904-S MS63 PCGS.** The 1904-S Morgan dollar was not an especially well-made issue, and many survivors suffer from striking problems and insipid mint luster. This attractive Select specimen is a happy exception to the rule, with sharply detailed design elements and vibrant mint luster throughout. Some scattered, minor contact marks are consistent with the grade. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS65+
Elusive Late-Series Issue**

- 4723 1904-S MS65+ PCGS.** The 1904-S Morgan dollar is an elusive issue from a late-series mintage of 2.3 million pieces. Most of the coins were paid out to settle deposits over an extended period of time and relatively few were included in the Treasury releases of the 1960s or the Redfield Hoard. As a result, the 1904-S is especially difficult to locate in high grade.

This Plus-graded Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few delicate hints of pale gold and lavender toning at selected angles. Housed in a new 30th Anniversary green holder. PCGS has graded 16 numerically finer examples (5/16). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1878 8TF Morgan, PR65
Doubled Reverse, VAM-14.3

- 4724 1878 8TF Doubled Bow, VAM-14.3, PR65 NGC. CAC.** The first-year proof in the Morgan dollar series is elusive in high grade. Certified VAM-14.3 examples, showing a doubled wreath and bow, are rare — NGC lists five and PCGS four, of which this Gem is the sole finest (4/16). This die pair was also used for circulation strikes. The present coin displays a full strike and reflective fields. Sun-gold, violet, and ocean-blue toning blanket each side, delivering excellent eye appeal.
From The Rev. Dr. James G. K. McClure Collection. PCGS# 134107 Base PCGS# 7311

1881 Morgan Dollar, PR65
Hints of Cameo Contrast

- 4725 1881 PR65 NGC.** Sun-gold toning gives this fully struck high-end proof 1881 Morgan dollar excellent eye appeal, while the deeply mirrored fields and satiny devices offer subtle contrast. Some grayish overtones are seen at certain angles. The 1881 proof is scarcely encountered finer than this naturally toned Gem. Census: 29 in 65, 39 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2725, PCGS# 7316

1882 Morgan Dollar, PR65 Cameo
Warm Toning and Contrast

- 4726 1882 PR65 Cameo NGC.** Glowing cameo contrast is seen through warm amber-gold toning on each side of this Gem 1882 proof Morgan. The strike is full, and barely more than a few faint hairlines determine the grade. Cameo examples of this issue are in the minority, and seldom is a high-grade piece offered at auction. This old-time coin is fresh to the market and will appeal to a range of collectors. Census: 22 in 65 Cameo, 27 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2726, PCGS# 87317

1882 Morgan Dollar, PR66+
Stellar Deep Cameo Example
Rarely Seen This Fine

- 4727 1882 PR66+ Deep Cameo PCGS. CAC.** The proof 1882 Morgan dollar is slightly scarcer than the proof Trade dollar of this year. Although the two issues had virtually identical mintages (1,100 and 1,097 coins, respectively), fewer examples of the Morgan variety have survived in high grade. A number of Cameo coins are known, but Deep Cameos are rare; CAC-endorsed Deep Cameos are even more so. This Plus-graded Premium Gem displays staggering eye appeal. The strike is bold, and the frost-white design elements appear flawless. Liquidlike mirroring in the fields delivers impeccable contrast and is devoid of perceptible hairlines. The Registry collector should give this piece close consideration. Population: 9 in 66 (2 in 66+) Deep Cameo, 3 finer. CAC: 2 in 66, 2 finer (4/16). NGC ID# 2726, PCGS# 97317

**1883 Morgan Dollar, PR66+ Cameo
Registry Set Contender**

- 4728 1883 PR66+ Cameo PCGS. CAC.** A fairly generous mintage of 1,039 proof Morgan dollars was accomplished in 1883, and this delightful Plus-graded Premium Gem is definitely one of the nicer survivors. The design elements exhibit razor-sharp definition throughout and the deeply mirrored fields contrast boldly with the frosty devices, to create a stunning cameo effect. The surfaces are impeccably preserved, with hints of lilac and greenish-gold on the obverse and vivid shades of emerald-green and cobalt-blue on the reverse. Overall eye appeal is terrific. This coin should find a home in a fine collection or Registry Set. Population: 13 in 66 (3 in 66+) Cameo, 2 finer. CAC: 5 in 66, 1 finer (4/16). NGC ID# 27YV, PCGS# 87318

**1884 Dollar, PR65 Cameo
Delightful Contrast and Toning**

- 4729 1884 PR65 Cameo NGC.** This remarkable Gem Cameo 1884 proof Morgan dollar displays dazzling field-device contrast that is accentuated by warm amber-gold toning. Hints of violet and blue around the peripheries draw the eye into the central devices, which are sharp and frosty. An exceptional coin in all respects. Census: 12 in 65 Cameo, 25 finer (4/16). NGC ID# 27ZB, PCGS# 87319

**1885 Morgan Dollar, PR66
High-End in Every Respect**

- 4730 1885 PR66 PCGS. CAC.** This Premium Gem proof 1885 Morgan dollar is conditionally rare, and it is one of the three finest non-Cameos at CAC. Each side is deeply toned in aquamarine and rose-gold hues, although the obverse still has modest field-device contrast. The strike is full, and the fields are deeply reflective. A finer 1885 proof will prove difficult to locate. Population: 15 in 66, 2 finer. CAC: 3 in 66, 0 finer (4/16). NGC ID# 27ZE, PCGS# 7320

**1887 Dollar, Colorful PR66
Rarely Seen This Fine**

- 4731 1887 PR66 PCGS. CAC.** The 1887 proof Morgan is a rarity in PR66 regardless of contrast level. This non-Cameo CAC coin actually shows considerable field-device contrast, although each side is deeply toned enough that a Cameo designation was not assigned. The strike is full, and there are no mentionable marks. The obverse displays sea-green and yellow-gold toning overall with a rose and aquamarine crescent along the left periphery. The reverse has vivid blue, gold, and plum peripheral toning around a warm sun-orange interior. Population: 13 in 66 (1 in 66+), 5 finer. CAC: 4 in 66, 3 finer (4/16). NGC ID# 27ZG, PCGS# 7322

**1889 Silver Dollar, PR64+
Only Plus-Graded Non-Cameo**

- 4732 1889 PR64+ NGC. CAC.** Blended multicolor hues encompass each side of this CAC-endorsed proof 1889 Morgan dollar, although the obverse is somewhat more bold than the reverse. Both sides are sharply struck and unmarked. This is the only Plus-graded non-Cameo proof certified. Census: 44 in 64 (1 in 64+), 47 finer. CAC: 3 in 64, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZJ, PCGS# 7324

**1889 Dollar, Brilliant PR67 Cameo
An Exceptionally Appealing Specimen**

- 4733 1889 PR67 Cameo NGC.** The *Guide Book* reports a mintage of 811 Morgan dollar proofs in 1889, and the issue has gotten a bad rap over the years. In his *Guide Book of Morgan Silver Dollars*, Bowers describes this proof emission: "Average strikes, usually flat at the centers. Medium to low contrast." This incredible Superb Gem Cameo proof fails to match any of those descriptors. The centers display full detail over the ear and breast feathers. Each side is entirely brilliant, enhancing the pronounced contrast between the deeply reflective fields and frosted motifs. Contact marks are unseen. Morgan dollar specialists will find much to appreciate. Census: 12 in 67 Cameo (3 in 67+ Cameo), 1 finer (5/16). NGC ID# 27ZJ, PCGS# 87324

1892 Dollar, Beautifully Toned PR64+

- 4734 1892 PR64+ NGC. CAC.** One of the more readily obtainable issues in the proof series. This is the only Plus-graded non-Cameo proof at NGC in PR64. Both sides are vividly toned in multiple hues, delivering stellar eye appeal. The strike is sharp, and the fields are highly reflective. Just an all-around visually stunning proof Morgan. CAC: 5 in 64, 11 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZM, PCGS# 7327

**1893 Silver Dollar, PR64
Eye-Appealing Patina**

- 4735 1893 PR64 NGC. CAC.** The 1893 proof Morgan is an available issue overall, but few are seen with CAC approval. The present coin is beautifully toned, and the colors are accentuated by the deep mirroring in the fields. The strike is bold, and modest contrast emerges through the patina. Vivid sun-gold, violet, and ocean-blue hues dominate each side. CAC: 4 in 64, 8 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZN, PCGS# 7328

**1894 Dollar, PR65 ★ Cameo
Colorful, Gleaming Surfaces**

- 4736 1894 PR65 ★ Cameo NGC. CAC.** NGC awarded this Gem Cameo proof the Star designation, denoting its beautiful rainbow toning that spans both sides. The strike is razor-sharp, and noticeable cameo contrast is seen even through the rich patina. Readily available in the absolute sense, the 1894 proof Morgan becomes scarce in Cameo grades. This CAC-endorsed coin is especially pleasing. Census: 8 in 65 (1 in 65 ★) Cameo, 46 finer. CAC: 3 in 65, 13 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2577, PCGS# 87329

**1895 Morgan Dollar, PR64
Key Proof-Only Issue**

4737 1895 PR64 NGC. CAC. Business-strike 1895 Morgan dollars are unknown to present-day collectors, although Mint records indicate 12,000 pieces were struck. Some numismatists believe the business-strike mintage was never produced and these figures represent some kind of clerical error. Others suggest that the entire mintage may have been melted under the provisions of the Pittman act in 1918. Whatever the explanation, the tiny mintage of 880 proofs has always been the only recourse for collectors seeking an example of this date. Considering the enormous popularity of Morgan dollar collecting, it is easy to understand why the 1895 is the most sought-after proof issue of the series.

This sharply detailed Choice example displays deeply reflective fields under intense shades of greenish-gold, cobalt-blue, and lilac toning. Eye appeal is tremendous for this classic proof rarity. Census: 48 in 64 (1 in 64★), 70 finer. CAC: 8 in 64, 8 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZR, PCGS# 7330

**1896 Morgan Dollar, PR65
Lovely Rainbow Toning**

4738 1896 PR65 NGC. CAC. A large portion of the surviving 1896 proof Morgan dollars is in the PR63 to PR65 grade range, which puts this Gem CAC coin at the top of end of the moderately affordable population. The strike is full and the fields are mirrored, but the chief eye-catcher on this piece is its vivid rainbow toning that encompasses each side. Census: 27 in 65, 40 finer. CAC: 2 in 65, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZT, PCGS# 7331

**1898 Dollar, PR65 Cameo
Attractively Toned, Pleasing Contrast**

4739 1898 PR65 Cameo NGC. CAC. Cameo contrast persists despite rich toning. Both sides of this Gem proof exhibit sun-gold interiors with violet and blue near the borders. The strike is sharp, and the fields are deeply mirrored. Cameo examples of the 1898 proof Morgan dollar are elusive, particularly at the Gem grade level. Census: 9 in 65 (1 in 65+) Cameo, 16 finer. CAC: 1 in 65 Cameo, 5 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZW, PCGS# 87333

1901 Morgan, Lightly Toned PR65+

4740 1901 PR65+ NGC. CAC. The debut proof Morgan of the 20th century is an ideal type coin candidate. Examples are usually obtainable in the absolute sense, but those finer than PR65 are scarce. This Plus-graded CAC coin displays dusky champagne-gray and golden-orange toning over well-preserved mirroring and sharp design elements. Census: 39 in 65 (1 in 65+), 49 finer. CAC: 7 in 65, 4 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZZ, PCGS# 7336

1902 Dollar, PR65
Elusive in Finer Grades

- 4741 1902 PR65 NGC.** Contrasted proof dollars of 1902 are rare, as this was the year that the Mint altered its method of proof die production, largely eliminating the cameo effect. This Gem non-Cameo is boldly struck and reflective, with amber-gold toning that deepens slightly toward the borders. Eye appeal is pleasing. Census: 44 in 65, 56 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2822, PCGS# 7337

1921 Zerbe Dollar, PR63 ★
Scarce VAM-1AG Variety

- 4742 1921 Zerbe PR63 ★ NGC. VAM-1AG.** Per VAMworld.com, Ash Harrison studied 1921 Morgan dollars designated as Zerbe proofs by the leading third party services. He determined that they were typically VAM-1AG, identified by specific die scratches on both sides. These are evident on the present coin, as is the line to the dentils from the second U in UNUM, the chief diagnostic for VAM-47, the traditional Zerbe proof assignment. This is a brilliant, satiny, and fully struck specimen with exemplary surfaces for the Select level.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

1922 Peace Dollar, MS67
Conditionally Rare, Among the Finest Certified

- 4743 1922 MS67 PCGS.** One of the two most common dates in the series by far, the 1922 Peace dollar actually becomes conditionally rare in MS67, more so than the 1923. The present coin is frosty and sharply struck, with a hint of champagne toning. A small group of marks is seen on the eagle's wing, but the obverse is beautifully preserved and luminous. Population: 29 in 67, 0 finer (4/16). NGC ID# 257C, PCGS# 7357

1922-D Dollar, Lustrous MS66+
Few Known Finer

- 4744 1922-D MS66+ NGC. CAC.** Frosty, luminous luster rolls over beautifully preserved surfaces on this high-end Premium Gem 1922-D Peace dollar. The strike is bold, and eye appeal is excellent. Premium Gem 1922-D dollars are occasionally offered, but Plus examples are rare. NGC lists only nine MS66+ coins and 16 Superb Gems finer. CAC: 64 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257D, PCGS# 7358

1922-S Peace Dollar, MS66
Among the Finest Certified

- 4745 1922-S MS66 NGC.** This 1922-S Peace dollar is among the finest certified of the date and is a notable rarity as such. The central high points are slightly soft, but the untuned, satiny surfaces make up the eye appeal. There are no significant abrasions. This issue is available through MS64, but the population begins to drop off rapidly in higher grades. Census: 18 in 66 (1 in 66★), 0 finer (4/16). NGC ID# 257E, PCGS# 7359

1923-D Peace Dollar, MS66
Among the Finest at NGC and CAC

- 4746 1923-D MS66 NGC. CAC.** The 1923-D Peace dollar is elusive in MS66 and nearly unknown finer. This Premium Gem is among the finest at both NGC and CAC. The strike is bold, and the frosty surfaces display lightly mottled toning — in amber-gold and champagne on the obverse and in lovely rainbow hues on the reverse. A lack of obvious abrasions further heightens the eye appeal. Census: 29 in 66 (1 in 66+, 1 in 66★), 0 finer. CAC: 24 in 66, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257G, PCGS# 7361

1924-S Peace Dollar, MS65
Only One Coin Finer at NGC

- 4747 1924-S MS65 NGC. CAC.** The 1924-S is elusive in MS65 and rarely seen finer. This CAC coin displays a sharp strike and frosty, faintly toned champagne surfaces. There are no significant abrasions, and eye appeal is excellent. This is a fresh-to-the-market example that should attract a lot of attention. Census: 74 in 65, 1 finer. CAC: 20 in 65, 2 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257K, PCGS# 7364

1927-S Peace Dollar, MS65
Remarkably Well-Preserved and Frosty

- 4748 1927-S MS65 PCGS.** Luminous, champagne-tinted luster rolls vibrantly over the frosty surfaces of this Gem 1927-S Peace dollar. Abrasions are seemingly nonexistent, and only a few truly faint grazes in the left obverse field limit the grade. Even the eagle's wing — often peppered in minute ticks and abrasions — shows only mint-made die debris marks. The 1927-S Peace dollar is scarce this well-preserved and extremely rare in finer condition. Population: 83 in 65 (3 in 65+), 2 finer (4/16). NGC ID# 26J6, PCGS# 7372

1927-S Dollar, Satiny MS65
Low-Mintage Issue

- 4749 1927-S MS65 PCGS.** The 1927-S is among the scarcer Peace dollar issues in the series in Gem condition, and finer coins are extremely rare. This MS65 PCGS coin displays a bold strike and satiny, untuned luster. A loupe fails to reveal any mentionable abrasions, and eye appeal is pleasing. The 1927-S boasts a small mintage of 866,000 coins, one of only four production totals in the series below 1 million pieces. Population: 83 in 65 (3 in 65+), 2 finer (4/16). NGC ID# 26J6, PCGS# 7372

1928-S Peace Dollar, MS65
Conditional Key Date

- 4750 1928-S MS65 NGC.** The 1928-S is one of the rarest dates in the series in Gem condition. Only the 1925-S is a close rival in this grade, and exactly which is rarer depends on an unknown number of possible resubmissions at each service. In terms of auction appearances, the 1928-S is the slightly scarcer date in MS65. Both dates are prohibitively rare in MS66 and unknown finer. This lustrous Gem is among the finest 1928-S dollars we have ever handled. Some softness of strike is noted on the central high points, but the outstanding preservation balances the eye appeal. A blush of delicate champagne toning graces each side. A loupe reveals a few truly faint, hair-thin grazes that preclude a finer grade but hardly impact the visual appreciation. Census: 44 in 65, 1 finer (4/16). NGC ID# 257W, PCGS# 7374

1934-S Peace Dollar, MS65
Sought-After Key Issue

- 4751 1934-S MS65 PCGS.** The 1934-S Peace dollar is a lower-mintage key in the series and examples in high grade are especially elusive. This attractive Gem displays well-detailed design elements and well-preserved, lustrous surfaces, under dappled shades of golden-tan and lavender-gray toning. PCGS has graded 30 numerically finer examples (4/16). NGC ID# 257Z, PCGS# 7377

**1935 Dollar, MS66+
Tied for Finest at PCGS**

4752 1935 MS66+ PCGS. CAC. A mintage of 1.5 million coins in 1935 represented the end of Peace dollar production at the Philadelphia Mint. The finest examples at PCGS grade MS66, and only 21 Premium Gem submissions have been awarded a Plus designation (4/16). CAC, too, has acknowledged the impeccable quality of this all-brilliant Peace dollar. Frosty luster swirls over each side, and the devices display uniformly crisp detail. A couple of minute ticks prevent a full Superb Gem assessment. NGC ID# 2582, PCGS# 7378

**1935 Dollar, MS66+
Unsurpassed Quality**

4753 1935 MS66+ PCGS. CAC. The final-year 1935 Peace dollar was struck to the extent of 1.5 million coins, and the average Mint State example grades between MS62 and MS64. Gems are elusive but obtainable, and only in this high grade does the issue become truly scarce. This bold Premium Gem is one of only a handful of examples to have been recognized for quality within the grade by both PCGS and CAC. An entirely brilliant obverse cedes to light chestnut patina on the reverse, while both sides display glimmering luster. Superficial distractions are at a minimum. Among the finest coins at PCGS, with none numerically finer. Population: 21 in 66+, 0 finer. CAC: 55 in 66, none finer (4/16). NGC ID# 2582, PCGS# 7378

**1935-S Peace Dollar, MS66+
Only Two Coins Finer at PCGS**

4754 1935-S MS66+ PCGS. CAC. This sharp 1935-S Peace dollar displays thick, frosty luster with a faint suggestion of light champagne warmth. Even with a loupe, it is almost impossible to differentiate this Plus-graded, CAC-endorsed Premium Gem from most MS67 coins on the market. The eye appeal is exemplary. PCGS lists only two Superb Gems finer (4/16). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

**1971-D Eisenhower Dollar, MS67
Tied for Finest, CAC-Endorsed**

4755 1971-D MS67 PCGS. CAC. 30th Anniversary Green Label Holder. A well-struck, satiny Superb Gem with delightful rainbow toning cast over each side. The fields are remarkably devoid of contact marks. The 1971-D is the first Eisenhower dollar issue from the Denver Mint. Uncirculated examples are plentiful in most grades, but this Superb Gem is a condition rarity. Population: 25 in 67, 0 finer. CAC: 3 in 67, 0 finer (4/16). NGC ID# 2585, PCGS# 7407

**1972 Eisenhower Dollar, MS66
Conditionally Rare Type One Coin**

4756 1972 Type One MS66 PCGS. CAC. 30th Anniversary Green Label Holder. Both the Type One and Type Two 1972 Eisenhower dollars are rare in MS66 and unknown finer; the Type Three variety is slightly more plentiful. The Type One reverse shows the Caribbean islands clearly defined and positioned east of Florida on the small globe. This top-grade CAC coin displays a bold strike and satiny luster with a blush of warm golden toning. Population: 6 in 66, 0 finer. CAC: 3 in 66, 0 finer (4/16). NGC ID# 2587, PCGS# 87409

SBA DOLLAR ERROR

**Anthony Dollar on a Cent Planchet
Struck Off-Center, Uniface
MS63 Red and Brown**

4757 Undated Anthony Dollar — Struck Off-Center, Uniface, on a Type One Cent Blank— MS63 Red and Brown ANACS. A cent blank and an Anthony dollar planchet were fed together between Anthony dollar dies. The cent blank was struck approximately 60% off center toward 7:30. It was struck between the Anthony obverse die and the dollar planchet (the latter is not included). The struck area includes the upper half of Anthony's profile, the RTY in LIBERTY, and the three upper right-side stars. The struck area is wafer-thin, and the design transfers through the obverse to the reverse, where it appears incused and reversed.

EARLY PROOF SET

1889 Seven-Piece Proof Set, PR64-PR66 All NGC-Certified

4758 1889 Seven-Piece Proof Set, PR64-PR66 NGC. This is an attractive proof set, all NGC-certified, with all seven pieces. Included are:

Cent PR66 Red and Brown. The fields are nicely mirrored and there is significant underlying mint red across both sides of the coin. However, both sides also have an even layer of brown patina that partially subdues both the mirrors and red luster.

Three Cent Nickel PR66. Final year of issue for this unusual denomination. The strike details are complete in all areas. The fields are nicely mirrored and there is almost enough frost over the devices to warrant a Cameo designation. Lightly toned.

Nickel PR65. Each side is layered in successive shades of pastel toning. The fields are moderately mirrored, and the strike is fully defined in all areas.

Dime PR65. Rich blue and golden-rose toning covers each side. The depth of the coloration partially subdues the mirrored flash in the fields, but close inspection makes one wonder if the toning were absent would this be deeply mirrored cameo?

Quarter PR64. Each side is deeply mirrored, but again like the dime, significant multicolored toning cloaks each side. Again, there is significant mint frost over the devices. Nice coin for the grade.

Half Dollar PR64. The surfaces are almost brilliant, showing just the slightest hint of golden patina. Deeply mirrored fields.

Morgan Dollar PR64. An attractive near-Gem example with almost brilliant surfaces. The obverse margin is surrounded by russet-blue toning. A few scrapes and scratches on the holder make it somewhat difficult to discern what few imperfections are on the coin and what is on the encasement. Sharply struck. (Total: 7 coins)

CERTIFIED MODERN PROOF SETS

1936 Five-Piece Proof Set, PR62-PR67 All NGC-Certified

4759 1936 Five-Piece Proof Set PR62-PR67, NGC-Certified. This five-piece set contains a Brilliant Finish cent and nickel. The entire set contains:

Cent — Brilliant Finish — PR63 Red. The yellow tinged, red surfaces are only affected by light spotting and flyspecks over each side.

Nickel — Brilliant Finish — PR67. A magnificent, problem-free example with just the faintest hint of pale golden toning and light blue at the margins.

Dime PR65. Deeply mirrored fields, like the nickel, each side shows light golden patina with a few slightly darker patches of color here and there.

Quarter PR64. A loupe will be required to see the contact marks that keep this exceptional quarter from an even higher grade. Deeply mirrored.

Half Dollar PR62. A few wispy slide marks seem to limit this coin from a higher designation. The fields are exceptionally deep in mirrored reflectivity and there is even slight evidence of field-device contrast on each side.

Ex: Eric P. Newman Numismatic Education Society. (Total: 5 coins)

1937 Proof Set, PR66-PR67
All NGC-Certified

4760 1937 Five-Piece Proof Set, PR66-PR67, NGC-Certified. This is a wonderfully preserved proof set that is essentially “as struck.” It includes:

Cent PR66 Red. Light red mint luster that tends a bit toward the yellow side with a few dabs of cherry and pale lilac interspersed. Deeply mirrored fields.

Nickel PR66+. An equally deeply mirrored proof, each side displays pale rose centers with sky blue patina around the margins. A small planchet flake is located above the mound on the lower reverse.

Dime PR67+. A nearly flawless proof. Each side shows an unusual and highly attractive visual element: thin streaks of pale blue that are nearly horizontal. A must-see coin.

Quarter PR67. The dazzling mint brilliance still shines through the light smoky patina that is just noticeable enough to deserve mention.

Half Dollar PR66+. Very light toning can be seen on each side, but certainly not enough to obscure the underlying surface quality and preservation. The obverse fields show evidence of heavy die lapping which has attenuated the rays of the sun and some of the recessed areas of the lower drapery.

Ex: Eric P. Newman Numismatic Education Society. (Total: 5 coins)

GOLD DOLLARS

1849 No L Gold Dollar, MS66+ First-Year *Guide Book* Variety

4761 1849 No L, D-1, Normal Stars, MS66+ PCGS. CAC. It has been reported that anywhere from 1,000 to 10,000 of the 688,567 Open Wreath gold dollars struck at the Philadelphia Mint in 1849 represented the No L variety. In *A Guide Book of Gold Dollars*, Bowers explains that the No L coins were “struck only for a short time. The obverse outlasted two reverses that each cracked, probably causing Chief Engraver James B. Longacre to make modifications.” Many No L gold dollars were saved as curiosities, being the first coins of that denomination struck at the Mint. To be sure, few survive in this impressive state of preservation.

This prooflike Premium Gem has light yellow-gold coloration with fields that show pronounced reflectivity. Smooth, frosty surfaces are virtually free of imperfections, and those that limit the grade are only visible upon close examination with a loupe. Full stars, hair strands, and wreath elements make this incredible first-year gold dollar all the more desirable. Population: 9 in 66 (1 in 66+), 2 finer (4/16). PCGS# 521670 Base PCGS# 7501

1849-D Gold Dollar, MS62 Mint State Dahlonge Type Coin

4762 1849-D MS62 NGC. Variety 1-A. Despite a mintage of just 21,588 pieces, the 1849 date is the most-available gold dollar from the Dahlonge Mint. Many pieces were saved as the first year of issue. Still, Mint State examples are only moderately available and they possess the tangible appeal of early branch mint Uncirculated gold — always a powerful allure for Southern gold specialists. This example shows a few grade-determining marks on the portrait but the mint luster is full throughout and the strike is better-than-average for a D-Mint dollar. It displays the desirable greenish-gold patina of local bullion. Census: 31 in 62 (1 in 62+), 23 finer (4/16). NGC ID# 25BD, PCGS# 7507

1853 Gold Dollar, Rare MS67 Tied for Finest at NGC

4763 1853 MS67 NGC. The 1853 is one of the few Type One gold dollars that is obtainable in Superb Gem condition. However, coins grading so fine are rare. Unlike in the 1880s, few high-end examples of the Type One design were spared from circulation. This MS67 example is tied with eight others as the finest 1853 example at NGC, and only four finer examples are reported at PCGS (4/16). The strike is razor-sharp, and the frosty surfaces yield blended rose, mint, and yellow-gold hues. A snaking die crack is seen near the left obverse rim. The Registry collector will find this piece highly appealing. NGC ID# 25BU, PCGS# 7521

**1854 Type Two Gold Dollar, MS63
Excellent Color and Luster**

- 4764 1854 Type Two MS63 PCGS.** Both sides of this Select Type Two gold dollar are richly toned in variegated apricot-gold and violet patination and display pleasing luster. A well-directed strike imparts sharp definition to the design features, with just the usual minor softness in the hair and on the 8. A few light handling marks limit the grade, yet this piece possesses nice overall eye appeal. This is a great coin for a high grade type set.
Ex: Long Beach Signature (Heritage, 9/2009), lot 1420. NGC ID# 32EH, PCGS# 7531

**1854 Type Two Gold Dollar, MS63
Scarce Doubled Die Obverse**

- 4765 1854 Type Two, Doubled Die Obverse, FS-101, MS63 PCGS.** Characterized by the triple row of beads over LIBERTY on the headband. Doubling is also seen on the ED of UNITED and on some of the letters of STATES. Considered extremely rare by Walter Breen (1988), who claimed that he discovered the variety in the winter of 1967-68. Bright yellow-gold surfaces display relatively strong luster and sharply impressed design elements, though portions of Liberty's hair are soft; all of the letters in LIBERTY are clear. A well-defined clash mark from the Liberty motif is apparent on the reverse. A few wispy handling marks are noted on the obverse.
Ex: ANA Signature (Heritage, 4/2006), lot 1542; ANA Signature (Heritage, 8/2010), lot 5748. PCGS# 145701 Base PCGS# 7531

**1855 Gold Dollar, MS64
Pleasing Type Two Coin**

- 4766 1855 Type Two MS64 PCGS.** The 1855 is one of the two Type Two gold dollar issues that are fairly plentiful in Mint State and popular among type collectors. This Choice example is at the top end of the typically seen grade range, as Gems are scarce and pricey. This coin shows a bold strike and satiny yellow-gold luster. Both sides have heavy clash marks, as is typical of the issue. NGC ID# 25C4, PCGS# 7532

**1855 Type Two Gold Dollar, MS64+
Second Year of a Short-Lived Type**

- 4767 1855 Type Two MS64+ PCGS.** Despite mintages that are virtually identical for the 1854 and 1855 Type Two gold dollars — 784,000 pieces versus 758,000, respectively — the 1855 is slightly rarer than the 1854 overall. Both issues are prone to extensive die-clashing, and weak strikes that appear as softness on the digits of the date, the LL in DOLLAR, and the high points of Liberty's hair on the obverse. Well-struck pieces, such as this one, are rare prizes among type collectors. The mint luster is simply astounding on this coin. Thick and frosted with no noticeable abrasions. NGC ID# 25C4, PCGS# 7532

**1856 Slanted 5 Gold Dollar, MS66+
First Year of the Type Three Design**

4768 1856 Slanted 5 MS66+ PCGS. CAC. The final iteration of the gold dollar, the Type Three Large Head Indian Princess design, was introduced in 1856. Slanted 5 examples are more available than the Upright 5 coins. Moreover, they represent one of the most collectible dates of the type. Glistening mint frost and appealing butter-gold color grace this phenomenally preserved Premium Gem. Each side features bold devices with a few alloy spots and die clash marks. Population: 13 in 66 (3 in 66+), 4 finer. CAC: 6 in 66, 1 finer (5/16). NGC ID# 25CB, PCGS# 7540

**1879 Gold Dollar, MS67
Prooflike, Top-Graded Example**

4769 1879 MS67 PCGS. The fact that this spectacular Superb Gem gold dollar is markedly prooflike is unsurprising and typical of many coins from this low-mintage issue. Merely 3,000 coins were struck in 1879, and virtually the entire production was squirreled away by collectors, dealers, and other speculators hoping to eventually cash in on the issue's limited supply. Deep yellow-gold color appears intermixed with complementary splashes of pale lilac. The hair curls, cotton bolls, and lower wreath elements display crisp detail. Bold clashing occurs within the wreath. Population: 9 in 67, 0 finer (4/16). NGC ID# 25DH, PCGS# 7580

PROOF GOLD DOLLAR

**1882 Gold Dollar, PR66 Deep Cameo
Amazing Contrast and Visual Appeal**

4770 1882 PR66 Deep Cameo PCGS. Merely 5,000 business-strike gold dollars and 125 proofs were minted in 1882. The coins were issued more for numismatic purposes than for circulation, as gold dollars were unused in general commerce after 1879. Walter Breen asserts in his *Proof Encyclopedia* that none of the proofs were melted, and the population data at PCGS and NGC bear that out. The combined certification total is 110 submissions across all designations, including an unknown number of resubmissions. CoinFacts estimates that 80 1882 gold dollar proofs survive, while Bowers provides a range of 60 to 80 proofs extant. To be sure, survivors are rare in any grade, but especially at the Premium Gem level with Deep Cameo contrast. This amazing PR66 Deep Cameo gold dollar features jet-black fields against frosted, fully struck motifs. Rich yellow-gold surfaces are exceptionally preserved, and the visual appeal is outstanding. Population: 6 in 66 Deep Cameo, 1 finer (4/16). NGC ID# 25ES, PCGS# 97632

EARLY QUARTER EAGLES

1804 13 Stars Reverse Quarter Eagle, BD-1, AU50
Extremely Rare in Any Grade
Outstanding Surface Quality

4771 1804 13 Stars Reverse, BD-1, High R.6, AU50 PCGS. Bass-Dannreuther Die State a/d. The 1804 13 Star Reverse is one of the rarest of all early quarter eagles, and it is traditionally regarded as the most sought-after. The mintage as reported by Breen of 1,003 pieces seems suspiciously high, especially in light of the fact that the 1804 13 Star is much rarer than the 1796 With Stars and the 1797, both of which have mintages of just over 400 pieces. John Dannreuther suggests the actual mintage may be as low as 250 coins. Estimates of the number of survivors are in a tight range of a low of nine pieces (Breen) to a high of 12-14 pieces (Dannreuther); Akers' estimate of 10-12 coins fits comfortably in the middle. If one were to go strictly by the number of coins certified, it would appear to be even rarer than these estimates, with only eight coins certified by PCGS and NGC combined (4/16). This number is more consistent with our roster, which lists only eight confirmed representatives.

The design difference is significant between the 13 and 14 star reverses. The 13 star reverse has the stars arranged in an "arc" arrangement while the 14 star variant has the stars arranged in the older "diamond shaped" patterns. The 14 star reverse die was also used on 1804 dimes, and it is believed to be a leftover die from 1798-99 when the cross arrangement was used on dimes, dollars, and half eagles.

From the literature that covers early gold, this issue is said to be found sharply impressed as a rule. And so it is with this piece. Additionally, the surfaces are unquestionably original with deep reddish-tinted patina overall and an outline of lilac around the peripheries and within the recesses of the devices. While the grade of AU50 qualifies this as a mid-Condition Census example, the coin appears at the top end of that grade level in terms of actual preservation. A shallow scratch running vertically in the left field from stars 2 through 6, several angling adjustment marks (mint made) located in the center of the obverse, and a shorter scratch seen from the lower reverse rim into the bundle of arrows to the viewer's left of the tailfeathers act as useful pedigree identifiers.

Most of the famous collections have lacked this issue, including Eliasberg and the Smithsonian. This lot presents a very rare opportunity for the quarter eagle collector or general collector to acquire one of the rarest U.S. gold coins of any denomination.

1804 BD-1 Quarter Eagle Roster, 13 Star Reverse

This roster is based on auction appearances in catalogs with sufficient photo quality to allow for plate matching, so it is always possible that a couple of other coins may exist that have long hidden from the limelight of publicity.

1. AU58 PCGS. Judge T. Gaskill (New Netherlands 48th Sale, 11/1956), lot 184; Stack's (3/1990), lot 629; Auction '90 (Superior, 8/1990), lot 1250; Superior (5/1991), lot 1308; Long Beach Connoisseur Collection (Bowers and Merena, 8/1999), lot 343, as AU55 PCGS, realized \$149,500; R.M. Phillips Limited Partnership Collection / Los Angeles Signature (Heritage, 7/2009), lot 1209, as AU58 PCGS, realized \$322,000. Pit in left reverse field, left of I in UNITED.

2. AU55 PCGS. CAC. Amon G. Carter, Jr. Family (Stack's, 1/1984), lot 533; The McCoy Family Collection of U.S. Early Gold Quarter Eagles / FUN Signature (Heritage, 1/2016), lot 5530, realized \$505,250. Planchet adjustment marks at 2 and 6 o'clock on the obverse, die lump on third vertical shield stripe on the reverse.

3. AU53 PCGS. George Earle (Henry Chapman, 6/1912), lot 2502; later, Charlotte Mint Museum (Stack's, 3/1979), lot 1672; Auction '85 (RARCOA, 7/1985), lot 349; Auction '89 (David Akers, 7/1989), lot 1359; Michael Keston (Superior, 1/1996), lot 6; Ed Price Collection of Early Dime and Quarter Eagle Varieties / ANA Signature (Heritage, 7/2008), lot 1459, realized \$322,000; D. Brent Pogue Collection (Stack's Bowers and Sotheby's, 5/2015), lot 1121, brought \$499,375. Diagonal line within Liberty's throat exits into right field.

4. AU50 PCGS. Charles Neumoyer Collection (Stack's, 5/1960), lot 2352, realized \$620; John Jay Pittman Collection, Part Two (David Akers, 5/1998), lot 1715, realized \$82,500; ANA Sale of the Millennium (Bowers and Merena, 8/2000), lot 2045, did not sell; FUN Signature (Heritage, 1/2004), lot 3005, realized \$92,000; Treasures from the S.S. New York (Stack's, 7/2009), lot 1300, realized \$149,500; Chicago ANA (Stack's, 8/2014), lot 11010. Obverse field scratch from stars 2 to 6. Vertical, parallel marks across Liberty's bust. **The present coin.**

5. AU50 NGC. Possibly "Cicero" (New Netherlands 55th Sale, 12/1960), lot 259; Buddy De Sylva (Superior, 2/1978), lot 644, realized \$15,000; Auction '79 (Superior, 7/1979), lot 1659, realized \$13,500; FUN Signature (Heritage, 1/2015), lot 4230, brought \$82,250. Small pit below L of LIBERTY.

6. AU50. Julian Leidman (5/1970); Harry W. Bass, Jr. Foundation. Obverse rim weak at 5 o'clock.

7. XF. Fairfield Collection (Bowers and Ruddy, 10/1977), lot 1440, realized \$9,250; "Dallas Bank" Collection (Sotheby's/Stack's, 10/2001), lot 300. Diagonal mark at star 9, extensive obverse adjustment marks.

8. VF. Clark E. Gilhausen (Superior, 2/1973), lot 102, realized \$3,800. Mark in front of Liberty's chin, horizontal lines on either side of star 9. NGC ID# BFVS, PCGS# 45509 Base PCGS# 7651

1807 BD-1 Quarter Eagle, AU58
Smooth, Problem-Free Surfaces

- 4772 1807 BD-1, R.3, AU58 NGC.** Bass-Dannreuther Die State a/b. The 1807 is a plentiful issue in the context of early quarter eagles with 250-350 pieces believed extant. The date is popular among type collectors. BD-1 is the only die marriage for the issue and is seen here in its early, uncracked obverse state. This piece is evenly struck and shows only a brush of friction with hints of luster clinging to the protected portions of the fields. The central shield and hair details are incompletely struck, and the upper obverse rim shows remnants of mint-made adjustment marks, all of which is typical of early quarter eagles. A finer Capped Bust Right quarter eagle type coin will prove difficult to locate. NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

LIBERTY QUARTER EAGLES

1856-D Two and a Half, AU53
Only 40 to 50 Pieces Known
Upper-End for the Issue

- 4773 1856-D AU53 PCGS. Variety 20-N.** The 1856-D quarter eagle is the single rarest Dahlonega gold issue of any denomination. Only 40-50 pieces are believed known in all grades, surviving from a truly paltry mintage of just 874 pieces. This is the lowest production total of any issue from the Georgia branch mint. Only a handful of coins have been called Uncirculated by the grading services, and these are prohibitively rare. This AU representative is high-end for the issue. Planchet granularity on the obverse portrait is a mainstay of the 1856-D, and the dull olive-gold patina in the fields is similarly characteristic. This issue is always seen with a deficient strike, although the present coin is better-than-average. The eagle's legs and shield and the hair curls around Liberty's face display the brunt of the weakness.

Doug Winter writes of this issue in *Gold Coins of the Dahlonega Mint*: "The concept of eye appeal cannot be applied to this date. A few moderately attractive coins exist but most are very unattractive." The present coin clearly defines "moderately attractive" in the context of this issue. The Southern gold specialist should not hesitate to acquire this rarity. NGC ID# 25J9, PCGS# 7779

1896 Liberty Quarter Eagle, MS67
Tied for Finest at PCGS

- 4774 1896 MS67 PCGS.** With a mintage of 19,070 pieces, the 1896 Liberty quarter eagle is scarce in all grades, and very rare at the MS67 level. This spectacular Superb Gem displays sharply detailed design elements, with vibrant mint luster, and impeccably preserved peach-gold surfaces. Overall eye appeal is tremendous. Population: 6 in 67, 0 finer (4/16). NGC ID# 25LL, PCGS# 7848

PROOF LIBERTY QUARTER EAGLES

1891 Liberty Quarter Eagle, PR64+ Rare Deep Cameo Example

- 4775** 1891 PR64+ Deep Cameo PCGS. CAC. The 1891 proof Liberty quarter eagle claims a small mintage of just 80 pieces and the issue is quite elusive in today's market. Probably no more than 30-40 examples survive in all grades and a number of impaired specimens are known. A few more survivors are impounded in institutional collections like the National Numismatic Collection at the Smithsonian Institution and the American Numismatic Society. This Plus-graded Choice specimen displays sharply detailed design elements and deeply reflective fields that contrast dramatically with the frosty devices. A few minor hairlines and contact marks prevent an even higher grade. Population: 1 in 64 (1 in 64+) Deep Cameo, 9 finer. CAC: 1 in 64, 6 finer (5/16). NGC ID# 288E, PCGS# 97917

1892 Quarter Eagle, PR64 Cameo Glittering Mirrored Fields, Strong Contrast

- 4776** 1892 PR64 Cameo NGC. Deceptive prooflike business strikes exist, although they are perhaps equally rare as proofs. This is a true proof example, with glittering, reflective fields and frosty central devices for bonafide cameo contrast. The strike is needle-sharp, and only the presence of a few microscopic, delicate lines is noted. This attractive, high-quality proof comes from the multi-year period of low mintages, with just 105 pieces struck in 1892. Census: 8 in 64 Cameo, 5 finer (4/16). NGC ID# 288F, PCGS# 87918

1906 Quarter Eagle, PR63 Cameo Proof Type Coin

- 4777** 1906 PR63 Cameo NGC. CAC. A fairly plentiful proof issue in the context of the series, the 1906 proof quarter eagle is a suitable coin for type purposes. This Select Cameo displays a razor-sharp strike and rich golden color. The fields are deeply mirrored, and the design elements are sharp. Light, scattered marks are consistent with the grade and pose minimal distraction. Census: 4 in 63 Cameo, 62 finer. CAC: 2 in 63, 15 finer (4/16). NGC ID# 288W, PCGS# 87932

INDIAN QUARTER EAGLE

1911-D Two and a Half, MS61 Strong D, Pleasing for the Grade

- 4778** 1911-D MS61 NGC. Strong D. Satiny wheat-gold luster gives this sharp 1911-D quarter eagle pleasing eye appeal, with only light field chatter limiting the grade. This key-date issue is not particularly rare in the absolute sense, but collector demand for this date is unrivaled by any other issue in the series. Moreover, high-quality coins within a given grade are hard to locate. This piece will please the budget-conscious collector. NGC ID# 7KR7, PCGS# 7943

THREE DOLLAR GOLD PIECES

1855 Three Dollar Gold, MS63 Sharp and Semiprooflike

- 4779 1855 MS63 PCGS.** A bold strike complements semiprooflike fields on this Select 1855 three dollar gold piece. Rich honey and orange-gold hues further accentuate the eye appeal, and there are no bothersome abrasions. The 1855 is not traditionally listed among the common "type-coin" issues like the 1854, 1874, and 1878, but attractive Mint State coins such as the present example should not be overlooked. Finer examples of the 1855 three are scarce. Population: 68 in 63 (2 in 63+), 28 finer (4/16). NGC ID# 25M6, PCGS# 7972

1859 Three Dollar Gold, MS64

- 4780 1859 MS64 PCGS.** Here is an impressively sharp 1859 three dollar gold piece with satiny orange-gold luster that is free of major abrasions. A hint of reflectivity in the fields emerges when tilted beneath a light. This piece shows the 9 in the date boldly recut on the right side and the 1 faintly recut on its flag. This issue is elusive in MS64 and rare finer. Population: 17 in 64 (2 in 64+), 9 finer (4/16). NGC ID# 7K5K, PCGS# 7979

1871 Three Dollar Gold, MS63+ Only 1,300 Coins Struck

- 4781 1871 MS63+ NGC.** The wreath shows the usual strike weakness, but the obverse is better defined. This Plus-designated Select 1871 three dollar gold piece displays frosty yellow-gold luster and minimal abrasions. The 1871 had a scant mintage 1,300 pieces, and few examples survive in Mint State. This is the only Plus-graded MS63 coin certified, and finer representatives are major rarities. Census: 8 in 63 (1 in 63+), 6 finer (4/16). NGC ID# 25MU, PCGS# 7993

1872 Three Dollar Gold, MS61 Prooflike Fields, Scarce in Mint State

- 4782 1872 MS61 NGC.** An elusive Mint State survivor from a small mintage of 2,000 pieces. This prooflike 1872 three dollar gold piece displays light handling marks that limit the grade but also boasts strong eye appeal with a hint of cameo contrast. The wreath bowknot is slightly soft, but the obverse portrait is sharp. Census: 13 in 61, 20 finer (4/16). NGC ID# 25MV, PCGS# 7994

1885 Three Dollar Gold, MS60 Only 801 Pieces Struck

- 4783 1885 MS60 NGC.** The 1885 three dollar gold piece had an enticingly low mintage of 801 coins, one of only three issues in the series with a mintage below 1,000 pieces. Nonetheless, in 1885, the three dollar denomination circulated little as compared to previous decades, and a higher number of Mint State pieces survive today than might be expected, making the date collectible. This boldly struck prooflike example displays bright yellow-gold color with scattered marks and hairlines that determine the grade. Census: 1 in 60, 60 finer (4/16). NGC ID# 7KDP, PCGS# 8007

1885 Three Dollar, MS61 Prooflike Popular, Low-Mintage Issue

- 4784 1885 MS61 Prooflike NGC.** The 1885 is certainly one of the scarcer as well as more popular issues in the three dollar series. Only 801 coins were struck and a percentage of that number appear to have actually circulated. Prooflike surfaces are not unusual, and in the past some prooflike pieces have traded as actual proofs. This is a bright, reflective example, whose obverse fields show a touch of orange-peel, an effect normally only seen on proof strikings. Numerous small abrasions are scattered across each side. Sharply struck, more so on the obverse than the reverse. An interesting and worthwhile three dollar. NGC ID# 25N8, PCGS# 78007

PROOF THREE DOLLAR GOLD PIECES

1888 Three Dollar Gold, PR64 Cameo
Excellent Candidate for Type

4785 1888 PR64 Cameo PCGS. The entire business strike mintage of 5,000 pieces in 1888 shows doubling on UNITED, while the 291 proofs that were struck do not. This Choice example is positively a proof both by the technical characteristics and by visual confirmation. Slight graininess in the lower-left obverse field is usually seen on the proof issues and it is more of a confirmation of the proof status than an aberration.

Overall, the mirrored fields and frosted central elements display a pleasing orange accents combined with rich, yellow-gold coloration for outstanding eye appeal. A sharp strike adds to the overt cameo contrast. David Bowers suggests the 291-piece proof mintage is too high based on grading events — perhaps some pieces were melted as unsold, or the *Guide Book* figure is based on erroneous information. Population: 8 in 64 (2 in 64+) Cameo, 16 finer (5/16). NGC ID# 28AX, PCGS# 88052

1888 Three Dollar Gold, PR65 Cameo
Glimmering Proof Type Coin
Rarely Seen This Fine

4786 1888 PR65 Cameo NGC. Most proof three dollar gold issues are great rarities and are far out of reach for average collectors. In the 1880s, however, mintages began to climb, and in 1888, 291 proof threes were struck. This was by far the highest mintage in the proof series, and survivors of this issue are the most obtainable by budget-restricted collectors seeking a single proof type coin. PCGS estimates 150 to 200 pieces survive, which is consistent with the certified population data, but most grade below the Gem level.

This Gem Cameo is an outstanding coin and is conditionally rare. The strike is bold, and the bright yellow-gold fields display deep mirroring. Field-device contrast is superb. The 1888 proof is extremely rare in any Ultra/Deep Cameo grade, and Cameos grading finer than this piece are rarely seen. An excellent opportunity for the proof gold type collector to represent the three dollar series. Census: 18 in 65 Cameo (1 in 65★ Cameo), 15 finer (4/16). NGC ID# 28AX, PCGS# 88052

EARLY HALF EAGLES

1795 Small Eagle Five, BD-3, VF30
Outstanding Old-Time Color, Eye-Appealing

4787 1795 Small Eagle, BD-3, High R.3, VF30 NGC. Bass-Dannreuther Die State c/b. This coin is a highlight among the early gold pieces offered in this sale: a first-year half eagle of an affordable variety in a seldom-seen mid-level circulated grade with exceptional eye appeal and originality. Olive-gold patina in the protected regions contrasts with slightly brighter bronze-gold hues overall, giving this 1795 Small Eagle five its old-time, circulated look. The strike is even, and moderate detail remains in Liberty's hair curls and the eagle's wings. A couple of tiny ticks between the F in OF and the first A in AMERICA are the only arguable flaws on this type coin. BD-3 is fairly plentiful in the context of early gold issues, although its estimated survival of 175-225 pieces in all grades is scant compared to most 19th century American coinage issues. This piece should not be overlooked. NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

1795 Capped Bust Right Five, VF30
First-Year Type Coin, BD-4

4788 1795 Small Eagle, BD-4, R.5, VF30 ANACS. Bass-Dannreuther Die State d/a. Capped Bust Right half eagles were struck at the Philadelphia Mint for the first time in 1795, with twelve die varieties known for the date and type. This coin represents the very scarce BD-4 variety, with Star 11 joining both Y in LIBERTY and Star 12, and three berries in the wreath. Experts estimate the surviving population of the BD-4 variety at just 60-75 pieces in all grades. This attractive VF30 specimen exhibits some wear on the hair, cap, eagle's head, and wings, but much interior detail remains intact. The orange-gold surfaces are moderately abraded and several minor planchet flaws are evident on the obverse. NGC ID# 25ND, PCGS# 519853 Base PCGS# 8066

1800 BD-4 Half Eagle, AU53
Sharp and Appealing

- 4789** 1800 BD-4, R.4, AU53 PCGS. Bass-Dannreuther Die State c/a. In the context of early gold varieties, BD-4 is fairly plentiful with as many 125-175 pieces known. This is the third of three die marriages that use this obverse and the only marriage of this reverse. The tail die quickly deteriorated, making this early die state coin scarce and desirable. The strike is even and bold, and the partially lustrous surfaces yield rich orange-gold color. Slight high-point wear is hardly noticed. A few faint adjustment marks are seen along the upper obverse rim. Housed in a green label holder. NGC ID# 25NW, PCGS# 45594 Base PCGS# 8082

1802/1 Half Eagle, XF Sharpness
Classic Early Overdate, BD-1

- 4790** 1802/1 BD-1, High R.4, XF40 ANACS. Bass-Dannreuther Die State a/a. The 2 in the date is free of the bust and the lowest star points straight to the lower point of the beak, identifying the popular BD-1 variety. This lightly worn specimen displays minimally abraded antique-gold surfaces with no planchet adjustment marks. The luster is slightly dimmed by a light cleaning. NGC ID# 25NX, PCGS# 519890 Base PCGS# 8083

1803/2 Half Eagle, AU58
Popular Overdate, BD-1

- 4791** 1803/2 BD-1, R.4, AU58 NGC. Bass-Dannreuther Die State a/b. The BD-1 is among four die pairings known for the 1803 half eagles, all of them 1803/2 overdates (even though no 1802 half eagles are known that are not themselves 1802/1 overdates). All four 1803/2 varieties rate either R.4 (scarce), to R.5, very scarce, in Bass-Dannreuther. The obverse of the BD-1 shows the T in LIBERTY lacking its bottom-right serif, and the adjacent Y nearly lacks its left foot. The 3 in the date just barely avoids grazing the lower-bust drapery. The reverse is a carryover from 1802, showing a star that is pointing directly to, but not touching, the eagle's upper beak. The T's in UNITED and STATES are also missing their serifs. Since this die was first used — even though extensively cracked — for the 1802/1 BD-7, those cracks dominate the reverse and are not much further advanced here. One runs through the tops of TED, while the second appears through the arrowheads, (faintly, due to strike weakness on the left claw and left side of the shield) through the shield, ribbon, and to star 12. This is a lovely bright yellow-gold piece that shows few marks of any import and excellent eye appeal. A few planchet adjustment marks on the obverse are well-hidden within Liberty's cap.
Ex: Long Beach Signature (Heritage, 6/2013), lot 4754. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1803/2 BD-3 Half Eagle, XF45
Sharp for the Grade

- 4792** 1803/2 BD-3, R.4, XF45 PCGS. Bass-Dannreuther Die State f/b. BD-3 survives to the extent of 125-175 coins. This Choice XF representative displays bright, modestly reflective fields and unusually bold design elements for the XF level. A few scattered hairlines are seen in the fields with a loupe, but the overall eye appeal is exceptional for the grade. Housed in a green label holder. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1805 Half Eagle, BD-2, MS63
Late Die State, Luminous Luster

4793 1805 BD-2, R.4, MS63 PCGS. Bass-Dannreuther Die State f/c-g/d. This glittering Select Mint State 1805 BD-2 half eagle appears to be in an intermediate die state between the two latest stages listed in John Dannreuther's *Early U.S. Gold Coin Varieties*. The obverse is clashed along the upper border through LIBERTY, and the reverse shows similar clashing through AMERICA and the tailfeathers, but the heavy central clash marks seen on the latest stage of this die marriage are not present. Moreover, the crack from the rim to the hair curls left of the 1 is visible, but the arcing crack from star 13 does not yet progress beyond the hair curls. The reverse is uncracked. A third heavy clashing must have taken place shortly after this coin was struck, inflicting the damage to each die that is seen in die state g/d.

This late-die-state BD-2 1805 half eagle was likely struck in 1806. The reverse die was also employed for the BD-1 1806 half eagle but is seen in an earlier die state for part of that coinage than it is on this 1805 variety. The logical conclusion is that late-die-state BD-2 coins as well as all BD-3, -4, and -5 1805 half eagles were struck after the earliest 1806 coins. Such reuse of outdated but still serviceable dies was commonplace at the early Mint.

This coin displays a bold and even strike with frosty original yellow-gold luster. Abrasions are surprisingly few and far between, and the luster captivates the eye. Remnants of scattered adjustment marks on the obverse are not unusual for the type, and a thin linear mark next to the F in OF is the only mentionable abrasion. Population (all varieties included): 38 in 63 (1 in 63+), 19 finer (4/16). NGC ID# 25P4, PCGS# 45616 Base PCGS# 8088

1806 Pointed 6 Half Eagle, MS61
Rare BD-2 Variety, 8x5 Stars

4794 1806 Pointed 6, 8x5 Stars, BD-2, High R.5, MS61 PCGS. Bass-Dannreuther Die State d/b. BD-2 is a rare die pairing within the plentiful 1806 date. The point of the 6 is minutely imbedded in the bust, and stars 1 and 2 are closely punched next to the lower hair curls. This piece is in a near-terminal die state, showing heavy lapping and clash marks on the obverse with peripheral die cracks around each side. The central strike is slightly weak with parallel die adjustment marks across the eagle. The borders are sharp, however, and it appears that enough metal was filed off the center of the planchet prior to striking that the eagle and portrait recesses of the die could not be completely filled. A thin scratch from the rim into the bust between the 0 and 6 in the date appears to be the only grade-limiting factor, as no other obvious abrasions are seen. A loupe reveals a small tick hidden next to star 11, although this is virtually insignificant. PCGS# 45622 Base PCGS# 8090

1806 Half Eagle, AU53
BD-6, Knobbed 6

- 4795** 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU53 PCGS. Bass-Dannreuther Die State d/e. The Knobbed 6 variety, plentiful and popular among type collectors. John Dannreuther estimates 600-900 examples survive in all grades. This AU coin displays a bold obverse strike but with moderate weakness and planchet adjustment marks on the central reverse. Wear is almost nonexistent. Each side displays satiny yellow-gold patina with no mentionable abrasions. Housed in a green label holder. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle, BD-1, MS62
Frosty Luster, Terminal Die State

- 4796** 1807 Bust Right, BD-1, High R.4, MS62 PCGS. Bass-Dannreuther Die State c/d, terminal, with a heavy rim cud above the T in UNITED. BD-1 is one of the more plentiful 1807 Draped Bust half eagle varieties, although it is still itself scarce with only 80 to 100 pieces believed extant. Mint State examples with any degree of original luster are rare. This MS62 coin displays scattered small abrasions, as the grade suggests, but also possesses frosty yellow-gold luster in the fields. The strike is even and well-centered but slightly soft on the central eagle and obverse stars. Eye appeal is excellent. The collector seeking an Uncirculated final-year type coin will want to give this piece close consideration. Population (all varieties included): 27 in 62, 39 finer (4/16). NGC ID# 25P8, PCGS# 519898 Base PCGS# 8092

**1807 Capped Bust Left Five, MS62
First Year of Design, BD-8**

4797 1807 Bust Left, BD-8, R.2, MS62 PCGS. Bass-Dannreuther Die State d/b. The year 1807 saw many changes at the Philadelphia Mint, including a change in the design of the half eagle. Six varieties of the old Capped Bust Right type were produced in the first part of the year, before the motif was switched to John Reich's Capped Bust Left design. Another two varieties of the new type were struck, with this piece representing the final BD-8 variety, with the arrow feather pointing to the tip of the flag of the 5 in the denomination. The BD-8 is an available variety, with a surviving population of 500-750 pieces in all grades.

This impressive MS62 specimen is sharply detailed in most areas, with just a touch of the always seen softness on the eagle's claws. A few light clash marks are evident on the reverse. The lustrous orange-gold surfaces are lightly marked and eye appeal is quite strong. NGC ID# 25P9, PCGS# 507607 Base PCGS# 8101

**1811 Small 5 Half Eagle, AU Details (Net XF40)
BD-2, Bright Greenish-Gold Surfaces**

4798 1811 Small 5, BD-2, R.3 — Cleaned — ANACS. AU Details, Net XF40. The greenish-gold surfaces are overly bright from cleaning, but the motifs are sharply defined and the surfaces are virtually free of hairlines or other marks. The surfaces show a fine texture (visible with a glass) that does not diminish the appearance of this scarce half eagle. Housed in an early ANACS holder. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**1813 Half Eagle, AU Details
Scarcer BD-2 Variety**

4799 1813 BD-2, R.4 — Improperly Cleaned — NGC Details. AU. Seemingly unclashed and uncracked, although the surfaces are minutely granular due to abrasive cleaning, and exact die state confirmation cannot be achieved. The coin is boldly and evenly struck with bright yellow-gold color. BD-2 is the scarcer of the two 1813 half eagle varieties. This piece will appeal to budget-conscious collectors. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

CLASSIC HALF EAGLE

1834 Classic Head Half Eagle, MS63
Semiprooflike Plain 4 Example

- 4800** 1834 Plain 4 MS63 PCGS. Breen-6502, McCloskey 4-C, R.2. The 1834 Plain 4 Classic half eagle is the go-to type-coin issue of the series due to its ready availability, but attractive Mint State coins are nonetheless conditionally elusive, and the appearance of such a piece at auction is often met with eager bidding. The present Select example packs a lot of eye appeal into a still-accessible grade. The strike is only a touch soft at the very centers, and the fields display eye-catching semiprooflike reflectivity. The brightly lustrous yellow-gold surfaces show only a few minor ticks and grazes. Higher-grade Classic Head gold will prove rare and exceedingly more expensive. This coin will more than please the average enthusiast. Population: 43 in 63, 44 finer (4/16). NGC ID# 25RR, PCGS# 8171

1838 Classic Head Five, MS62
Frosty, Original Luster

- 4801** 1838 MS62 NGC. CAC. Breen-6515, McCloskey 2-B, R.1. Diagnostic to this variety, the TES in STATES is widely spaced. The 1838 is the final year of this short-lived type and among the more difficult P-mints therein, trailing only the Crosslet 4 and 1837 in Mint State rarity. This piece is boldly detailed with frosty, original mint luster and rich yellow-gold color. Abrasions are evenly distributed and mostly unobtrusive, with the overall eye appeal being clearly superior for the grade. CAC-endorsed in a prior generation holder. Census: 25 in 62, 25 finer. CAC: 3 in 62, 3 finer (4/16). Ex: FUN Signature (Heritage, 1/2006), lot 5134. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

1862 Liberty Half Eagle, AU53
Elusive, Low-Mintage Issue

4802 1862 AU53 PCGS. The U.S. government suspended specie payments in the early days of the Civil War because of widespread hoarding and the attendant financial stresses of the conflict. As a result, mintages of gold coins were sharply reduced in 1862. In the case of the Liberty half eagle, only 4,430 examples were struck, making the date extremely elusive today, especially in high grade. This attractive AU53 specimen shows just a touch of wear on the design elements and the lustrous orange-gold surfaces display the minimum number of minor contact marks for the grade. An excellent coin for the series specialist. Population: 3 in 53, 15 finer (5/16). NGC ID# 25VP, PCGS# 8292

1871 Five Dollar, MS61
Mintage 3,200 Pieces

4803 1871 MS61 PCGS. The surfaces are semireflective, a frequent state for higher-end half eagles from this issue of just 3,200 business strikes, and Liberty's well-defined portrait even shows a hint of frost. Pale yellow-gold surfaces show a scattering of small to moderate abrasions, but the devices are generally clean and overall eye appeal is pleasing for an MS61 coin. The 1871 half eagle's circulation strikes were not saved in any great quantity and Mint State examples such as this are great rarities. PCGS has certified only two other examples as MS61 with none in MS61+ or finer grades (4/16). Ex: Long Beach Signature (Heritage, 9/2013), lot 6781. NGC ID# 25WC, PCGS# 8322

1904 Liberty Half Eagle, MS67+
Finest Certified at PCGS

- 4804 1904 MS67+ PCGS. CAC.** The year 1904 was one in which the Philadelphia Mint was largely concerned with striking vast quantities of silver dollars and double eagles, although it did produce the considerable quantity of 392,000 half eagles, as well. Most of those gold coins, while they may have circulated little, were often moved in bags from place to place as reserve backing for bank deposits and Treasury obligations (back when the U.S. dollar was backed by gold). The average certified survivor is Mint State with marks, an MS62 coin. This splendid Superb Gem is exceptional, displaying incredible luster and a complete absence of mentionable contact. Deep amber- and honey-gold color and a sharp strike complete the sensational eye appeal. Population: 5 in 67 (1 in 67+), 0 finer. CAC: 4 in 67, None finer (5/16). NGC ID# 25Z6, PCGS# 8409

1906-S Half Eagle, MS65
Conditionally Rare

- 4805 1906-S MS65 PCGS. CAC.** The 1906-S half eagle is a better date in Uncirculated condition, and Gem-quality coins are rare. This CAC-endorsed MS65 coin is boldly struck with vibrant, frosty luster. A few faint grazes on the obverse define the grade but are unseen by the naked eye. A few small coppery alloy spots are present on the reverse. Population: 11 in 65, 6 finer. CAC: 2 in 65, 3 finer (5/16). NGC ID# 25ZB, PCGS# 8415

INDIAN HALF EAGLES

1909-S Indian Half Eagle, MS63
Elusive Issue in Higher Grades

- 4806 1909-S MS63 PCGS.** From a mintage of 297,200 pieces, the 1909-S Indian half eagle is actually just as rare as its more famous, lower mintage New Orleans counterpart in high grade. According to Mike Fuljenz, the 1909-S is "rare in MS63, very rare in MS64 and extremely rare in MS65 or better." This attractive Select specimen is sharply detailed in most areas, with just a touch of softness on the eagle's shoulder. The vivid orange-gold surfaces show a few highlights of rose, but only scattered minor signs of contact are present. This piece displays subtle, satiny mint luster and eye appeal is quite strong. Population: 30 in 63, 23 finer (4/16). NGC ID# 25ZL, PCGS# 8516

1913-S Indian Half Eagle, MS62
Substantial Mintage, Low Survival Rate

4807 1913-S MS62 PCGS. A substantial mintage of 408,000 Indian half eagles was achieved at the San Francisco Mint in 1913, at a time when gold coins still circulated to some extent in the Western United States. Examples in lower grades are not difficult to locate, but the issue is one of the most challenging of the series in high grade. This well-detailed MS62 specimen exhibits lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. NGC ID# 25ZP, PCGS# 8526

1914 Indian Half Eagle, MS65
Only One Finer Coin at NGC

4808 1914 MS65 NGC. From a mintage of 247,000 pieces, the 1914 Indian half eagle is rare in MS65 condition, and finer examples are virtually unobtainable. This Delightful Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces that show only minor signs of contact. Census: 18 in 65, 1 finer (5/16). NGC ID# 28DU, PCGS# 8527

1915 Five Dollar, MS65
Among the Finest Certified

4809 1915 MS65 NGC. Any Gem Indian half eagle is scarce or rare, and this 1915 is no exception. It is tied for the finest at NGC, and none at PCGS grade finer than MS65+. The strike is bold, and the softly frosted surfaces yield original rose-gold and honey-orange hues. A few faint grazes in the fields hardly affect the eye appeal. Suitable for a top-grade Indian half eagle collection. Census: 39 in 65, 0 finer (4/16). NGC ID# 28DX, PCGS# 8530

EARLY EAGLES

1799 Eagle, AU Details
BD-7, Small Obverse Stars

4810 1799 Small Obverse Stars, BD-7, R.3 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State f/d. This Small Stars 1799 eagle displays a bold, even strike and shows little high-point wear. Scattered hairlines indicate an old cleaning, and an occasional small nick is observed with a loupe. Partial luster is seen in the fields, and the surfaces display rich straw-gold color. A pleasing type coin for the budget-restricted collector seeking sharp detail. NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

1799 BD-10 Eagle, AU50
Large Obverse Stars, Ideal Type Coin

- 4811** 1799 Large Obverse Stars, BD-10, R.3, AU50 PCGS Secure. Bass-Dannreuther Die State a/a, without any die cracks or clash marks. A total of 10 die pairs were used to strike the 1799-dated eagles, comprised of eight Small Stars variants and two Large Stars varieties. BD-10 has the lowest berry positioned over the right foot of (AMERIC)A. Examples are among the most available of all early eagles, making them desirable for type purposes. The reverse die was clearly well-made, employed through 1801 to strike all 1800 eagles and the 1801 BD-1 coins.

Bright yellow-gold surfaces retain luster in the recesses of the razor-sharp relief elements. The wing, neck, and tailfeathers show remarkably complete definition. High-point rub is virtually imperceptible without close inspection. Light marks are scattered over each side, with a thin pinscratch in the right obverse field in front of Liberty's chin. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1799 Eagle, AU55
BD-10, Large Obverse Stars

- 4812** 1799 Large Obverse Stars, BD-10, R.3, AU55 PCGS. Bass-Dannreuther Die State a/a. This is the often-seen BD-10 Large Stars variety, surviving to the extent of 300-400 pieces, per John Dannreuther. Examples are often seen in type collectors' cabinets, and high-grade pieces can come with excellent eye appeal. This Choice AU representative is boldly struck save for a couple of stars and a cloud above the eagle's head, and the fields show a hint of reflectivity. High-point wear is slight, and there are no bothersome abrasions. BD-10 has the only 1799 head die with the large star punch employed, seen here in its second marriage. This tail die was reused for 1800 and 1801 coinage. Early gold eagles are in high demand in all grades, even the frequently seen varieties. This piece is housed in a green label holder. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

LIBERTY EAGLES

1843-O Ten Dollar, AU58
Rare Any Finer

4813 1843-O AU58 PCGS. Variety 2. An elusive early New Orleans issue that is rarely seen in Mint State. This near-Mint coin shows partially lustrous yellow-gold surfaces with moderate chatter in the fields. The strike is sharp, and there is only slight high-point friction. Eye appeal is pleasing. Population: 8 in 58, 6 finer (4/16). NGC ID# 262R, PCGS# 8589

1844 Liberty Eagle Rarity, AU58
Single-Finest Certified at PCGS

4814 1844 AU58 PCGS. From a minuscule mintage of 6,361 pieces, the 1844 is the rarest Liberty eagle of the decade. Even the lower mintage 1841-O is seen more often in today's market. Significantly, not a single specimen of the 1844 was found in the recovery of the *S.S. Republic*, and Mint State examples are virtually unobtainable. This attractive near-Mint piece shows just a trace of actual wear on the well-detailed design elements, and the orange-gold surfaces retain much of their original mint luster. A number of minor, grade-consistent contact marks are evident and a linear planchet flaw is present in the field by star 12. Population: 1 in 58, 0 finer (4/16). NGC ID# 262S, PCGS# 8590

1864 Eagle, AU Details
Low-Mintage Rarity

4815 1864 — Cleaning — ANACS. AU Details. The economic stresses and uncertainties of the Civil War caused widespread hoarding of precious-metal coinage, resulting in much smaller mintages of gold denominations. The 1864 Liberty eagle claims a tiny production total of 3,530 pieces and the issue is both rare and overlooked in today's market. This pleasing orange-gold specimen is lightly worn and lightly abraded, but the luster has been dimmed by a light cleaning. NGC ID# 264D, PCGS# 8639

1872-CC Ten Dollar, VF Details
Only 60 to 70 Survivors

4816 1872-CC — Improperly Cleaned — NGC Details. VF. Variety 1-B. The mintmark placement and weak second vertical shield stripe are diagnostic of variety 1-B, the more available of two variants. This date ranks among the rarest Carson City eagles. Doug Winter estimates that only 60 to 70 pieces survive from a mintage of 4,600 coins. This khaki-gold example is well-circulated and typically struck, but the major motifs maintain good detail. Wispy marks are scattered over each side, and a couple of pedigree identifiers appear on Liberty's cheek and in the left obverse field. NGC ID# 53M3, PCGS# 8664

1876 Ten Dollar Liberty, AU58
Low-Mintage Rarity
Only Two Finer Certified

4817 1876 AU58 PCGS. CAC. The overall rarity of the 1876 ten dollar rivals that of almost all other dates in the Liberty eagle series, with only the 1873 and the prohibitively rare 1875 being decisively rarer. The 1876 eagle also had a mintage of only 687 pieces, the second-lowest production total of the series, behind only the 1875 at a paltry 100 coins. Survivors are rare in all grades, with only 40 to 50 pieces believed extant. The sole finest known is an NGC MS61 Prooflike coin; PCGS has also certified a Mint State example — an MS60 coin — though it is unknown if this is perhaps the same as the NGC example. Seven AU58 coins are tied for the next finest known of the date (2 at PCGS and 5 at NGC), though even this figure possibly includes one or more resubmissions (4/16). The combined certified population total of 54 coins in all grades is notably higher than the number of pieces actually believed to exist. The Smithsonian Institution lacks an example of this issue in business strike format. This is the only CAC-endorsed AU58 example of this rarity, and neither of the two (or perhaps just one) pieces certified in Mint State have been CAC-endorsed.

All known representatives of this date are moderately abraded, as virtually the entire mintage was released into circulation. Prooflike fields, or rather the remnants thereof, are the norm, as can be expected for an issue with such a low mintage. The present coin is a noticeably reflective example, with warm honey-gold patina and sharply defined motifs. Light, uniformly dispersed abrasions are observed on each side, slightly subduing the mirroring in the exposed portions of the fields, but actual wear is almost indiscernible, even with a loupe. Overall, this is an immensely appealing, original example of this With Motto Philadelphia rarity. With only one or two numerically finer representatives known, the specialist should not let this one pass by. NGC ID# 265C, PCGS# 8674

1881-CC Ten Dollar, AU58
Seldom Seen Finer

- 4818 1881-CC AU58 NGC. Variety 1-A.** An elusive Carson City issue, scarcely seen in Mint State. This near-Mint example displays honey-gold patina with hints of luster in the protected regions of the fields. The strike is bold, and light field chatter is not particularly bothersome, given the grade. The 1881-CC ten had a small mintage of 24,015 coins, contributing to its low survival rate in high grade. NGC ID# 265X, PCGS# 8692

1882-CC Eagle, AU53
Low-Mintage Branch Mint Issue

- 4819 1882-CC AU53 NGC. Variety 2-A.** The 1882-CC Liberty eagle had a small mintage of only 6,764 pieces, few of which survive in high grade. This yellow-gold AU example remains accessible by the average branch mint gold collector, and little wear is present. The protected areas of the fields display hints of reflectivity. There are no singularly mentionable abrasions. Seldom seen finer. NGC ID# 2663, PCGS# 8696

1891-CC Ten Dollar, FS-501, MS63
Secondary C to the Right of the Primary Mintmark

- 4820 1891-CC/CC FS-501, Variety 4-C, MS63 PCGS.** This interesting variety shows a secondary C from the right side of the second C of the primary mintmark. The surfaces are bright and highly lustrous, unsurprising for a Carson City product, and the strike is strong (but not quite full) throughout. A number of small to medium-sized abrasions are scattered over each side and are consistent with the grade. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1891-CC Liberty Eagle, MS63
Prooflike Fields

- 4821 1891-CC/CC FS-501, Variety 3-C, MS63 PCGS.** From a substantial mintage of 103,702 pieces, the 1891-CC Liberty eagle is an available issue and a popular choice of branch mint type collectors. This attractive Select specimen offers well-detailed design elements and reflective prooflike fields, with a number of minor hairlines and contact marks on both sides. The mintmark has been repunched, identifying the scarcer Variety 3-C. Housed in a green label holder. Population: 90 in 63 (4 in 63+), 4 finer (5/16). NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1893-CC Ten, Semiprooflike AU58
Seldom Seen Finer

- 4822 1893-CC AU58 PCGS. Variety 1-A.** In spite of the mintage of only 14,000 pieces, the 1893-CC ten is one of the more frequently encountered Carson City issues. This example shows the usual softness of high point detail, seen on almost all survivors. The semiprooflike surfaces are peppered with numerous small to medium-sized abrasions, again as seen on most examples. Each side is bright yellow-gold with a faint accent of reddish patina around the margins. Population: 31 in 58, 8 finer (4/16). NGC ID# 2672, PCGS# 8726

1894-O Ten Dollar, MS63+
Just a Single Coin Finer at PCGS

- 4823 1894-O MS63+ PCGS. Variety 3.** The majority of the 107,500 eagles struck in New Orleans in 1894 saw circulation, and the survival of a small number of Uncirculated examples (mainly in MS60 to MS62) stems from several hoards discovered within the past 20 years. Surprisingly vibrant luster abounds over wheat-gold surfaces with hints of rose. The stars have full radial lines, the hair curls are well-detailed, and the eagle's feathers, talons, and olive leaves are bold. Undoubtedly on the cusp of an even higher technical grade. Population: 14 in 63 (1 in 63+), 1 finer (4/16). Ex: Long Beach Signature (Heritage, 9/2007), lot 3653, which realized \$6,900.00 NGC ID# 2676, PCGS# 8730

1900-S Eagle, MS63
Underrated Condition Rarity

4824 1900-S MS63 PCGS. Frosty luster rolls over the wheat-gold surfaces of this strongly rendered Select Uncirculated ten dollar gold piece. Small abrasions in the obverse field limit the grade. Only 81,000 eagles were produced in California at the turn of the century. Examples are decidedly rare in MS63 and higher. Population: 20 in 63, 3 finer (4/16). NGC ID# 42AN, PCGS# 8746

1903-S Eagle, Crisp MS66
Smooth Peach-Gold Surfaces

4825 1903-S MS66 PCGS. The 1903-S has a higher mintage and survival rate in high grades than its Philadelphia and New Orleans cousins, but that should not diminish the importance of this conditionally rare Premium Gem eagle. Coruscating luster embraces smooth peach-gold surfaces devoid of major flaws. Each side exhibits crisp strike detail, although the upper stars lack their centers and radials. Population: 24 in 66 (2 in 66+), 3 finer (4/16). NGC ID# 267X, PCGS# 8754

1903-S Liberty Eagle, MS66
Popular S-Mint Type Coin

4826 1903-S MS66 PCGS. The 1903-S is the least conditionally rare issue in the Liberty eagle series. It is the only issue with more certified in MS64 than in MS62. Nonetheless, examples as close to pristine as the present sun-gold piece are desirable as representatives of their type. Lustrous, fully struck, and smooth aside from a tick on the chin. A minor alloy spot is noted above the highest arrowhead. Population: 24 in 66 (2 in 66+), 3 finer (5/16). NGC ID# 267X, PCGS# 8754

INDIAN EAGLES

1907 Wire Rim Indian Eagle, AU58
Inaugural High Relief Pattern

4827 1907 Wire Rim AU58 PCGS. The 1907 Wire Rim Indian eagle is technically a pattern issue, although it is widely considered an essential acquisition for a complete Indian gold collection. The Mint struck 542 pieces. Most were given to various dignitaries and others persons of importance, and later 70 remaining examples were melted at the Mint. Examples of this first die run of Saint-Gaudens' ten dollar design are highly sought-after. The present near-Mint coin was likely carried as a pocket piece for a brief period of time or was improperly handled by its owner, as the slight friction over each side consistent with these theories. The details are nonetheless bold, and some luster remains in the fields. Honey, rose, and lavender-gold hues accent each side, delivering excellent visual appeal. Housed in a green label holder. NGC ID# 26F2, PCGS# 8850

1908 Motto Ten Dollar, MS65
Shimmering Honey-Gold Surfaces

4828 1908 Motto MS65 PCGS. The motto, unseen on ten dollar gold coins after the design change in 1907 through through the first half of 1908, was returned to the reverse field on July 1, 1908. This Philadelphia issue, like other dates in the Saint-Gaudens Indian ten dollar series, is very scarce at the Gem level. Honey-gold surfaces shimmer with flowing luster, and a strong impression is only fractionally incomplete over the highest points of the forecurl and wingtip. Four small pedigree identifiers occur on Liberty's upper cheek. NGC ID# 28GJ, PCGS# 8859

1908-D Motto Ten Dollar, MS63
Rarely Seen in Better Condition

4829 1908-D Motto MS63 PCGS. Each side of this beautiful Denver eagle is awash in satiny luster that contributes to the wonderful aesthetic quality. Well-detailed peach and greenish-gold surfaces show lightly peppered grazes, but they are minor in nature. This first-year Motto ten dollar was struck to the extent of 836,500 pieces, yet examples are rarely seen in better condition. In fact, PCGS lists 45 higher grading events (5/16). NGC ID# 28GK, PCGS# 8860

1908-D Indian Eagle, MS64
First Year With Motto

4830 1908-D Motto MS64 NGC. The 1908-D Indian eagle, with the motto IN GOD WE TRUST on the reverse, is much more difficult to locate than its mintage of 836,500 pieces would suggest, especially in high Mint State grades. At the Gem level and above, the With Motto issue is almost as rare as its No Motto counterpart, which has a mintage only one fourth its size. The reason for this equivalent rarity probably lies in the different distribution of the two issues and disproportionate melting of the With Motto pieces at a later time.

The present coin is an attractive Choice example, with sharply detailed design elements and vibrant mint luster throughout. The light yellow-gold surfaces are free of mentionable distractions and show pleasing hints of rose, and green. Eye appeal is outstanding. Census: 23 in 64 (1 in 64+), 11 finer (5/16). NGC ID# 28GK, PCGS# 8860

**1909 Ten Dollar, MS64
Conditionally Elusive**

- 4831 1909 MS64 PCGS.** The 1909 Indian eagle is available through MS63 but is scarce any finer. This Choice example displays well-struck motifs and satiny yellow-gold luster. A few faint grazes in the left obverse field are all that limit the grade, and the eye appeal is pleasing. PCGS lists only 29 finer representatives (5/16). NGC ID# 28GM, PCGS# 8862

**1910 Indian Eagle, MS65
Remarkable Eye Appeal**

- 4832 1910 MS65 NGC.** From one of the more attractive and available P-mint issues, this sharply struck Gem displays softly frosted mint luster and lovely yellow-gold color accompanied by pleasing rose accents, noticed mainly within the feathers of the headdress. A visually impressive Indian eagle with mattelike surfaces and remarkable eye appeal.

Ex: Long Beach Signature (Heritage, 6/2014), lot 4879; Houston Money Show Signature (Heritage, 12/2014), lot 3828. NGC ID# 28GR, PCGS# 8865

**1911 Ten Dollar, Frosty MS65+
Beautifully Shaded Surfaces**

- 4833 1911 MS65+ PCGS.** The 1911 Indian eagle is deceptively plentiful in lower grades, and conditionally scarce in Gem condition and finer. This Plus-graded example delivers appealing, frosty luster over surfaces that yield tinges of rose, coppery-orange, and lilac amid soft yellow-gold coloration elsewhere. The strike is impressively sharp, and only a few minute ticks on Liberty's cheek preclude a full Premium Gem grade for this eye-catching type coin. PCGS has seen 34 finer submissions (4/16).

Ex: Central States Signature (Heritage, 4/2015), lot 6349. NGC ID# 28GT, PCGS# 8868

**1912 Ten Dollar, MS65
Glowing Luster, Lovely Color**

- 4834 1912 MS65 PCGS.** 30th Anniversary Green Label Holder. Blended orange-gold and coppery hues give this Gem Indian Head eagle wonderful eye appeal. Glowing luster illuminates each side, furthering its desirability. Careful examination reveals light marks on the cheek and near the eagle's wingtips, but the fields are mostly smooth and unabraded. This Philadelphia issue has an unassuming mintage of 405,083 coins, but like other dates in the series, Gems are exceedingly difficult to locate. Population: 38 in 65 (1 in 65+), 13 finer (5/16). NGC ID# 28GW, PCGS# 8871

**1912-S Ten Dollar, MS64
Original Luster, Strong Eye Appeal**

- 4835 1912-S MS64 PCGS.** The 1912-S Indian eagle is a slightly better date in Uncirculated condition. Choice examples are scarce, and anything finer is rare. This MS64 coin displays original honey and olive-gold luster with satiny surfaces and minimal abrasions. The strike is bold, and eye appeal is pleasing. Population: 77 in 64 (23 in 64+), 14 finer (4/16). NGC ID# 269G, PCGS# 8872

1913 Eagle, Blazing MS65+

- 4836 1913 MS65+ PCGS.** Blazing luster runs over khaki-gold surfaces of this delightful Gem eagle, a great example of the With Motto subdesign for type purposes if one desires an alternative to the ubiquitous 1926 and 1932 options. The high points of each side are free of distractions, and the strike is sharp throughout. Population: 64 in 65 (5 in 65+), 16 finer (4/16).
Ex: Central States Signature (Heritage, 4/2015), lot 6359. NGC ID# 28GY, PCGS# 8873

**1914 Eagle, Elusive MS65
A Better Date in High Grade**

4837 1914 MS65 PCGS. There are a number of key and semikey dates in the Indian eagle series, but if one focuses their collection on Gem-quality coins, there are very few dates that won't present a challenge. The 1914 is moderately available through MS63 but becomes elusive in MS64. This Gem representative is exceedingly scarce, and finer coins are rarely seen. This piece displays satiny yellow-gold luster, with a few tiny ticks on the eagle's wing that limit the grade. The strike is bold, and eye appeal is outstanding. A visually finer 1914 eagle will prove to be out of reach for most collectors. Population: 36 in 65 (1 in 65+), 17 finer (4/16). NGC ID# 28H2, PCGS# 8875

**1914-S Indian Ten Dollar, MS64
Challenging Issue in High Grade**

4838 1914-S MS64 PCGS Secure. An impressive green-gold eagle, this moderately low-mintage San Francisco issue had the 14th lowest mintage of the Indian eagle series. The ranking makes sense when discussing circulated coins. However, when strictly Uncirculated examples are considered, the 1914-S is among the scarcest of all ten dollar Indians, and it is seldom available with both problem-free surfaces and a high grade. Both sides of this frosty, sharply struck piece show tinges of coppery-orange toning, especially along the portrait, with a small splash of dark toning in the left reverse field. Population: 66 in 64 (3 in 64+), 13 finer (4/16). NGC ID# 28H4, PCGS# 8877

1915-S Indian Eagle, MS64
Well-Made San Francisco Semikey

4839 1915-S MS64 PCGS. The Denver Mint abstained from striking ten dollar gold coins in 1915, leaving it to the facilities at Philadelphia and San Francisco. The vast majority of eagles were struck on the East Coast; Only 59,000 pieces were minted in California. The 1915-S has a very similar mintage to the 1908-S, but examples are noticeably less available, especially in Choice condition or higher. In fact, few issues in the Indian Head eagle series are as elusive as the 1915-S in top grades.

Frosty, medium yellow-gold surfaces feature the sharply struck relief elements one would expect from a high-end representative of this well-produced San Francisco emission. Each side is remarkably unabraded. Two ticks occur on Liberty's cheek and brow. A few reddish alloy spots appear on the obverse. Population: 23 in 64 (1 in 64+), 8 finer (4/16). NGC ID# 28H6, PCGS# 8879

LIBERTY DOUBLE EAGLES

1850 Liberty Head Twenty, AU53
First-Year Philadelphia Type One

4840 1850 AU53 PCGS. While this Philadelphia twenty displays its share of ticks, pecks, and nicks, there are no large bagmarks or deep contacts, and the vibrant orange-gold color offers plenty of visual appeal. Always in demand as the first-year P-Mint double eagle, the 1850 must have seemed an imposing big brother to the tiny gold dollars first struck the year before. NGC ID# 268F, PCGS# 8902

1851 Double Eagle, MS61
Highly Elusive in Mint State

4841 1851 MS61 NGC. A wonderfully preserved Type One twenty, with nearly unabraded, satiny-smooth fields and sharply struck rims and motifs. The coloration is a captivating greenish-gold with bright mint luster glowing across surfaces that in places are semireflective. More than 2 million double eagles were struck at the Philadelphia Mint in 1851, yet any Uncirculated survivor is a prize and this example in particular deserves thoughtful consideration. Census: 29 in 61 (1 in 61+), 32 finer (4/16). NGC ID# 268H, PCGS# 8904

1855 Double Eagle, AU58
Very Rare in Better Condition

4842 1855 AU58 NGC. Although the 1855 is considered one of the more plentiful Type One issues, AU examples are very scarce and Uncirculated coins are downright rare. NGC and PCGS have each graded 17 finer submissions (5/16), but Doug Winter believes the actual Mint State survival rate ranges from 15 to 20 distinct pieces. Subdued orange-gold color graces surfaces that show a few small abrasions, as usual. Also typical for the date is a crisp strike. Faint traces of luster remains in the hidden areas. A fantastic near-Mint No Motto twenty. NGC ID# 268V, PCGS# 8914

1856-O Liberty Double Eagle, AU55
Rare, Low-Mintage Key
23 Examples Traced

4843 1856-O AU55 PCGS Secure. Variety 1. The 1856-O Liberty double eagle has long been known as the rarest coin from the New Orleans Mint, although recent research indicates it is virtually tied with its 1854-O double eagle counterpart for that distinction. The recorded mintage of 2,250 pieces is the smallest production total of the series and, except for the single SP63 example saved by Superintendent Bienvenue and his descendants, all the coins were placed into circulation at the time of issue. None were saved by contemporary collectors, as there was no numismatic interest in mintmarks or large denomination gold coins at the time. As a result, the survival rate was low and most of the coins we know about today are in XF-AU grades. Doug Winter estimates the surviving population at 20-30 examples in all grades, while NGC and PCGS have combined to certify a total of 26 coins, including an unknown number of resubmissions and crossovers (4/16). We have compiled a roster of the 23 specimens we are aware of and some earlier citations that may or may not represent the coins in the main roster.

New Orleans was a hub of economic activity in the 1850s, and the 1856-O double eagles circulated heavily in the regional economy. Some coins were shipped out of the busy port and reached distant destinations. One specimen was found in the Baltimore Hoard, which was buried around 1857 and discovered in 1934 by two boys playing in a cellar. Another seemingly made its way up the Mississippi and Ohio Rivers to the Kentucky-Ohio border country, where it was stashed away by James Bullock and only discovered by his heirs in 2010. It is possible that a few more examples of this rare issue are waiting to be discovered to delight present-day collectors.

The present coin had been off the market for many years until we offered it as lot 4453 in our 2015 ANA signature sale. Prior to that, it appeared in the ANA Convention Auction (Stack's, 8/1971), lot 2424, where the cataloger noted:

"1856 'O' About Uncirculated, with considerable mint lustre still adhering. Unquestionably one of the finest known. Superior in grade to the Van Roden-Miles coin. One of the rarest Liberty Head Double Eagles; a true rival in rarity to the 1870 'CC' in this sale. Plate"

This coin is certainly an attractive specimen and should fit comfortably in the Condition Census for the date. The pleasing greenish-gold surfaces show a few of the minor contact marks that are always present on this issue, but none are obtrusive or overly distracting. As noted by the Stack's cataloger, this specimen retains much original mint luster and just a touch of high-point wear shows on the well-detailed design elements. The overall presentation is undeniably attractive for this classic Southern gold rarity, and it should find a home in a fine collection or Registry Set. The 1856-O is listed among the *100 Greatest U.S. Coins*. Population: 5 in 55, 2 finer (4/16).

Roster of 1856-O Liberty Double Eagles

1. SP63 PCGS. Purchased from the New Orleans Mint at the time of issue by Mint Superintendent Charles Bienvenue; passed to Bienvenue's heirs; purchased by Marc Emory of New England Rare Coin Galleries directly from Bienvenue's family in 1979; sold by James Halperin later that year to Larry Demerer for approximately \$215,000; sold to Superior for a reported \$312,500 in late 1980/early 1981; The Premier Auction Sale (Superior, 1/1995), lot 1645, realized \$203,500; The Eagle Collection (Heritage, 1/2002), lot 4147, realized \$310,500; Long Beach Signature (Heritage, 6/2004), lot 6372, realized \$542,800; Long Beach Signature Auction (Heritage, 5/2009), lot 1989, realized \$1,437,500.

2. AU58 NGC. NASC Convention Auction (Paramount, 2/1965), lot 887; William Van Roden Collection (Stack's, 5/1968), lot 916, realized \$6,500; James Dines Collection (Stack's, 3/1969), lot 856; Winner F. Delp Collection (Stack's, 11/1972), lot 816; James and Margaret Carter Collection (Stack's, 1/1986), lot 414; ANA Signature Auction (Heritage, 7/1997), lot 7824, realized \$80,500; Dallas Signature Auction (Heritage, 10/2008), lot 3018, realized \$576,150; Los Angeles Signature Auction (Heritage, 7/2009), lot 1316, realized \$460,000.

3. AU55 PCGS. ANA Convention Auction (Stack's, 8/1971), lot 2424, realized \$5250; Duquesne Collection / ANA Signature (Heritage, 8/2015), lot 4452. **The present coin.**

4. AU55 PCGS. Cicero Collection (New Netherlands, 12/1960), lot 10; Jack Klausen; purchased by Harry W. Bass, Jr. on June 19, 1968; Harry W. Bass, Jr. Collection (Bowers and Merena), lot 1711, realized \$105,800; New York Signature Auction (Heritage, 7/2002), lot 9472, realized \$132,250; San Francisco Signature Auction (Heritage, 7/2005), lot 10399, realized \$431,250; Central States Signature (Heritage, 4/2015), lot 5428.

5. AU53 PCGS. R.L. Miles Collection (Stack's, 10/1968), lot 839; Auction '88 (Akers, 7/1988), lot 975; Auction '90 (David Akers, 8/1990), lot 1951, realized \$24,200; Long Beach Signature Auction (Heritage, 2/2001), lot 7091, realized \$94,875; Chicago Signature (Heritage, 8/2014), lot 5691, realized \$425,937.50. The Winter/Crum plate coin, and the plate coin for *Encyclopedia of U.S. Gold Coins* by Garrett and Guth.

6. AU53 PCGS. European holding; New York Sale (NERCA, 3/1977), lot 935, realized \$23,000; Baltimore Auction (Bowers and Merena, 3/2007), lot 5597, realized \$356,500.

7. AU53, per Garrett and Guth. National Numismatic Collection, Smithsonian Institution. This coin was discovered in the NNC in 1984 with no record of its provenance. It was not listed in the inventory Comparette compiled in the 1912-1914 era, but it may have been in the collection for some time.

8. AU50 PCGS. Dallas Bank Collection (Sotheby's/Stack's, 10/2001), lot 16, realized \$92,000; Denver Signature Auction (Heritage, 8/2006), lot 5601, realized \$345,000.

9. AU50 NGC. Charles Kramer Collection (Stack's/Superior, 12/1988), lot 736; Auction '89 (RARCOA, 7/1989), lot 453; Long Beach

Signature Auction (Heritage, 1/2004), lot 7247, realized \$143,750.

10. **AU50 NGC.** Richmond Collection (David Lawrence, 7/2004), lot 2252, realized \$276,000.

11. **AU50 Prooflike.** Louis Eliasberg, Sr.; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 889, realized \$49,500; Manfra Tordella & Brookes.

12. **AU.** Amon Carter Collection (Stack's, 1/1984), lot 847; Public Coin Auction (Stack's, 10/1986), lot 967, realized \$33,000; James A. Stack Collection (Stack's, 11/1989), lot 1500.

13. **AU Details ANACS.** John J. Pittman, purchased from Ed Bell (11/27/1961); John Jay Pittman Collection (David Akers, 10/1997), lot 1134, realized \$35,750; FUN Signature Auction (Heritage, 1/2005), lot 8831, realized \$138,000; Central States Signature (Heritage, 4/2014), lot 5795, realized \$164,500.

14. **XF45+ NGC.** James Bullock before 1923; Bullock's heirs; Long Beach Signature Auction (Heritage, 9/2010), lot 5554, realized \$345,000.

15. **XF45 PCGS.** Atlanta Signature Auction (Heritage, 4/2006), lot 2137; Chicago Signature (Heritage, 8/2014), lot 5690; FUN Signature (Heritage, 1/2016), lot 5639, which realized \$235,000.

16. **XF45 PCGS.** Pre-Long Beach Sale (Superior, 5/1999), lot 3766, realized \$67,850; FUN Signature (Heritage, 1/2014), lot 5518, realized \$318,875.

17. **XF45 PCGS.** FUN Signature Auction (Heritage, 1/2009), lot 4131, realized \$276,000; Los Angeles Signature Auction (Heritage, 7/2009), lot 1315, realized \$253,000; Pittsburgh Fall ANA Auction (Heritage, 10/2011), lot 5100, realized \$276,000.

18. **XF45 PCGS.** Public Auction Sale (Stack's, 3/1986), lot 534; King of Siam Sale (Bowers and Merena, 10/1987), lot 2017, realized \$23,100; Broadus R. Littlejohn, Jr. Collection (Schuyler Rumsey, 2/2012), lot 1216.

19. **XF40 NGC.** European collection; ANA Auction Sale (Superior, 8/1975), lot 1601, which realized \$37,500; Arrowhead Collection (Sotheby's, 5/1987), lot 352; FUN Signature Auction (Heritage, 1/2011), lot 5249; the Akers plate coin.

20. **XF.** Public Auction Sale (Stack's, 11/1994), lot 1600, realized \$35,200.

21. **XF Cleaned, per Garrett and Guth.** Lilly Collection until 1968; National Numismatic Collection, Smithsonian Institution.

22. **VF30.** D.E.A. and U.S. Marshals Service Sale (Heritage, 12/1988), lot 1377.

23. **VF20 PCGS.** Alex Shuford Collection (Abe Kosoff, 5/1968), lot 2414; Gilhousen sale (Superior, 2/1973), lot 860, realized \$7,000; ANA Convention Auction (Paramount, 8/1974), lot 973; Central States Auction (Rarcoa, 4/1975), lot 105; Eugene Detmer Collection (Stack's, 2/1983), lot 1084; Charmont Sale (Steve Ivy, 8/1983), lot 4387; Auction '85 (Superior, 7/1985), lot 974, realized \$21,850; Century Sale (Superior, 2/1992), lot 2944; January-February Auction (Superior, 1/1993), lot 1487, realized \$13,750; Dr John Kardatzke Collection (Goldberg, 6/2000), lot 1719, realized \$21,850; ANA Auction (Stack's Bowers, 8/2011), lot 7753.

Additional Appearances

A. J.H. Townsend; John Nickerson Collection (Thomas Elder, 12/1933), lot 1126. Fine.

B. A specimen in the Col. Green Collection, sold to King Farouk via Stack's in 1943 for \$135, called "Unc. Mint luster," Palace Collections of Egypt (Sotheby's, 2/1954), lot 180, purchased by Abe Kosoff at 180 Egyptian pounds.

C. A specimen in the Baltimore Hoard, Public Auction Sale (Perry Fuller, 5/1935), realized \$105 to a "Virginia collector", possibly Louis Eliasberg, who lived in Baltimore and became interested in coin collecting as a means to legally hold gold after the 1933 Recall.

D. J.F. Bell Collection (Stack's, 12/1944), lot 899, realized \$320; possibly number 10 above, per the Eliasberg catalog. Uncirculated, full mint luster.

E. George H. Hall Collection (Stack's, 5/1945), lot 2243. VF.

F. William Cutler Atwater Collection (Mehl, 6/1946), lot 1338, realized \$210; possibly number 10 above, per Eliasberg catalog, or number 11. Strictly Very Fine, free from any nicks or dents.

G. H.R. Lee Collection (Stack's, 10/1947), lot 1777; possibly number C above, as this was a sale of Eliasberg's duplicates. Strictly Very Fine.

H. Dr. Charles W. Green Collection (B. Max Mehl, 4/1949), lot 808, realized \$180; Strictly Very Fine.

I. Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1957, realized \$280. Very Fine.

J. Thomas Melish Collection (Abe Kosoff, 4/1956), lot 888. Very Fine.

K. J.F. Bell Collection (RARCOA, 4/1963), lot 849. XF obverse, AU reverse, possibly number 3 above.

L. Pre-Long Beach Sale (Superior, 5/2001), lot 4170D. AU50 sharpness, Net XF45 due to harsh cleaning on both sides. Described on a tipped-in sheet at the front of the catalog.

M. Two specimens reported as sold at private sale in the 3/1977 New England catalog. One in XF40 with a planchet defect sold in 1976 for \$30,000 (possibly number 16). Another in XF45 sold in 1975 for \$65,000.

N. Another specimen referred to in the lot description of the Cicero catalog (number 3 above) "the miserable cleaned coin in one of our Numisma auctions some years ago." NGC ID# 268Z, PCGS# 8918

1856-S Twenty Dollar, AU58
Khaki-Gold Coloration

4844 1856-S AU58 NGC. CAC. Variety 17A. The striking of double eagles at the San Francisco Mint continued to climb three years after the facility's inauguration, reaching nearly 1.2 million coins in 1856. Although the provenance of this near-Mint No Motto twenty is uncertain, the die matches many coins recovered from the wreckage of the S.S. *Central America* (full serifs on STATES, broken A). Each khaki-gold side is awash in considerable mint luster, providing excellent aesthetic appeal. Well-detailed with shallow abrasions peppered evenly throughout. NGC ID# 2692, PCGS# 8919

1857-O Liberty Twenty, AU55
Overlooked Branch Mint Issue

4845 1857-O AU55 NGC. Variety 1. Although the 1857-O Liberty double eagle claims a small mintage of 30,000 pieces, its elusive nature is often overlooked because of its proximity to the 1854 and 1856 New Orleans issues, two of the greatest rarities of the series. Despite the recovery of a few Mint State coins from the wreck of the S.S. *Republic*, the 1857-O remains a scarce issue, especially in high grade. This attractive Choice AU specimen exhibits well-detailed design elements, with just a touch of wear on the high points. The lightly abraded orange-gold surfaces show traces of prooflike reflectivity in sheltered areas around the devices. The overall presentation is most attractive. Census: 36 in 55, 30 finer (4/16). NGC ID# 2694, PCGS# 8921

**1857-S Liberty Double Eagle, MS65
S.S. Central America, 'Spiked Shield'**

4846 1857-S MS65 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 0856. The "Spiked Shield" variety, named for two die lines near the left shield border, is the most often seen variety among coins recovered from the wreck of the S.S. Central America. The 1857-S Liberty double eagle was extremely rare in high grade before the treasure from the famous shipwreck was recovered. Since more than 5,000 examples of the 1857-S were aboard when the ship sank, and many have been retrieved in exquisite state of preservation, the 1857-S is the most available and popular Type One double eagle in today's market. Garrett and Guth list the 1857-S among the *100 Greatest U.S. Coins*.

The present coin is an impressive Gem, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces add tremendously to the outstanding eye appeal. Lot includes the official presentation box, case, booklet, and certificate of authenticity. NGC ID# 2696, PCGS# 8922

**1858 Twenty Dollar, MS60
Rare in Mint State**

4847 1858 MS60 PCGS. Satiny orange-gold luster illuminates surprisingly attractive surfaces on this Mint State 1858 double eagle. The strike is sharp, and grade-limiting abrasions are light in nature and evenly scattered. The 1858 is a plentiful issue in circulated grades but rare in Mint State. This piece has few superiors. Population: 7 in 60, 16 finer (5/16). NGC ID# 2697, PCGS# 8923

**1859-S Twenty Dollar, AU58
Beautifully Smooth Surfaces**

4848 1859-S AU58 PCGS. This remarkably smooth, still-lustrous 1859-S double eagle displays outstanding eye appeal without distracting abrasions and wear. Only light slide marks on the obverse prevent a Mint State designation, and the honey-gold glow from each side is most pleasing. PCGS has seen only 40 Uncirculated pieces finer (4/16). NGC ID# 269C, PCGS# 8928

**1859-S Twenty Dollar, AU58
Seldom Seen Finer**

4849 1859-S AU58 NGC. The 1859-S double eagle is a moderately available date that is conditionally rare in Mint State. Such coins are seldom seen without unsightly bagmarks. This attractive near-Mint example is a more affordable and visually pleasing alternative. The strike is bold, and moderate luster remains in the honey-gold fields. Light chatter is almost unnoticed by the naked eye. NGC lists 20 Uncirculated coins finer (4/16). NGC ID# 269C, PCGS# 8928

**1865-S Liberty Twenty, MS62
S.S. Republic Survivor**

- 4850 1865-S MS62 NGC.** Large S. The 1865-S Liberty double eagle was an elusive Type One issue in high grade before the era of modern shipwreck finds changed the landscape of double eagle collecting forever. In recent years, 500 examples of the 1865-S were recovered from the wreck of the *S.S. Brother Jonathan*, and another 250 specimens were found on the *S.S. Republic*. Since these shipwrecks occurred shortly after the coins were minted, in July and October of 1865, respectively, it makes sense that most of the recovered coins were in Mint State grades. This attractive MS62 specimen from the *S.S. Republic* offers well-detailed design elements and lustrous yellow and rose-gold surfaces that show the expected number of minor contact marks for the grade. The Large (or Medium) S variety is much more elusive than its Small S counterpart. Lot includes the official presentation box, case, and booklet, but the top velvet cushion has become unglued. NGC ID# 269V, PCGS# 8944

**1866-S Double Eagle, AU Details
No Motto**

- 4851 1866-S No Motto — Improperly Cleaned — PCGS Genuine.** AU Details. With a small mintage of 120,000 coins, the No Motto 1866-S double eagle is elusive in all grades. This lightly cleaned example displays muted yellow-gold luster with bold design elements. A few minor abrasions here and there do not distract. Uncirculated examples of this issue are extremely rare and heavily bagmarked, making AU-level coins all the more appealing. NGC ID# 269W, PCGS# 8945

**1866 With Motto Twenty, AU58
Still Lustrous, Minimal Marks**

- 4852 1866 Motto AU58 NGC.** Substantial mint luster remains across the smooth, minimally abraded surfaces of this nearly Uncirculated Type Two twenty. Mint State coins are rare, making attractive, well-struck About Uncirculated coins (such as this example) especially appealing to collectors. NGC reports just 47 numerically finer examples (4/16). NGC ID# 269X, PCGS# 8949

**1866 With Motto Twenty, AU58+
As Close to Mint State as Possible**

- 4853 1866 Motto AU58+ PCGS.** Substantial original luster illuminates the frosty, green-gold surfaces of this Plus-graded near-Mint 1866 With Motto double eagle. PCGS has Plus-graded only five AU58 coins, and there are 50 Mint State pieces finer (4/16). This coin is boldly struck and shows almost no true wear, although moderate chatter on the obverse contributes to the grade. NGC ID# 269X, PCGS# 8949

1866-S With Motto Twenty, AU55
Lustrous and Attractive

4854 1866-S Motto AU55 PCGS. CAC. A problem-free, Choice AU example of this debut With Motto San Francisco issue, showing substantial original luster in the protected regions of the fields. Lovely wheat-gold patina has a few scattered abrasions, as is consistent with the grade, but eye appeal remains pleasing. The design elements are well-detailed. Population: 48 in 55, 47 finer. CAC: 15 in 55, 12 finer (4/16). NGC ID# 26B2, PCGS# 8950

1867-S Liberty Double Eagle, AU55
Popular Type Two Branch Mint Twenty

4855 1867-S AU55 NGC. CAC. With a substantial mintage of 920,750 pieces, the 1867-S Liberty double eagle is an available date in most circulated grades, but Mint State coins are rare. This Choice AU specimen offers well-detailed design elements with just a touch of wear, and lustrous orange-gold surfaces with the expected number of minor abrasions for the grade. NGC ID# 26A2, PCGS# 8952

1868-S Twenty, Lustrous AU58
Rarely Seen Finer

4856 1868-S AU58 PCGS. As with many Type One and Type Two issues, the 1868-S Liberty double eagle is rare in Mint State. This near-Mint coin has significant appeal from both an affordability viewpoint as well as technical quality. The strike is bold, and brief high-point friction is primarily limited to the devices. The fields have vibrant yellow-gold luster. Light surface chatter accompanies the grade. PCGS has seen 30 finer representatives (5/16). NGC ID# 26A4, PCGS# 8954

1870-S Double Eagle, MS60
Lustrous and Appealing

4857 1870-S MS60 NGC. The 1870-S double eagle is often overshadowed by its rare Carson City counterpart, but it is still itself a conditionally scarce issue in Mint State. This Uncirculated coin displays frosty yellow-gold luster and boldly rendered design elements. Light surface chatter, mostly on the obverse, is consistent with the grade. Eye appeal is pleasing. Census: 16 in 60, 42 finer (4/16). NGC ID# 26A9, PCGS# 8959

**1873-S Liberty Double Eagle, MS61
Scarcer Open 3 Variety**

4858 1873-S Open 3 MS61 PCGS. Coins struck early in 1873 have a Closed 3 in the date, but Chief Coiner A. Loudon Snowden complained the 3 looked too much like an 8, so a new numeral punch was used to produce dies with an Open 3. Of course, the new dies got to San Francisco sometime after they were in use at Philadelphia, so comparatively fewer coins were struck with those dies at the West Coast facility. Today, the 1873-S Liberty double eagle with an Open 3 in the date is more elusive than its Closed 3 counterpart, while the opposite is true of the Philadelphia issues. Like most Type Two twenties, the 1873-S is seldom seen in Mint State grades.

This attractive Mint State example displays well-detailed design elements, with vibrant mint luster throughout. The vivid orange-gold surfaces show the expected number of minor contact marks for the grade and eye appeal is quite strong. Population: 40 in 61, 5 finer (5/16). NGC ID# 26AM, PCGS# 8979

**1875-CC Liberty Twenty, AU53
Pleasing Carson City Double Eagle**

4859 1875-CC AU53 PCGS. Variety 4-A. The 1875-CC is readily available in most grades up to the Select Uncirculated level, when it becomes infrequently seen. This AU53 example retains pleasing medium-gold color and above-average luster for the grade. The unavoidable bagmarks and abrasions that accompany Carson City double eagles are of routine size and depth — no large marks, but several ticks, nicks, and shallow scrapes are distributed across the otherwise attractive, well-detailed surfaces. NGC ID# 26AT, PCGS# 8974

**1875-CC Liberty Double Eagle, MS61
Popular Branch Mint Type Coin**

4860 1875-CC MS61 PCGS Secure. Variety 1-A. A generous mintage of 111,151 Liberty double eagles was accomplished at the Carson City Mint in 1875. Although few examples were saved by contemporary collectors, the issue enjoys a fairly high survival rate. In fact, the 1875-CC is the most available Type Two double eagle from the famous Western facility, and a favorite choice of branch mint type collectors. This attractive Mint State specimen exhibits well-detailed design elements, with a touch of the usual softness on Liberty's hair and the eagle's claws, but sharp definition on the stars and wing feathers. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26AT, PCGS# 8974

**1880 Double Eagle, MS61
Rare Issue, Bold Eye Appeal**

4861 1880 MS61 PCGS. A notable run of rare Liberty Head double eagles from the Philadelphia Mint starts with the 1880 issue, known for its low mintage of 51,456 pieces and few Uncirculated survivors. Subsequent mintages of Philadelphia twenties range from minuscule to negligible until 1888, when the “silver frenzy” instigated by the Bland-Allison Act subsided and more-normal double eagle production resumed.

The current example exhibits a Mint freshness that excites the eye. Some prooflikeness in the fields yields to a frosty brilliance, and the sun-gold patina flashes orange, rose-red, and lilac highlights. The coin shows a sharp strike throughout, with minor abrasions in the left obverse field that determine the grade but do not diminish the splendid appeal. Population: 21 in 61, 10 finer (4/16). NGC ID# 26BA, PCGS# 8992

**1883-CC Double Eagle, Sharp AU58
Prooflike in Sheltered Areas**

4862 1883-CC AU58 PCGS. Variety 2-A. Substantial areas of prooflike reflectivity remain in areas sheltered by the raised elements, while orange accents at the rim add eye appeal to the medium-gold surfaces. Busyness in the fields is more noticeable than usual because of the reflective surfaces. Sharply struck, this is a vibrant and attractive near-Mint double eagle with the always in-demand Carson City mintmark. PCGS reports fewer than 100 finer examples (4/16). NGC ID# 26BH, PCGS# 8999

**1884-CC Twenty Dollar, AU58
Ideal Nevada Type Coin**

4863 1884-CC AU58 NGC. CAC. Variety 1-A. The 1884-CC double eagle is popular among type collectors looking to add a high-end Carson City twenty dollar gold piece to their portfolios. The Nevada mint struck 81,139 coins, and examples can be found through AU grades and in lower Mint condition. Additionally, the issue was well-made, as evidenced by this razor-sharp borderline-Uncirculated representative. A blend of peach and greenish-gold color adorns each side with radiant frost retained near the design recesses. Minimally abraded with much to admire. NGC ID# 26BK, PCGS# 9001

**1889-CC Twenty, Reddish Toned AU55
One of the More Available CC Double Eagles**

4864 1889-CC AU55 NGC. Variety 1-A. The release of a couple of hoards 20 years ago has made the 1889-CC an even more available Carson City issue, and one that can be sought for type purposes. Wide variability can be found in the strike details and surface preservation of these coins. This is a well-struck example that only shows small, inoffensive abrasions with the help of a loupe. Rich, reddish-gold color. NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, MS61
Frosty and Strongly Struck

4865 1890-CC MS61 PCGS. Variety 1-A. The mintmark is centered between (TWENTY) D(OLLARS). Carson City Mint officials manufactured 91,209 double eagles in 1890, and examples are among the most frequently encountered Type Three twenties from that facility. Winter estimates that 200 to 300 pieces survive in Uncirculated condition, while the certification totals at PCGS and NGC suggest a Mint State survival rate of perhaps 350 to 400 coins. This MS61 representative is typically sharp with full stars and strongly delineated hair curls. Frosty luster emanates from straw-gold surfaces with occasional rose-gold accents centrally on the reverse. Shallow reeding marks and light chatter occur throughout, but the only mark of note appears between stars 9 and 10. Undoubtedly a great Carson City double eagle for type purposes. NGC ID# 26BY, PCGS# 9014

1891-CC Twenty Dollar, Unc Details
Rare Issue in High Grade

4866 1891-CC — Cleaning — PCGS Genuine Secure. Unc Details. Variety 1-A. The 1891-CC Liberty double eagle boasts a memorably low mintage of just 5,000 pieces, the second-lowest production total of the series. Few high-quality examples were saved by contemporary collectors and the 1891-CC is an elusive issue today, especially in high grade. This attractive Mint State specimen shows just a trace of wear on the high points of the well-detailed design elements and the pleasing orange-gold surfaces retain much of their original mint luster. A scattering of minor contact marks on both sides is consistent with the grade and eye appeal is quite strong. Population: 2 in 60, 15 finer (4/16).

PROOF LIBERTY DOUBLE EAGLE

1886 Proof Twenty, Unc Details
Total Mintage of Only 1,106 Pieces

4867 1886 — Altered Surfaces — PCGS Genuine. Unc Details. Just 1,000 business strikes and 106 proofs were struck by the Philadelphia Mint in 1886, making this date one of the unquestioned keys in the series. Date collectors and proof specialists alike compete for the few remaining specimens. Estimates range from 20 to 25 proofs remaining — a paltry number to satisfy the many collectors still searching for this rare-date twenty.

PCGS has correctly designated this coin as having altered surfaces. Areas of skillful enhancement possibly include polishing in the upper obverse fields and manipulation of the reverse lettering (which appears bright as opposed to the frosted look of other devices including the eagle, portrait, and obverse stars). Perhaps the work was done to minimize hairlining, which is evident on the lower obverse fields, portrait, and across the lower third of the reverse.

Still, this glittering proof is appealing and a viable choice for those who recognize the extreme rarity of the issue and the difficulty of acquiring an example. NGC ID# 26E7, PCGS# 9102

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Saint-Gaudens Twenty
Wire Rim, Unc Sharpness

4868 1907 High Relief, Wire Rim — Reverse Repaired — NGC Details. Unc. A sharp High Relief with satiny yellow-gold luster and minimal abrasions. The reverse shows a small area of repair work along the rim at 3 o'clock, but the coin is otherwise problem-free. The High Relief Saint-Gaudens double eagle is a famous numismatic relic that is in constant demand by collectors and investors. This piece will appeal to the budget-restricted enthusiast. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS61
Nearly Complete 'Fin' or Wire Rim

- 4869** 1907 High Relief, Wire Rim MS61 NGC. Experimentation remained the watchword during 1906 and 1907 during the striking of the Ultra High Reliefs, High Reliefs, and finally the greatly lowered relief circulation-strike twenties. Early in the production of the High Reliefs, it was noticed that the coins had a "fin" in Mint parlance, or as collectors now term it a wire rim. Frank Leach was the primary mover in eliminating or partially eliminating the fin, seen by Mint personnel as a striking defect. Leach believed the problem might be solved by either pre-shaping or pre-milling the planchets. Pre-shaping did not work. However, the pre-milled planchets did eliminate the fin. It did so by slightly thickening the edge of the planchet, thus producing a flat rim in advance of striking. The striking process required the same number of blows from a hydraulic press, and even Charles Barber was pleased with the results. Barber's pleasure was tempered, however, with a fear that the president might like the new coins too much and insist on their continued production. The bright, satiny surfaces show just the slightest hint of reddish patina, and there are no obvious or distracting blemishes on either side. The "fin," or wire rim, encircles most of each side of this attractive High Relief. Fully defined in all areas, including the lettering at the top of the reverse. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty Dollar, MS62
Wire Rim Variant

- 4870** 1907 High Relief, Wire Rim MS62 PCGS. John Dryfhout and Henry Duffy write in *Augustus Saint-Gaudens: American Sculptor of the Gilded Age*:

"... Saint-Gaudens epitomized the spirit of America in the late nineteenth century. His rugged appearance and the confident sense of honesty, clarity, and simple truth exemplified in his sculpture and in his own public image were central to 19th century cultural belief and to the newfound awareness in America of the nation's changed position in the world."

The Saint-Gaudens MCMVII Ultra High Relief and High Relief double eagle design is distinctly American in its vision. Saint-Gaudens, more accustomed to working in large formats, managed to make both sides monumental, even in the small format of a gold coin. The purposeful Liberty striding forward, shorn of all but the essentials, foreshadows the United States' increasing economic and political power. Derived from the Victory of Saint-Gaudens' General Sherman Monument in New York City, the female figure holds a torch to light the way toward freedom and an olive branch for peace. This reddish-gold example shows only the slightest, scattered contact marks across each side. The wire rim, or "fin" as it was known in the Mint, encircles much of each side but is not as pronounced as seen on other High Reliefs.
Ex: *Portland Signature* (Heritage, 3/2004), lot 6523. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS67
Ex: Wells Fargo Hoard

4871 1908 No Motto, Wells Fargo Nevada, MS67 PCGS. Ex: Wells Fargo Nevada Gold. A satiny Superb Gem example from the famous Wells Fargo Hoard of 1908 No Motto double eagles. This piece is well-struck with soft wheat-gold luster. A single mark on Liberty's knee appears to be all that limits the grade. Finer coins are elusive, and almost all are pedigreed to the same hoard as this piece. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-D Saint-Gaudens Twenty, MS66
First-Year With Motto

4872 1908-D Motto MS66 PCGS. The 1908-D Saint-Gaudens double eagle claims a mintage of 349,500 pieces, but examples are rare at the MS66 grade level, and finer specimens are virtually unobtainable. Representing the first year of the Motto design, the 1908-D is a popular coin with mintmark type collectors.

The present example is a delightful Premium Gem, with pinpoint definition on all design elements and bright orange-gold surfaces that radiate vibrant mint luster. Close inspection with a loupe reveals no mentionable distractions, and eye appeal is terrific. Population: 31 in 66 (2 in 66+), 4 finer (4/16). NGC ID# 26F9, PCGS# 9148

1914 Double Eagle, MS64
Low Mintage, Few Survivors Finer

- 4873 1914 MS64 PCGS.** Frosty original luster glows on each side of this Choice 1914 Saint-Gaudens double eagle, illuminating well-struck design elements and largely smooth surfaces. This Philadelphia issue had an enticingly low mintage of 95,250 pieces, one of six production totals in the series, including that of the High Relief, that fall below the six-figure mark. Mint State survivors are evenly dispersed throughout the MS61 to MS64 grades with few finer. NGC ID# 26FS, PCGS# 9164

1915 Twenty Dollar, MS64
Strong Design Definition

- 4874 1915 MS64 PCGS. CAC.** CAC has appropriately awarded this near-Gem Saint-Gaudens twenty a green sticker for eye appeal and quality within the grade. Glowing rose and yellow-gold surfaces radiate frosty luster. Design definition is strong, particularly on the visage, but also on the torch hand, Capitol columns, and eagle feathers. Peppered abrasions on each side are generally well-hidden. The Philadelphia Mint accomplished a mintage of 152,050 double eagles in 1915. Choice survivors are scarce, and higher-graded coins prove decidedly rare. NGC ID# 26FV, PCGS# 9167

1920-S Twenty Dollar, Unc Details
Heavily Melted Issue, Few Coins Survive

- 4875 1920-S — Cleaning — PCGS Genuine. Unc Details.** Although the San Francisco Mint struck 558,000 double eagles in 1920, most likely never left storage and were later melted under the terms of the mid-1930s gold recall order. Most of the pieces known today show scattered abrasions or are lightly circulated. Per new research by Roger Burdette, most of these likely originated from production and assay residuals that were paid out to depositors and others by the Mint Cashier. A few high-grade coins known today were likely acquired from the Mint by notable collectors of the period — this was not an issue that could be bought from a local bank by the roll.

The number of pieces ultimately distributed is unknown, and survival estimates have varied greatly. Popular suggestions are that fewer than 150 1920-S double eagles are extant, although if un-gradable examples are included, as many as 200 pieces could survive according to auction data. This example is unworn but shows evidence of a light cleaning. The slightly muted yellow-gold luster is nonetheless free of major abrasions, and eye appeal is pleasing. The strike is boldly rendered. An important opportunity for the budget-restricted collector to acquire a sharply detailed example of this semikey Saint-Gaudens double eagle. NGC ID# 26FZ, PCGS# 9171

**1925-S Twenty Dollar, MS61
Better San Francisco Issue**

- 4876 1925-S MS61 PCGS.** The 1925-S is a better date in Uncirculated condition, seldom seen in any such grade. This lower-end Mint State coin has light surface chatter but is free of singular abrasions. The strike is bold, and the satiny yellow-gold surfaces are visually pleasing for the grade. The 1925-S was heavily melted in the mid-1930s, rendering the date much scarcer than its mintage of more than 3.7 million coins would suggest. NGC ID# 26GC, PCGS# 9182

**1926-S Twenty Dollar, MS64+
Radiant Luster, Scarce Any Finer**

- 4877 1926-S MS64+ PCGS.** The 1926-S is a slightly better date in Uncirculated condition, but the chief appeal of this high-end Choice Saint-Gaudens double eagle is the combination of its Plus designation and the rarity of coins just half of a grade point finer. The strike is bold, and the minimally abraded surfaces yield incredibly vibrant luster in rose, mint, and yellow-gold hues. Eye appeal is far beyond what is expected for the grade. PCGS lists 40 finer submissions (4/16). NGC ID# 26GF, PCGS# 9185

**1928 Double Eagle, MS66+
Impressive Luster and Eye Appeal**

- 4878 1928 MS66+ PCGS. CAC.** The 1928 is the latest date in the Saint-Gaudens double eagle series that is available in a general sense. But Superb Gems are scarce. This Plus-graded Premium Gem is an outstanding coin. The strike is bold, and the frosty orange-gold fields are largely devoid of contact. Only a few trivial marks on the high points of Liberty and the eagle preclude a full MS67 grade. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

**1900 Lafayette Dollar, MS65
Lightly Toned and Lustrous**

- 4879 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C.** The conjoined portraits of Lafayette and Washington show a sharp strike and faint bluish-gray toning that deepens slightly at the rims. Only a few small marks visit the surfaces, including a minor abrasion in the right field beneath the second A of AMERICA. The reverse toning is somewhat deeper with golden highlights and a scattering of high-point nicks. Frosty mint luster glows from both sides of this Gem dollar, an ideal type coin with CAC endorsement. CAC: 61 in 65, 27 finer (4/16). NGC ID# BYKW, PCGS# 9222

**1921 Alabama Centennial Half, MS66+
Few Known Finer**

- 4880 1921 Alabama MS66+ PCGS. CAC.** A lovely, high-end Alabama Centennial half dollar, struck for the 100th anniversary of Alabama's statehood. This Plus-graded coin is boldly struck and frosty with a hint of champagne toning. There are no significant abrasions, and eye appeal is pleasing. PCGS has seen just four finer representatives. CAC: 50 in 66, 2 finer (4/16). NGC ID# BYF2, PCGS# 9224

**1939 PDS Arkansas Half Dollar Set, MS66+
Three-Coin Commemorative Set**

- 4881 1939 Arkansas PDS Set MS66+ PCGS. CAC.** A well-matched PDS set of 1939 Arkansas commemorative half dollars. Each coin grades MS66+ PCGS, and each has been certified by CAC. All coins are sharply detailed and impeccably preserved, with light-to-medium champagne-gold toning. Vibrant mint luster adds to the outstanding visual appeal of each coin. NGC ID# BYFJ, PCGS# 9252

**1892 Columbian Half Dollar, MS67
Splendid Toning from the Original Packaging**

- 4882 1892 Columbian MS67 PCGS. CAC.** Vibrant luster shines beneath outer rings of ocean-blue, peach-rose, and gold that fade to silver-gray at the center of the obverse and brilliance at the same place on the reverse. This example of America's first commemorative half displays stellar eye appeal on both sides. PCGS reports just one numerically finer example. Population: 36 in 67 (7 in 67+), 1 finer. CAC: 34 in 67, None finer (4/16). NGC ID# BYGF, PCGS# 9296

**1893 Columbian Half Dollar, MS67
Among the Finest at PCGS**

- 4883 1893 Columbian MS67 PCGS.** One might expect a commemorative issue with a distribution in excess of 1.5 million coins to have been carefully preserved in large numbers. However, the collecting community was relatively small in 1893, and while many Columbian halves were sold, they traded hands frequently and often with little consideration for their condition. For that reason, the 1893 is decidedly rare in MS67. This Superb Gem has violet tones centrally with shades of sea-green and ice-blue around the edges. Frosty luster percolates through the patina. Well-struck. Population: 29 in 67 (3 in 67+), 0 finer (4/16). NGC ID# BYGG, PCGS# 9297

**1928 Hawaiian Half Dollar, MS66
Silver Commemorative Key**

- 4884 1928 Hawaiian MS66 PCGS. CAC.** With a one-year distribution of 9,958 pieces, the 1928 Hawaiian half dollar is the acknowledged key to the classic silver commemorative series. This spectacular Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout, with well-preserved surfaces, under vivid shades of golden-brown and lavender toning. PCGS has graded only three numerically finer examples (4/16). NGC ID# BYGR, PCGS# 9309

**1921 Missouri 2x4 Centennial Half, MS66
Lightly Toned, Highly Lustrous**

- 4885 1921 Missouri 2x4 MS66 PCGS.** Commemorating Missouri's statehood Centennial, the Missouri halves were the design work of Robert Aitken. Slightly fewer pieces were distributed with the incuse 2x4 symbol than those without the imprint, although both varieties are about equally rare in Premium Gem condition. MS66 is the finest numeric grade attained by the 2x4 variant at either PCGS or NGC. This frosty and lustrous example displays light, champagne-gold toning with blushes of rustic-tan color on the sharply struck obverse. The reverse is brilliant and frosty. Population: 36 in 66 (1 in 66+), 0 finer (4/16). NGC ID# 2FE9, PCGS# 9331

**1923-S Monroe Half Dollar, MS66+
Few Seen Finer**

4886 1923-S Monroe MS66+ PCGS. CAC. The Monroe Doctrine Centennial half dollar is seldom seen in Premium Gem condition, and finer pieces are rare. This Plus-graded coin is well-struck and frosty with excellent eye appeal. Mottled olive-green, gold, and lavender-gray hues encompass each side. Population: 97 in 66 (12 in 66+), 6 finer. CAC: 21 in 66, 1 finer (4/16). NGC ID# BYH4, PCGS# 9333

**1937 Texas Half Dollar, MS68
Brilliant With Peripheral Toning**

4887 1937 Texas MS68 PCGS. On June 15, 1933, Congress authorized the production of at most 1.5 million Texas commemorative half dollars to celebrate the 100th anniversary of statehood. Texas sculptor Pompeo Coppini's design features a pentagonal star behind an eagle on the obverse, while the reverse shows Victory, the Alamo, and portraits of Sam Houston and Stephen Austin. The final product has been scorned and lauded, but Cornelius Vermeule argued in 1971: "This coin has one of the greatest of the designs in the commemorative series..."

Texas half dollars were manufactured between 1934 and 1938, with the Philadelphia Mint striking 6,571 pieces in 1937. This MS68 commemorative half is near-flawless. Essentially brilliant surfaces showcase glimpses of rainbow toning peripherally, while frosty interiors radiate thick mint luster. Sharply struck throughout. Population: 5 in 68 (1 in 68+), 0 finer (4/16). NGC ID# BYJH, PCGS# 9390

**1946-D Booker T. Washington Half, MS68
Beautiful Glowing Patina**

- 4888** 1946-D Booker T. Washington MS68 NGC. CAC. This is an outstanding, Registry-quality Booker T. Washington half with bold forest-green, lemon-gold, and amber-red toning on the obverse and lighter lilac-gray and champagne over much of the reverse. The strike is sharp and a few trivial marks appear on the cheek, as usual. This piece is one of only nine MS68 examples seen by NGC (four MS68 ★, one MS68+), with a single MS69 ★ finer (4/16). NGC ID# BYJT, PCGS# 9405

**1951-S Booker T. Washington Half Dollar
Brilliant MS67 Prooflike**

- 4889** 1951-S Booker T. Washington MS67 Prooflike NGC. CAC. Brilliant surfaces with the slightest tinge of pale blue have incredibly deep and reflective mirrors that are uncommonly found on coins from this Booker T. Washington commemorative half dollar issue. Minuscule scattered ticks are noted, but they are unimportant. A delightful, eye-appealing representative for the specialist. Census: 5 in 67 Prooflike, 0 finer (4/16). NGC ID# BYKB, PCGS# 89426

COMMEMORATIVE GOLD

**1904 Lewis and Clark Gold Dollar, MS66
Few Certified Finer of the Type**

- 4890** 1904 Lewis and Clark Gold Dollar MS66 PCGS. The 1904 Lewis and Clark gold dollar is slightly more plentiful in high grade than the 1905 issue, but it is still scarce in Premium Gem condition and rare finer than this level. The present coin displays a bold strike and smooth, satiny fields with luminous yellow-gold luster. PCGS lists only 21 numerically finer representatives (4/16). NGC ID# BYLE, PCGS# 7447

**1904 Lewis and Clark Gold Dollar
High-Quality Premium Gem**

- 4891** 1904 Lewis and Clark Gold Dollar MS66+ PCGS. CAC. According to David M. Bullowa, "Of the 25,028 [Lewis and Clark gold dollars] struck in September 1904 at the Philadelphia Mint, 10,025 were sold, and 15,003 were melted down at the San Francisco Mint." This high-quality Premium Gem undoubtedly rivals the MS67 submissions at the leading services. Marks are essentially indistinguishable without magnification. Rich orange-gold color combines with effulgent mint luster over well-impressed surfaces. NGC ID# BYLE, PCGS# 7447

**1915-S Pan-Pac Quarter Eagle, MS66
Upper-End for the Grade**

- 4892** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. This softly frosted yellow-gold Panama-Pacific quarter eagle appears virtually pristine, even under a loupe. The fields display the usual swirling die polishing lines, and the design elements are boldly struck. Only 6,749 examples were distributed in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915, and pieces surviving finer than this coin are scarce. NGC ID# BYLP, PCGS# 7450

1915-S Two and a Half, MS66
Pan-Pac Exposition Commemorative

- 4893** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. This softly frosted Panama-Pacific quarter eagle displays a bold strike and luminous surfaces. A loupe reveals only a few faint lines that preclude a Superb Gem designation. This issue was produced in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915 to celebrate the completion of the Panama Canal. Higher-grade examples are infrequently seen. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Two and a Half
CAC-Endorsed Premium Gem

- 4894** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. CAC. Premium Gem 1915-S Panama-Pacific quarter eagles are encountered with enough frequency to remain within the grasp of most enthusiasts and appeal to a range collectors who find scarce Superb Gems to be out of reach. This piece is well-struck and lightly frosted, displaying soft straw-gold color. CAC-endorsed eye appeal. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Round Fifty Dollar
Unc Details

- 4895** 1915-S Panama-Pacific 50 Dollar Round — Rim Repair — NGC Details. Unc Details. The Panama-Pacific Exposition was a dual celebration: The completion of the canal connecting the Atlantic and Pacific Oceans and the recovery of San Francisco from the devastating earthquake of 1906. The Exposition itself was a stunning celebration carried out in numerous halls scattered across the grounds. Landscape architecture and water displays were also important visual features. Official coinage and medals were struck that left a permanent legacy of this significant cultural event. The fifty dollar gold pieces borrowed heavily from antiquity and their original cases explained the Classical derivations on each coin.

For the collector looking for the best value in a Round Pan-Pac fifty, this piece should receive careful consideration. The surfaces have been lightly wiped, diminishing the original vibrancy of the mint luster, and the Rim Repair referred to on the insert is an area of slight rim filing at 2 o'clock on the obverse. The only other mentionable defect we see is a shallow horizontal scratch on the left side of the reverse. But to the casual observer, this is an impressive example of this Classically inspired and always-popular design.

1915-S Panama-Pacific Fifty Dollar, MS63
Octagonal Variant

4896 1915-S Panama-Pacific 50 Dollar Octagonal MS63 NGC.
The 1915 Panama-Pacific fifty dollar gold coins are widely praised for their artistry, but they received a degree of criticism following their production and release. In 1916, the *American Journal of Numismatics* published an overview of the coins and medals produced in the United States during the previous year. The author, using the pseudonym T.L.C., described Robert Aitken's Pan-Pac designs as "questionable," expounding:

"... the artist had really two important American events to draw upon and a coin with an unusually large field in which to elaborate a composition. But the types of the coin reveal no American influence, the subjects being as appropriate for any other country and event as for California or the United States of America and the completion of the Panama Canal. The criticism often heard, that 'there is nothing American about the coin except the inscription' is fully warranted."

The author deemed the use of classical symbolism "commonplace" and "a weakness of which the art is happily working free." One cannot help but wonder what he thought of Augustus Saint-Gaudens' ten and twenty dollar gold coins issued eight years prior. Those coins, like Robert Aitken's, drew heavily on classical imagery for inspiration and were lauded as two of the greatest coinage designs ever issued in this country. Despite Aitken's contemporary detractors, numismatists and art historians now regard the Pan-Pac fifty dollar slugs as a high-water mark in numismatic design.

Sales of the Octagonal fifty dollar coins exceeded Round coin sales during the exposition. Of the 1,509 Octagonal examples struck, 645 pieces were sold to fair-goers for \$100 apiece. Only 483 Round coins were distributed. The Octagonal coins' novel design, reminiscent of California's storied Gold Rush, undoubtedly contributed to their popularity. Additionally, the Octagonal slugs depict added dolphins around the margins, symbolizing the new "uninterrupted water route made possible by the Panama Canal." For the same historic and design reasons collectors sought out the Octagonal fifties a hundred years ago, collectors continue to seek out examples today in all grades. This is a wonderfully preserved example and an excellent value for the grade. Only the faintest scuffs can be seen with the aid of a loupe, and are invisible without one, making this piece even finer than its technical grade. The bright satiny luster displays even reddish-gold color across each side. NGC ID# BYHP, PCGS# 7452

PROOF COMMEMORATIVE GOLD

1903 Louisiana Purchase Gold Dollar, PR66 Cameo Rare Jefferson Proof Variant

4897 1903 Louisiana Purchase Jefferson Gold Dollar PR66 Cameo NGC. The Louisiana Purchase Exposition was held in St. Louis to commemorate the centennial of the Louisiana Purchase from France, which took place in 1803, under President Thomas Jefferson's administration. Two gold dollar coins were issued in connection with the exposition, one with a bust of Jefferson on the obverse and the other with a bust of President William McKinley, who had recently been assassinated. The first 100 coins struck from the two dies were produced in proof format and given to exposition and government officials and other insiders, but were not made available to the numismatic community as a whole. Few have survived in high grade.

This Plus-graded Premium Gem features the Jefferson design, with sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The impeccably preserved yellow-gold surfaces show no mentionable distractions and eye appeal is terrific. Census: 3 in 66 Cameo (1 in 66+ Cameo), 2 finer (5/16). NGC ID# BYMF, PCGS# 87482

MODERN BULLION COINS

1989 Half-Ounce Gold Eagle, MS70 One of Four Flawless Submissions at PCGS

4898 1989 Half-Ounce Gold Eagle MS70 PCGS. This is a must-have half-ounce Gold Eagle for the Registry enthusiast. Unmarked lemon-gold surfaces radiate satiny luster and feature fully struck relief elements. Production dropped to 44,829 business strikes in the series' fourth year, and the 1989 is one of the key dates in the set. This is only the second time we have offered an MS70 PCGS example. Population: 4 in 70 (4/16). NGC ID# 26NA, PCGS# 9832

1991 Half-Ounce Gold Eagle, MS70 Elusive This Fine

4899 1991 Half-Ounce Gold Eagle MS70 NGC. The 1991 is the final half-ounce Gold Eagle struck with the Roman numeral date. Examples are common in MS69, but perfect MS70 coins are scarce. NGC lists 81 pieces in this grade and PCGS only 18 (4/16). This representative is fully struck with mint-fresh yellow-gold luster and an appropriately high degree of eye appeal. NGC ID# 26NC, PCGS# 9852

1993-P Half-Ounce Gold Eagle Elusive PR70 Deep Cameo

4900 1993-P Half-Ounce Gold Eagle PR70 Deep Cameo PCGS. While the concept of a truly scarce modern issue may seem odd to many collectors, the 1993-P half-ounce Gold Eagle proof is just such a coin in perfect PR70 Deep Cameo condition. Proof half-ounce Gold Eagle mintage figures began to decline in 1993, with the Philadelphia Mint producing only 43,819 coins that year. Surviving examples are plentiful in the absolute sense but PCGS has seen only 141 coins in the perfect PR70 Deep Cameo grade. This piece is fully struck with eye-catching cameo contrast and seemingly infinite depth of mirroring in the fields. NGC ID# 28YF, PCGS# 9873

1995 Half-Ounce Gold Eagle, MS70
Only Six Top-Graded Examples at PCGS

- 4901 1995 Half-Ounce Gold Eagle MS70 PCGS.** The Saint-Gaudens-designed obverse and Miley Busiek reverse are each fully brought-up. Each side boasts delicate lemon-gold color and satiny luster over absolutely pristine surfaces. One of 53,474 half-ounce Gold Eagles struck in 1995, yet the date is rarer in MS70 than most others in the series. Population: 6 in 70 (4/16). NGC ID# 26NG, PCGS# 9892

1995 Half-Ounce Gold Eagle, MS70
Only Six Coins So Fine at PCGS

- 4902 1995 Half-Ounce Gold Eagle MS70 PCGS.** The half-ounce 1995 Gold Eagle is extremely rare in PCGS-certified MS70. Only six coins are reported so fine at that service (4/16), one of which is represented here. This glittering beauty is fully struck and showcases flawless, mint-fresh luster with proportionately superb eye appeal. NGC ID# 26NG, PCGS# 9892

1997 Half-Ounce Platinum Eagle, MS70
One of 10 Coins This Fine at PCGS

- 4903 1997 Half-Ounce Platinum Eagle MS70 PCGS.** The 1997 is the debut issue in the half-ounce Platinum Eagle series. Coins graded MS69 are plentiful, but MS70 representatives are rare. PCGS lists only 10 examples so fine (4/16). The present coin is razor-sharp and beautifully preserved with strong contrast between the frosty fields and the mirrored accents. NGC ID# 26TC, PCGS# 99752

1999 Quarter-Ounce Platinum Eagle, MS70
Only Five Coins So Fine at PCGS

- 4904 1999 Quarter-Ounce Platinum Eagle MS70 PCGS.** The 1999 quarter-ounce Platinum Eagle is rarely seen in perfect MS70 condition, with five coins at PCGS and 17 at NGC (4/16). This Registry coin showcases full design rendering and mint-fresh luster. The mirrored accents in the design are beautifully displayed. Eye appeal is superb. NGC ID# 26ST, PCGS# 9774

2001 Quarter-Ounce Platinum Eagle, MS70
Rare So Fine at PCGS

- 4905 2001 Quarter-Ounce Platinum Eagle MS70 PCGS.** The 2001 quarter-ounce Platinum Eagle had a small mintage of 21,815 pieces, of which only eight survivors are certified by PCGS as perfect MS70 (4/16). This representative shows full design rendering and flawless, mint-fresh surfaces. An essential Registry Set acquisition and an eye-catching coin. NGC ID# 26SV, PCGS# 9787

TERRITORIAL GOLD

1851 K-6 Humbert Fifty, XF40
Popular Reeded Edge, 887 Thous. Variety

4906 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-6, R.4, XF40 PCGS Secure. CAC. The iconic symbol of the California Gold Rush, these octagonal gold slugs served as the bastion of commerce for a few short years, before most were unceremoniously melted and recoinced into double eagles at the new San Francisco Mint. Few were preserved — and fewer still without problems of excessive cleaning, marks, or rim damage — making problem-free examples of these hefty ingots (“slugs”) perhaps the ultimate acquisition for territorial gold enthusiasts.

This Reeded Edge example displays a nearly unblemished target reverse for the XF grade with particularly sharp borders and corners. Tiny abrasions and lines exist, but they are balanced by a pleasing orange-gold patina. The obverse shows light wear but no heavy marks, and the date is readable as is the legend, AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA. Struck in 887 THOUS gold, from the Kagin-6 dies with its restyled eagle obverse. NGC ID# ANH9, PCGS# 10214

1853 Assay Office Ten, AU58
.900 Thous., K-16 Variety

4907 1853 Assay Office Ten Dollar, 900 Thous. AU58 NGC. K-16, Low R.6. Local merchants petitioned the U.S. Assay Office to issue lower denomination gold coins in early 1853 to deal with a chronic shortage of small change in the region. The Assay Office complied, issuing ten and twenty dollar coinage on an emergency basis from February 23 to March 1, but these coins were necessarily of lower fineness than the .900 alloy specified by the federal government because the firm had no parting acids on hand. When a supply of parting acids finally arrived, the Assay Office produced ten dollar coins with the proper fineness between March and April of 1853. These coins, classified as the K-16 variety of 1853 in Don Kagin's series reference, are quite elusive today and examples are prized by territorial collectors. This attractive near-Mint specimen features lightly abraded orange-gold surfaces that retain much of their original mint luster. The design elements are well-detailed and show just a trace of actual wear. Listed on page 394 of the 2017 *Guide Book*. Census: 2 in 58, 12 finer (4/16). NGC ID# ANHB, PCGS# 10007

COINS OF HAWAII

1880 Hawaii Wailuku Plantation Token, XF40
Half Real, Medcalf 2TE-7

- 4908 1880 Wailuku Plantation Half Real XF40 PCGS. Medcalf 2TE-7. Distributed as a chit to workers on the sugar cane plantation, the half real token carried a Spanish-American denomination equivalent to 6 1/4 cents. The tokens were struck by a blacksmith and are usually found unevenly struck, but the present piece has a consistent strike and shows only light wear. The moderately granular surfaces are toned walnut-brown. Listed on page 421 of the 2017 *Guide Book*. NGC ID# 2UBP, PCGS# 600509

PATTERNS

1836 Cap and Rays Gold Dollar
Judd-67, PR65 Cameo
Coin-Turn Original Striking

- 4909 1836 Gold Dollar, Judd-67 Original, Pollock-70, R.5, PR65 Cameo NGC. CAC. The design was engraved by Christian Gobrecht and the obverse was Mexican influenced with a Liberty cap surrounded by rays of glory. The reverse features the denomination 1 D. within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Struck in gold with a 10% copper alloy with a plain edge.

Judd-67 is the first gold dollar pattern struck in anticipation of a future coinage. It is also one of the few gold patterns, actually struck in gold that can be obtained at a somewhat reasonable price. Both originals and restrikes exist for Judd-67, with one overstruck example known on an 1859 gold dollar as its host. That piece is clearly visible on the USPatterns.com website. In general, original strikes have a coin turn while restrikes have a medallion turn. However, there are exceptions, with some restrikes showing a coin turn. This design was restruck in 1844 with a 10% silver alloy, and it was also struck in silver, copper, and orioide or copper-nickel.

This coin-turn piece is believed to be from the original striking period. The fields show remarkable depth of reflectivity on each side with noticeably frosted devices. Close examination reveals only the slightest contact marks, the only one distinctive enough to use as a pedigree identifier is a slight scuff located within the D in the denomination.

Ex: Eric P. Newman Collection / Central States Signature (Heritage, 4/2013), lot 3909. PCGS# 411795

**1838 Half Dollar Pattern, Gem Proof
Judd-73 Restrike, Beautifully Toned**

- 4910** 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR65 NGC. CAC. On the obverse, Liberty faces left and wears a diadem and a ribbon inscribed LIBERTY. 13 stars and the date fill the periphery. On the reverse, an eagle flies level in a plain field with the statutory legend UNITED STATES OF AMERICA around, and the denomination HALF DOLLAR below. Christian Gobrecht is credited as designer, and the face of Liberty bears a strong resemblance to her counterpart on the Liberty eagle, also introduced in 1838. Struck in silver with a reeded edge. A beautifully toned Gem draped in peach, violet, and aquamarine shades. The medal turn and bold reverse die cracks confirm restrike status. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 296N, PCGS# 11288

**1866 Shield Nickel Pattern, Struck in Nickel
Judd-507, PR65 Cameo**

- 4911** 1866 Shield Nickel, Judd-507, Pollock-591, R.5, PR65 Cameo PCGS. A transitional pattern that lacks the rays found on non-pattern 1866 Shield nickels. Struck in nickel with a plain edge. The reverse differs slightly from 1867 No Rays business strikes, since a star points to the center of the first A in AMERICA, rather than between AM. However, some 1867 proofs were struck from this reverse subtype. Shield nickels had a series of production problems, especially in the first year of issue — most notably lack of depth in the proof mirrors, softness of strike, and peripheral die cracks — all due to the Mint's inexperience with striking nickel and the presence of the rays motif on the reverse. This piece shows none of those problems. The surfaces are bright, the fields deeply mirrored with sharply contrasted frosted devices. The strike is complete throughout and we see no die cracking. NGC ID# 29L6, PCGS# 860703

**1867 Quarter, Struck in Copper
Judd-590, PR65 Red and Brown**

- 4912** 1867 Quarter Dollar, Judd-590, Pollock-654, High R.7, PR65 Red and Brown NGC. Regular dies trial issue. Struck in copper with a reeded edge. These off-metal strikings were likely struck for sale to collectors as part of complete copper sets. USPatterns.com states that T. Harrison Garrett owned a set and a double set is owned by the Iowa State Historical Department. Probably only half a dozen examples are known. The surfaces are very close to full red over each side. For the pattern collector who is also value-conscious, this piece is a must-see. A couple of obverse carbon spots are the only detracting feature we see, and they do little to diminish the overall appeal of this dies trial striking. NGC ID# 29MK, PCGS# 70802

**1868 Five Cent Pattern in Copper
Judd-627, PR64 Red**

- 4913** 1868 Five Cents, Judd-627, Pollock-696, R.7, PR64 Red PCGS. The obverse closely resembles the contemporary three cent nickel. The reverse is a pattern design, and has a laurel branch with ribbon framing a large 5 and CENTS in curved letters. IN GOD WE TRUST is at the the upper border. Struck in copper with a plain edge. The planchet has the diameter of a quarter and the rims are very broad, usual for Judd-627. The red mint luster shows just the faintest olive iridescence on the reverse, and flyspecks of carbon are undoubtedly the reason the piece does not grade even higher. Brightly reflective fields on each side. NGC ID# 29NH, PCGS# 80844

**1869 SIL. / NIC. Dime Pattern
Judd-714, PR65
Cupro-Nickel Experimental Strike**

- 4914** 1869 Ten Cents, Judd-714, Pollock-793, Low R.7, PR65 PCGS. 30.9 grains. The obverse features the regular issue Liberty Seated design without the date. The reverse is inscribed SIL. 9 / NIC. 1 / 1869. Struck in cupro-nickel composition with a reeded edge. While one would naturally assume (as did Adams-Woodin and the early editions of the Judd book) that this pattern would be a metallurgical trial for a silver / nickel alloy, that has not turned out to be the case. The only pieces known of this pattern are in copper-nickel alloy. This particular piece was SEM-EDX tested by S&N Labs on certificate number 60939.64/2510321 and turned out to be 75% copper and 25% nickel. The surfaces have the "hard" look of a nickel coin with satiny mint luster and light oil-slick iridescence over each side. In spite of the high nickel content, the strike details are strongly brought up, and there are no obvious or detracting abrasions. A light streak of discoloration through the S in SIL. Is noted, and is an easy pedigree identifier. Fine diagonal die striations are seen to the upper-right of the figure of Liberty, a characteristic of all patterns in this series.

Ex: David B. Silberman, Jr. Collection (Bowers and Merena, 11/1988), lot 5392; ANA Signature Auction (Heritage, 8/1998), lot 5103; David Cassel Collection / ANA Signature (Heritage, 8/2015), lot 5958. NGC ID# 29RV, PCGS# 60939

**1869 Standard Silver Quarter in Silver
Judd-733, PR67**

- 4915** 1869 Standard Silver Quarter Dollar, Judd-733, Pollock-814, R.5, PR67 NGC. The bust of Liberty faces right, wearing a headband with LIBERTY on it. The peripheral legend is UNITED STATES OF AMERICA, with IN GOD WE TRUST on a scroll in exergue. On the reverse, an oak and laurel wreath surrounds 25 CENTS, and with STANDARD SILVER 1869 around the rim. Struck in silver with a reeded edge. This is a magnificently preserved example that displays rich, original toning on each side with strong mirrored flash in the fields. The finest certified. NGC ID# 29SH, PCGS# 60960

**1870 Standard Silver Dime in Copper
Judd-839, PR65 Red and Brown**

- 4916** 1870 Standard Silver Ten Cents, Judd-839, Pollock-930, R.7, PR65 Red and Brown PCGS Secure. CAC. A capped bust of Liberty faces right with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. On the reverse 10 CENTS and 1870 are within a wreath of cotton and corn with STANDARD above. Struck in copper with a reeded edge. The reflective fields serve to enhance the autumn leaves toning seen over each side. The surfaces are problem-free and show no obvious carbon spotting. PCGS# 71083

**1870 Standard Silver Quarter in Aluminum
Boldly Contrasted Judd-910, PR65 Cameo**

- 4917** 1870 Standard Silver Quarter, Judd-910, Pollock-999, High R.7, PR65 Cameo PCGS. CAC. Ex: Denali Collection. The Standard Silver design depicts a bust of Liberty that faces right on the obverse with a cap ornamented with three stars and a ribbon inscribed LIBERTY running through the lower hair, the motto IN GOD WE TRUST on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in aluminum with a reeded edge. A beautiful, radiant, and sharply contrasted example of this rare pattern. This piece is two grade points finer than the non-Cameo Lemus-Queller Collection example. Population: 2 in 65 Cameo, 2 finer (5/16).

Ex: FUN Signature (Heritage, 1/2012), lot 6017; New York Signature (Heritage, 3/2012), lot 3902. PCGS# 800066 Base PCGS# 61154

1870 Aluminum Standard Silver Quarter
Judd-923, PR66 Cameo

- 4918** 1870 Standard Silver Quarter Dollar, Judd-923, Pollock-1028, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. The obverse shows Liberty facing right, the hair tied in a loose bun behind the head, with additional flowing curls across the shoulder. The headband is inscribed LIBERTY with a star above the forehead. The reverse is the usual Standard Silver design with the denomination inside a wreath, the date below. Struck in aluminum with a plain edge. An estimated six or so examples extant in this metal and with this edge combination. The surfaces show strong contrast on each side and deeply mirrored fields. A telltale identifier is in the lower right obverse field: a streak of grease that was struck into the coin at the time of manufacture. Ex: *Central States Signature* (Heritage, 4/2012), lot 5414. PCGS# 800082

1870 Standard Silver Half Dollar in Aluminum
Judd-955, Reeded Edge, PR66 Cameo

- 4919** 1870 Standard Silver Half Dollar, Judd-955, Pollock-1099, High R.7, PR66 Cameo PCGS. CAC. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST is placed on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in aluminum with a reeded edge. About half a dozen of these aluminum patterns survive, and none can equal this exemplary Cameo proof. The stone-white surfaces display minor carbon and are devoid of contact or hairlines. The centers show slight incompleteness of strike, usual for patterns from this die marriage. PCGS# 505671 Base PCGS# 61201

1870 Standard Silver Half in Aluminum
Judd-956, PR66 Cameo

- 4920** 1870 Standard Silver Half, Judd-956, Pollock-1100, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. A Standard Silver design with Liberty wearing a diadem. The date is in small digits within the wreath, STANDARD centered above. The N in IN and the E in WE are lightly repunched within the motto, which resides in a scroll below the bust. Struck in aluminum with a plain edge. This high-quality specimen's obverse has little patina, crisp contrast, and only a few surface irregularities in the right obverse field. The reverse shows a light layer of toning, but the contrast is clear save at a small rough patch in the center. A sizable piece, yet impressively light in the hand.

Ex: *Chicago Signature* (Heritage, 8/2013), lot 5964. PCGS# 800036

1872 Three Cent Nickel in Aluminum
Judd-1186, PR66 Cameo

- 4921** 1872 Three Cent Nickel, Judd-1186, Pollock-1326, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. The regular dies of the 1872 three cent nickel. Struck in aluminum with a plain edge. Like Judd-1185, this pattern uses regular dies and an off-metal planchet; unlike the Judd-1185, which plausibly could have been a trial for a bronze three cent coin, the aluminum Judd-1186 was a nonsensical choice for a replacement metal, and so those pieces almost certainly were struck as favors to collectors. Indeed, the eye appeal is delicate on this Premium Gem specimen, faintly blue-tinted where not aluminum-white from frost. Great contrast and eye appeal.

Ex: *FUN Signature* (Heritage, 1/2011), lot 5374; *Chicago Signature* (Heritage, 8/2013), lot 5971. PCGS# 800039 Base PCGS# 61457

End of Session Three

SESSION FOUR

GSA DOLLARS

- 4922 1881-CC GSA MS66 NGC. VAM-2.** A sharply struck and thoroughly lustrous high-grade example of the popular low mintage Carson City issue. Brilliant save for wisps of olive-gray across the left obverse. The box and certificate of GSA issue accompany the lot. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126
- 4923 1884-CC GSA MS65 Deep Mirror Prooflike NGC.** The GSA release of the 1970s yielded close to 1 million 1884-CC Morgan dollars, but few can match the Deep Mirror Prooflike surfaces of this Gem. Fully frosted and untuned, each side has incredible jet-black mirrors that produce bold contrast. Band-certified in the black GSA holder of issue. NGC ID# 254M, PCGS# 518874 Base PCGS# 497153
- 4924 1885-CC GSA MS65 NGC. VAM-3.** Infrequent blushes of butter-gold toning visit the margins of this otherwise brilliant Gem. Lustrous and nicely struck with smooth fields and minor facial marks. The GSA box and certificate are included. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1885-CC GSA Dollar, MS66
VAM-2A, Clashed N

- 4925 1885-CC GSA MS66 NGC. VAM-2A.** A nicely struck and thoroughly lustrous Premium Gem. Glimpses of honey-gold toning adorn predominantly brilliant surfaces. VAM-2A is the middle die state of the VAM-2 dies. The dies are lightly cracked and strongly clashed, but the radial crack of VAM-2B is absent. The box and certificate of GSA issue are included. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

MORGAN DOLLARS

- 4926 1878 8TF Pierced Eyelid, VAM-6, MS65 PCGS.** A short, vertical die line through Liberty's eyelid gives VAM-6 its "Pierced Eyelid" moniker. This Gem example displays a bold strike and frosty, radiant luster. The interiors are brilliant, framed by a halo of light golden peripheral toning. A few light grazes on Liberty's cheek limit the grade. NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072
- 4927 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** A pleasing Gem of the introductory eight tailfeathers subtype. Lustrous and lightly toned with a bold strike and smooth fields. The cheek shows only delicate marks. Minor die doubling on both sides is characteristic of VAM-17, the most available among the few dozen 8TF VAMs. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4928 1878 8TF Doubled Date, VAM-18, MS65 PCGS.** The entire obverse is boldly doubled on this 8TF variety, most notably the date, stars, and LIBERTY. The reverse is a Hooked Beak variety. This elusive die marriage is rare in Gem condition. The present example displays frost-white luster and semiprooflike fields. Only a touch of strike weakness is seen on the central high points. Eye appeal is superb. NGC ID# 253H, PCGS# 133819 Base PCGS# 7072

- 4929 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** The seven tail feathers and parallel arrow feathers identify the popular Reverse of 1878. This spectacular Gem offers well-detailed design elements and lustrous, well-preserved surfaces, under vivid shades of golden-brown, gray, and violet toning. PCGS has graded 44 numerically finer examples (4/16). NGC ID# 2TY3, PCGS# 7074

- 4930 1878 7TF Reverse of 1879 MS65 NGC.** An essentially untuned reverse cedes to electric-blue, lavender, and orange-gold patina on the obverse. Lustrous surfaces are suitably struck and well preserved. PCGS has seen 22 numerically finer specimens (4/16). NGC ID# 253L, PCGS# 7076

1878 7TF Morgan, MS64+ Deep Mirror Prooflike
Cameo Contrast

- 4931 1878 7TF Reverse of 1879 MS64+ Deep Mirror Prooflike PCGS.** This Deep Mirror Prooflike dollar displays stark white-on-black contrast and sharp, frosty design elements. The mirrored fields show scattered light marks that preclude a Gem grade, but the eye appeal is nonetheless pleasing. Hints of light golden toning appear around the extreme outer peripheries. The 1878 7TF Reverse of 1879 dollar is seldom seen this fine in DMPL. Population: 38 in 64 (6 in 64+) Deep Mirror Prooflike, 6 finer (4/16). NGC ID# 253L, PCGS# 97077

- 4932 1878-CC MS65 NGC.** Vibrant, frosty luster and deep original toning generate strong eye appeal on this Gem-graded 1878-CC Morgan dollar. The hues include crimson, forest-green, olive, gold, and lavender. The strike is sharp, and a few marks on Liberty's cheek define the grade.
Ex: Central States Signature (Heritage, 4/2012), lot 10345 (as PCGS MS63). NGC ID# 253M, PCGS# 7080

- 4933 1878-CC MS65 PCGS.** A fantastic first-year Carson City Morgan dollar with strong cartwheel luster. Frosted on the devices with a stronger reflective element on the minimally toned reverse. Eye appeal is excellent for the grade.
Ex: FUN Signature (Heritage, 1/2012), lot 6913. NGC ID# 253M, PCGS# 7080

- 4934 1878-CC MS65 PCGS.** A beautifully toned Gem example of this debut Carson City Morgan issue, showing a bold strike and frosty, vibrant luster. Each side displays sun-gold, lavender-gray, crimson, and aquamarine hues intermingled around the design elements. Eye appeal is quite pleasing. NGC ID# 253M, PCGS# 7080

- 4935 1878-CC MS65 NGC.** A vibrantly lustrous, brilliant Gem example of the debut Carson City Morgan dollar, showing razor-sharp motifs and semiprooflike fields. A few faint grazes on the cheek are all that preclude an even finer grade. Eye appeal is excellent. NGC ID# 253M, PCGS# 7080

- 4936 1878-CC MS64+ Prooflike PCGS. CAC.** Brilliant, mirrored fields give this high-end Choice 1878-CC Morgan dollar attractive cameo contrast on each side. The devices are fully struck and frosty, and abrasions are minimal. An outstanding coin for the Carson City Morgan dollar collector. NGC ID# 253M, PCGS# 7081

- 4937 1878-CC MS65 Prooflike ANACS.** Prooflike 1878-CC Morgan dollars are elusive in Gem and finer condition. This piece displays bold, frosty design elements and highly reflective fields. Tinges of sun-gold appear around the peripheries, and a few small marks on the cheek and in the left obverse field determine the grade. NGC ID# 253M, PCGS# 7081
- 4938 1878-S MS66+ PCGS.** A high-end Premium Gem representative of this popular first-year issue, with sharply detailed design elements throughout and vibrant mint luster mixed with areas of prooflike reflectivity on both sides. A few hints of golden-tan toning visit the impeccably preserved surfaces. PCGS has graded 36 numerically finer examples (4/16). NGC ID# 253R, PCGS# 7082
- 4939 1878-S MS64 Deep Mirror Prooflike NGC.** A sharply detailed Choice specimen from the first year of the Morgan dollar design, this attractive coin displays deeply reflective surfaces that contrast profoundly with the frosty devices and show only minor signs of contact. NGC has graded 29 numerically finer examples (5/16). NGC ID# 562C, PCGS# 97083
- 4940 1879-CC XF45 PCGS. CAC.** The 1879-CC is one of the low-mintage keys to the Carson City series. This lightly worn Choice XF specimen offers lightly abraded lavender-gray surfaces, with a few highlights of greenish-gold toning. NGC ID# 253U, PCGS# 7086
- 4941 1879-CC — Struck-Thru Obverse — AU50 PCGS.** The mint-made strike-through resembles a pea pod and measures 7 mm x 1 mm. It overlaps obverse star 6, near 9 o'clock. This key date Carson City dollar has a pearl-gray obverse, while the reverse displays dusky gunmetal, sea-green, and ruby-red shades. NGC ID# 253U, PCGS# 7086
- 4942 1879-CC Capped Die, VAM-3, Top 100, XF45 PCGS.** A Top 100 Variety. This sharply detailed VAM-3 retains tiny hints of luster in the protected peripheral fields. Each side shows pleasing champagne-tinted battleship-gray patina and smooth surfaces. Eye appeal is pleasing. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-O Dollar, MS65
Rarely Seen Finer**

- 4943 1879-O MS65 PCGS.** This Gem 1879-O silver dollar displays satiny luster with a hint of champagne color as is typical of the issue. The strike, however, is above-average. This New Orleans issue is infrequently available in MS65, and finer examples are rare. This piece shows a couple of faint grazes on the cheek that are within the confines of the grade. PCGS lists 25 numerically finer examples (4/16). NGC ID# 253X, PCGS# 7090
- 4944 1879-S Reverse of 1878 MS64 PCGS.** The throwback S-mint reverse with parallel arrow fletchings paired with an 1879-dated obverse die. This crisply struck piece is strongly lustrous with light golden overtones on the obverse.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1690. NGC ID# 253W, PCGS# 7094
- 4945 1879-S MS67+ PCGS.** This Plus-Graded Superb Gem Morgan dollar displays sharply detailed, richly frosted design elements and virtually pristine surfaces with vibrant mint luster throughout. Overall visual appeal is enhanced by a few hints of greenish-gold toning at the rims. NGC ID# 253X, PCGS# 7092

- 4946 1879-S MS67+ PCGS. CAC.** A Plus-graded Superb Gem representative of this well-produced issue, with sharply detailed design elements and vibrant mint luster that mixes with prooflike reflectivity at certain angles. The surfaces are impeccably preserved and eye appeal is tremendous. NGC ID# 253X, PCGS# 7092
- 4947 1879-S MS67 Prooflike PCGS.** *Ex: Ray George.* Slender ruby-red, forest-green, and gold bands grace the lower left border of this magnificently preserved Superb Gem. The fields are flashy, and the strike is full aside from the tips of a few obverse denticles. Population: 51 in 67 (3 in 67+) Prooflike, 3 finer (4/16).
From The Cocoa Beach Collection. NGC ID# 253X, PCGS# 7093
- 4948 1880 MS65+ PCGS.** A sharp, vibrantly lustrous high-end Gem example of this early Philadelphia issue, showing virtually brilliant surfaces. A few small marks on the cheek and in the field prevent a higher grade. Finer representatives of the 1880 Morgan dollar are elusive. NGC ID# 253Y, PCGS# 7096
- 4949 1880/79-CC Reverse of 1878, VAM-4, MS64 Prooflike PCGS.** A Top 100 Variety. While most collectors are familiar with the scarcity of the Reverse of 1878 on the 1880-CC, few have ever seen a Prooflike example. This is a brilliant coin that is fully struck. The devices are heavily frosted and show sufficient contrast against the deeply mirrored fields to easily warrant the Prooflike assessment. Scattered typical marks define the grade. Population: 39 in 64 (2 in 64+) Prooflike, 15 finer (5/16).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1706, which realized \$1,495. NGC ID# AP7P, PCGS# 41131 Base PCGS# 7109
- 4950 1880-CC 8 Over High 7, VAM-5, MS65 PCGS.** A Top 100 Variety. The underdigit 7 is plainly visible beneath the second 8 in the date on this sought-after VAM variety. This Gem example displays frost-white luster and a bold strike. The fields are semiprooflike, delivering strong eye appeal. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 4951 1880-CC 8 Over High 7, VAM-5, MS65 PCGS.** A Top 100 Variety. The remnants of an undertype 7 are visible high in the top loop of the second 8 in the date. This impressive Gem is sharply detailed and brightly lustrous, with attractive hints of greenish-gold toning. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 4952 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC.** A Top 100 Variety. One of three different prominently overdated varieties found on 1880-CC silver dollars. (VAM-4 and VAM-6 are the other two overdated marriages.) These were created at Philadelphia as an economy measure, and shipped to Carson City where, presumably, they would receive less notice. This highly lustrous and nicely struck Premium Gem has smooth fields and light golden toning. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1880-CC Silver Dollar, MS66+
VAM-5, 8 Over High 7**

- 4953 1880-CC 8 Over High 7, VAM-5, MS66+ PCGS.** A Top 100 Variety. The underlying 7 is clearly visible beneath the second 8 in the date on this popular VAM variety. The present coin is among the finest available at the Premium Gem grade level. The strike is razor-sharp, and the brilliant surfaces display frosty, vibrant luster. A couple of faint marks on the cheek are all that prevent a Superb Gem designation. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

4954 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS. Among the finest VAM-6 1880-CC dollars at PCGS, showing frosty, brilliant luster and well-struck design elements. Only a few faint grazes on Liberty's cheek preclude an even finer grade. VAM-6 is similar to VAM-5, but the 7 underdigit in the date is slightly lower. Population: 39 in 66 (4 in 66+), 0 finer (5/16). NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

4955 1880-CC MS65+ PCGS. Gold and sky-blue peripheral toning gives this frosty, radiant high-end Gem outstanding eye appeal. Slight strike weakness is seen on the hair above Liberty's ear, but the eye appeal is unhindered. Grade-defining marks are trivial in nature. NGC ID# 2542, PCGS# 7100

4956 1880-O MS64 PCGS. Small or Micro O. A lustrous and lightly toned near-Gem with a good strike and a well preserved reverse. A couple of minor marks on the portrait limit the grade. A scarce date in better Mint State grades despite a sizable mintage.
Ex: Long Beach Signature (Heritage, 9/2004), lot 8375, which realized \$1,437.50. NGC ID# 2543, PCGS# 7114

4957 1880-O MS64 NGC. Small or Micro O. Faint suggestions of peripheral color yield swiftly to dazzling silver-white on this O-mint near-Gem. Minor strike softness is typical for the issue, but the bold eye appeal is not. NGC has certified just 28 numerically finer pieces (5/16).
Ex: ANA Signature (Heritage, 3/2010), lot 1345. NGC ID# 2543, PCGS# 7114

1880-O Morgan Dollar, MS64 Intense Obverse Toning

4958 1880-O MS64 PCGS. CAC. The 1880-O Morgan dollar was produced in large numbers and the issue is not difficult to locate in grades up to MS64, but finer examples are decidedly elusive. This well-detailed Choice example is spectacularly toned in shades of violet, gray, and greenish-gold, with most of the color on the obverse. Vibrant mint luster shines through the patina and only minor signs of contact are present. PCGS has graded 39 numerically finer examples (4/16). NGC ID# 2543, PCGS# 7114

4959 1880-O MS63 Deep Mirror Prooflike PCGS. This attractive Select specimen is sharply detailed for a New Orleans issue, and the frosty design elements contrast boldly with the deeply reflective fields. The reflective surfaces show the expected number of minor, scattered contact marks for the grade. Population: 50 in 63 Deep Mirror Prooflike, 36 finer (4/16). NGC ID# 2543, PCGS# 97115

4960 1881-CC MS66 PCGS. VAM-2. VAM-2 shows the 8s in the date doubled inside their upper loops. This Premium Gem example displays brilliant, frosty mint luster and sharply struck design elements. Eye appeal is excellent. Finer 1881-CC dollars are out of reach for budget-restricted enthusiasts. NGC ID# 2549, PCGS# 7126

4961 1881-CC MS66 PCGS. VAM-2. Bright luster radiates from both sides of this Premium Gem, and a well-executed strike emboldens the design elements. Untoned surfaces reveal just a few minor grade-consistent marks. VAM-2 has doubled 8s in the date.
Ex: Central States Signature (Heritage, 4/2008), lot 2747. NGC ID# 2549, PCGS# 7126

4962 1881-CC MS66+ PCGS. A Plus-graded Premium Gem Morgan dollar from the always popular Carson City Mint, this coin offers sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 2549, PCGS# 7126

4963 1881-O MS65+ PCGS. The 1881-O is a less often seen date in high grade. This Plus-designated Gem displays an impressively bold strike and satiny, untuned luster. At first glance, this coin appears a grade point finer, but a loupe reveals some faint, tiny grazes on the cheek that preclude the PCGS designation. PCGS has seen 30 finer representatives (4/16). NGC ID# 2548, PCGS# 7128

4964 1881-O MS65 Prooflike NGC. Crisply struck devices stand out nicely against the mirrored fields. White surfaces are free of any significant contact marks. Prooflike 1881-O Morgans are common, but most are in AU or low Mint State grades. Full Gem Prooflikes are rare. Census: 6 in 65 (1 in 65+) Prooflike, 1 finer (4/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 10046; Central States Signature (Heritage, 5/2005), lot 9504; Dallas Signature (Heritage, 11/2005), lot 3148. NGC ID# 2548, PCGS# 7129

4965 1881-S MS67 PCGS. CAC. 30th Anniversary Green Label Holder. This 1881-S Morgan dollar is a dream coin for the type collector. The availability of the issue will make the price affordable, while the extent of the eye appeal will surpass even the most strict expectations. The strike is full, and the satiny surfaces radiate cartwheel luster. The obverse displays a wide crescent of rainbow toning along the left and lower margins, while the reverse has a brilliant interior with vivid rainbow hues along the left-hand border. A couple of tiny nicks on Liberty's chin are the only flaws. NGC ID# 2549, PCGS# 7130

4966 1881-S MS67+ PCGS. CAC. The wide availability of the 1881-S in ultra-high grades has made it a fan favorite for decades. This mint-fresh Superb Gem is fully brilliant and pinpoint-sharp without a mark of note. Thick, frosty luster cartwheels over each side, explaining the impeccable eye appeal. NGC ID# 2549, PCGS# 7130

4967 1881-S MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. This remarkable 1881-S dollar is almost flawlessly preserved, hence the coveted Plus designation/CAC green label combination. The strike is full, and radiant luster rolls over the untouched surfaces. A faint blush of light golden toning warms the eye appeal. NGC ID# 2549, PCGS# 7130

1881-S Dollar, MS67+ Exceptional Toning

4968 1881-S MS67+ PCGS. CAC. It's a good thing this coin is photographed. A photo can explain so much more than words in this case. It appears the coin was in a bag face-up and three other dollars lay around it, leaving the center of the obverse exposed to the air and canvas bag. The reverse is completely brilliant. Fully struck, of course, with the bright mint luster one expects from an '81-S. NGC ID# 2549, PCGS# 7130

4969 1882 MS66+ PCGS. CAC. A uniform layer of patina blankets each side, the obverse showing melded shades of lavender and peach-orange and the reverse showing iridescent pumpkin-gold, olive-green, and rose. The sharp strike and top-notch preservation match the marvelous aesthetic quality. PCGS has seen merely nine finer submissions (4/16). NGC ID# 254A, PCGS# 7132

4970 1882-CC MS66+ PCGS. CAC. This Plus-designated Premium Gem 1882-CC dollar displays dazzling frost-white luster with a hint of gold toning on the upper reverse. The strike is sharp, and the fields are virtually prooflike. Modest cameo contrast is seen on each side. Finer examples of this Carson City issue are infrequently seen, and finer CAC coins are rare. NGC ID# 254S, PCGS# 7134

- 4971 1882-O MS65+ PCGS.** Characteristically satiny luster displays a hint of light golden toning on this Plus-graded Gem 1882-O Morgan dollar. The surfaces are well-preserved, and eye appeal is pleasing. PCGS has seen 59 finer submissions (4/16). NGC ID# 254C, PCGS# 7136
- 4972 1882-O/S VAM-4, Early Die State, MS64 PCGS.** A Top 100 Variety. The "O/S Recessed" variety, which shows the curve of the mintmark lower within the O, relative to the scarcer VAM-3. This piece is lustrous and well-preserved with light peripheral rose-gold toning. The strike is sharp.
Ex: ANA Signature (Heritage, 8/2010), lot 5262; FUN Signature (Heritage, 1/2011), lot 5924. NGC ID# CH4Z, PCGS# 133892 Base PCGS# 7138
- 4973 1882-S MS67+ PCGS. CAC. VAM-14.** The date is lightly doubled on this VAM variety. As a type coin, this high-end Superb Gem 1882-S dollar is exceptional. The strike is bold, and the radiantly lustrous surfaces are devoid of mentionable flaws. The reverse has a hint of light champagne toning, while the obverse shows more colorful pastel hues with a splash of vivid multicolor toning along the left-hand border. NGC ID# 254F, PCGS# 7140
- 4974 1883 MS65 Deep Mirror Prooflike PCGS.** The design elements of this impressive Gem are sharply detailed and richly frosted, creating intense contrast with the deeply reflective prooflike fields. The surfaces show a few minor hairlines and contact marks, but overall eye appeal is outstanding. Housed in a green label holder. PCGS has graded 10 numerically finer examples (5/16). NGC ID# 254G, PCGS# 97143
- 4975 1883 MS65 Deep Mirror Prooflike NGC.** Nicely contrasted between the fields and devices with Gem-quality preservation on the surfaces. Close inspection reveals the affects of heavy die rust on Liberty's cheek, but there are no distracting abrasions. Census: 44 in 65 Deep Mirror Prooflike, 8 finer (5/16).
Ex: FUN Signature (Heritage, 1/2005), lot 11224. NGC ID# 254G, PCGS# 97143
- 4976 1883-CC MS66+ PCGS. VAM-3A.** An interesting VAM that boasts clashed letters and a dash below the second 8 in the date. Only a wisp of golden patina adorns this lustrous Carson City type coin. The preservation is excellent despite a field graze above the uppermost arrowhead. NGC ID# 254J, PCGS# 7144
- 4977 1883-CC MS66+ PCGS. CAC.** Gorgeous shades of green, blue, rose, and gold blend across the obverse, leaving the reverse brilliant with just a splash of orange patina near UNIT. The resulting visual quality of this Plus-designated and CAC-approved Premium Gem is extraordinary. Incompleteness at the centers is of little consequence. NGC ID# 254J, PCGS# 7144
- 4978 1883-CC MS66 Prooflike PCGS. VAM-4.** The date is faintly doubled on VAM-4. This Premium Gem Prooflike 1883-CC dollar displays a bold strike and noticeable cameo contrast. The fields are deeply mirrored, and there are no major abrasions. PCGS lists only eight finer Prooflike representatives (5/16). NGC ID# 254H, PCGS# 7145

- 4979 1883-CC MS66+ Prooflike PCGS.** Borderline deep prooflike mirroring gives this high-end Premium Gem 1883-CC dollar impeccable eye appeal and cameo contrast. Traces of light gold toning on the frosty devices attests to the originality of the surfaces, and the strike is sharp. There are no significant abrasions. PCGS lists only eight finer Prooflike 1883-CC dollars (4/16). NGC ID# 254H, PCGS# 7145
- 4980 1883-CC MS65 Deep Mirror Prooflike PCGS.** An untoned, gleaming cameoed Gem with deeply mirrored fields and sharp, frosty design elements. A few stray marks and grazes are not out of line for the grade. Finer Deep Mirror Prooflike 1883-CC dollars are infrequently seen, heightening the appeal of this piece. NGC ID# 254H, PCGS# 97145
- 4981 1883-CC MS65 Deep Mirror Prooflike PCGS.** Frost-white, sharply struck design elements are showcased amid deeply mirrored, brilliant fields on this Gem 1883-CC Morgan dollar. A few trivial marks are not distracting, and both sides displays noticeable cameo contrast. Finer Deep Mirror Prooflike coins are infrequently seen. NGC ID# 254H, PCGS# 97145

**1883-CC Morgan Dollar, MS66
Spectacular Deep Mirror Prooflike Example**

- 4982 1883-CC MS66 Deep Mirror Prooflike PCGS.** The 1883-CC Morgan dollar claims a fairly generous Carson City mintage of 1.2 million pieces and examples are not too difficult to locate in high grade. However, the issue is conditionally very rare in grades above MS66, with Deep Mirror Prooflike surfaces. This delightful Premium Gem exhibits well-detailed design elements with a rich coat of mint frost that contrasts profoundly with the deeply reflective prooflike fields. The impeccably preserved surfaces add to the terrific eye appeal. PCGS has graded two numerically finer examples (4/16). NGC ID# 254H, PCGS# 97145
- 4983 1883-S MS62 PCGS.** A notable condition rarity grades finer than MS63, this MS62 example shows many qualities of a finer grade. The surfaces are semiprooflike throughout both sides and the strike is sharp. Brilliant except for some powder-gray toning in the left field on the reverse and a touch of pale-gold on the rims, the coin displays nice cartwheel luster and strong eye appeal. Abrasions are minimal for the assigned grade. NGC ID# 254K, PCGS# 7148
- 4984 1883-S MS62 NGC.** A sharp, lustrous example of this conditionally elusive San Francisco issue, showing traces of lavender toning on the champagne-tinted surfaces. Liberty's cheek has some faint grazes that limit the grade, but there are no singularly bothersome abrasions. NGC ID# 254K, PCGS# 7148
- 4985 1884 MS66+ PCGS.** This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster on both sides. The well-preserved, mostly brilliant surfaces show a few delicate highlights of lavender toning. NGC ID# 254L, PCGS# 7150

1884 Silver Dollar, MS67

- 4986 1884 MS67 NGC.** Dusky autumn-brown toning enriches this lustrous and intricately impressed Superb Gem. Outstanding preservation further distinguishes this silver type coin from the pack. A plentiful Philadelphia issue in bagmarked Mint State, but very scarce in the present quality. Census: 35 in 67 (3 in 67★), 2 finer (4/16). NGC ID# 254L, PCGS# 7150

1884 Morgan Dollar, MS67 Seldom Encountered Any Finer

- 4987 1884 MS67 PCGS.** Ex: Gold River. From a huge Philadelphia mintage of 14 million pieces, this delightful Superb Gem is one of the finest survivors. The design elements are uniformly sharp, and the impeccably preserved surfaces show a few delicate hints of golden-tan and lavender toning at selected angles. Vibrant mint luster adds to the incredible eye appeal. PCGS has graded three numerically finer examples (5/16). NGC ID# 254L, PCGS# 7150
- 4988 1884-CC MS66+ PCGS. CAC. VAM-2.** The date and mintmark are lightly repunched. The borders display a trace of golden patina. A highly lustrous Carson City type coin that boasts a precise strike and smooth surfaces. Although the 1884-CC appeared in quantity within the GSA sales, most examples are far more abraded than the present piece. NGC ID# 8BBF, PCGS# 7152
- 4989 1884-S AU58 NGC.** An attractive near-Mint example of this popular issue, from a mintage of 3.2 million pieces, this coin exhibits well-detailed design elements with just a trace of wear on the high points. The pleasing surfaces radiate vibrant mint luster and show the expected number of minor abrasions for the grade. NGC ID# 254P, PCGS# 7156
- 4990 1884-S AU58 NGC.** The 1884-S Morgan dollar is an elusive issue in all Mint State grades. This attractive borderline-Uncirculated specimen offers lightly abraded, lustrous surfaces and well-detailed design elements that show just a trace of actual wear. NGC ID# 254P, PCGS# 7156
- 4991 1884-S AU58 NGC.** Surprisingly vibrant luster rolls around in the fields of this near-Mint 1884-S Morgan dollar, while the design elements show only slight high-point wear. Warm golden peripheral toning attests to the originality of the surfaces. Eye appeal is excellent for the grade. NGC ID# 254P, PCGS# 7156
- 4992 1884-S AU58 PCGS.** A lustrous near-Mint example of this better San Francisco issue, showing original golden toning that lightens toward the centers. The strike is bold, and only a brush of friction is seen over the high points of the design. NGC ID# 254P, PCGS# 7156

- 4993 1884-S AU58 PCGS.** Nearly full luster complements a faint golden hue on this near-Mint 1884-S Morgan dollar. The strike is bold, and slight friction over the eagle's breast and Liberty's ear is all that precludes a Mint State designation. Light surface chatter is consistent with the grade. NGC ID# 254P, PCGS# 7156
- 4994 1884-S AU58 PCGS Secure.** This still-lustrous, near-Mint 1884-S Morgan dollar displays semiprooflike fields with brilliant interiors and light golden peripheries. The 1884-S is an elusive date in Uncirculated condition, making high-end AU coins such as this highly popular. NGC ID# 254P, PCGS# 7156
- 4995 1885 MS67 NGC.** Decidedly scarce at the MS67 grade level, the 1885 Morgan dollar is very rare in finer grades. This delightful Superb Gem is sharply detailed and brightly lustrous, with virtually pristine surfaces. A few hints of lavender and pale gold toning enhance the outstanding eye appeal. NGC ID# 254R, PCGS# 7158
- 4996 1885 MS66 Deep Mirror Prooflike NGC.** The frosty, sharp design elements on this Deep Mirror Prooflike 1885 Morgan dollar are starkly contrasted against the fields, and a halo of light golden toning frames the peripheries. Liberty's cheek is clean, and only a few marks in the adjacent field limit the grade. Census: 55 in 66 (2 in 66+, 2 in 66★, 1 in 66+★) Deep Mirror Prooflike, 5 finer (5/16). NGC ID# 254R, PCGS# 97159
- 4997 1885-CC MS65 PCGS.** A sharply detailed Gem from the famous Carson City Mint, with a low mintage of 228,000 pieces, this coin offers well-preserved surfaces that show a mix of vibrant mint luster and considerable prooflike reflectivity in the fields. A few subtle hints of greenish-gold toning add to the outstanding eye appeal. NGC ID# 254S, PCGS# 7160
- 4998 1885-CC MS65 PCGS.** Subtle highlights of lavender-gray toning visit the well-preserved, lustrous surfaces of this attractive Gem, with sharply detailed design elements and outstanding eye appeal. From a mintage of just 228,000 examples. NGC ID# 254S, PCGS# 7160
- 4999 1885-CC MS65 NGC.** An impressive Gem Morgan dollar from the famous Carson City Mint, this piece exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces display a few delicate hints of lavender toning. NGC ID# 254S, PCGS# 7160
- 5000 1885-CC MS66 PCGS. VAM-2.** Dash under second 8. This is the last of the widely distributed Carson City issues, with 130,823 examples released from Treasury vaults during the 1970s. Translucent rainbow tones gently grace the obverse of this Premium Gem dollar. The mostly brilliant reverse exhibits traces of multicolor patina near the lower margins. Strongly struck with great eye appeal. NGC ID# 254S, PCGS# 7160
- 5001 1885-CC MS66 PCGS.** A spectacular Premium Gem example of this popular issue from the Carson City Mint, with sharply detailed design elements and vibrant mint luster throughout. A few hints of golden-tan toning visit the immaculate surfaces, adding to the outstanding visual appeal. NGC ID# 254S, PCGS# 7160
- 5002 1885-O MS67 PCGS.** The impeccably preserved surfaces of this delightful Superb Gem are mostly brilliant, with an attractive crescent of green and lavender on the obverse rim. The design elements are well-detailed and vibrant mint luster adds to the outstanding visual appeal. PCGS has graded only one numerically finer example (4/16). NGC ID# 254T, PCGS# 7162
- 5003 1885-O MS65+ Deep Mirror Prooflike PCGS. CAC.** The reflective mirrors that surround the thick, frosty devices appear limitless, giving each side impeccable eye appeal and explaining both the Deep Mirror Prooflike designation and CAC approval sticker. A fully struck and brilliant New Orleans dollar. NGC ID# 254T, PCGS# 97163

- 5004 1885-S MS64 Prooflike NGC.** The 1885-S Morgan dollar is often seen with a soft strike, but this attractive Choice example exhibits razor-sharp definition on all design elements and the richly frosted devices contrast boldly with the deeply reflective fields. The brilliant surfaces show the expected number of minor contact marks for the grade. NGC has graded eight numerically finer examples (4/16). NGC ID# 254U, PCGS# 7165
- 5005 1886 MS67 PCGS. CAC.** This delightful Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces display shades of magenta and greenish-gold toning, with most of the color on the reverse. PCGS has graded seven numerically finer examples (4/16). NGC ID# 254V, PCGS# 7166
- 5006 1886-O MS61 NGC.** Available in circulated condition, the 1886-O Morgan is a better date in Mint State. This piece displays an above-average strike with satiny luster and a blush of champagne toning. Light, scattered abrasions contribute to the grade. NGC ID# 254W, PCGS# 7168
- 5007 1886-O MS62 NGC.** Faint reddish-gold toning appears at the top of the obverse and at the bottom reverse rim, yet this scarce O-Mint is mostly brilliant. The strike shows only minor weakness on the central high points, as usually seen. Abrasions are limited to a few light marks on the cheek, neck, and widely separated across the frosty fields. Pleasing for the MS62 level. NGC ID# 254W, PCGS# 7168
- 5008 1886-O MS62 PCGS.** The 1886-O Morgan dollar is an elusive issue in higher Mint State Grades. This attractive MS62 example offers well-detailed design elements, with just a touch of the usual softness on the hair above the ear, and lustrous surfaces with a scattering of minor contact marks on both sides. NGC ID# 254W, PCGS# 7168
- 5009 1886-O MS63 NGC.** The 1886-O Morgan dollar is seldom encountered in high grade. This attractive MS63 specimen offers well-detailed design elements and lustrous surfaces, with a scattering of minor contact marks on both sides. Hints of greenish-gold and lavender-gray toning visit the pleasing surfaces. NGC ID# 254W, PCGS# 7168
- 5010 1886-S/S VAM-2, Top 100, MS65 PCGS.** A Top 100 Variety. The 1886-S is a better date with a low mintage of 750,000 coins. Examples are rarely found in finer than this Gem. Translucent blue, golden-russet, and violet patina lightly tints the obverse. Comparable hues occur marginally around the brilliant reverse. Frosty with minor central softness. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 5011 1886-S/S VAM-2, MS64 Prooflike PCGS.** A Top 100 Variety. Undesignated by PCGS as VAM-2, but the mintmark serifs are clearly repunched. A brilliant and impressively mirrored representative of this lower mintage issue. Light marks on the portrait and reverse field are commensurate with the designated grade. PCGS# 42793 Base PCGS# 7171
- 5012 1887 MS67 PCGS. CAC.** The 1887 Morgan dollar is a scarce issue in MS67, and finer examples are virtually unobtainable. This remarkable Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with impeccably preserved surfaces and terrific eye appeal. PCGS has graded only one numerically finer example (4/16). NGC ID# 27Y3, PCGS# 7172
- 5013 1887 MS65+ Deep Mirror Prooflike PCGS.** An essentially untuned, deeply mirrored Gem 1887 Morgan dollar, showing a bold strike and stark white-on-black contrast. Only three MS65 Deep Mirror Prooflike dollars are Plus-graded at PCGS, and just 34 coins are finer (4/16). NGC ID# 254Y, PCGS# 97173
- 5014 1887/6 VAM-2, Top 100, MS65 PCGS.** A Top 100 Variety. For many years, MS65 examples of the 1887/6 overdate were virtually nonexistent. Today, quite a few have been certified, but higher grade pieces remain nearly impossible to locate. This bold example has frosty mint luster with sharp design features and brilliant white surfaces. PCGS has only certified 15 finer examples (5/16). Ex: *Houston Signature (Heritage, 12/2008)*, lot 2932. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174
- 5015 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The popular O-mint Morgan dollar overdate, offered here as a lustrous, largely silver-white coin with a hint of peripheral gold-orange toning. A few scattered, minor contact marks are consistent with the grade. Ex: *FUN Signature (Heritage, 1/2010)*, lot 2932, which realized \$1,725. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 5016 1887-O MS65 PCGS.** The 1887-O Morgan dollar is seldom encountered with a decent strike and vibrant mint luster, but this delightful Gem possesses both of those attributes, along with well-preserved surfaces that show a few subtle traces of pink and golden-tan toning at selected angles. PCGS has graded 10 numerically finer examples (4/16). NGC ID# 2547, PCGS# 7176
- 5017 1887-O MS65 PCGS.** The 1887-O Morgan dollar claims a large mintage of 11.3 million pieces, but striking problems and insipid mint luster prevent most survivors from achieving the MS65 designation. This elusive, sharply detailed Gem offers vibrant mint luster and well-preserved surfaces throughout. PCGS has seen 10 numerically finer coins (4/16). NGC ID# 2547, PCGS# 7176
- 5018 1887-S MS65 PCGS.** A virtually untuned Gem 1887-S Morgan dollar with well-struck design elements. The lustrous surfaces display just a few luster grazes that prevent an even finer grade. PCGS lists 30 numerically finer representatives (4/16). Ex: *Pittsburgh Signature (Heritage, 8/2004)*, lot 6869. NGC ID# 2554, PCGS# 7180
- 5019 1887-S MS65 PCGS.** The 1887-S Morgan dollar is seldom encountered in grades above MS65. This impressive Gem is sharply detailed and well-preserved, with vibrant mint luster throughout. PCGS has graded 30 numerically finer examples (4/16). NGC ID# 2554, PCGS# 7180
- 5020 1888 MS66+ PCGS. CAC.** This Plus-graded Premium Gem is spectacularly toned in shades of golden-brown, lavender-gray, and purple, with impeccably preserved lustrous surfaces under the patina. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded 38 numerically finer examples (4/16). NGC ID# 26KF, PCGS# 7182
- 5021 1888-O MS65 Deep Mirror Prooflike PCGS.** A hint of light golden toning accentuates the stark cameo contrast of this Gem Deep Mirror Prooflike 1888-O Morgan dollar. The strike is bold, and Liberty's cheek is clean. An elusive issue in so fine of a grade. Population: 63 in 65 Deep Mirror Prooflike, 4 finer (5/16). NGC ID# 2556, PCGS# 97185
- 5022 1888-O Doubled Arrows, VAM-9, MS65 Deep Mirror Prooflike NGC.** A Top 100 Variety. The arrows on the reverse are strongly doubled on this popular Morgan dollar variety. This delightful Gem exhibits sharply detailed, frosty design elements that contrast dramatically with the deeply reflective fields. Highlights of golden-brown and magenta toning enhance the outstanding eye appeal. NGC ID# 2556, PCGS# 43020 Base PCGS# 97185
- 5023 1888-S MS65 PCGS.** A frosty, collectible Gem example of the 1888-S Morgan dollar, showing well-struck design elements and untuned surfaces. Only a few faint grazes on the cheek limit the grade. PCGS has seen 32 numerically finer submissions (5/16). NGC ID# 2557, PCGS# 7186

5024 1888-S MS65 PCGS. A brilliant and thoroughly lustrous Gem with smooth fields and a good strike. The portrait displays occasional small marks. Seldom encountered any finer. A lower mintage issue and a better date. NGC ID# 2557, PCGS# 7186

5025 1889-CC VF20 PCGS. This is an outstanding mid-grade 1889-CC dollar, showing original battleship-gray patina and problem-free surfaces. Wear is even and consistent with the grade. The 1889-CC is the rarest of the Carson City Morgans and is one of the biggest key dates in the entire series. NGC ID# 2559, PCGS# 7190

5026 1889-CC VF30 PCGS. A well-detailed coin for the grade with problem-free surfaces that show original olive-gray and pewter patina. The 1889-CC is the key to the Carson City short set and is highly sought-after in all grades. NGC ID# 2559, PCGS# 7190

5027 1889-CC XF40 PCGS. A pleasing XF representative of this important Carson City key, with lightly worn and lightly abraded surfaces that show attractive shades of lavender-gray and golden-tan toning. From a mintage of 350,000 pieces. NGC ID# 2559, PCGS# 7190

5028 1889-CC — Improperly Cleaned — NGC Details. AU. The silver-gray obverse is subdued and displays scattered small dark freckles. The almond-gold and ice-blue reverse is partly lustrous, and has a pleasing appearance despite minor hairlines. The 1889-CC is the rarest Carson City Morgan issue. NGC ID# 2559, PCGS# 7190

5029 1889-CC — Cleaning — PCGS Genuine. AU Details. The 1889-CC is the rarest Carson City Morgan dollar issue. This lightly circulated representative has a cream-gray obverse. The reverse displays wheat-gold, lilac-red, and navy-blue toning. The surfaces are lightly hairlined and inoffensively abraded. NGC ID# 2559, PCGS# 7190

5030 1889-CC — Improperly Cleaned — NGC Details. AU. Unquestionably the Carson City issue to own if possible, the 1889-CC saw a mintage of just 350,000 pieces. This survivor is bright from a light cleaning, but surfaces are relatively unabraded except for the delicate hairlines that are visible with a lens. The strike is sharp with only slight softness above the ear. More obtainable for many collectors in this condition and an opportunity for the perceptive bidder. NGC ID# 2559, PCGS# 7190

1889-O Dollar, Attractive Gem Colorful Obverse, Brilliant Reverse

5031 1889-O MS65 PCGS. The 1889-CC overshadows the 1889-O, and rightfully so, but the latter is still conditionally elusive. In fact, it is very scarce in Gem, and very rare in higher grades. As a rule, the issue was poorly produced. This example is remarkably attractive with intermingled peach-gold, rose, and blue hues over the obverse. Cartwheel luster emanates through the toning. The other side is wholly brilliant. Well-struck without any marks to report. PCGS has seen merely 10 finer submissions (4/16). NGC ID# 255A, PCGS# 7192

1889-O Morgan Dollar, MS65 Clean-Cheeked Gem

5032 1889-O MS65 PCGS. Ex: Gold River. Occasional glimpses of gold toning visit this primarily stone-white Gem. The portrait is uncommonly unabraded, and field marks are trivial aside from a graze near the C in AMERICA. The strike is good given its New Orleans origin, although the centers lack absolute definition. NGC ID# 255A, PCGS# 7192

1889-O Silver Dollar, MS65 Few Seen Finer

5033 1889-O MS65 NGC. Although the 1889-O was not one of the most plentiful issues in the Treasury Department releases of the early-to-mid-1960s, enough examples had been dispersed in earlier years to make this a relatively obtainable date in today's market. Nevertheless, most collectors will have to settle for an example that grades no finer than MS64. As a Gem, the '89-O, which typically comes lackluster, poorly struck, and/or heavily abraded, is scarce. The present example is uncommonly well-produced with the slightest bit of strike incompleteness on the hair over Liberty's ear. Billowy mint frost overlays both sides, and there are no singularly distracting bagmarks. A find for the advanced Morgan dollar date collector. Census: 54 in 65 (1 in 65+), 8 finer (4/16). Ex: FUN Signature (Heritage, 1/2003), lot 8041. NGC ID# 255A, PCGS# 7192

5034 1889-S MS65 PCGS. A well-struck, frosty, and brilliant example of this conditionally elusive San Francisco issue. This Gem 1889-S dollar shows clean fields, and only a few minor ticks behind Liberty's eye limit the grade. Finer examples are scarcely seen. NGC ID# 255B, PCGS# 7194

5035 1890 MS65+ PCGS. A large mintage of 16.8 million pieces explains the thousands of coins certified in the MS62 to MS64 range. Gems are much more elusive, especially high-end examples like this, and most collectors would consider Premium Gems unattainable. Beautifully toned surfaces include blue, rose, violet, and gold hues. Typically struck. NGC ID# 255C, PCGS# 7196

5036 1890 MS65 Prooflike PCGS. Prooflike examples of this Philadelphia issue are rare in Gem condition. This PCGS coin is brilliant and displays boldly rendered design elements. Some cameo contrast is observed by the mirrored fields. A light graze on Liberty's jaw is the only mentionable abrasion. Population: 25 in 65 Prooflike, 1 finer (4/16). NGC ID# 255C, PCGS# 7197

5037 1890 MS64 Deep Mirror Prooflike PCGS. The well-detailed, frosty design elements of this attractive Choice Morgan dollar show an unusual degree of contrast with the lightly marked, deeply reflective fields. The well-preserved surfaces display vivid highlights of emerald-green and more subtle hints of lavender-gray toning. PCGS has graded nine numerically finer examples (4/16). NGC ID# 3VX7, PCGS# 97197

5038 1890-CC MS64 PCGS. Frosty, untuned luster gives this Choice 1890-CC Morgan dollar outstanding eye appeal. The strike is also well-executed, and grade-limiting abrasions are minimal. Finer coins become increasingly elusive and expensive. NGC ID# 255D, PCGS# 7198

5039 1890-CC MS64 PCGS. A sharply struck and shining near-Gem representative of this popular Carson City issue. Delicate cream and rose tints visit the otherwise silver-white surfaces. Grade-limiting abrasions are minimal.
Ex: Central States Signature (Heritage, 4/2008), lot 2798. NGC ID# 255D, PCGS# 7198

5040 1890-CC MS64+ PCGS. 30th Anniversary Green Label Holder. A lustrous, well-struck 1890-CC dollar with essentially untuned, satiny surfaces. A few faint, grade-limiting abrasions on the obverse are only visible from certain angles. This issue is elusive any finer. NGC ID# 255D, PCGS# 7198

5041 1890-CC MS64 PCGS. CAC. The Carson City Mint manufactured 2.3 million Morgan dollars in 1890. Coins were released into circulation at the time, but many remained in vaults until the mid-20th century. Thus, Uncirculated 1890-CC dollars are moderately plentiful through MS64. This all-brilliant near-Gem shows a thick layer of frost over well-preserved surfaces. The design elements are strongly impressed. NGC ID# 255D, PCGS# 7198

5042 1890-CC MS64 PCGS. CAC. Lovely multicolor toning adorns the peripheral regions on this Choice 1890-CC Morgan dollar, leaving the interiors with a blue-gray and lavender-gold hue. The strike is a trifle soft on the central high points, but there are no distracting abrasions. NGC ID# 255D, PCGS# 7198

5043 1890-CC MS64 Prooflike PCGS. Only a relatively small number of 1890-CC Morgan dollars were stored in Treasury vaults and later released in the 1960s and '70s. As a result, the issue is quite elusive in high grade, despite the adequate mintage of 2.3 million pieces. This sharply detailed Choice example features well-preserved surfaces with much prooflike reflectivity in the fields. PCGS has graded 17 numerically finer examples (4/16). NGC ID# 255D, PCGS# 7199

5044 1890-O MS65 PCGS. The 1890-O is available through MS65, but the certification totals drop off precipitously in higher grades. Iridescent orange, violet, and cobalt-blue patina covers the obverse of this Gem Louisiana dollar, while the other side is mostly brilliant with a ring of gold and rose toning around the rims. The centers are predictably soft for the facility. NGC ID# 255E, PCGS# 7200

5045 1890-O MS65 PCGS. Pleasing golden-brown and aquamarine toning ensures the eye appeal of this lustrous, nicely preserved, and moderately well-struck New Orleans Gem. A high mintage but conditionally elusive issue. PCGS has seen only 27 numerically finer representatives (5/16). NGC ID# 255E, PCGS# 7200

5046 1890-O MS65 PCGS. Attractive shades of sea-green and violet toning blanket the well-preserved surfaces of this impressive Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded 27 numerically finer examples (5/16). NGC ID# 255E, PCGS# 7200

5047 1890-S MS65+ PCGS. Fully brilliant surfaces radiate cartwheel mint luster, producing excellent visual appeal. The 1890-S typically comes well-struck, and this high-end Gem Morgan dollar does not disappoint. A small speck appears in the field next to the eagle's right wing. NGC ID# 255F, PCGS# 7202

5048 1890-S MS65+ PCGS. Potent luster and frosty radiance deliver stellar eye appeal on this high-end Gem 1890-S silver dollar. The strike is bold, and the only noticeable toning is a hint of gold near the outer peripheries. A couple of tiny ticks on Liberty's cheek are all that preclude a full Premium Gem grade. NGC ID# 255F, PCGS# 7202

5049 1890-S MS66 PCGS. Largely brilliant obverse surfaces feature a thin veil of violet-gray and gunmetal-blue patina peripherally, while the reverse is entirely toned in similar hues with added accents of gold. This Premium Gem dollar is sharply detailed at the centers. Marks are scant. PCGS reports seven finer submissions (4/16). NGC ID# 255F, PCGS# 7202

5050 1891 MS64+ PCGS. CAC. This Plus-graded Choice specimen displays well-detailed design elements with just a touch of the usual softness on the hair above the ear and the eagle's breast. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 255G, PCGS# 7204

5051 1891-CC MS64 PCGS. The 1891-CC Morgan dollar is a sought-after issue from the Carson City Mint. This attractive Choice example displays lightly marked brilliant surfaces with vibrant mint luster on both sides. The design elements are sharply detailed and overall eye appeal is outstanding. NGC ID# 255H, PCGS# 7206

5052 1891-CC MS64 PCGS. A total of 5,177 1891-CC dollars turned up during the GSA release of the 1970s, a tiny number compared to several earlier Carson City dates. All-brilliant surfaces gleam with bright, frosty luster, illuminating boldly struck design elements. NGC ID# 255H, PCGS# 7206

5053 1891-CC MS64 PCGS. Vivid original toning graces the margins of this Choice 1891-CC dollar, delivering hues of gold, amber-orange, crimson, and aquamarine. The interiors have dusky gray-gold color. The central strike is soft, as is commonly seen on later Carson City Morgans. NGC ID# 255H, PCGS# 7206

5054 1891-CC MS64 NGC. The availability of the 1891-CC dollar declines significantly above MS64. This collectible Choice example shows frosty luster and vivid ocean-blue border toning. The obverse interior is golden, the reverse interior is brilliant with amber hues seen toward the rims. Slight strike weakness occurs on the hair above Liberty's ear.
Ex: Houston Signature (Heritage, 12/2009), lot 8440. NGC ID# 255H, PCGS# 7206

5055 1891-CC MS64+ PCGS. CAC. This Plus-designated Choice 1891-CC Morgan dollar displays a bold strike and frosty, vibrant mint luster. Neither side is toned, and grade-limiting abrasions are trivial. Finer coins become increasingly elusive in succeeding grades. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65 Seldom Encountered Any Finer

5056 1891-CC MS65 PCGS. The 1891-CC Morgan dollar is a better date in the Carson City series, despite the larger than average mintage of 1.6 million pieces. This attractive Gem exhibits sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. A few subtle hints of golden-tan toning enhance the strong eye appeal. PCGS has graded 35 numerically finer examples (4/16). NGC ID# 255H, PCGS# 7206

5057 1891-O MS64+ PCGS. The 1891-O Morgan becomes conditionally scarce at the Gem level. This collectible high-end Choice example displays vibrant, frosty luster that is devoid of significant toning. Only a few faint grazes on the cheek limit the grade. The eagle's breast and the hair above Liberty's ear show mild strike weakness. NGC ID# 255J, PCGS# 7208

**1891-O Dollar, MS64 Prooflike
Among the Finest Prooflike Coins Certified**

5058 1891-O MS64 Prooflike PCGS. The 1891-O is a scarce Morgan dollar issue in Prooflike grades and is even scarcer in Deep Mirror Prooflike. This Choice Prooflike coin has deeply reflective fields warmed by light golden toning. Some blue and lavender color is also seen along the upper-right obverse rim. The strike is slightly weak on the central high points, but the eye appeal is pleasing. This piece is among the finest Prooflike coins certified. Population: 11 in 64 (1 in 64+) Prooflike, 0 finer (5/16). NGC ID# 4J6A, PCGS# 7209

5059 1891-S MS65 PCGS. A carefully preserved, Gem example of this elusive S-mint issue. Radiant, frosty mint luster yields to orange-gold, violet, and aquamarine toning over each side, while boldly struck design elements complete the overall appeal. NGC ID# 255K, PCGS# 7210

5060 1891-S MS65 PCGS. The availability of the 1891-S Morgan declines in MS65, and finer pieces are rare. This Gem example displays frosty, radiant luster and bold design elements. The obverse is brilliant, while the reverse has mottled lavender-gold toning. NGC ID# 255K, PCGS# 7210

**1892 Morgan Dollar, MS65
Iridescent Toning**

5061 1892 MS65 PCGS. From a mintage of just over 1 million pieces, the 1892 Morgan dollar is an elusive issue in high grade and examples that grade better than MS65 are almost unobtainable. This attractive Gem offers well-detailed design elements and well-preserved, lustrous surfaces, under iridescent shades of violet, gray, and golden-brown toning. PCGS has graded five numerically finer examples (5/16). NGC ID# 255L, PCGS# 7212

5062 1892-CC MS62 PCGS. VAM-8A. Brilliant and lustrous with a good strike and the expected number of small marks on the portrait. VAM-8A is among the more distinctive VAMs for this better Carson City issue. The 2 in the date has a die break above the base, and a double set of clash marks accompany Liberty's lips and neck. NGC ID# 255M, PCGS# 7214

5063 1892-CC MS62 PCGS. The fields on this well-struck, frosty 1892-CC Morgan dollar are pleasantly well-preserved, although some abrasions on Liberty's cheek limit the grade. The strike is well-executed, and a vibrant cartwheel effect heightens the eye appeal. Each side shows a hint of pale champagne toning. NGC ID# 255M, PCGS# 7214

5064 1892-CC MS62 NGC. A collectible, lower-end Mint State example of this late-series Carson City issue, showing vibrant, frosty luster and well-struck design elements. Amber-gold toning appears around the peripheries, leaving the interiors mostly brilliant. Scattered abrasions account for the grade. NGC ID# 255M, PCGS# 7214

5065 1892-CC MS63 PCGS. A sharp 1892-CC dollar with satiny luster and brilliant surfaces. Light, scattered abrasions determine the grade, but the vibrant cartwheel effect balances the eye appeal. A slightly better Carson City issue in higher grades. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
First Generation Holder**

5066 1892-CC MS64 PCGS. CAC. This better-date Carson City silver dollar displays dazzling luster and a crisp strike. A whisper of almond-gold toning overlies attractive and carefully preserved surfaces. Certified in a first generation holder, which has a minor horizontal crack near the middle of the left front border. NGC ID# 255M, PCGS# 7214

5067 1892-CC MS63 Prooflike NGC. This impressive Select Morgan dollar displays sharply detailed design elements, with a rich coat of mint frost that contrasts boldly with the deeply reflective fields. The surfaces are lightly marked and appealing. NGC has graded 58 numerically finer examples (4/16). NGC ID# 255M, PCGS# 7215

5068 1892-O MS64+ PCGS. CAC. The obverse is essentially all-brilliant, save for a wisp of golden color near the lower-right border. Cobalt-blue, crimson, and violet-gray tones appear within the design recesses throughout the reverse, though substantial areas of brilliance remain centrally. Typically struck and impressively free of major marks. NGC ID# 255N, PCGS# 7216

1892-O Morgan Dollar, MS65

5069 1892-O MS65 PCGS. From a mintage of 2.7 million pieces, the 1892-O Morgan dollar is seldom available in grades above MS65. This impressive Gem offers well-detailed design elements, with just a touch of the typical softness on the hair above the ear and the eagle's breast. The well-preserved surfaces are brightly lustrous, under highlights of lavender and greenish-gold toning. PCGS has graded six numerically finer examples (5/16). NGC ID# 255N, PCGS# 7216

5070 1892-S AU53 NGC. A bold and original representative of this desirable San Francisco Morgan issue. Luster is absent only on the cheek and in the open fields. The centers show slight wear, but there are no obtrusive marks. A hint of champagne toning graces each side. Ex: Long Beach Signature (Heritage, 2/2007), lot 5656. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, Choice AU
Ideal Collector-Grade Example**

- 5071 1892-S AU55 NGC.** Morgan dollars struck at the California mint in 1892 circulated extensively in the Western region of this country, explaining the prevalence of worn coins and the rarity of high-grade examples. This Choice About Uncirculated dollar showcases bright, untoned surfaces with trivial friction over the devices. A minimally marked example that would stand in nicely for an Uncirculated piece. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU55
Better San Francisco Issue**

- 5072 1892-S AU55 PCGS.** The 1892-S is among the rarest dates in the series in Mint State, making this Choice AU example a highly appealing alternative for the budget-conscious collector. Each side is brilliant with a hint of reflectivity in the fields. The strike is bold, and light chatter appears on each side. Pleasing for the grade. NGC ID# 255P, PCGS# 7218

- 5073 1893 MS63 PCGS. VAM-3.** Booming luster and minimal marks ensure the quality of this low mintage Morgan dollar. For the issue, the MS63 grade provides the best balance between quality and value. VAM-3 has a repunched 3 in the date and minor die doubling on both sides, apparent on Liberty's profile and UNITED. NGC ID# 255R, PCGS# 7220

- 5074 1893 MS63+ PCGS.** A Plus-graded Select specimen, from a low mintage of 378,000 pieces, this coin exhibits sharply detailed design elements and vibrant cartwheel mint luster. The brilliant surfaces show a scattering of minor contact marks that do little to impact the outstanding eye appeal. NGC ID# 255R, PCGS# 7220

- 5075 1893 MS64 PCGS.** Vibrant, frosty luster illuminates the near-Gem surfaces of this semikey Philadelphia Morgan, showing champagne interiors with orange-gold and sea-green peripheries. A few grade-limiting grazes on the cheek are trivial. Finer 1893 dollars are elusive. NGC ID# 255R, PCGS# 7220

- 5076 1893 MS64 PCGS.** Dabs of dusty-olive peripheral toning yield to effective brilliance in the centers. Strongly lustrous and well-defined, and a highly appealing Choice example of this desirable date, which marks the first of three consecutive years of low mintage issues from the Philadelphia Mint.
Ex: *FUN Signature (Heritage, 1/2009)*, lot 4695. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS64
Low-Mintage Philadelphia Issue**

- 5077 1893 MS64 PCGS. CAC.** The small mintage of 378,000 pieces is sometimes overlooked for this scarce Philadelphia issue, overshadowed by the even scarcer 1893-S and 1893-O dollars as well as the popular 1893-CC. The creamy, silver-white surfaces show only a faint hint of gold at the rims with Choice, nearly unabraded surfaces. The strike is incomplete above Liberty's ear as usual, and the eagle's legs and talons are weak, yet the lustrous and clear fields are virtually devoid of contact. CAC endorsed and attractive. NGC ID# 255R, PCGS# 7220

- 5078 1893-CC XF40 PCGS.** Violet and milky blue patination sits on the dark gray surfaces of this Carson City coin, which still has a tiny amount of luster shining through the toning. Worn primarily in the center of Liberty's hair and on the eagle's upper wings and breast, the piece still retains decent obverse detail. A couple of tiny marks on Liberty's cheek are the only abrasions of note. NGC ID# 255S, PCGS# 7222

- 5079 1893-S AG3 NGC. CAC.** This evenly worn 1893-S Morgan will appeal to a range of budget-conscious collectors. The rims are a trifle weak in spots, barely keeping this CAC-endorsed AG coin from a full Good grade. A greenish tint appears on the tan-gray surfaces. Eye appeal is pleasing for this low-end grade.
From *The Rev. Dr. James G. K. McClure Collection*. NGC ID# 255U, PCGS# 7226

- 5080 1893-S VG8 NGC.** All lettering in the legends, mintmark, and the date remain bold on this important low-mintage key, and significant interior detail remains intact on the central design elements. Some scattered, minor contact marks are evident, and the surfaces are blanketed in pleasing shades of lavender-gray and golden-brown toning. NGC ID# 255U, PCGS# 7226

- 5081 1893-S VG10 NGC.** The pleasing dove-gray surfaces of this important Morgan dollar key show a few hints of golden-brown toning and only minor abrasions are evident. Liberty's hair and the eagle's feathers retain significant amounts of interior detail and all lettering and the date are fully legible. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine 12
Problem-Free Collector Coin**

- 5082 1893-S Fine 12 NGC.** This moderately circulated 1893-S dollar displays even wear and attractive battleship-gray patina with hints of olive in the crevices. The surfaces are smooth and appealing. The 1893-S is highly popular in all grades, although mid-level circulated coins with problem-free surfaces have a strong collector base. NGC ID# 255U, PCGS# 7226

- 5083 1893-S — Improperly Cleaned — NGC Details. VF.** The stone-gray and straw-gold surfaces are hairlined, most noticeably on the lower reverse. Marks are relatively few. The mintages of the 1893-S and 1894 are similar, but the 1893-S is much scarcer, likely due to the traditional Western preference for silver coin instead of paper money. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS62
Collectible Mint State Example**

- 5084 1894 MS62 PCGS.** A brilliant, lustrous Mint State example of this semikey Philadelphia issue. The 1894 Morgan dollar had a small mintage of 110,000 coins and is arguably the scarcest P-mint circulation-strike in the series in high grade. This coin displays well-rendered design elements and light, scattered abrasions, as are consistent with the grade. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, AU58 Prooflike
Rarely Seen With Reflective Surfaces**

- 5085 1894 AU58 Prooflike NGC.** Although this scarce P-mint issue's mintage of 110,000 pieces is among the lowest in the series (theoretically resulting in less overworked dies), it is quite unusual to find an example with prooflike qualities. This untoned representative appears to have entered circulation for a brief period of time, but the surviving luster in the protected fields exhibits unmistakable glassy reflectivity. A shallow facial mark is more ill-placed than individually offensive. Census: 6 in 58 Prooflike, 6 finer (5/16). NGC ID# 255V, PCGS# 7229

- 5086 1894-O MS62 PCGS.** Satiny luster shows a light golden hue as it illuminates each side of this 1894-O Morgan dollar. Grade-limiting abrasions are relatively minimal, although considerable strike weakness is seen on the eagle's breast and the hair above Liberty's ear. New Orleans issues of this period are frequently seen with incomplete strikes. NGC ID# 255W, PCGS# 7230

- 5087 1894-O MS62 PCGS.** Original, satiny luster on this Mint State 1894-O Morgan dollar displays a blush of light golden toning. Scattered abrasions limit the grade but pose little distraction for the grade. As is typical of the issue, the central high points of the devices and the lower portion of the wreath are poorly struck. Housed in a green label holder. NGC ID# 255W, PCGS# 7230

- 5088 1894-O MS62 NGC.** This attractive MS62 Morgan dollar displays well-detailed design elements, with just a touch of the typical softness on the hair above the ear and eagle's breast. The brightly lustrous surfaces show some scattered minor contact marks that define the grade. NGC ID# 255W, PCGS# 7230

- 5089 1894-S MS63 PCGS.** A beautifully lustrous and original 1894-S Morgan dollar with a blush of light golden toning. The reverse displays excellent preservation, although light chatter over the obverse limits the grade. Some minor strike weakness on the eagle's breast and the hair above Liberty's ear is not unusual for the issue. NGC ID# 255X, PCGS# 7232

- 5090 1894-S MS63 PCGS.** The 1894-S is a better date in all grades. This Select example displays well-struck design elements and vibrant, frosty luster that is free of obvious toning. A scattering of minor abrasions on Liberty's cheek and in the adjacent field limits the grade. NGC ID# 255X, PCGS# 7232

- 5091 1894-S MS63 NGC.** An attractive Select specimen of this semikey branch mint issue, with sharply detailed design elements and vibrant mint luster that mixes with areas of prooflike reflectivity. The brilliant surfaces show a scattering of minor contact marks on both sides. NGC ID# 255X, PCGS# 7232

- 5092 1894-S MS63+ PCGS.** A high-end Select example of this challenging Morgan dollar issue, with sharply detailed design elements and lustrous surfaces that show prooflike reflectivity in selected areas. Only minor signs of contact are evident and a few hints of greenish-gold toning enhance the considerable eye appeal. NGC ID# 255X, PCGS# 7232

- 5093 1894-S MS64 PCGS.** The 1894-S often stands in for the elusive 1894-P and 1894-O in collectors' date sets. This Choice Morgan dollar showcases brilliant surfaces with frosty luster and well-detailed devices. Minor chatter on the bust truncation and a couple of superficial luster grazes are the only flaws. Housed in a first generation holder. NGC ID# 255X, PCGS# 7232

- 5094 1895-O AU55 NGC.** The 1895-O Morgan dollar is a low-mintage issue that was not well-represented in the Treasury Releases of the 1960s. This Choice AU specimen shows just a touch of actual wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 255Y, PCGS# 7236

- 5095 1895-O AU55 PCGS. VAM-3A.** Light to medium silver-gray and almond-gold toning embraces this partly lustrous and inoffensively abraded example. The 1895-O is key to a collection of New Orleans Morgan dollars. VAM-3A is the "Bearded Eagle" variety, named for the trail of die rust below the eagle's jaw. The 5 in the date is lightly repunched north. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58
Seldom Encountered in High Grade**

- 5096 1895-O AU58 PCGS.** From a small mintage of 450,000 pieces, the 1895-O was one of the few business-strike issues that was never released in bag quantities in the great Treasury releases of the 1960s. This attractive near-Mint specimen exhibits a much better-than-average strike for a New Orleans issue, with just the tiniest touch of softness on the hair above the ear. The lightly abraded, lustrous surfaces are enhanced by highlights of greenish-gold toning at the rims. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Seldom Encountered Any Finer

5097 1895-O AU58 PCGS. This semikey issue displays a medium density grayish-tan patina and pleasing residual luster. A few small obverse abrasions are noted, especially on Liberty's cheek. The design features are generally well impressed, except for weakness on the hair over Liberty's ear. The mintage of 450,000 pieces is low for a Morgan dollar issue, and survivors of this well-traveled New Orleans issue are especially elusive in higher grades.
Ex: ANA Auction (Heritage, 7/2005), lot 6943; Chicago Signature (Heritage, 8/2011), lot 4758. NGC ID# 255Y, PCGS# 7236

5098 1895-S XF45 PCGS. The 1895-S is a low-mintage better date in the series, and this lightly worn Choice XF specimen will be a welcome addition to a fine collection of Morgan dollars. The lightly abraded surfaces are patinated in attractive shades of champagne-gold, lavender-gray, and amber. NGC ID# 255Z, PCGS# 7238

5099 1895-S AU50 NGC. A budget-friendly but well-detailed AU example of this semikey San Francisco issue, showing moderate amounts of luster in the protected regions of the fields. Slight high-point wear accompanies minor chatter on each side, consistent with the grade. NGC ID# 255Z, PCGS# 7238

5100 1896-O MS61 PCGS. The 1896-O is a better date in Uncirculated condition. This MS61 coin is moderately abraded, but the frosty, original luster is most pleasing. Amber and blue peripheral toning adds to the eye appeal. As is expected for the issue, the high points of the central devices are weakly struck. NGC ID# 27ZU, PCGS# 7242

5101 1896-O MS61 NGC. The reverse of this attractive Mint State example displays remarkably clean creamy surfaces, while the obverse shows the expected number of minor contact marks for the grade. Well-detailed design elements and vibrant mint luster add to the considerable eye appeal. NGC ID# 27ZU, PCGS# 7242

5102 1896-O MS61 PCGS. An attractive Mint State specimen of this challenging branch mint issue, with well-detailed design elements and lustrous surfaces that show the minimum number of minor contact marks for the grade. A few hints of prooflike reflectivity are evident in sheltered areas. NGC ID# 27ZU, PCGS# 7242

5103 1896-O MS62 PCGS. A pleasing lower-end Mint State example of this conditionally elusive New Orleans issue, showing frosty luster with traces of tan-gold color. Light grazes on the obverse limit the grade, and characteristic weakness is seen on the central devices. Housed in an old green label holder. NGC ID# 27ZU, PCGS# 7242

5104 1896-O MS62 NGC. This example presents lustrous surfaces with creamy color and relatively minor marks for the assigned grade level. A pleasing Uncirculated example of this scarce issue from the New Orleans Mint.
Ex: Baltimore Signature (Heritage, 3/2009), lot 1483. NGC ID# 27ZU, PCGS# 7242

5105 1896-S — Improperly Cleaned — NGC Details. Unc. Attractive golden-brown and ocean-blue toning graces both sides, but is more iridescent on the reverse. This coruscating and minimally abraded better-date dollar reveals delicate hairlines when observed beneath a loupe.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2564, PCGS# 7244

1896-S Dollar, Frosty MS63

5106 1896-S MS63 PCGS. Typically struck with tremendous mint frost across each side, and brilliant silver surfaces that exhibit not even a trace amount of toning. The obverse has a mildly scuffy appearance that accounts for the grade, but the reverse is surprisingly clean and would certainly grade at least one point higher on its own merits. An attractive Select example from the San Francisco Mint.
Ex: Central States Signature (Heritage, 4-5/2009), lot 3189. NGC ID# 2564, PCGS# 7244

5107 1897 MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed design elements and virtually pristine creamy surfaces, with vibrant mint luster on both sides. Overall eye appeal is terrific. PCGS has graded 32 numerically finer examples (4/16). NGC ID# 27P5, PCGS# 7246

5108 1897-O MS61 PCGS. A collectible Mint State example of this conditionally elusive New Orleans issue, showing a bold strike and brilliant, satiny luster. A few bits of olive toning are seen around the extreme outer peripheries. Light chatter on Liberty's cheek determines the grade. NGC ID# 2565, PCGS# 7248

5109 1897-O MS62 PCGS. Bowers notes that more than 1 million 1897-O dollars were melted out of the 4 million coins struck. Most other pieces were thrust into circulation, and a relatively small percentage survive in Mint State. Fully toned in dusky violet, blue, and gold patina, each side offers softly frosted luster over typically detailed motifs. NGC ID# 2565, PCGS# 7248

5110 1897-O MS62 PCGS. The 1897-O is a slightly better date in Uncirculated condition. This piece displays well-struck motifs and softly frosted, vibrant cartwheel luster. Light, scattered abrasions limit the grade, but the eye appeal is quite pleasing for this New Orleans issue. NGC ID# 2565, PCGS# 7248

5111 1897-O MS62 PCGS. While not full, the strike is sufficiently bold for this conditionally challenging O-mint issue. There are relatively few abrasions, and the eye appeal benefits greatly from original champagne-russet peripheral toning.
Ex: Long Beach Signature (Heritage, 6/2002), lot 6179. NGC ID# 2565, PCGS# 7248

5112 1897-S MS66 PCGS. The 1897-S Morgan dollar is scarce in MS66 condition, and finer examples are rare. This attractive Premium Gem is well-detailed, with virtually pristine surfaces and vibrant mint luster on both sides. PCGS has graded 30 numerically finer examples (4/16). NGC ID# 2567, PCGS# 7250

5113 1897-S MS65 Deep Mirror Prooflike NGC. Freckled orange-gold and sea-green visits the margins, but the remainder of this lustrous Gem is untuned. The centers show only minor inexactness. Certified in a former generation holder. Census: 39 in 65 Deep Mirror Prooflike, 5 finer (5/16). NGC ID# 2567, PCGS# 97251

5114 1898-O MS67 PCGS. Characteristically satiny luster prevails on each side of this Superb Gem 1898-O dollar, illuminating wisps of pale champagne color. The design elements are well-defined, and there are no mentionable abrasions. None are numerically finer at PCGS (5/16). NGC ID# 2569, PCGS# 7254

5115 1898-O MS67 PCGS. This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. PCGS has graded no coins in numerically finer grades (4/16). NGC ID# 2569, PCGS# 7254

5116 1898-O MS65+ Deep Mirror Prooflike PCGS. This delightful Plus-graded Gem exhibits sharply detailed frosty design elements that contrast profoundly with the deeply mirrored fields. The well-preserved surfaces show only the most insignificant signs of contact. PCGS has graded 49 numerically finer examples (4/16). NGC ID# 2569, PCGS# 97255

5117 1898-S MS65 PCGS. The 1898-S Morgan is scarce above MS65, increasing the appeal of this semiprooflike Gem. The strike is bold, and the surfaces are brilliant. A few faint grazes on the cheek are all that limit the grade. NGC ID# 256A, PCGS# 7256

5118 1898-S MS65 PCGS. An untoned example that possesses vibrant luster and a precise strike. Refreshingly free from abrasions, and a quality Gem example of this conditionally elusive San Francisco issue. Finer coins are seldom seen.
Ex: Houston Signature (Heritage, 12/2009), lot 1120. NGC ID# 256A, PCGS# 7256

5119 1899-O MS67 PCGS. Pleasing cartwheel luster swirls over the silver-white surfaces of this Superb Gem O-mint Morgan. The design features are well-defined and the few light marks are within the parameters of the designated grade. Examples grading MS67 will require some diligent searching and are the finest that are likely to be encountered. PCGS has seen a solitary piece finer and NGC has graded none finer (5/16).
Ex: FUN Signature (Heritage, 1/2004), lot 9073. NGC ID# 256C, PCGS# 7260

5120 1899-S MS65 NGC. A gorgeous Gem with satiny silver luster and amazing eye appeal for the grade. Faint splashes of gold toning are evident along parts of the obverse border. Finer coins are elusive.
Ex: Houston Signature (Heritage, 12/2008), lot 3223. NGC ID# 256D, PCGS# 7262

5121 1900 MS66+ PCGS. CAC. This high-end Premium Gem Morgan dollar exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster throughout. A few delicate highlights of lavender toning enhance the terrific eye appeal. PCGS has graded 45 numerically finer examples (4/16). NGC ID# 256F, PCGS# 7264

5122 1900-S MS65 PCGS. A frosty Gem, all-brilliant except for a dash of teal-blue along the reverse rim between 12 and 1 o'clock. This 1900-S Morgan dollar is sharply struck and shows minimal signs of contact. Finer examples of this conditionally elusive San Francisco issue are infrequently seen. NGC ID# 256H, PCGS# 7270

5123 1900-S MS65 PCGS. A well-preserved, well-struck Gem 1900-S Morgan dollar with semiprooflike fields and untuned surfaces. A few faint marks in the left obverse field limit the grade but have little affect on the eye appeal. Finer representatives are elusive. NGC ID# 256H, PCGS# 7270

5124 1901 AU58 PCGS. The 1901 Morgan dollar is a prime condition rarity in high grade. The lightly abraded, lustrous surfaces of this attractive near-Mint example are blanketed in vivid shades of magenta, lavender-gray, and golden-brown toning. The well-detailed design elements show only a trace of wear. NGC ID# 256J, PCGS# 7272

**1901 Dollar, Toned MS61
Conditionally Elusive**

5125 1901 MS61 NGC. Deep russet toning slightly subdues the luster on this Uncirculated 1901 Morgan dollar, although many collectors will appreciate the originality of the patina. The strike is well-executed, and grade-limiting abrasions are masked by the toning. The 1901 is a better date in Mint State, always in demand. NGC ID# 256J, PCGS# 7272

**1901 Dollar, Toned MS61
Scarce in all Mint State Grades**

5126 1901 MS61 NGC. Brilliant silver luster dominates each side of this Mint-fresh Uncirculated 1901, always a preferred issue in the series and genuinely scarce when fully Mint State. Small abrasions and bagmarks on the obverse account for the MS61 grade, yet this example is sharply struck for the issue and the coin displays excellent eye appeal. NGC ID# 256J, PCGS# 7272

5127 1901 Doubled Die Reverse, VAM-3, AU55 ANACS. A Top 100 Variety. The famous and sought-after "Shifted Eagle" doubled die reverse *Guide Book* variety. The strong doubling is easily seen on the eagle's tail feathers. This lightly worn and lightly abraded Choice AU specimen shows attractive highlights of golden-brown and lavender-gray toning. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

5128 1901-S MS64 PCGS. The 1901-S Morgan dollar is a relatively scarce issue in grades above MS64. This attractive Choice example offers well-detailed design elements, with just a touch of softness on the hair above the ear, and well-preserved surfaces with ample mint luster. NGC ID# 256L, PCGS# 7276

5129 1901-S MS64 PCGS. An untuned, satiny example with a few faint grazes on the obverse that preclude Gem classification. The strike is weak in the centers, as usual for this date. The 1901-S becomes elusive above MS64, where this collectible example resides. NGC ID# 256L, PCGS# 7276

5130 1901-S MS64 NGC. An attractive Choice specimen of this popular issue, with well-detailed design elements and vibrant mint luster. The well-preserved surfaces show the minimum number of minor contact marks for the grade. NGC ID# 256L, PCGS# 7276

**1902 Dollar, MS65 Prooflike
Lightly Toned and Reflective**

- 5131 1902 MS65 Prooflike NGC.** This Gem Prooflike 1902 Morgan dollar displays pleasing preservation and warm champagne toning. The obverse stars are weakened by die polishing, but the strike is otherwise sharp. The fields are highly reflective. The 1902 is elusive in Prooflike grades. Census: 18 in 65 Prooflike, 1 finer (4/16). NGC ID# 256M, PCGS# 7279

1903-O Dollar, Vibrantly Lustrous MS67

- 5132 1903-O MS67 NGC.** The 1903-O Morgan dollar is seldom seen in MS67 and is unknown finer. This NGC coin displays expected smooth luster with a pleasing softly frosted texture. Hints of lemon-gold toning appear around the extreme outer peripheries. The hair above Liberty's ear and the eagle's breast show above-average definition. Census: 43 in 67 (1 in 67+), 0 finer (4/16). NGC ID# 256S, PCGS# 7286

**1903-O Morgan Dollar, MS67
Among the Finest Certified**

- 5133 1903-O MS67 NGC.** The 1903-O is a better 20th century date in the Morgan dollar series despite the flood of mint-fresh coins that spewed from a Philadelphia Mint vault in the early 1960s. This is a scarce Superb Gem example that likely originated from that storage vault. The preservation is outstanding, and the satiny surfaces display a blush of light golden toning. The obverse is well-struck, but the reverse shows minor softness on the eagle's breast. Census: 46 in 67 (1 in 67+), 0 finer (5/16). NGC ID# 256S, PCGS# 7286

-
- 5134 1904 MS65 PCGS.** Richly toned in shades of sea-green, lavender-gray, and magenta, this attractive Gem offers well-detailed design elements and well-preserved lustrous surfaces, underneath the patina. PCGS has graded 25 numerically finer examples (4/16). NGC ID# 256U, PCGS# 7290

- 5135 1904 MS65 PCGS. CAC.** A pleasing Gem representative of this better-date Philadelphia issue, with well-detailed design elements and vibrant mint luster, under attractive shades of greenish-gold and magenta toning. PCGS has graded 25 numerically finer examples (5/16). NGC ID# 256U, PCGS# 7290

- 5136 1904-O MS66+ Prooflike PCGS. CAC.** A Plus-graded Premium Gem from the New Orleans Mint, this coin exhibits sharply detailed design elements and lightly marked surfaces that show considerable prooflike reflectivity. Population: 79 in 66 (5 in 66+) Prooflike, 1 finer. CAC: 23 in 66, 0 finer (5/16). NGC ID# 256V, PCGS# 7293

**1904-S Dollar, Lustrous MS62
Border Toning**

- 5137 1904-S MS62 NGC.** Vibrant, frosty luster rolls over each side of this Mint State 1904-S dollar, showing a halo of orange-gold toning around the peripheries. Scattered abrasions determine the grade, mostly on the obverse. The strike is slightly soft on the hair above Liberty's ear. The 1904-S is a better date in Mint State. NGC ID# 256W, PCGS# 7294

-
- 5138 1921-S MS65+ NGC.** The final year of Morgan dollar production saw the California mint strike nearly 22 million examples. Although readily available through MS65, Plus-designated Gems represent a tiny minority of coins certified at that grade level. Finer examples are very scarce. This is a dazzling, all-brilliant dollar with cartwheel luster and pinpoint definition. NGC ID# 256Z, PCGS# 7300

- 5139 1921-S MS65+ PCGS.** 30th Anniversary Green Label Holder. Premium Gem examples of the 1921-S Morgan are scarce, making this Plus-graded MS65 coin highly appealing. The strike shows above-average wreath detail but is still soft on the eagle's breast. Frosty luster rolls around beneath light golden toning, and only a couple of tiny ticks on the cheek limit the grade. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1879 Morgan Dollar, PR63
Richly Toned Second-Year Proof**

-
- 5140 1879 PR63 NGC. CAC.** A generous mintage of 1,100 proof Morgan dollars was accomplished in 1879, all with the slanting arrow feathers that identify the Reverse of 1879. The lightly marked surfaces are richly toned in shades of emerald-green, cobalt-blue, and lilac, with well-detailed design elements and deeply mirrored fields underneath.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 272Z, PCGS# 7314
-

**1880 Morgan Dollar, PR64
Well-Preserved, Richly Patinated Example**

- 5141 1880 PR64 NGC.** A speculation in the proof-only Trade dollar issue of 1880 created an unusually large demand for proof sets that year, and the coat-tail effect of this phenomenon resulted in a large mintage of 1,355 proof Morgan dollars. This attractive Choice example exhibits sharply detailed design elements and lightly marked reflective fields, under vivid shades of greenish-gold and cerulean-blue toning.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2724, PCGS# 7315

**1882 Morgan Dollar, PR63+
Deeply Toned**

- 5142 1882 PR63+ NGC.** Needle-sharp design elements display satiny luster and offer modest cameo contrast despite deep toning on each side. Mostly olive-green and russet-brown hues are seen, although glimpses of gold and rose appear in the fields. Scattered hairlines and marks are masked by the patina. NGC ID# 2726, PCGS# 7317
- 5143 1883 PR60 NGC.** From a generous proof mintage of 1,039 pieces, this pleasing PR60 example displays sharply detailed design elements and reflective fields, under vivid shades of lavender-gray and greenish-gold toning. NGC ID# 2727, PCGS# 7318

**1883 Morgan Dollar, PR63
Well-Produced Proof Issue**

- 5144 1883 PR63 NGC.** The Philadelphia Mint produced a generous total of 1,039 proof Morgan dollars in 1883, to accompany a huge mintage of nearly 12.3 million business-strikes. The issue was especially well-made and this attractive Select specimen shows the sharp strike and deeply mirrored fields that are typical of the mintage. Intense shades of greenish-gold toning cover most of the lightly marked surfaces, with a few hints of violet at the rims.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2727, PCGS# 7318

**1884 Morgan Dollar, PR64
Spectacular Multicolor Toning**

- 5145 1884 PR64 NGC.** The Philadelphia Mint produced 875 proof Morgan dollars in 1884, to accompany a huge business-strike mintage of more than 14 million pieces. This impressive Choice example displays razor-sharp definition on all design elements and the well-preserved surfaces are blanketed in vivid shades of greenish-gold, cerulean-blue, lavender, and gray toning. Reflective fields shine through the patina. Census: 52 in 64, 48 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 272B, PCGS# 7319

**1885 Morgan Dollar, PR64
Iridescent, Multicolor Toning**

- 5146 1885 PR64 NGC.** Iridescent shades of golden-brown and violet toning blanket the lightly marked surfaces of this attractive Choice example, with sharply detailed design elements and deeply mirrored fields that shine through the patina. Eye appeal is outstanding. From a nominal proof mintage of 930 pieces. Census: 54 in 64, 59 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 272E, PCGS# 7320

**1886 Morgan Dollar, PR64
Sharply Struck and Vividly Toned**

- 5147 1886 PR64 NGC. CAC.** From a nominal mintage of 886 pieces, the 1886 proof Morgan dollar is an elusive issue in high grade. This visually appealing Choice example displays vivid shades of emerald-green, cobalt-blue, and lilac toning over well-preserved, lightly marked surfaces. The fields are deeply reflective and the design elements are sharply detailed throughout. CAC: 2 in 64, 8 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 272F, PCGS# 7321

1887 Morgan Dollar, PR64
Only 710 Proofs Struck

- 5148 1887 PR64 NGC. CAC.** Spectacular shades of greenish-gold, lavender-gray, and cerulean-blue patina visit the well-preserved surfaces of this attractive proof Morgan dollar. The design elements are sharply detailed throughout and the fields are deeply mirrored, underneath the toning. Only 710 proofs were struck in 1887. Eye appeal is terrific. CAC: 2 in 64, 10 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZG, PCGS# 7322

1888 Morgan Dollar, PR63
Richly Patinated Example

- 5149 1888 PR63 NGC.** Vivid shades of cerulean-blue, golden-brown, and silver-gray toning visit the obverse of this attractive Select Morgan dollar, while the reverse is evenly patinated in pleasing greenish-gold hues. The design elements are sharply detailed and the surfaces show a scattering of minor hairlines and contact marks that define the grade. Census: 33 in 63, 88 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZH, PCGS# 7323

1890 Morgan Dollar, PR64
Only 590 Examples Struck

- 5150 1890 PR64 NGC.** The 1890 proof Morgan dollar claims a mintage of just 590 examples, a small production total, even by 19th century proof coinage standards. Like many specimens of this issue, this attractive Choice example shows just a trace of softness on the hair strands above Liberty's ear. The fields are deeply reflective and the well-preserved surfaces are blanketed in shades of greenish-gold and powder-blue toning. Census: 34 in 64, 63 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZK, PCGS# 7325

- 5151 1891 PR61 PCGS.** Numerous lines across the mirrored fields on both the obverse and reverse determine the assigned grade, although the in-hand appearance is attractive and that of a finer grade. Amber-gold toning at the margins shows orange and gunmetal-blue accents while the central motifs are silver-white. The 1891 proof mintage was 650 pieces. NGC ID# 27ZL, PCGS# 7326

1891 Morgan Dollar, PR64
Only 650 Pieces Struck

- 5152 1891 PR64 NGC.** An attractive Choice example, from a meager proof mintage of 650 pieces, this specimen exhibits sharply detailed design elements and deeply reflective fields, under vivid shades of cerulean-blue, greenish-gold, and lavender-gray toning. The surfaces are well-preserved and eye appeal is outstanding. Census: 40 in 64, 65 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZL, PCGS# 7326

1894 Silver Dollar, PR63
Comprehensive Multicolor Toning

- 5153 1894 PR63 PCGS.** Rotation beneath a light reveals iridescent apple-green, cherry-red, and pumpkin-gold peripheral patina. Fully struck and nicely mirrored. The lower obverse field is lightly hairlined. Although an 1895 proof is priced beyond reach for most collectors, the 1894 proof is affordable despite its key date status. NGC ID# 2577, PCGS# 7329

- 5154 1897 PR62 NGC.** NGC reports PR62 as the most frequently assigned grade among the 1897 proofs, a telling statistic for the 731 proof dollars struck by the Philadelphia Mint. This uniquely toned proof is sharply struck with an avocado-gold patina, with glimpses of mirrored surface seen only among the stars and above the eagle's head on the reverse. Although the circumstances for acquiring such unusual toning are not known, the preservation is original and the surfaces are technically of a considerably finer grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZV, PCGS# 7332

- 5155 1899 PR62 NGC.** A nominal proof mintage of 846 Morgan dollars was achieved in 1899. This pleasing PR62 example exhibits sharply detailed design elements and deeply reflective fields that show a few minor hairlines and contact marks, with attractive emerald-green and powder-blue toning on the reverse. NGC ID# 27ZX, PCGS# 7334

1899 Morgan Dollar, PR63
Popular End-of-the-19th-Century Proof

- 5156 1899 PR63 NGC. CAC.** According to Mint records, 846 proof Morgan dollars were struck in 1899, with deliveries in March (301 pieces), June (73 examples), September (145 coins), and December (327 specimens). This pattern is a familiar one, as requests for proofs were normally highest in the early months of the year and at Christmas time. Shades of powder-blue, gray, and greenish-gold toning blanket the well-preserved surfaces of this sharply detailed Select specimen, with deeply reflective fields underneath.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 27ZX, PCGS# 7334

1900 Morgan Dollar, PR63+
Sharply Detailed, Nicely Toned

- 5157 1900 PR63+ NGC. CAC.** The 1900 proof Morgan dollar claims a fairly generous proof mintage of 912 pieces, delivered in quarterly batches throughout the year. This Plus-graded Select specimen offers sharply detailed design elements and deeply reflective fields, under attractive shades of cerulean-blue, lilac, and greenish-gold toning. The overall visual appeal is outstanding.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 3KYV, PCGS# 7335

1903 Morgan Dollar, PR63
Spectacular Multicolor Toning

- 5158 1903 PR63 NGC. CAC.** The Philadelphia Mint switched to an all-brilliant finish for proof coins after 1902, reducing the mint frost on the devices and eliminating cameo contrast on the great majority of the coins. This attractive Select example exhibits sharply detailed design elements and deeply mirrored fields with the typical lack of contrast. The lightly marked surfaces are spectacularly toned in shades of cerulean-blue, greenish-gold, and lavender patina.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2823, PCGS# 7338

- 5159 1904 PR58 NGC.** Just a trace of wear shows on the hair above Liberty's ear and the eagle's breast, and the reflective fields of this PR58 specimen show the expected number of hairlines and minor contact marks for the grade. A few hints of greenish-gold toning visit the peripheries. NGC ID# 2824, PCGS# 7339

1904 Morgan Dollar, PR63
Vivid Toning, Only 650 Pieces Struck

- 5160 1904 PR63 NGC. CAC.** Only 650 proof Morgan dollars were struck in 1904. This impressive Select specimen is spectacularly toned in vivid shades of emerald-green, violet-gray, and cobalt-blue. The design elements are sharply detailed throughout and the fields are deeply mirrored under the toning. A few minor hairlines and contact marks explain the grade.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 5161 1921 MS64+ NGC. CAC.** The high relief of the design caused insufficient metal flow in the centers, resulting in some flatness on Liberty's hair on virtually all examples seen. This Plus-graded Choice specimen is sharply detailed throughout and the well-preserved brilliant surfaces radiate vibrant mint luster. NGC ID# 2U4E, PCGS# 7356
- 5162 1921 MS65 NGC.** The well-detailed design elements of this attractive Gem show the always seen touch of softness on Liberty's hair at the temple, but other features are sharp. The well-preserved, lustrous surfaces display pleasing shades of lavender and golden-brown toning. NGC ID# 2U4E, PCGS# 7356
- 5163 1921 MS65+ PCGS.** This inaugural issue and single-year type is perennially sought-after. Its generous mintage and survival rate help to satisfy collector demand through MS65, but finer examples are very scarce. Pastel shades of green, blue, gold, and violet drape minimally marked surfaces. High-relief motifs are incomplete at the centers. NGC ID# 2U4E, PCGS# 7356
- 5164 1921 MS65+ NGC. CAC.** This high-end Gem 1921 Peace dollar is impressively well-defined on the central high points, and the satiny surfaces yield pleasing champagne toning. There are no distinctive abrasions, and eye appeal is excellent. The 1921 is often collected as a one-year type due to its high-relief design. NGC ID# 2U4E, PCGS# 7356
- 5165 1922-D MS66 PCGS.** This Denver issue is accessible through MS65, but Premium Gems prove scarce. Largely brilliant, satiny surfaces display blushes of translucent patina that enhance the eye appeal. A bold die crack travels from Liberty's lower hair strands through TR(VST) to the bust truncation. There are only three higher-graded examples at PCGS (4/16). NGC ID# 257D, PCGS# 7358
- 5166 1922-S MS65+ PCGS.** A hint of light golden toning graces the frosty, vibrant surfaces of this high-end Gem 1922-S Peace dollar, illuminating sharp design elements and excellent preservation. PCGS has seen only 10 finer representatives (4/16). NGC ID# 257E, PCGS# 7359
- 5167 1925-S MS64+ NGC. CAC.** In Gem condition, the 1925-S Peace dollar is a great series rarity. This Plus-graded Choice coin should garner significant attention. The strike is bold, and the frosty surfaces display attractive cartwheel luster. Dusky olive-gold toning blankets each side.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257M, PCGS# 7366

- 5168 1926-D MS65 PCGS Secure. CAC.** Radiant, frosty luster rolls over largely undisturbed surfaces on this CAC-endorsed Gem 1926-D Peace dollar. The strike is sharp, and the luster is brilliant. Only a couple of tiny ticks near Liberty's chin preclude a finer grade. Conditionally elusive above MS65. NGC ID# 257P, PCGS# 7368

**1926-S Silver Dollar, MS66
Only Two Coins Finer**

- 5169 1926-S MS66 PCGS.** The 1926-S Peace dollar is often seen, but it is seldom seen in MS66. This Premium Gem boasts a sharp strike and frosty cartwheel luster with traces of light champagne toning. Barely a few trivial grazes are seen on each side. Only two coins are numerically finer at both services combined. Population: 82 in 66, 2 finer (5/16). NGC ID# 257R, PCGS# 7369

- 5170 1927-S MS64+ PCGS. CAC.** Mixed multicolor toning comprises elements of gunmetal-blue, golden-orange, green, and violet with pronounced brilliance and frosty luster underneath the attractive overlay. Small bagmarks are well-concealed. The 1927-S is a famous low-mintage condition rarity. This high-end Choice dollar would be exceedingly difficult to upgrade. NGC ID# 26J6, PCGS# 7372

- 5171 1928 MS64 PCGS. CAC.** The 1928 Peace dollar is always in demand due to its low mintage of 360,649 pieces. This CAC-endorsed near-Gem boasts frosty luster and sharp design elements. A hint of light golden toning warms each side and aids in masking a few trivial abrasions that preclude Gem classification. NGC ID# 257V, PCGS# 7373

- 5172 1928 MS64+ PCGS. CAC.** The 1928 Peace dollar claims the lowest mintage of the series, at 360,649 pieces. This high-end Choice example displays lightly marked, lustrous surfaces and well-detailed design elements, under delicate shades of pale gold toning. NGC ID# 257V, PCGS# 7373

- 5173 1928-S MS64+ NGC. CAC.** The 1928-S is a costly acquisition as a Gem, but the MS64+ grade is nearly as nice yet much more affordable. This lustrous near-Gem offers rich jade-green and chestnut-gold toning. Smooth aside from minor grazes on the left obverse field. As is the case with many 1928-S silver dollars, IN GOD WE TRUST and the designer's monogram exhibit die doubling. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 257W, PCGS# 7374

**1934-S Peace Dollar, MS62+
Frosty and High-End for the Grade**

- 5174 1934-S MS62+ NGC.** The 1934-S is the scarcest Peace dollar issue in Mint State, coming from a mintage of barely more than 1 million coins. This piece is one of three Plus-graded MS62 coins at NGC (4/16). It is well-struck and has minimal abrasions for the grade, and the frosty luster is unusually vibrant and attractive. Ideal for the budget-conscious collector. NGC ID# 257Z, PCGS# 7377

- 5175 1935 MS66 PCGS. CAC.** This spectacular Premium Gem represents the last Peace dollar issue from the Philadelphia Mint. The design elements are sharply detailed and the impeccably preserved, lustrous surfaces show a few hints of pale gold toning. PCGS has graded no coins in higher numeric grades (4/16). NGC ID# 2582, PCGS# 7378

- 5176 1935-S MS65 PCGS.** Three rays below ONE. Splashes of golden-tan toning encompass the borders, giving way to brilliance at the centers on each side. As usual for the issue, this Gem Peace dollar is sharply rendered with soft, shimmering mint luster. Scattered grazes define the grade. A pleasing final-year representative. NGC ID# 2583, PCGS# 7379

- 5177 1935-S MS65 PCGS.** Three rays below ONE. The San Francisco Mint ceased Peace dollar production after it struck nearly 2 million coins in 1935. Most examples come well-defined with softly frosted luster, as here. Mixed chestnut and steel-blue patina covers about 60% of the obverse, leaving the other areas brilliant. NGC ID# 2583, PCGS# 7379

- 5178 1935-S MS65 NGC.** Three rays below ONE. This spectacular Gem displays sharply detailed design elements throughout and vibrant mint luster on both sides. The well-preserved surfaces show just a trace of golden-tan toning, with outstanding eye appeal. NGC has graded 68 numerically finer examples (4/16). NGC ID# 2583, PCGS# 7379

- 5179 1935-S MS65+ PCGS.** Three rays below ONE. According to Bowers: "This may be the quintessential Peace dollar from a grade viewpoint. Most Mint State pieces are well struck, have satiny lustre, and are very attractive." Such is the case with this Gem. An overlay of golden-russet tones blankets the obverse, while the reverse is mainly brilliant. NGC ID# 2583, PCGS# 7379

- 5180 1935-S MS65 PCGS. CAC.** A shower of copper-russet and light green pastels adorns the obverse peripheries, while the reverse is partially blanketed by dappled brick-red patina on the otherwise light-gray surfaces. The color is unusual but very attractive. Quality-wise, this piece is definitely at the high end of the grade, and worthy of a premium bid. Ex: Long Beach Signature (Heritage, 9/2004), lot 9024. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

**1976-D Eisenhower Dollar, MS67
Popular Type Two Issue**

- 5181 1976-D Type Two MS67 PCGS.** The Type Two Bicentennial dollar is identified by the thin reverse letters, and the position of the second U in UNUM centered below the letter I. This delightful Superb Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster and attractive highlights of golden-brown toning. Population: 27 in 67 (1 in 67+), 0 finer (4/16). NGC ID# B76P, PCGS# 7421

- 5182 1978-D MS66+ PCGS Secure.** The well-preserved surfaces of this Plus-graded Premium Gem are blanketed in shades of attractive golden-brown toning, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded two numerically finer examples (4/16). NGC ID# 258R, PCGS# 7426

End of Session Four

SESSION FIVE

PATTERNS

1850 Three Cent Silver, Choice Proof
Judd-125 Original

- 5183** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR64 NGC. CAC. A Liberty cap dominates the obverse, surrounded by rays. LIBERTY is near the cap base; the date 1850 appears below. On the reverse, UNITED STATES OF AMERICA frames a circular palm branch that encloses the Roman numeral III. Struck in silver with a plain edge. Dappled forest-green and wheat-gold toning overlies the nicely mirrored stone-gray surfaces. Well struck and carefully preserved with a pair of tiny strike-throughs (as made) on the field inside the wreath.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 298G, PCGS# 11536

1850 Cap and Rays Three Cents in Silver
Judd-125, PR65
Ex: Newman

- 5184** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR65 NGC. The obverse shows a Liberty cap with resplendent rays surrounding. LIBERTY is on the bottom part of the cap, and the date 1850 below. A palm branch encircles the entire reverse to form a wreath, enclosing the numeral III. UNITED STATES OF AMERICA rings the rim. Struck in silver with a plain edge. It is thought that originals and restrikes were minted, although they are indistinguishable today. The design is a close copy of Christian Gobrecht's 1836 gold dollar pattern, Judd-67. These patterns were produced in anticipation of regular issue coinage that began the following year. This deeply toned Gem has reflective fields beneath pale gold and cobalt-blue patina with splashes and spots of darker toning.
From The Eric P. Newman Collection / Central States Signature (Heritage, 4/2013), lot 3913. NGC ID# 298G, PCGS# 11536

1855 Flying Eagle Large Cent, PR53
Judd-168 Original

- 5185** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR53 NGC. A Flying Eagle cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The diameter is that of a large cent, and the reverse is similar to the issued 1855 cent. It shows ONE CENT at the center surrounded by a circular wreath bound by a ribbon. Struck in copper with a plain edge. A deep golden-brown specimen with light wear on the leaves and the crest of the front wing. Both sides exhibit bold clash marks, and glimpses of aqua residue are noted in design crevices. NGC ID# 29AG, PCGS# 11720

1855 Flying Eagle Cent Pattern in Copper
Judd-168 Original, PR64 Brown

- 5186** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR64 Brown NGC. CAC. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar its counterpart on the large cent. Struck in copper with a plain edge. The glossy-brown surfaces have underlying olive patina and nice reflectivity in the fields. The only surface defect is a shallow scratch from the right of star 1 to star 2. Sharply defined.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 29AG, PCGS# 11720

1858 Judd-208 Indian Cent, MS61
Popular Transitional Pattern

- 5187** 1858 Indian Cent, Judd-208, Pollock-259, Snow-PT28, R.3, MS61 NGC. A transitional pattern similar to the designs of the issued 1859 cent. Pollock's centered date variant with five-leaf clusters in the wreath. Struck in copper-nickel with a plain edge. Judd-208 was included in the 12-piece pattern set openly sold to numismatists by the U.S. Mint. This nicely struck olive-gold example is unabraded and displays scattered minute gray freckles. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 29BP, PCGS# 11884

1859 So-Called 'French Head' Half Dollar, PR65
Judd-239, Ex: Eliasberg

- 5188** 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR65 PCGS. Ex: Eliasberg. Longacre's so-called "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse features the wreath of the issued 1860 Seated dime, though larger in scale commensurate with the diameter. The denomination is expressed as 1/2 DOLLAR within the wreath. Struck in silver with a reeded edge. The fields show pronounced die striations that have imparted a bright proof finish. Light golden patina is seen around the obverse margin, the same color is found on the reverse but scattered irregularly around that side. Lint marks are also seen on the reverse. Ex: Eliasberg Collection (Bowers and Merena, 5/1996), lot 241. NGC ID# 26VE, PCGS# 11972

1863 Indian Cent, PR62 Brown
Judd-299, Bronze, Thick Planchet

- 5189** 1863 One Cent, Judd-299, Pollock-359, Snow-PT1b, R.3, PR62 Brown NGC. 74.8 grains. Although Judd-299 is R.3 if all variants are combined, the vast majority of pieces encountered weigh between 47 and 50 grains. Pollock-359 is broken down into four thin/thick, 180/360 degree variants. This is the very rare thick planchet variety with the 360-degree rotation. Struck from regular dies with a plain edge, but the alloy is bronze and the dies have medal orientation. A well-struck chocolate-brown representative kept from a finer grade by delicate hairlines. Ex: Long Beach Signature (Heritage, 2/2005), lot 9834.

1863 Judd-299 Cent, PR63 Brown
Bronze, Thin Planchet

- 5190** 1863 One Cent, Judd-299, Pollock-359, Snow-PT1a, R.3, PR63 Brown NGC. A transitional variety similar to the 1864 No L bronze cent but dated 1863; the regular-issue cents of this year were still of the copper-nickel composition. Struck in bronze, medal alignment, on a thin planchet with a plain edge. Deep mahogany-brown and gunmetal toning encompasses fully impressed and undisturbed surfaces. NGC ID# 29ED, PCGS# 60454

1863 Indian Cent, PR64 Brown
Judd-299, Thin Planchet

- 5191** 1863 One Cent, Judd-299, Pollock-359, Snow-PT1a, R.3, PR64 Brown NGC. A transitional pattern struck from regular issue plain edge 1863 Indian cent dies, but in bronze instead of copper-nickel. The prevalence of copper Civil War tokens, and the absence of Indian cents from commerce, convinced the Mint to change the alloy. Although undesignated as such on the holder, this is the usually encountered thin planchet and medal turn variant. The fully struck and prominently mirrored surfaces exhibit attractive apple-green, peach-gold, and lilac-red undertones. The rim shows depressions near 9 o'clock on the obverse, and incused letters opposite at 3 o'clock on the reverse. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 29ED, PCGS# 60454

**1863 Two Cent Piece, PR65 Brown
Judd-312, GOD OUR TRUST**

- 5192** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR65 Brown NGC. CAC. The design resembles the adopted two cent piece of the following year, except the motto is GOD OUR TRUST, the word CENTS is sharply curved within the reverse wreath, and ribbon ends are absent. The 6 in the date is lightly repunched south. Struck in bronze with a plain edge. Aquamarine toning bathes the fields of this fully struck, satiny, and unabraded Gem. From The Rev. Dr. James G. K. McClure Collection. NGC ID# 29ER, PCGS# 60467

**1870 Standard Silver Ten Cents in Silver
Judd-861, Brilliant PR63**

- 5193** 1870 Standard Silver Ten Cents, Judd-861, Pollock-949, High R.6, PR63 PCGS. On the obverse the head of Liberty wears a diadem with a plain ribbon encircling her hair; the reverse has 10 CENTS in the center surrounded by a thick oak and laurel wreath with STANDARD SILVER 1870 at the margin. Struck in silver with a reeded edge. The surfaces are brilliant and lightly hairlined. A grade-limiting shallow scratch is seen at the top of the obverse. NGC ID# 26JT, PCGS# 61105

**1870 Seated Half in Copper
Judd-935, PR64 Brown**

- 5194** 1870 Half Dollar, Judd-935, Pollock-1041, High R.6, PR64 Brown NGC. A seated figure of Liberty faces left on the obverse with 13 stars surrounding. The date is below, a free-standing liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. The reverse is the same type that was used to coin regular issue With Motto Seated halves. Struck in copper with a reeded edge. Significant underlying mirrors remain evident in spite of variegated reddish-brown that covers each side. A few small contact marks are noted in the right obverse field. NGC ID# 29Y7, PCGS# 61181

**1870 Standard Silver Half in Silver
Judd-982, PR64+ Cameo**

- 5195** 1870 Standard Silver Half Dollar, Judd-982, Pollock-1102, Low R.7, PR64+ Cameo PCGS. Liberty wears a diadem and faces right. Her hair is tied up in a bun. The reverse features a cotton and corn wreath with the date below and 50 CENTS nestled inside. STANDARD SILVER is proclaimed across the periphery. Struck in silver with a plain edge. There are seven compositional and edge variants of this design, all of which are estimated to only have a half dozen or fewer pieces known. This is a magnificent example. The fields are extraordinarily deep and the devices show thick mint frost. The interior of each side is brilliant with golden-russet and deep blue toning around the margins. PCGS# 511194 Base PCGS# 61228

**1875 Three Dollar, Proof Details
Judd-1437, Aluminum Striking With White Gilt**

- 5196** 1875 Three Dollar, Judd-1437, Pollock-1579 — Environmental Damage — Proof Details, Gilt. NGC Details. Regular dies trial striking for the three dollar gold piece. Struck in aluminum and gilt with a reeded edge. This is a curious piece and one that has questions remaining about its nature. The gilt is some sort of white metal, not German silver, as German silver is mostly nickel, and the strike on this piece is not consistent with nickel. Our assumption is NGC weighed this piece to determine it is indeed an aluminum striking. If so, then the question is: Why would someone plate an aluminum piece with white metal? We can only speculate. Perhaps the underlying aluminum oxidized and became dark. The Environmental Damage mentioned is definitely corrosion, seen mostly on the obverse. An interesting piece that will undoubtedly receive further study.

**1879 Judd-1617 Metric Dollar, PR60
Goloid Alloy, Reeded Edge**

- 5197** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR60 NGC. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls, similar in design to the half union patterns from 1877. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid with a reeded edge. Pastel almond-gold and olive-green patina graces intricately struck surfaces. Wispy vertical hairlines cross the obverse but cannot deny the eye appeal. NGC ID# 2AH8, PCGS# 61995

GOLD DOLLARS

- 5198** 1849-D XF40 PCGS. CAC. **Variety 1-A.** An original olive-gold example of the sole Open Wreath Dahlonega issue. The curls near the ear display moderate wear. Noticeable marks are limited to a line on the reverse rim near 7 o'clock. From a meager mintage of 21,588 pieces. NGC ID# 25BD, PCGS# 7507

**1849-D Gold Dollar, AU58
Available, First-Year Issue**

- 5199** 1849-D AU58 PCGS. **Variety 1-A.** The 1849-D is the most available Dahlonega gold dollar, yet it has the appeal of a first-year issue. This is a bright, sharply defined example that retains much of the original mint luster. The only notable surface imperfections are a mark in the right obverse field and a shallow planchet depression to the left of the bottom of the 1 on the reverse. NGC ID# 25BD, PCGS# 7507

**1849-O Gold Dollar, MS63
Open Wreath, Scarcely Seen So Fine.**

- 5200** 1849-O Open Wreath MS63 NGC. **Variety 3.** The reverse is lapped. The discovery of large-scale gold deposits in California in 1848 accounts for the introduction of gold dollars one year later. The mints at Philadelphia, Charlotte, Denver, and New Orleans were put to work striking gold dollars in 1849. The Louisiana facility coined 215,000 pieces, all with an Open Wreath reverse. This Select representative showcases lustrous khaki-gold surfaces with sharp definition throughout the obverse (along with several die cracks). As mentioned, the reverse details are somewhat weak because of die lapping, especially on the date and lower wreath. Scarcely seen so fine. NGC ID# 25BE, PCGS# 7508

- 5201** 1850 MS64 PCGS. A popular second-year issue in the series, the 1850 claims a healthy mintage of 481,953 coins. The still-novel coins were clearly saved, and examples can be acquired through MS64. Coruscating luster flows over clean lemon-gold surfaces. All design elements are strongly rendered. Population: 40 in 64 (5 in 64+), 22 finer (4/16). NGC ID# 25BF, PCGS# 7509

**1853-C Gold Dollar, MS60
Scarce Mint State Charlotte Dollar**

- 5202** 1853-C MS60 NGC. **Variety 1.** Just 11,515 pieces were struck and most saw immediate circulation. The planchet quality of this example is typical for the issue, with some granularity and small fissures beneath the neck truncation. Lustrous with rich, greenish-gold color, the coin displays nice eye appeal and only slight blending on Liberty's foremost curls. Doug Winter estimates just 15 to 25 Uncirculated pieces survive, although the grading services report several more grading events than that number. Census: 6 in 60, 42 finer (5/16). NGC ID# 25BV, PCGS# 7522

- 5203** 1853-O MS64 PCGS. **Variety 1.** An attractive Choice specimen of this popular branch mint type coin, with well-detailed design elements and vivid orange-gold surfaces that radiate satiny mint luster. Only minor signs of contact are evident. Population: 35 in 64 (3 in 64+), 10 finer (5/16). NGC ID# 25BX, PCGS# 7524

**1856 Slanted 5 Gold Dollar, MS66
One of the Finest Known**

5204 1856 Slanted 5 MS66 PCGS. The 1856 is not a Type Three issue usually placed in a type set. In spite of its mintage of 1.7 million pieces, almost all were placed into circulation and very few were set aside. This is an exceptionally well-produced piece that displays even bright, yellow-gold color and softly frosted mint luster. Very few post-striking defects can be found. A few shallow roller marks can be seen on the obverse. Population: 13 in 66 (3 in 66+), 4 finer (5/16). NGC ID# 25CB, PCGS# 7540

5205 1856 Upright 5 MS63 PCGS. The Upright 5 preceded the Slanted 5 variety, and it is far and away the scarcer of the two date styles for the issue. This introductory Type Three gold dollar is sharply struck and exceptionally clean for the Select Uncirculated grade. Population: 23 in 63 (2 in 63+), 30 finer (4/16).

Ex: Long Beach Signature (Heritage, 2/2002), lot 6672; Long Beach Signature (Heritage, 5/2007), lot 2123. NGC ID# 25CB, PCGS# 7541

5206 1856 Upright 5 MS64 PCGS. Outnumbered by the Slanting 5 variety by a factor of about 10 to 1, the Upright 5 gold dollar remains underrated despite the obvious scarcity confirmed by its low number of grading events. Bowers suggests merely 130 to 160 examples exist in all Mint State grades. This example is Choice, frosty, and lively with bountiful mint luster. The strike is first-rate. Population: 24 in 64 (2 in 64+), 6 finer (4/16). NGC ID# 25CB, PCGS# 7541

5207 1861 MS64 PCGS. CAC. More than half a million gold dollars were manufactured in 1861, but the coins did not circulate after the outbreak of the Civil War. Scintillating luster cascades over light rose-gold surfaces that show good detail despite the softly impressed cotton bolls and wreath bow. Heavy reverse clashing. NGC ID# 25CU, PCGS# 7558

5208 1881 MS65 NGC. An attractive Gem from a mintage of 7,260 pieces, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with prooflike reflectivity in the fields. Eye appeal is outstanding. NGC ID# 25DK, PCGS# 7582

5209 1883 MS66 PCGS. CAC. Mintages of gold dollars in the 1880s was low but the number of saved pieces was high, with relatively large populations in higher grades at PCGS and NGC. The 1883 is no exception, with one of the higher mintages of the decade at 10,800 pieces and many coins available in Gem or finer condition. This Premium Gem is lustrous and attractive with a sharp strike. CAC endorsed. NGC ID# 25DM, PCGS# 7584

**1883 Gold Dollar, Semiprooflike MS67
Lower Mintage Issue for Type Purposes**

5210 1883 MS67 NGC. Even though the mintage doubled for gold dollars from 1882 to 1883, only 10,800 pieces were struck. This is an attractive example with semiprooflike fields and the usually seen reddish-gold color. However, copper spots are noticeably absent. Strike details are complete throughout. NGC ID# 25DM, PCGS# 7584

**1883 Gold Dollar, MS67
Lovely Color**

5211 1883 MS67 NGC. CAC. Suitable for type purposes, this Superb Gem 1883 gold dollar displays a bold strike and nearly flawless surfaces with lovely orange and tangerine-gold hues painting the satiny luster. Few finer examples are known, and the CAC population in MS67 and MS68 is quite small. CAC: 44 in 67, 5 finer (4/16). NGC ID# 25DM, PCGS# 7584

5212 1884 MS65 PCGS. A tiny mintage of 5,200 coins accounts for the popularity of the 1884 gold dollar. Many coins were set aside, ensuring an adequate supply for collectors. Lightly frosted rose-gold surfaces radiate effulgent mint luster. Strong definition is especially bold on the wreath bow. Population: 29 in 65, 47 finer (4/16). NGC ID# 25DN, PCGS# 7585

5213 1884 MS65 PCGS. CAC. A semiprooflike Gem type coin with modest cameo contrast on each side. The strike is sharp, and only a few stray ticks limit the grade. The 1884 is among the scarcer late-series issues in high grade. Population: 29 in 65, 47 finer. CAC: 6 in 65, 18 finer (4/16). NGC ID# 25DN, PCGS# 7585

**1887 Gold Dollar, MS64+ Prooflike
Brightly Reflective Fields**

5214 1887 MS64+ Prooflike NGC. CAC. Struck toward the end of the series, only 7,500 pieces were minted. This is an extraordinarily impressive example that displays bright, deeply mirrored prooflike fields on each side with modest contrast seen on the devices. The color is even reddish-gold and the strike details are strong throughout. Minimal abrasions are present. Census: 6 in 64+ Prooflike, 12 finer (4/16). NGC ID# 25DS, PCGS# 77588

**1888 Gold Dollar, MS67
Beautifully Preserved Type Coin**

5215 1888 MS67 PCGS. This sharp, frosty Superb Gem 1888 gold dollar displays virtually flawless yellow-gold surfaces with a few faint lines on the obverse that define the MS67 grade. Eye appeal is outstanding, and the type coin potential is immense. Population: 51 in 67 (2 in 67+), 6 finer (4/16). NGC ID# 25DT, PCGS# 7589

- 5216 1889 MS67 PCGS.** The 1889 gold dollar boasts a mintage of 21,000 pieces. This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded nine numerically finer examples (5/16). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

- 5217 1834 AU55 PCGS. Small Head, Breen-6138, Variety 1, R.1.** A pleasing Classic Head type coin, this Choice AU 1834 quarter eagle displays well-detailed motifs and bright yellow-gold surfaces. Light chatter covers each side, leaving hints of luster in the protected areas of the fields. NGC ID# 25FS, PCGS# 7692
- 5218 1835 AU55 NGC. Breen-6141, Variety 6, R.2.** A pleasing Classic Head type coin, this Choice AU 1835 quarter eagle displays bright green-gold surfaces with pleasantly well-struck design elements. Scattered marks are normal for the grade and issue. Small areas of prooflike mirroring can be seen in the protected peripheral regions. NGC ID# 25FT, PCGS# 7693
- 5219 1836 Script 8 AU55 PCGS. CAC. Breen-6143, Variety 11, R.2.** Original peach-gold toning fills the borders. The fields display hints of olive-green. This lightly circulated and moderately abraded Classic type coin exhibits blending of impression at the centers but peripheral elements are sharply struck. NGC ID# 25FU, PCGS# 7694

1836 Quarter Eagle, MS61
Block 8, Variety 15

- 5220 1836 Block 8 MS61 PCGS. CAC. Breen-6144, Variety 15, R.2.** A pleasing Mint State Classic Head type coin, this Block 8 1836 quarter eagle displays satiny green-gold luster with little in the way of abrasions — only light field chatter appears to limit the grade. The strike is slightly weak in the centers, as is often seen on this type. A planchet lamination appears on the A in STATES. Population: 14 in 61, 42 finer. CAC: 4 in 61, 13 finer (4/16). NGC ID# 25FU, PCGS# 97694

1839-O Quarter Eagle, XF45
Classic Head Type Coin

- 5221 1839-O XF45 PCGS. Breen-6152, Variety 27, R.3.** High Date, Wide Fraction. The 1839-O is in high demand as the only O-Mint Classic Head quarter eagle. This is a sharp Choice XF example with original orange-gold luster and relatively smooth surfaces. Hints of luster remain in the reverse peripheries, adding to the eye appeal. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 5222 1840-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** The 1840-C is a fairly scarce Charlotte quarter eagle with 175 to 225 pieces extant, per Doug Winter. This is a well-struck coin with hints of luster and green-gold coloration. A loupe reveals evidence of an old, light cleaning in the fields. A still-pleasing coin with little high-point wear. NGC ID# 25GB, PCGS# 7718
- 5223 1842-O XF45 NGC. Variety 1.** This bright green-gold 1842-O quarter eagle survives from a mintage of just 19,800 coins. The issue is often seen with a deficient strike, as is seen on this piece with weak central devices. Uncirculated examples of this issue are rare. This Choice XF coin will appeal to the budget-conscious collector. NGC ID# 25GK, PCGS# 7726

1844-C Quarter Eagle, XF45
Scarce North Carolina Issue

- 5224 1844-C XF45 NGC. Variety 1.** Doug Winter explains: "The 1844-C is among the scarcer Charlotte quarter eagles. It is most often seen well worn with some survivors grading as low as Very Good to Fine. It is scarce in properly graded Extremely Fine and rare in About Uncirculated." The strike detail is soft, as always for the 1844-C quarter eagle. Bright yellow-gold surfaces display a faint suggestion of green color. Marks are not nearly as obtrusive as is often encountered, though small ticks are scattered throughout. From a mintage of 11,622 coins. NGC ID# 25GU, PCGS# 7735

- 5225 1844-D Improperly Cleaned — NGC Details. AU Details. Variety 5-I.** One of the more available Dahlonega quarter eagles, this example gives the collector the opportunity to acquire this popular branch mint issue at a reasonable price. While net graded with AU Details, that must be taken within the context of known 1844-D two and a halves, most of which are very weakly defined in the centers. Overall the surfaces are pale gold with darker accents around the peripheral devices. NGC ID# 25GV, PCGS# 7736

1847-C Two and a Half, MS62
Sharp Strike, Pleasing Eye Appeal

- 5226 1847-C MS62 PCGS. CAC. Variety 1.** The 1847-C quarter eagle is fairly plentiful, ideal for type purposes. As many as 450 examples may survive in various grades, but only a handful of those are in Mint State. This CAC-endorsed coin displays an uncommonly sharp strike for a Charlotte issue with satiny green-gold luster. Light chatter in the fields limits the grade in the absence of any significant abrasions. Population: 11 in 62, 12 finer. CAC: 2 in 62, 4 finer (4/16). NGC ID# 25H6, PCGS# 7745

**1848 Liberty Quarter Eagle, AU58
Elusive, Underrated Issue**

5227 1848 AU58 PCGS. Although it is often overshadowed by its famous counterpart with CAL above the eagle on the reverse, the 1848 Liberty quarter eagle is a scarce issue in its own right, from a small mintage of 6,500 pieces. This attractive near-Mint specimen shows just a trace of wear and the lightly marked orange-gold surfaces retain much of their original mint luster. Population: 6 in 58, 10 finer (4/16). NGC ID# 25H9, PCGS# 7748

5228 1849 AU58 NGC. With a moderately small mintage of 23,294 pieces, the 1849 quarter eagle is a scarce date in all grades and a rarity in Mint State. This near-Mint example displays bright yellow-gold surfaces with subtle reflectivity in the fields. The eagle's left (facing) leg shows minor weakness of strike. Census: 43 in 58, 22 finer (5/16). NGC ID# 25HD, PCGS# 7752

**1849-D Two and a Half, AU50
Bright and Well-Struck**

5229 1849-D AU50 PCGS. Variety 11-N. The more plentiful of only two known varieties, this piece has the date high in the field, nearly touching the bust. The other variety has the date low with the 1 touching the border. Of the 10,945 pieces struck, only 150-200 are estimated to have survived in all grades. This is a lustrous yellow-gold example that features bold design elements, the reverse has a small scrape over the final A. Population: 21 in 50, 58 finer (4/16). Ex: FUN Signature (Heritage, 1/2009), lot 5209. NGC ID# 25HF, PCGS# 7754

**1850-D Quarter Eagle, Choice XF
Orange and Olive-Gold Color**

5230 1850-D XF45 PCGS. Variety 13-N. The usually seen variety shows the 0 close to the shoulder tip and the upright of the 1 positioned over a dentil. This Dahlonega issue is more available than any other D-mint quarter eagle from the decade, yet only 175 to 225 pieces are believed extant from a mintage of 12,148 coins. Few survivors are as attractive as this orange and olive-gold representative. The stars display full radials, and the obverse dentils are complete. Incompletely defined centers are expected for the 1850-D. Abrasions are minimal. NGC ID# 25HJ, PCGS# 7757

5231 1851-O AU58 NGC. Variety 1. The date is dramatically doubled. Full star centers, bold hair curls, clear leaf veins, and complete dentilation are remarkable for a New Orleans quarter eagle. Brightly lustrous, light yellow-gold surfaces show trivial friction that barely precludes an Uncirculated assessment. Minimally marked. NGC ID# 25HP, PCGS# 7762

5232 1852-O AU58 NGC. Variety 2. Mintmark left. An attractive, orange-gold example that retains areas of prooflike surface with a crisp strike and outstanding eye appeal. The fields show only light abrasions and a bit of rub on the high points of the raised elements. Doug Winter notes the 1852-O is very scarce in bonafide AU58 condition (such as this coin). NGC reports just 32 finer examples (4/16). NGC ID# 7HX8, PCGS# 7766

5233 1856-S AU55 NGC. The 1856-S Liberty quarter eagle boasts a limited mintage of 72,120 pieces. This attractive Choice AU specimen shows a little softness on the eagle's leg, but just a trace of actual wear. The lightly abraded surfaces retain much original mint luster. Census: 38 in 55, 74 finer (4/16). NGC ID# 25KL, PCGS# 7781

5234 1866-S AU53 NGC. A trace of wear appears over otherwise well-detailed devices, and faint wispy marks occur in the fields. Partial luster is visible within the recesses of this conditionally scarce survivor from an original mintage of just 38,960 pieces, of which 200 pieces are believed extant. Ex: Central States Signature (Heritage, 5/2005), lot 8468. NGC ID# 25K8, PCGS# 7804

5235 1868 AU58 PCGS. A lovely orange-gold near-Mint example of this elusive Philadelphia quarter eagle issue, showing bold design elements and areas of reflectivity in the fields. Light surface marks are not bothersome, and the eye appeal outstanding. From a mintage of just 3,600 pieces. Population: 18 in 58, 12 finer (5/16). NGC ID# 25KB, PCGS# 7807

**1874 Quarter Eagle, MS62
Only 3,920 Coins Struck**

5236 1874 MS62 PCGS. Examples of this Philadelphia date are elusive in all grades, as only 3,940 pieces were struck. This is one of the small number of Mint State survivors. Each side is well-detailed and mildly prooflike with light yellow-gold coloration. Mild chatter in the fields is to be expected. Population: 8 in 62, 10 finer (4/16). Ex: FUN Signature (Heritage, 1/2005), lot 8614. NGC ID# 7JS4, PCGS# 7821

**1879 Two and a Half, MS65
Conditionally Scarce**

5237 1879 MS65 PCGS. The 1879 quarter eagle is a moderately available date overall, but Gem or finer coins are rare. This MS65 example displays a sharp strike and frosty yellow-gold luster. A few faint lines in the fields limit the grade but are invisible without a loupe. Eye appeal surpasses expectations for the grade. Population: 15 in 65, 9 finer (4/16). NGC ID# 25L2, PCGS# 7830

- 5238 1890 MS62 Prooflike NGC. CAC.** This Mint State 1890 quarter eagle displays sharp relief detail and rich rose-gold color. The fields are fully prooflike, and grade-limiting marks and hairlines are not severe. NGC has designated 13 1890 quarters Prooflike, including four in this grade and three finer (5/16). NGC ID# 25LE, PCGS# 77842

**1897 Quarter Eagle, MS66
Seldom Seen Finer**

- 5239 1897 MS66 PCGS.** Close scrutiny with a loupe is needed to differentiate this frosty, sharp Premium Gem 1897 quarter eagle from many of the MS67 coins on the market. The wheat-gold surfaces display excellent luster and sharp motifs. This late 19th century Philadelphia issue is often chosen for type purposes due to its overall availability and affordability. NGC ID# 25LM, PCGS# 7849

**1901 Two and a Half, MS67
Superior Type Coin**

- 5240 1901 MS67 PCGS.** While the 1901 can only be considered a common type coin in lower grades, it is surprisingly scarce in MS67. PCGS has only certified 14 other pieces in this grade with one coin finer (4/16). The original surfaces show a slight accent of reddish patina over the soft mint luster. Fully struck throughout and, of course, devoid of any noticeable abrasions. NGC ID# 25LS, PCGS# 7853

**1901 Quarter Eagle, MS67
Smooth, Lustrous Surfaces**

- 5241 1901 MS67 PCGS.** All other post-1900 quarter eagle mintage were significant compared to the 1901, of which only 91,100 pieces were struck. However, it is still considered a type coin with probably three dozen Superb Gems surviving. This piece has lovely soft, frosted mint luster and even light orange-gold color. The strike details are complete in all areas. Population: 15 in 67, 1 finer (5/16). NGC ID# 25LS, PCGS# 7853

- 5242 1903 MS66 PCGS.** This delightful Premium Gem exhibits razor-sharp definition on all design elements and the virtually pristine orange-gold surfaces radiate vibrant mint luster throughout. Overall eye appeal is terrific. PCGS has graded 78 numerically finer examples (4/16). NGC ID# 2688, PCGS# 7855

- 5243 1906 MS65 NGC.** An attractive Gem representative of this late series issue, with vibrant satiny mint luster and sharply detailed design elements throughout. The peach-gold surfaces show no mentionable distractions. NGC ID# 7JW8, PCGS# 7858

INDIAN QUARTER EAGLES

- 5244 1908 MS64 NGC.** A first-year example of Bela Lyon Pratt's sunken relief design, the satiny yellow-gold surfaces are minimally abraded. Well-struck feature notably strong definition on the headdress. Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 4505. NGC ID# 288Y, PCGS# 7939

- 5245 1908 MS64 PCGS.** As a first-year-of-issue design, the 1908 Indian Head quarter eagles were better-saved than later issues, with many Choice or finer coins well-preserved by collectors. This near-Gem example shows few of the abrasions or marks that often appear on the 1908 coins, suggesting it was carefully put aside. Sharply struck with orange-gold highlights, the only weak area is the eagle's shoulder — a problem with the die preparation, which was corrected on later issues. NGC ID# 288Y, PCGS# 7939

- 5246 1909 MS63 PCGS.** An attractive Select specimen of this popular issue, with sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Satiny mint luster adds to the outstanding eye appeal. NGC ID# 288Z, PCGS# 7940

- 5247 1909 MS64 PCGS.** A sharp Indian quarter eagle type coin with satiny honey-gold luster and minimal abrasions. The 1909 is an available date in most grades but becomes elusive above MS64. This collectible Choice example is housed in a first generation holder. NGC ID# 288Z, PCGS# 7940

- 5248 1910 MS64 NGC.** An attractive Choice example, with sharply detailed design elements and vibrant mint luster on both sides. The pleasing reddish-gold surfaces show only a few minor contact marks and eye appeal is outstanding. NGC ID# 2892, PCGS# 7941

- 5249 1910 MS64 PCGS.** Garrett and Guth explain that the 1910 is "one of the more elusive dates for the Indian Head quarter eagles," particularly at the higher levels of Mint State. Softly frosted luster and attractive yellow-gold coloration give this bold near-Gem great eye appeal. NGC ID# 2892, PCGS# 7941

- 5250 1910 MS64 PCGS.** The obverse of this Choice 1910 Indian quarter eagle appears almost a grade point finer with regards to preservation, although moderate strike weakness is seen on the lower headdress feathers. The reverse has a few small marks in the field behind the eagle's head that limit the grade. Rich orange-gold luster blankets each side in satiny luminance, and the eye appeal is pleasing. NGC ID# 2892, PCGS# 7941

- 5251 1911 MS64 PCGS.** The 1911 Indian eagle is elusive in Gem and finer condition. This near-Gem is much more accessible for the budget-conscious collector and displays nearly as strong eye appeal. The strike is well-executed, and each side shows satiny wheat-gold luster. NGC ID# 7KR6, PCGS# 7942

- 5252 1911 MS64+ PCGS. CAC.** Glowing sun-gold surfaces exhibit traces of rose coloration. The eagle's wingtip features pinpoint definition, and the only area of localized softness is over the central obverse. Two minute ticks on the cheek are likely all that stand in the way of a full Gem assessment. A high-end Choice example. NGC ID# 7KR6, PCGS# 7942

**1911-D Two and a Half, AU53
Nice, Problem-Free Example**

- 5253 1911-D AU53 PCGS. CAC.** The sole key to its series, the 1911-D quarter eagle is in demand in all grades but still obtainable at the AU53 level of the present piece. The surfaces are relatively unmarked for the grade, showing only light high-point wear, attractive peach-gold patina, and a nice bold mintmark. A nice, problem-free example of this scarce issue. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half
Uncirculated Details**

- 5254 1911-D — Improperly Cleaned — NGC Details. Unc.** The Denver Mint is sharp on this luminous lemon-gold key date example. Well struck and without and singularly noticeable marks, but the surfaces are somewhat bright and peppered with minute abrasions. The Indian quarter eagle series is widely collected by date and mintmark, which puts pressure on the series stopper. NGC ID# 7KR7, PCGS# 7943

- 5255 1913 MS64 PCGS.** An elusive issue in higher grades, the 1913 Indian quarter eagle can be located in MS64 with a little patience. This impressive Choice specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 7KR9, PCGS# 7945

- 5256 1913 MS64 PCGS.** The 1913 Indian quarter eagle is an available issue in MS64, but finer coins are definitely scarce. This attractive Choice example is sharply detailed, with well-preserved orange-gold surfaces and ample satiny mint luster. Eye appeal is outstanding. NGC ID# 7KR9, PCGS# 7945

- 5257 1913 MS64 PCGS. CAC.** Satiny orange and peach-gold hues give this Choice 1913 Indian quarter eagle pleasing eye appeal. The strike is well-executed, and grade-limiting abrasions are minimal. Finer examples of this Philadelphia issue are infrequently available. NGC ID# 7KR9, PCGS# 7945

- 5258 1913 MS64+ PCGS. CAC.** This Plus-graded Choice 1913 Indian quarter eagle is a remarkably attractive, frosty coin with a bold strike. The fields are impressively well-preserved, delivering eye appeal that rivals many Gem-graded coins. This issue is seldom seen in finer grades. NGC ID# 7KR9, PCGS# 7945

- 5259 1914 MS62 NGC.** This is a pleasing MS62 example from a low mintage of 240,000 quarter eagles in 1914. Each side has sharply detailed design elements and lustrous orange-gold surfaces that show scattered minor marks. NGC ID# 7KRA, PCGS# 7946

- 5260 1914 MS62 NGC.** The 1914 is the secondmost elusive issue in the series in high grade after the famous 1911-D. Splendid reddish-gold surfaces glimmer with subtle mint luster, and a few dark spots occur below the bust. This strongly struck two and a half is perfect for the collector on a budget. NGC ID# 7KRA, PCGS# 7946

- 5261 1914 MS62 PCGS.** Deep honey-gold color embraces this Uncirculated quarter eagle, one of 240,000 two and a half dollar gold pieces struck at Philadelphia in 1914. Bold central detail and surprisingly clean surfaces are readily appreciable. NGC ID# 7KRA, PCGS# 7946

- 5262 1914 MS62 PCGS.** Ranking either second or third in Uncirculated rarity among Indian Head quarter eagles (in a horse race with the 1909 issue), the 1914 saw a reduced mintage of 240,000 pieces that is indisputably the second-lowest of the series. This light-gold example is lustrous with a reasonably bold strike and several small marks and abrasions that determine the assigned grade. NGC ID# 7KRA, PCGS# 7946

- 5263 1914 MS63 PCGS. CAC.** Rich peach toning augments the eye appeal of this nicely struck and lightly marked representative. The 1914 has the second-lowest mintage of the series, and is in demand at the Select level. Certified in a green label holder. NGC ID# 7KRA, PCGS# 7946

**1914 Two and a Half, MS64
Upper-End for the Grade**

- 5264 1914 MS64 NGC.** A borderline-Gem example of this condition rarity and semikey date. The 1914 quarter eagle is one of the three rarest dates in the series in MS65, making Choice examples like this highly popular. This piece is remarkably well-preserved, even for the MS64 level. The wheat-gold surfaces show satiny luster and sharp design elements. There are no distracting abrasions. NGC lists 48 finer submissions (4/16). NGC ID# 7KRA, PCGS# 7946

- 5265 1914-D MS63 PCGS.** The second of just three Denver Mint issues of the Indian quarter eagle, this example displays good detail with lovely rose gold and blue toning on its light yellow surfaces. An elusive date in high grade. NGC ID# 2899, PCGS# 7947

- 5266 1914-D MS64 NGC.** This vibrant Indian quarter eagle is well-struck with satiny surfaces and slight reflectivity in the fields. Medium yellow-gold color frames rose-gold hues in the recesses. For practical purposes, the 1914-D is the rarest issue of the series in Gem or finer grades, making this near-Gem an attractive opportunity. NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64+
Scarcely Seen Finer**

5267 1914-D MS64+ PCGS. CAC. Lovely honey and olive-gold hues give this high-end Choice 1914-D quarter eagle excellent eye appeal, combining with frosty luster on each side. The lower headdress feathers are a trifle soft, but the strike is otherwise pleasing. Only a few faint grazes in the left obverse field limit the grade. PCGS lists 50 finer submissions (4/16). NGC ID# 2899, PCGS# 7947

5268 1915 MS64+ PCGS. Satiny yellow-gold luster gives this high-end Choice 1915 Indian quarter eagle pleasing eye appeal, although the sharp strike and lack of noticeable abrasions also contribute to its desirability. The 1915 is available in this grade but scarce finer. An ideal coin for type representation. NGC ID# 7KRC, PCGS# 7948

**1915 Two and a Half, Shimmering Gem
Very Rare Any Finer**

5269 1915 MS65 PCGS. CAC. Although a substantial mintage of 606,000 coins might suggest otherwise, the 1915 quarter eagle is very scarce in Gem condition. Anything finer than this CAC-approved MS65 representative is very rare. Shimmering frost and light peach-gold color combine to produce the wonderful eye appeal seen on each side. Strongly rendered motifs and minimal marks are additional attributes. PCGS shows four finer grading events (4/16). NGC ID# 7KRC, PCGS# 7948

**1926 Quarter Eagle, MS65+
Beautiful Type Coin**

5270 1926 MS65+ PCGS. CAC. Orange-gold color yields to olive and pale rose accents over the beautifully original surfaces of this high-end Gem quarter eagle. While the 1926 issue is readily available in grades up to MS65, few coins can pass muster for a higher designation. This coin exceeds the norm with flying colors, while only a scattering of tiny field ticks prevent an even finer grade. NGC ID# 7KRE, PCGS# 7950 1276 STD

5271 1928 MS65+ NGC. Frosty yellow-gold luster gives this high-end Gem 1928 Indian quarter eagle significant type coin appeal. The strike is slightly soft on the lower headdress feathers, but there are no significant abrasions. NGC lists 19 finer representatives (4/16). NGC ID# 289E, PCGS# 7952

5272 1929 MS65 PCGS. An undeniable Gem with frosty mint luster in hues of rose, peach, and yellow-gold. The strike is sharp, and the type-coin appeal of this 1929 quarter eagle is strong. A few tiny ticks behind the eagle's head are the only mentionable flaws. PCGS has only seen four numerically finer submissions (5/16). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

5273 1854 AU58 PCGS. A straw-gold Borderline Uncirculated representative. No marks are remotely relevant, and luster dominates the borders and motifs. A trace of wear is noted on Liberty's curls near the forehead, ear, and shoulder. A single year subtype with small letters in DOLLARS. NGC ID# 25M3, PCGS# 7969

5274 1854 MS61 NGC. An attractive Mint State specimen from the first year of the denomination, this coin offers pleasing orange-gold surfaces with a minimum number of minor contact marks for the grade and original satiny mint luster. NGC ID# 25M3, PCGS# 7969

5275 1854 MS62 NGC. This is a sharp type coin candidate, showing softly frosted yellow-gold luster without any heavy abrasions — only scattered hairlines on the obverse limit the grade. Several burgundy-colored alloy spots are seen around the peripheries, but none are in prime focal areas. NGC ID# 25M3, PCGS# 7969

5276 1854-O Fine 15 PCGS. Variety 2. From a mintage of 24,000 pieces, the 1854-O is the only three dollar gold piece from the New Orleans Mint. This pleasing Fine 15 specimen retains some interior detail in the headdress feathers, but the eyebrow and hair above the forehead has been worn smooth. The reverse shows the incomplete detail in the bow (due to lapping) that characterizes Variety 2. No large or distracting abrasions are evident. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, XF45
Sole O-Mint Issue of the Series**

5277 1854-O XF45 PCGS. The 1854-O is popular for its low mintage, small DOLLARS subtype, and New Orleans origin. The curls display moderate wear, but this original apricot-gold example exhibits noticeable luster and shows few marks. Struck from the usual die state with lapping evident on the wreath ribbon. The eye appeal is excellent for the Choice XF grade. NGC ID# 25M5, PCGS# 7971

5278 1855 AU55 NGC. Partial luster remains in the fields, and the design elements exhibit only trivial wear. This Choice AU 1855 three dollar gold piece will appeal to a range of budget-conscious type collectors. The surfaces display pleasing wheat-gold color. NGC ID# 25M6, PCGS# 7972

5279 1855 AU58 NGC. A pleasing near-Mint type coin with remnants of luster in the fields. The wreath bowknot is slightly soft, but the obverse portrait is bold. A small planchet lamination is seen at the rear base of the headdress. There are no individually significant abrasions. NGC ID# 25M6, PCGS# 7972

5280 1855 MS61 NGC. Satiny straw-gold surfaces give this lightly abraded 1855 three dollar gold piece pleasing eye appeal. The wreath bowknot is weak, but the remainder of the design is sharp. The Mint State designation will add to this coin's desirability. NGC ID# 25M6, PCGS# 7972

5281 1855-S VF20 PCGS. A small mintage of 6,600 coins and a tiny survival rate of about 200 to 400 pieces make this early San Francisco Mint issue a semikey in the series. Light orange-gold surfaces exhibit accents of lilac patina and even rub over the devices. Housed in an old green label holder. NGC ID# 7K5D, PCGS# 7973

5282 1856 AU58 NGC. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much of their original satiny mint luster. From a mintage of 26,010 pieces, the 1856 is seldom encountered in Mint State. NGC ID# 25M8, PCGS# 7974

**1857 Three Dollar, MS61
Rich Original Peach Patina**

5283 1857 MS61 PCGS. A charming peach-gold representative. No marks are noticeable and only the high points lack full definition. Struck from clashed dies. Philadelphia mintages of the denomination diminished each year between 1854 and 1858, as it became clear that quarter eagles were preferred in commerce. NGC ID# 7K5G, PCGS# 7976

**1860 Three Dollar, AU58
Scarce Antebellum Issue**

5284 1860 AU58 PCGS. A butter-gold representative with pleasing surfaces despite a minor mark near the E in UNITED. The legends and wreath display flashy luster. Unlike selected other low mintage issues, such as the 1888, the 1860 was not set aside in quantity by Philadelphia-area dealers, and examples are scarce at the near-Mint level. NGC ID# 25ME, PCGS# 7980

**1860 Three Dollar Gold, AU58
Low-Mintage, Early Series Issue**

5285 1860 AU58 PCGS. Only 7,036 business-strike three dollar gold pieces were struck in 1860 and, unlike many low-mintage issues of later dates, few examples were saved by contemporary collectors. This attractive near-Mint specimen shows just a trace of wear on the high points of the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster in sheltered areas. NGC ID# 25ME, PCGS# 7980

5286 1865 — Rim Filing — NGC Details. AU. This AU-level 1865 three dollar gold piece has little wear and displays small areas of reflectivity in the fields. Light file marks along the lower reverse rim prevent a numeric grade. The wreath bowknot is poorly defined, as usual, but the obverse is sharp. A still-pleasing example of this better date, coming from a mintage of 1,140 pieces. NGC ID# 7K5S, PCGS# 7986

5287 1866 AU58 NGC. Partially lustrous fields accentuate the blatantly original honey-gold patina of this near-Mint 1866 three dollar gold piece. The bowknot is better struck than typical, and light field chatter is consistent with the grade. Census: 43 in 58, 46 finer (4/16). NGC ID# 25MM, PCGS# 7987

5288 1867 — Improperly Cleaned — NGC Details. Unc. This elusive issue claims a mintage of only 2,600 pieces and collectors prize examples in all grades and conditions. This well-detailed specimen is lightly abraded and shows no sign of wear, but the semiprooflike surfaces are unnaturally bright, a result of a light cleaning in the past. NGC ID# 25MN, PCGS# 7988

5289 1868 AU58 NGC. The 1868 three dollar gold piece boasts a low mintage of 4,850 pieces, and Uncirculated examples are elusive. This near-Mint coin displays a bold strike, with bright yellow-gold surfaces and noticeable reflectivity in the fields. Light surface chatter accompanies the grade. NGC ID# 25MP, PCGS# 7989

**1870 Three Dollar, AU58
Only 3,500 Pieces Struck**

5290 1870 AU58 NGC. A lightly circulated apricot-gold example. Refreshingly free from noticeable marks, and luster illuminates protected regions. Minor wear on the eyebrow confirms a brief stint in commerce. An underappreciated date, since relatively few coins from the mintage of 3,500 pieces were saved by numismatists. NGC ID# 7K8F, PCGS# 7991

5291 1874 AU58 NGC. From a generous mintage of 41,800 pieces, the 1874 three dollar gold piece is an available date in the context of the series. This lightly abraded Near-Mint examples retains almost all of its original mint luster and shows just a trace of wear on the design elements. NGC ID# 7KDE, PCGS# 7998

5292 1874 AU58 NGC. CAC. A CAC-endorsed near-Mint example of this popular type-coin issue, showing remnants of shimmering luster in the fields and strong detail on the design elements. The surfaces are smooth, and eye appeal is pleasing. NGC ID# 7KDE, PCGS# 7998

5293 1878 AU58 NGC. Always in demand as the quintessential three dollar gold type coin, this 1878 example is nearly full Mint State. Bright yellow-gold luster remains across both sides with only minuscule marks and very little sign of prior circulation. Sharp eye appeal offsets minor blending on the hair strands and bowknot. NGC ID# 25MZ, PCGS# 8000

5294 1878 AU58 NGC. A brush of high-point friction keeps this honey-gold 1878 three dollar gold piece out of the Mint State grade range, but substantial, shimmering luster remains in the fields. This budget-friendly type coin shows typical weakness on the wreath bowknot, but the obverse is boldly struck. NGC ID# 25MZ, PCGS# 8000

5295 1878 AU58 NGC. Much luster remains in the fields of this near-Mint 1878 three dollar gold piece, an ideal type coin for the budget-restricted collector. The strike is weak on the bowknot but sharp elsewhere, and few noticeable abrasions are present. Eye appeal is pleasing. NGC ID# 25MZ, PCGS# 8000

5296 1878 AU58 NGC. The 1878 is not only the most abundantly produced three dollar issue, it is also the best-produced issue in the series. This piece shows slight breaks in the luster in the fields, and yet significant portions remain, giving the coin "life" other AU58 coins just wouldn't show. The strike is just a bit less-than-complete, and there are no obvious or detracting abrasions on either side. NGC ID# 25MZ, PCGS# 8000

5297 1878 MS62 PCGS. Minted in large quantity of more than 82,000 pieces to serve as reserves for the anticipated exchange of paper money for gold, the mere authorization by law for such an exchange was enough to satisfy the public, which preferred to use the paper currency. The 1878 three dollar gold pieces languished in treasury vaults. This MS62 example is brightly lustrous with partially reflective fields and attractive, medium-gold color. Light abrasions account for the grade. A sharp strike weakens at the lower hair curls and at the bowknot. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS64 Beautiful Shimmering Luster

5298 1878 MS64 NGC. This Choice 1878 three dollar gold piece displays the shimmering, frosty mint luster for which this type-coin issue is widely appreciated. The wreath bow is weak, but the strike is otherwise sharp. A few tiny ticks on the obverse only seem to accentuate the thickness and luminance of the luster. A superb three dollar gold piece. NGC ID# 25MZ, PCGS# 8000

5299 1879 AU58 PCGS. Considerably scarcer than its 1878 immediate predecessor, the 1879 has a mintage of just 3,000 pieces. This attractive slider has ample peach-tinged luster and a bold strike. We note only a field graze near the S in STATES and a cluster of minuscule marks on the cheekbone. NGC ID# 25N2, PCGS# 8001

5300 1879 — Improperly Cleaned — NGC Details. Unc. 1878 represented the final hurrah for the three dollar gold series, with all subsequent mintages scarcely worth the Mint's trouble. Just 3,000 pieces were struck in 1879 plus perhaps 30 proofs. This circulation strike shows some light lines on the prooflike surfaces, but no evidence of harsh cleaning and considerable eye appeal remains. Sharply struck throughout.

1888 Three Dollar Gold, MS62 Low Mintage, High Survival Rate

5301 1888 MS62 NGC. From a low mintage of just 5,000 pieces, the 1888 three dollar gold piece is surprisingly available in high grade. Contemporary numismatists may have saved them when news of the small production total became public. This attractive MS62 example offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 25NB, PCGS# 8010

1889 Three Dollar Gold, Highly Lustrous MS63

5302 1889 MS63 PCGS. The unpopular three dollar gold denomination was discontinued after 1889, following a small mintage of 2,300 pieces. Peach-gold and apricot patina resides over the highly lustrous surfaces of this strongly struck Select representative. A few scattered marks do not detract.
Ex: New York Signature (Heritage, 2/2014), lot 5349; Long Beach Signature (Heritage, 9/2014), lot 3391; Long Beach Signature (Heritage, 6/2015), lot 4225. NGC ID# 7KDU, PCGS# 8011

1889 Three Dollar Gold, MS63 Final-Year Type Coin

5303 1889 MS63 NGC. A lovely Select example of this final three dollar gold issue, showing satiny peach-gold luster and razor-sharp strike definition — particularly on the wreath bow. Some faint slide marks on the obverse limit the grade, but there are no singular abrasions of note. A pleasing type coin candidate. NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLES

- 5304** 1799 Small Reverse Stars, BD-6, R.5 — Ex-Jewelry, Cleaned — ANACS. VF Details, Net Fine 12. Bass-Dannreuther Die State indeterminate. BD-6 is a rare 1799 half eagle die variety with only 40 to 50 pieces believed extant. This piece shows orange-gold patina with cleaned surfaces that are heavily cleaned and abraded. An old mount bump is seen at 12 o'clock on the rim. PCGS# 519880 Base PCGS# 8081
- 5305** 1811 Tall 5, BD-1, High R.3 — Whizzed — ANACS. XF Details, Net VF20. Bass-Dannreuther Die State c/e. Incredibly bold clash marks are diagnostic of this late die state. This BD-1 half eagle displays bold detail and bright yellow-gold surfaces. Finely granular surfaces account for the Details grade from ANACS. NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110

1813 BD-1 Half Eagle, AU Details Challenging Type

- 5306** 1813 BD-1, R.2 — Whizzed — ANACS. AU Details. Net XF40. Bass-Dannreuther Die State b/b. Moderately available for the Capped Bust type, the BD-1 variety has an estimated survival of 450 to 650 pieces. This example is overly bright and smooth, yet skillfully done to minimize abrasions on the obverse and adjustment marks on the reverse. The “improved” surfaces are not displeasing, but with a finely-textured finish and other faint signs of the handwork. Housed in a small, previous-generation ANACS holder.

CLASSIC HALF EAGLES

- 5307** 1834 Plain 4 AU53+ PCGS. Breen-6501, McCloskey 3-B, R.1. First Head. Always the preferred issue to represent the Classic Head type, this Plain 4 half eagle retains traces of its original mint luster in protected areas. Greenish-gold color and partially prooflike fields add eye appeal. Light abrasions visit both sides with minor die erosion above the eagle's head at the rim. NGC ID# 25RR, PCGS# 8171
- 5308** 1834 Plain 4 AU55 PCGS. Breen-6502, McCloskey 2-A, R.1. The 4 in the date is triple punched, and TAT is spaced much more widely than the remainder of the reverse legend. A charming caramel-gold example of the first-year Classic half eagle. The centers show minor incompleteness of strike, usual for the type, but no marks are of any notice. NGC ID# 25RR, PCGS# 8171
- 5309** 1834 Plain 4 — Questionable Color — PCGS Genuine. Unc Details. Breen-6501, McCloskey 3-B, R.1. The fields are prooflike and olive-gold with faint blue and orange-gold highlights, but slightly cloudy, contributing to the PCGS designation of Questionable Color. The strike is quite sharp for the issue with crisply defined hair strands above the ear. Marks and abrasions are a non-issue, with only minor ticks and a couple of small contacts visible with a glass. An appealing example of this Classic Head five, suitable for many collections and appealing for type. NGC ID# 25RR, PCGS# 8171
- 5310** 1834 Crosslet 4 VG8 PCGS. Breen-6503, McCloskey 5-D, R.4. The Crosslet 4 Classic 1834 five dollar is approximately 10 times rarer than its Plain 4 counterpart. This lower-grade example gives the collector of this short and completable series a chance to acquire this rarity at an entry level price. Friction is even over the high points and the surfaces are bright. And yes, the Crosslet 4 is abundantly clear. NGC ID# 25RU, PCGS# 8172

- 5311** 1836 AU53 NGC. Breen-6509, McCloskey 2-B, R.4 Second Head, Large Date. This variety is attributed by the missing middle arrow shaft. A die crack passes from star 8 down through the 6 in the date. Bright straw-gold surfaces show mild high-point friction and partial luster. Myriad abrasions are present on each side. NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

- 5312** 1840-D Tall D — Improperly Cleaned — NGC Details. AU. Variety 3-B. A late die state with cracks near stars 1, 10, and 13, and a small gouge (as made) below star 13. Well struck for a Dahlonega product, since only the horizontal shield lines lack a full impression. The surfaces are a bit bright from a wipe, but are free from any mentionable abrasions. NGC ID# 25SG, PCGS# 8198
- 5313** 1843-D Medium D — Altered Surfaces — PCGS Genuine. AU Details. Variety 10-G. This lemon-gold Dahlonega type coin shows a sharp strike and no obtrusive marks, although some abrasions were smoothed accounting for the PCGS net grade. Ample luster is present but the reflective fields are slightly subdued from light cleaning. Most 1843-D fives have a Medium D mintmark, although a very scarce Small D variety is also known. As a date, this issue is one of the more available Dahlonega half eagles for type purposes. Perhaps 450 to 550 examples are believed to survive in all grades.

1844-D Half Eagle, AU55 Choice D-Mint Surfaces

- 5314** 1844-D AU55 PCGS. Variety 12-G. The date position is slightly left of normal and the final 4 is centered between the Liberty's neck truncation and the dentils, enough to warrant a new variety in Doug Winter's 2013 book. Our records show the obverse may also be paired with a Large D mintmark, unlisted in the Winter book and surely rare if it exists. The present coin displays light green-gold color and a sharp strike. The Choice surfaces retain considerable luster with only minor ticks and small marks. Population: 14 in 55, 37 finer (5/16). NGC ID# 25T9, PCGS# 8221

1845-D Five Dollar, AU55 Impressive Strike Definition

- 5315** 1845-D AU55 PCGS. Variety 13-H. The more available of two variants shows the 1 centered below the tip of the bust. The 1845-D (90,629 coins minted) comes better-struck than other contemporary Dahlonega half eagles. This bright Choice AU example has bold stars and hair curls. The eagle's feathers and talons are equally razor-sharp. Myriad abrasions appear throughout, and a tiny rim nick occurs below the date. Population: 28 in 55, 50 finer (4/16). NGC ID# 25TC, PCGS# 8224

**1845-D Five Dollar, Unc Details
Bright Lemon-Yellow Color**

5316 1845-D — Cleaning — PCGS Genuine. Unc Details. Variety 13-H. The 1845-D is one of the more obtainable Dahlonega half eagles, and this cleaned example will provide even more affordable to a wider range of collectors. The surfaces are predictably bright, with even lemon-yellow color. The strike details are sharp throughout, as often found on this issue. Minimally abraded. NGC ID# 25TC, PCGS# 8224

5317 1846-C — Improperly Cleaned — NGC Details. AU. Variety 1. The 1846-C is a very scarce Charlotte issue, in spite of a mintage of 12,995 pieces. Only 100-125 examples are believed known in all grades. On this piece, the high-point friction is that of an AU coin but cleaning and other post-striking problems are present. Reddish-golden surfaces, the strike details are well-defined throughout. NGC ID# 25TG, PCGS# 8227

5318 1847 MS61 NGC. Despite a substantial mintage of 915,981 pieces, the 1847 Liberty half eagle is seldom encountered in Mint State grades. This attractive MS61 example is well-detailed and lustrous, with pleasing yellow and orange-gold surfaces that show a scattering of minor contact marks. Census: 45 in 61, 79 finer (5/16). NGC ID# 25TL, PCGS# 8231

**1849-D Five Dollar, AU55
Seldom Encountered Finer**

5319 1849-D AU55 PCGS. Variety 25-S. The 1849-D is a moderately scarce D-mint five. The mintage was a healthy 43,984 pieces, but attrition took a heavy toll as only 150-200 pieces are estimated extant today and is usually only seen in VF or XF. This issue is well-known for mint-made problems, but on this example the only one is unfortunately placed horizontally across the face of Liberty. The green-gold surfaces show light reddish accents around the devices. Population: 10 in 55, 19 finer (4/16). NGC ID# C5XE, PCGS# 8242

5320 1850 AU53 PCGS. CAC. Original olive-gold patina gives this AU 1850 half eagle exceptional eye appeal. The surfaces are fairly smooth, and hints of luster remain in the peripheral fields. The high points of the devices show trivial wear and minor strike weakness. The 1850 is an underrated, scarce issue in high grade. Population: 6 in 53, 31 finer. CAC: 2 in 53, 6 finer (4/16). NGC ID# 25TY, PCGS# 8243

**1852 Five Dollar, MS62
Surprisingly Unavailable No Motto Issue**

5321 1852 MS62 PCGS. More than a half-million 1852 fives were struck, but higher grade pieces are seldom located. Garrett-Guth estimate that 150 pieces may exist in Uncirculated today. This is a highly lustrous example that is well-defined throughout. The only deterrents to a higher grade are a horizontal mark in the left obverse field and a scratch that connects stars 10 and 12. Population: 41 in 62 (2 in 62+), 29 finer (4/16). NGC ID# 2Y7R, PCGS# 8250

**1854-C Five Dollar, XF45
Pleasing Original Patina**

5322 1854-C XF45 PCGS. CAC. Variety 1. The 1854-C half eagle is a fairly scarce issue from this mint, with only 140-170 pieces believed extant. This Choice XF example has traces of luster on slightly abraded orange-gold surfaces. The CAC green label confirms the notable quality and eye appeal. Population: 23 in 45, 45 finer. CAC: 1 in 45, 3 finer (4/16).
Ex: *Long Beach Signature* (Heritage, 2/2007), lot 4555. NGC ID# 25UH, PCGS# 8257

5323 1867-S VF25 PCGS. A moderately circulated mustard-gold and tan survivor from this San Francisco issue of only 29,000 pieces. The devices show a number of light marks, and small areas of alloy appear on and near the truncation of the bust. This 1867-S half eagle is original with only expected abrasions from circulation. Population: 6 in 25, 48 finer (5/16).
Ex: *FUN Signature* (Heritage, 1/2008), lot 4281. NGC ID# 25W4, PCGS# 8314

5324 1874 XF40 PCGS Secure. With a mintage of 3,400 coins, the 1874 half eagle is rare in all grades. CoinFacts estimates that merely 80 examples survive. Reddish and orange-gold color and myriad abrasions appear over each side. Strike detail is good with clear star centers and bold curls. NGC ID# 25WN, PCGS# 8333

5325 1883 MS63 PCGS. CAC. The 1883 Liberty half eagle claims a mintage of 233,400 pieces, but the issue is seldom encountered in grades above MS63. This well-detailed Select specimen is lightly marked, outside of a scrape in the right obverse field near star 12 and a vertical mark near Liberty's forehead. Population: 73 in 63 (3 in 63+), 23 finer. CAC: 5 in 63, 2 finer (4/16). NGC ID# 25XK, PCGS# 8361

- 5326 1883-S MS63 PCGS.** With a mintage of 83,200 coins, the 1883-S is conditionally scarce in Mint State. Sharply struck with frosty luster, each side shows pleasing yellow-gold color that lightens to lemon-gold around the periphery. Lightly marked. Population: 35 in 63 (2 in 63+), 3 finer (4/16).
Ex: Long Beach Signature (Heritage, 9/2005), lot 4629; Dallas Signature (Heritage, 12/2005), lot 1362. NGC ID# 25XM, PCGS# 8363

**1890-CC Five Dollar, MS62
Collectible Mint State Example**

- 5327 1890-CC MS62 PCGS. Variety 1-A.** A pleasing lower-end Mint State example of this conditionally elusive Carson City issue, showing satiny honey-gold luster and well-struck design elements. Light, scattered abrasions determine the grade but have little impact on the eye appeal. Finer examples are seldom seen. NGC ID# C5XF, PCGS# 8376

- 5328 1892 MS64+ PCGS. CAC.** This high-end Choice example exhibits sharply detailed design elements throughout, with some spidery die cracks that travel through the eagle's left (facing) wing and some of the letters in the reverse legend. The pleasing peach-gold surfaces radiate vibrant mint luster and only minor signs of contact are evident. Population: 65 in 64 (4 in 64+), 53 finer. CAC: 17 in 64, 12 finer (5/16). NGC ID# C5XG, PCGS# 8379

- 5329 1895 MS65 NGC.** A conditionally scarce Gem example of this otherwise plentiful late-19th century Philadelphia issue. The strike is bold, and each side displays frosty, original rose-gold luster. Finer 1895 half eagles are rarely seen. Census: 79 in 65 (3 in 65+), 13 finer (5/16). NGC ID# 25YH, PCGS# 8390

- 5330 1896 MS64 PCGS.** An attractive Choice Liberty half eagle from a small mintage of 59,063 pieces, this coin offers sharply detailed design elements and lustrous orange-gold surfaces that show a few minor contact marks, none that are individually distracting. Population: 22 in 64 (1 in 64+), 4 finer (5/16). NGC ID# 25YK, PCGS# 8392

- 5331 1896-S MS62 PCGS.** The 1896-S is a better date in Uncirculated condition. Coins grading finer than this MS62 piece are rare. This example displays a sharp strike and frosty yellow-gold luster. Scattered abrasions define the grade but few are individually significant. Population: 17 in 62, 12 finer (5/16). NGC ID# 25YL, PCGS# 8393

- 5332 1905-S MS63 PCGS.** Sharply detailed in most areas, this attractive Select specimen shows just a touch of softness on some star centers. The lustrous orange-gold surfaces show a few scattered minor contact marks, with a vertical scratch on the jaw the only one of note. Population: 33 in 63, 36 finer (5/16). NGC ID# 25Z7, PCGS# 8412

- 5333 1905-S MS64 PCGS.** PCGS CoinFacts estimates that only 250 1905-S half eagles survive in mint condition, surprising given the issue's mintage of 880,700 coins. Frosty luster shimmers over medium yellow-gold surfaces void of major impairments. The stars are a touch soft, but the central motifs are bold. Population: 28 in 64 (2 in 64+), 8 finer (4/16). NGC ID# 25Z7, PCGS# 8412

**1906 Liberty Half Eagle, MS65+
Well-Preserved, Colorful Example**

- 5334 1906 MS65+ PCGS. CAC.** Despite a substantial mintage of 348,700 pieces, the 1906 Liberty half eagle is very scarce in MS65 condition, and finer examples are rare. This high-end Gem exhibits sharply detailed design elements and vivid orange-gold surfaces, with vibrant mint luster and no mentionable distractions. PCGS has graded 34 numerically finer examples (4/16). NGC ID# 25Z9, PCGS# 8413

**1906 Five Dollar, MS66
Frosty, Conditionally Rare**

- 5335 1906 MS66 NGC.** Relatively little coin-to-coin contact was needed in early 20th century banks to mar the surfaces of gold pieces to the point of fitting the "bagmarked" descriptive. The survival of this essentially untouched Premium Gem is remarkable. This rare coin displays frosty straw-gold mint luster and blemish-free surfaces. Trivial strike weakness is seen on the hair curls around Liberty's face. Census: 27 in 66 (2 in 66+, 1 in 66★), 10 finer (5/16). NGC ID# 25Z9, PCGS# 8413

**1906-D Half Eagle, MS65+
First Denver Issue of the Type**

- 5336 1906-D MS65+ PCGS. CAC.** This first-year Denver Mint Gem has lime-green peripheries and canary-gold fields and devices. Liberty's curls and the eagle's fletchings show moderate blending of detail, but abrasions are limited to minor field grazes. Population: 60 in 65 (2 in 65+), 8 finer. CAC: 16 in 65, 4 finer (4/16).
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 4785, which realized \$4,887.50. NGC ID# 25ZA, PCGS# 8414

- 5337 1906-S MS64+ PCGS. CAC.** The 1906-S Liberty half eagle is seldom encountered in high grade. This Plus-graded Choice specimen exhibits sharply detailed design elements and vibrant mint luster, with vivid orange-gold surfaces that show few signs of contact. Population: 40 in 64 (2 in 64+), 17 finer. CAC: 6 in 64, 5 finer (5/16). NGC ID# 25ZB, PCGS# 8415

INDIAN HALF EAGLES

- 5338 1908 MS64 PCGS.** The rich-gold surfaces offer hints of hazel and copper in the protected areas. The strike is above average, with sharp definition on the headdress and eagle except at the shoulder feathers. Careful scrutiny reveals a pair of light scrapes on the Indian's cheek that may have prevented a Gem ranking, but a notable lack of abrasions elsewhere.

Ex: *Central States Signature (Heritage, 4/2006)*, lot 2865. NGC ID# 28DE, PCGS# 8510

1908 Indian Half Eagle, MS64+ First Year of the Design

- 5339 1908 MS64+ PCGS. CAC.** Bela Lyon Pratt's innovative incuse Indian design was introduced in 1908, an important consideration for type purposes. This Plus-graded Choice example exhibits sharply detailed design elements and vivid orange-gold surfaces with minimal signs of contact and satiny mint luster. Eye appeal is outstanding. NGC ID# 28DE, PCGS# 8510

- 5340 1909-D MS64 NGC.** The 1909-D five dollar remains an available coin at the near-Gem level but it is scarce any finer. Type collectors and Indian Head gold specialists search out MS64 examples with strong eye appeal as the half eagle with the most bang for the buck. This piece qualifies with lustrous, orange-gold surfaces and a strong strike. The ever-present abrasions on the Denver issue are present but less conspicuous than often seen. NGC reports just 81 finer examples (4/16). NGC ID# 28DJ, PCGS# 8514

1909-D Five Dollar, MS64+ Few Abrasions, Nice Eye Appeal

- 5341 1909-D MS64+ PCGS. CAC.** Khaki-gold surfaces are largely unabraded for this Denver date and remarkably Choice as a result. Most examples even approaching the Gem level show bagmarks and other distractions from rather careless handling of the large mintage (more than 3.4 million pieces struck) yet this coin is smooth on both sides. A few small blended areas are noted on the headdress and a tiny scrape on the jawline. An ideal type coin. NGC ID# 28DJ, PCGS# 8514

- 5342 1910-S MS61 PCGS.** Uncirculated 1910-S Indian half eagles are elusive. This collectible example is well-struck and has satiny olive-gold patina with peach-gold luster in the recesses. Scattered abrasions limit the grade, but the overall eye appeal is pleasing for an MS61 half eagle. NGC ID# 28DN, PCGS# 8519

- 5343 1910-S MS62 NGC.** Strong Mintmark. The 1910-S Indian half eagle is a semikey date in Uncirculated condition, and pieces grading finer than this MS62 coin are especially scarce. This piece displays well-struck design elements and satiny prairie-gold luster. Light, scattered abrasions are consistent with the grade. NGC ID# 28DN, PCGS# 8519

- 5344 1910-S MS62 NGC.** The 1910-S Indian half eagle is a scarce issue in MS62 condition, despite the substantial mintage of 770,200 pieces, and finer examples are rare. This pleasing MS62 example displays sharply detailed design elements and lightly marked yellow and rose-gold surfaces with attractive mint luster. NGC has graded 34 numerically finer examples (5/16). NGC ID# 28DN, PCGS# 8519

- 5345 1911 MS64+ PCGS.** A sharp 1911 half eagle with glowing, frosty luster in yellow-gold hues. A loupe reveals only insignificant ticks, and the eye appeal is very nearly Gem-level. This issue is usually available in Choice condition but is scarce any finer. NGC ID# 28DP, PCGS# 8520

- 5346 1911-D AU55 PCGS.** The "D" mintmark on this About Uncirculated five is lightly impressed but visible. Attractive greenish-gold surfaces show only minor evidence of brief circulation with a fair amount of remaining mint luster. Less grainy than many examples of the date, this is a Choice representative of the second-lowest mintage of the Indian Head half eagle series. NGC ID# 28DR, PCGS# 8521

- 5347 1911-S MS62 PCGS.** The 1911-S is surprisingly scarce in MS63 or higher, making this example perfect for budget-minded specialists. Light yellow-gold surfaces display characteristic S-mint frost and remarkably few blemishes of note. Incompleteness over the lower headdress feathers is also typical for the issue. NGC ID# 25ZM, PCGS# 8522

1911-S Five Dollar, MS63 Lovely Original Color

- 5348 1911-S MS63 PCGS.** The 1911-S Indian half eagle is a slightly better date in Uncirculated condition, rarely seen finer than this MS63 example. This piece is well-struck with subdued, frosty luster. Light, scattered abrasions are largely unnoticed in the shadow of rich original coloration. Much of each side displays honey and orange-gold hues, while the recesses exhibit tinges of lilac and rose. PCGS has seen 33 finer representatives (5/16). NGC ID# 25ZM, PCGS# 8522

- 5349 1912 MS63 NGC.** The headdress feathers and eagle's shoulder feature bold strike detail, as do the other major design elements of this pleasing, pale yellow-gold Indian half eagle. Lightly marked and good for type purposes. NGC ID# 28DS, PCGS# 8523

1914-S Indian Half Eagle, MS61

- 5350 1914-S MS61 PCGS.** The vivid orange-gold surfaces of this attractive Mint State specimen show a scattering of minor contact marks on both sides, but the design elements are sharply detailed and all surfaces radiate vibrant mint luster. From a mintage of 263,000 pieces, the 1914-S is plentiful in lower Mint State grades but high-quality examples are elusive. NGC ID# 28DW, PCGS# 8529

1914-S Five Dollar Indian, MS61
One of the Great Condition Rarities in the Series

5351 1914-S MS61 PCGS. In general S-mint five and ten dollar Indians are significant condition rarities. That is certainly the case with the 1914-S five dollar. This Uncirculated piece shows original surfaces with a few scattered specks of olive patina. Numerous small abrasions are scattered across each side also and there is some striking softness over the high points. NGC ID# 28DW, PCGS# 8529

5352 1915 MS63 NGC. This was the final Philadelphia emission in the series before 1929, when half eagles were struck at the facility one last time. The strike characteristics of this wonderful Select type coin are exceptionally strong. Rose-gold dominates each side with light-green accents near the rims. NGC ID# 28DX, PCGS# 8530

LIBERTY EAGLES

1842 Large Date Ten, Near-Mint
Crisply Struck, Conditionally Rare

5353 1842 Large Date AU58 PCGS. Although the *Guide Book* mintage for the Large Date variety is multiples of its Small Date counterpart, the two issues are similarly priced, and approximately equal in rarity. This near-Mint Large Date example has a good strike and occasional hints of honey toning. Marks are relatively few and unimportant aside from a small divot on the cheekbone. Population: 3 in 58, 6 finer (4/16). NGC ID# 262M, PCGS# 8584

5354 1842 Small Date AU53 PCGS. The scarcer Small Date variety. This piece displays bright yellow-gold patina with hints of luster in the protected regions of the fields. The strike is bold, and little wear is present. Light field chatter is consistent with the grade. Population: 7 in 53, 14 finer (5/16). NGC ID# 262M, PCGS# 8585

1842-O Ten Dollar, AU53
Seldom Seen in High Grades

5355 1842-O AU53 NGC. Variety 1. Ex: S.S. Republic. In spite of a mintage of 21,400 pieces, the 1842-O is a challenging issue to locate in higher grades. This example has pale yellow-gold surfaces that display the expected number of abrasions, but none are especially deep. The strike details show even softness over the high points of the design. Census: 39 in 53, 62 finer (4/16). NGC ID# 262N, PCGS# 8587

1845-O Ten Dollar, AU53
Repunched Date

5356 1845-O Repunched Date, Variety 1, AU53 NGC. This variety shows bold repunching on the date. The 1845-O Liberty eagle is rare in Mint State, making attractive AU coins highly appealing to the budget-conscious collector. This lightly abraded AU coin displays bright yellow-gold surfaces with hints of reflectivity in the protected regions of the fields. Light high-point wear leaves the devices sharply detailed. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

5357 1853 AU58 PCGS. Lovely orange-gold patina on this near-Mint 1853 Liberty ten displays hints of luster in the protected regions of the fields. The strike is bold, and high-point friction is minor. Light field chatter is consistent with the grade. Population: 35 in 58, 28 finer (5/16). NGC ID# C82G, PCGS# 8610

5358 1856 AU58+ NGC. The only Plus-graded AU example at NGC, this near-Mint 1856 Liberty eagle displays bold detail and partial luster amid honey-gold surfaces. Light chatter accompanies the grade but hardly affects the eye appeal. NGC lists 29 Mint State coins finer (4/16). NGC ID# 263P, PCGS# 8619

**1861 Eagle, Pleasing AU58
Excellent No Motto Type Coin**

5359 1861 AU58 PCGS. The 1861 eagle has long been the go-to issue for type collectors looking for a pleasing No Motto ten dollar gold coin, as the Mint struck 113,100 pieces that year. Near-Mint coins are still very scarce. This borderline-Uncirculated eagle has bright and partly lustrous yellow-gold surfaces with myriad abrasions lightly peppered over each side. As a whole, the impression is bold, although the stars lack centers and the olive leaves fail to show complete veins. NGC ID# 2647, PCGS# 8633

5360 1879 MS62 PCGS. The 1879 ten is elusive in Mint State. This collectible MS62 coin displays a bold strike and vibrant honey-gold luster. Chatter over each side limits the grade, but there are no singularly bothersome abrasions. PCGS lists 44 finer submissions (5/16). NGC ID# 265M, PCGS# 8683

5361 1880-O — Streak Removed — PCGS Genuine. AU Details. Just 9,200 pieces were struck of this New Orleans ten but most are lost to attrition. Doug Winter estimates a survival of 175 to 225 pieces in all grades. This example shows an unsuccessful attempt to remove a streak of struck-in grease on the reverse, leaving a trail of deep toning. Pleasing khaki-gold color remains elsewhere, with minute traces of mint luster and no other significant detractions.

**1880-S Ten Dollar, MS63+
Conditionally Rare Issue**

5362 1880-S MS63+ PCGS. Breen-7000. Tall S. A sharply struck and lustrous Select orange-gold example. Minor field marks near the chin and above the arrowheads combine to preclude an even finer grade. PCGS has certified only two pieces as MS63+; the other one appeared as lot 4520 in our December 2010 Houston Signature and realized \$6,325. Population: 49 in 63 (2 in 63+), 7 finer (4/16). NGC ID# 265V, PCGS# 8690

**1881-O Ten Dollar, AU55
Scarcer New Orleans Issue**

5363 1881-O AU55 NGC. Variety 1. Scarcest of the three O-mint tens struck in the early 1880s, a group that has historically been grouped together in terms of collectibility. This piece shows significant remaining prooflikeness in the obverse fields and the color is subtle reddish-gold. Well-struck overall, the surfaces only show a few abrasions in the right reverse field. NGC ID# 265Y, PCGS# 8693

5364 1881-S MS63 NGC. This West Coast issue is plentiful in most grades, but Select coins are exceedingly rare. Lovely peach-gold surfaces show strong detail with light chatter that fails to detract. Thick, frosty luster abounds. Census: 28 in 63 (1 in 63 ★), 2 finer (5/16). NGC ID# 265Z, PCGS# 8694

5365 1888-O MS61 PCGS. Variety 1. A mintage of 21,335 pieces ensures better date status for this Cleveland-era New Orleans issue. Rich orange toning endows lustrous and moderately marked surfaces. Only star 13 lacks a precise strike. Two die pairs are known for the '88-O, but most examples are Variety 1. NGC ID# 266L, PCGS# 8713

5366 1888-S MS63 PCGS. The *Gold Encyclopedia* explains that the 1888-S "offers a good strike, bold luster, and good eye appeal" — characteristics that define this Select offering. Rose-gold color dominates surfaces that display lightly scattered abrasions. Finer coins are extremely rare, with only four higher grading events at PCGS (4/16). NGC ID# 266M, PCGS# 8714

5367 1889-S MS63 PCGS. Vibrant orange-gold luster rolls over minimally abraded surfaces and sharp design elements on this Select 1889-S Liberty eagle. Eye appeal and originality are outstanding. PCGS has seen only 23 numerically finer examples (4/16). NGC ID# 267L, PCGS# 8716

5368 1889-S MS63 PCGS. The 1889-S Liberty eagle is a relatively available issue in MS63, but finer examples are rare. This attractive Select specimen is well-detailed and lustrous, with some scattered minor contact marks and scratches. PCGS has graded 23 numerically finer examples (5/16). NGC ID# 267L, PCGS# 8716

5369 1891-CC/CC FS-501 MS61 PCGS. This vibrantly lustrous 1891-CC ten displays sharp design elements and vivid honey-gold surfaces. Scattered abrasions limit the grade but none are individually bothersome. The 1891-CC is a plentiful Carson City issue, popular among collectors seeking a single piece from this mint. The mintmark is recut on this *Cherry-pickers'* variety. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

5370 1892-O MS62 PCGS. Variety 1. An elusive New Orleans issue in Mint State, coming from a mintage of only 28,688 pieces. This is a sharp, frosty MS62 coin with yellow-gold surfaces that show light, scattered chatter as is consistent with the grade. PCGS has seen only eight numerically finer coins, NGC just one (4/16). NGC ID# 266X, PCGS# 8723

5371 1893-O MS62 PCGS. Variety 1. A reasonably available issue in MS62, the 1893-O Liberty eagle is surprisingly hard to locate any finer. This sharply detailed example retains much of its original mint luster, but the yellow-gold surfaces show some chatter in the fields. PCGS has graded 12 numerically finer examples (5/16). NGC ID# 2673, PCGS# 8727

- 5372 1894-O MS61 NGC. Variety 3.** A well struck and inoffensively abraded pumpkin-gold example. The low date and low mintmark die combination. Five die pairs are confirmed from the relatively low mintage of 107,500 pieces. An underrated issue relative to other New Orleans ten emissions of the era. NGC ID# 2676, PCGS# 8730
- 5373 1897-O MS62 PCGS. Variety 1.** A sharply detailed MS62 specimen from a mintage of just 42,500 pieces, this attractive Liberty eagle offers lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. Population: 70 in 62 (2 in 62+), 26 finer (4/16). NGC ID# 7LHC, PCGS# 8738
- 5374 1897-O MS62+ NGC. Variety 1.** A lovely peach-gold representative. Well struck except for a few inner star points. The coruscating surfaces lack any mentionable marks. Like other later New Orleans issues, the 1897-O has a low mintage and is seldom encountered above the MS62 level. NGC ID# 7LHC, PCGS# 8738
- 5375 1898 MS64 PCGS.** The 1898 Liberty eagle is much more difficult to locate in high grade than its mintage of 812,130 pieces would suggest. This sharply detailed Choice example displays lustrous orange-gold surfaces with a few scattered minor contact marks. Population: 68 in 64 (2 in 64+), 11 finer (5/16). NGC ID# 267G, PCGS# 8740
- 5376 1898 MS64 PCGS.** A sharp near-Gem with cartwheeling yellow-gold luster that illuminates the mostly unabraded relief elements. The fields have a few faint grazes that define the grade. The 1898 Liberty ten is occasionally seen in MS64 but is rare finer. Population: 68 in 64 (2 in 64+), 11 finer (5/16). NGC ID# 267G, PCGS# 8740
- 5377 1901 MS64+ PCGS.** Frosty luster on this high-end Choice 1901 Liberty eagle displays hints of rose and peach color. The strike is bold, and there are no significant abrasions. This piece is in an accessible and affordable grade for the type collector, something finer coins quickly surpass. NGC ID# 7LHF, PCGS# 8747

**1901 Ten Dollar, Radiant MS66
Splendid Liberty Head Type Coin**

- 5378 1901 MS66 NGC.** It is unsurprising that the 1901 ten is frequently found in type collections given the issue's survival rate. Examples can be located with ease through MS64. Gems are scarce but accessible, and the date only begins to pose a real challenge at this impressive level. Areas of orange and peach-gold coloration cover this frosty Premium Gem Liberty ten dollar gold coin. A pinpoint strike makes this offering all the more desirable. Unimportant luster grazes in the left obverse field prevent an even higher grade. Census: 52 in 66 (1 in 66+, 1 in 66 ★), 7 finer (4/16). NGC ID# 7LHF, PCGS# 8747

- 5379 1901-O MS61 NGC. Variety 1.** A yellow-gold New Orleans type coin with good luster and a nice strike. Mentionable marks are limited to a line below the AM in AMERICA. A lower mintage issue, as only 72,041 pieces were produced. NGC ID# 267R, PCGS# 8748

- 5380 1901-S MS64 NGC. CAC.** The 1901-S Liberty eagle was produced in large numbers and the issue is a favorite choice of branch mint type collectors. This impressive Choice specimen is sharply detailed throughout, with vibrant mint luster and well-preserved yellow and orange-gold surfaces. NGC ID# 267S, PCGS# 8749

- 5381 1902 MS63+ PCGS. CAC.** The 1902 Liberty eagle is a better date in the series, from a mintage of 82,400 pieces. This Plus-graded Select example is well-detailed, with lustrous orange-gold surfaces that show a scattering of minor contact marks. PCGS has graded 23 numerically finer examples (5/16). NGC ID# 267T, PCGS# 8750

- 5382 1903-O MS61 PCGS. Variety 1.** A sharply struck New Orleans type coin with occasional splashes of orange toning over coruscating sun-gold surfaces. Minor field abrasions are distributed. The reverse has a few minuscule spots. NGC ID# 267W, PCGS# 8753

- 5383 1905 MS64+ PCGS. CAC.** 30th Anniversary Green Label Holder. Satiny straw-gold luster gives this high-end Choice 1905 eagle luminous surfaces and strong eye appeal. The strike is boldly rendered, and only a couple of faint marks on the cheek limit the grade. PCGS lists 31 finer representatives. CAC: 10 in 64, 11 finer (4/16). NGC ID# 7LD3, PCGS# 8757

- 5384 1906-O MS61 NGC.** Apricot-tinged luster enlivens this well struck and moderately marked Liberty ten. The final New Orleans issue of the denomination and the penultimate Southern gold issue, followed only by the 1909-O five. NGC ID# 53FB, PCGS# 8761

- 5385 1907 MS64 PCGS.** A thick layer of mint frost blankets both sides of this lustrous Liberty Head eagle, which saw a mintage of more than 1.2 million pieces before the transition to the new Indian Head design. Many were exported to Europe. This attractive near-Gem example is sharply struck with only minor marks. Housed in an old green label holder, the 1907 Liberty tens are rare any finer. PCGS reports just 28 coins in a higher numeric grade (4/16). NGC ID# 2688, PCGS# 8763

- 5386 1907-D MS63 PCGS.** The 1907-D Liberty eagle claims a substantial mintage of more than 1 million pieces but high-grade specimens are surprisingly difficult to locate. This attractive Select example is sharply detailed and lustrous, with pleasing orange-gold surfaces that show a few scattered, minor contact marks on each side. PCGS has graded 55 numerically finer examples (5/16). NGC ID# 268A, PCGS# 8764

- 5387 1907-D MS64 PCGS.** This is the second of just two Denver Mint Liberty eagles, and it is a condition rarity despite a mintage of just over 1 million coins. A few scattered marks are evident, with a thin scratch across part of the shield that prevents a higher grade and finest known status. Brilliant yellow-gold surfaces exhibit wisps of pale blue and orange color. Population: 55 in 64 (2 in 64+), 0 finer (5/16). NGC ID# 268A, PCGS# 8764

**1907-S Eagle, MS63
Final-Year Issue**

- 5388 1907-S MS63 NGC.** Broadly lustrous apricot-gold surfaces show scattered light marks that have surprisingly little impact on the overall eye appeal. Strike softness is noted over the hair framing Liberty's face. The final-year issue with a mintage of 210,500 coins. Census: 14 in 63, 7 finer (4/16).
Ex: Houston Signature (Heritage, 12/2013), lot 5181. NGC ID# 38EP, PCGS# 8765

INDIAN EAGLES

- 5389 1907 No Motto MS61 NGC.** A pleasing Mint State representative of this popular first-year type issue, with well-detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 28GF, PCGS# 8852
- 5390 1907 No Motto MS61 PCGS.** A collectible Mint State example of this popular No Motto type-coin issue, showing satiny yellow-gold luster with some deeper orange tinges near the borders. Moderate die erosion is seen in the fields, and a single light scratch appears in front of Liberty's profile. NGC ID# 28GF, PCGS# 8852
- 5391 1907 No Motto MS63 PCGS.** Lustrous and original with honey and yellow-gold hues intermingling over each side. This Select No Motto Indian eagle type coin displays a bold strike and has only light, scattered abrasions that define the grade. A pleasing coin for the budget-conscious collector. NGC ID# 28GF, PCGS# 8852

1907 No Motto Eagle, Strong MS64+ Collectible First-Year Issue

- 5392 1907 No Motto MS64+ NGC.** Type collections often include an example of the 1907 No Motto eagle. It is an available first-year issue and more accessible than the 1908 among No Motto ten dollar gold coins. This strong Choice example enjoys medium yellow-gold color that combines with vibrant luster over each side. A couple of pedigree marks on the nose and neck are the only notable flaws. NGC ID# 28GF, PCGS# 8852
- 5393 1908-D No Motto MS62 PCGS.** The earlier No Motto version of the 1908-D eagle, an elusive issue in Mint State. This collectible MS62 coin displays well-struck design elements and satiny yellow-gold luster. Light surface chatter limits the grade. Finer examples are infrequently seen. NGC ID# 28GH, PCGS# 8854
- 5394 1908 Motto MS63 PCGS.** Congress mandated that the motto IN GOD WE TRUST be added to the reverse after July 1, 1908. The Mint struck 341,370 eagles in the final five months of the year. Frosted butter-gold surfaces are minimally abraded with well-defined relief elements. A nice first-year subtype representative. NGC ID# 28GJ, PCGS# 8859

1908 Motto Ten, MS64 First-Year With Motto Type Coin

- 5395 1908 Motto MS64 PCGS.** A sharp, satiny Choice example of the inaugural With Motto Indian eagle issue, showing yellow-gold luster without any obvious abrasions. Finer examples of this issue are elusive, making this piece ideal for the budget-conscious collector. Eye appeal is pleasing for the grade. NGC ID# 28GJ, PCGS# 8859

- 5396 1909 MS62 PCGS.** Moderate high-point incompleteness hardly affects the appeal of this incredibly lustrous Saint-Gaudens ten dollar gold piece. Light grazes and bagmarks appear over eye-catching khaki-gold surfaces. NGC ID# 28GM, PCGS# 8862
- 5397 1909 MS63 NGC.** The 1909 is more accessible in better grades than its D- and S-mint counterparts, yet anything finer than this Select example will give collectors a run for their money. Khaki-gold surfaces radiate frosty luster and boast well-struck devices. Small ticks and bagmarks are in line with the grade. NGC ID# 28GM, PCGS# 8862
- 5398 1909 MS63 PCGS.** Pleasant surfaces with hints of crimson and some steely-blue color on the lower obverse. Average strike with the expected wispieness for the grade but overall high eye appeal. Finer examples of the 1909 Indian eagle are elusive. Ex: FUN Signature (Heritage, 1/2005), lot 9343. NGC ID# 28GM, PCGS# 8862
- 5399 1909-D MS62 PCGS.** The 1909-D Indian eagle is seldom encountered in Mint State, especially in grades above MS62. This attractive MS62 example offers well-detailed design elements and lustrous yellow and orange-gold surfaces with some scattered minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863
- 5400 1909-D MS62 PCGS. CAC.** The 1909-D Indian eagle is an elusive issue in high grade. This attractive MS62 specimen is well-detailed and lustrous, with orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 28GN, PCGS# 8863
- 5401 1909-S AU58 PCGS. CAC.** Only a trace of actual wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded orange-gold surfaces retain much of their original mint luster. From a mintage of 292,350 pieces. NGC ID# 28GP, PCGS# 8864
- 5402 1909-S MS61 NGC.** Abrasions are often a problem for this San Francisco eagle, although the present coin shows only small marks. The strike is slightly incomplete at the eagle's shoulder, trailing leg, and talons, as well as at the high points of the curls. Vibrant mint luster shines beneath medium-gold patina. NGC ID# 28GP, PCGS# 8864
- 5403 1910-D MS64 NGC.** This attractive Choice example displays well-detailed design elements and vibrant mint luster throughout. The pleasing yellow and orange-gold surfaces show only minor signs of contact and eye appeal is quite strong. NGC ID# 28GS, PCGS# 8866
- 5404 1910-S MS62 NGC.** The 1910-S is a "classic condition rarity that is one of the cornerstones to a great collection," according to Garrett and Guth. This collector-grade representative has softly frosted luster over green and rose-gold surfaces. A crisp impression furthers the appeal. NGC ID# 268D, PCGS# 8867
- 5405 1910-S MS62 PCGS.** The 1910-S Indian eagle claims a substantial mintage of 811,000 pieces, but the issue becomes scarce at the MS62 grade level. This attractive MS62 example offers well-detailed design elements and vibrant mint luster throughout, with lightly abraded yellow-gold surfaces. NGC ID# 268D, PCGS# 8867
- 5406 1911 MS64 PCGS.** This is among the most accessible Indian Head eagles after the 1932 and 1926 issues, making it a great type coin. Khaki-gold shadings complement light straw color. There are an expected number of ticks on each side. A small planchet void occurs near the rim next to star 2. NGC ID# 28GT, PCGS# 8868
- 5407 1912-S MS61 NGC.** Wheat-gold color prevails over each side of this frosty S-mint eagle. Blushes of reddish-gold appear at the upper reverse. A die crack encircles most of the obverse rim. Notable abrasions occur on Liberty's temple, neck, and headdress. An uneven strike shows softness over the lower feathers and the eagle's shoulder. NGC ID# 269G, PCGS# 8872

- 5408 1914-D MS63 PCGS.** Satiny golden luster illuminates well-detailed motifs on this Select 1914-D Indian ten. Each side is lightly abraded, but there are no severe distractions. The 1914-D is a slightly better date in the finer Mint State grades, but examples in MS63 and lower levels are obtainable for the budget-conscious collector. NGC ID# 28H3, PCGS# 8876

1914-D Ten Dollar, MS64
Attractive and Conditionally Elusive

- 5409 1914-D MS64 PCGS.** The 1914-D Indian eagle is occasionally seen in MS64 but is scarce at the Gem level. This collectible Choice representative displays a sharp strike and frosty prairie-gold luster. A few faint grazes are quite minimal for the grade. Eye appeal is correspondingly high. PCGS lists only 36 numerically finer submissions (4/16). NGC ID# 28H3, PCGS# 8876

- 5410 1915 MS64 NGC.** This well-made Philadelphia Indian Head eagle issue is ideal for type representation. Choice examples like the one here are sufficiently available to meet most collector demand, though higher-graded Gems become decidedly scarce. Light copper and wheat-gold color reveal occasional tinges of green. Design detail is crisp, and shallow marks and grazes do not overly detract. NGC ID# 28H5, PCGS# 8878

- 5411 1915 MS64 PCGS.** The 1915 Indian eagle can be found in MS64 condition with a little patience, but it is very scarce in finer grades. This well-detailed Choice example displays lustrous orange-gold surfaces with a few scattered, minor contact marks. PCGS has graded 66 numerically finer examples (5/16). NGC ID# 28H5, PCGS# 8878

- 5412 1932 MS64 PCGS.** Far and away one of the most-available Indian eagles for type, the 1932 ten is a paragon of high-quality production and smooth, well-struck surfaces. This Choice example displays colors ranging from light lemon-gold to reddish-orange, with sharp motifs and bold satin luster throughout. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

- 5413 1851-O — Graffiti — PCGS Genuine. XF Details. Variety 2.** The 1851-O is the ideal O-mint double eagle for the collector seeking a single piece from this mint. The present coin is deeply original with olive-gold patina and well-detailed design elements. Each side shows moderate chatter, as is typical of the issue, although only a small letter "A" carved into the left reverse field and a similar "X" above the eagle's head preclude a numeric designation. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, Near-Mint
Minimally Marked, Semireflective

- 5414 1852 AU58 PCGS.** Two years after double eagles were first released into circulation, the Mint struck more than 2 million twenty dollar gold coins. Consequently, the 1852 is one of the most collectible No Motto issues, and examples are readily obtainable through AU grades. Uncirculated coins are very scarce, and this near-Mint twenty has the look of a Mint State piece without breaking the bank. Considerable luster rolls over the light golden surfaces with a nice frosty texture. The devices are remarkably well-defined, and marks are undistracting. NGC ID# 268K, PCGS# 8906

1853 Double Eagle, AU50
Original Patina

- 5415 1853 AU50 PCGS. CAC.** Ex: Granite Lady Hoard. Blatantly original luster and green-gold patina blanket the moderately abraded surfaces of this About Uncirculated 1853 double eagle. This Gold Rush-era Philadelphia issue is popular for type purposes, although Mint State coins are elusive. This well-detailed AU coin should appeal to a number of collectors who appreciate old-time coloration. NGC ID# 268M, PCGS# 8908

1853-O Twenty Dollar, XF Details
Scarcer, Low-Mintage Issue

- 5416 1853-O — Cleaning — PCGS Genuine. XF Details. Variety 1.** The 1853-O is a scarce Type One New Orleans twenty that is generally only available in VF and XF condition. This is a well-defined piece for the grade with remarkably few abrasions present. Each side shows brightness that is just a bit too much for an original coin, the result of cleaning. The color is olive-gold with slightly darker accents over the devices. NGC ID# 268N, PCGS# 8910

**1855-S Liberty Twenty, AU53
Bright Surfaces**

- 5417 1855-S AU53 PCGS Secure.** Medium S. The 1855-S was well-represented in recent shipwreck finds, but high-grade specimens are still somewhat scarce in today's market. This attractive AU53 example displays well-detailed design elements and bright surfaces with lightly abraded orange and greenish-gold color. NGC ID# 268X, PCGS# 8916

**1857-S Double Eagle, AU55
Partly Lustrous, Khaki-Gold Surfaces**

- 5418 1857-S AU55 NGC.** Medium S. The Broken A variety (Breen-7188) was well-represented in the S.S. *Central America* hoard, though this Choice AU example has not been pedigreed to that famous cache. It differs from Variety 20E, which has a defective left serif. The surfaces suggest the origin of this Type One twenty to be terrestrial rather than nautical. Myriad abrasions appear over each partially lustrous, khaki-gold side. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, Unc Details
Smoothed Obverse**

- 5419 1857-S — Altered Surfaces — PCGS Genuine.** Unc Details. A concerted effort was made to create an unmarked obverse, but the resultant appearance is that of a buffed coin with unnatural smoothness, although not wholly displeasing. The reverse appears to be original and lustrous Mint State, or nearly so. NGC ID# 2696, PCGS# 8922

- 5420 1858-S AU53 PCGS.** A pleasing AU53 representative of this popular Type One double eagle, with light wear on the well-detailed design elements and orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 2699, PCGS# 8925

- 5421 1860 — Improperly Cleaned — NGC Details.** Unc. A richly detailed caramel-gold double eagle with moderately reflective fields. A loupe reveals wispy hairlines, but marks are relegated to tiny ticks on the portrait. Stars and rays are clashed on Liberty's neck. Despite a plentiful mintage, the 1860 remains very scarce in Uncirculated grades. NGC ID# 269D, PCGS# 8929

1864 Twenty Dollar, AU Details

- 5422 1864 — Cleaning — PCGS Genuine.** AU Details. The 1864 double eagle is a conditionally elusive issue, rarely seen in Mint State. This lightly cleaned AU coin is far more affordable than an uncirculated piece and maintains moderate eye appeal. The bright yellow-gold surfaces are lightly abraded, as expected, but the design elements are sharp.

**1865 Double Eagle, Choice AU
Final Philadelphia No Motto Issue**

- 5423 1865 AU55 NGC.** CAC. The Mint's final batch of No Motto double eagles was produced in 1865, totaling 351,175 coins. Examples are moderately available thanks in part to the discovery of the S.S. *Republic* in 2003. Medium yellow-gold surfaces exhibit traces of olive-green color, and an impressive degree of frosty luster remains within the recesses of the well-struck design elements. The typically seen abrasions are present on each side, but the only singular imperfection is a reeding mark above Liberty's nose. NGC ID# 269U, PCGS# 8943

**1867 Liberty Twenty, AU58
Popular Type Two Representative**

- 5424 1867 AU58 NGC.** The 1867 Liberty double eagle claims a mintage of 251,015 pieces and the issue is always popular with type collectors seeking a specimen of the Type Two design. This attractive near-Mint example shows well-detailed design elements with just a trace of wear and lightly abraded orange-gold surfaces that retain much original mint luster. NGC ID# 269Z, PCGS# 8951

1868-S Liberty Double Eagle, AU58
Lustrous Type Two Specimen

- 5425 1868-S AU58 PCGS.** Produced in large numbers and readily located in lower circulated grades, the 1868-S Type Two double eagle is quite elusive in AU58 condition. This attractive Near-Mint representative shows just a touch of wear, and the vivid yellow and orange-gold surfaces retain almost all of their original mint luster. The scattered minor abrasions are consistent with the grade. PCGS has graded 30 numerically finer examples (4/16). NGC ID# 26A4, PCGS# 8954

1869-S Double Eagle, AU55
Some Luster Remains

- 5426 1869-S AU55 NGC.** Moderate luster remains in the protected regions of the fields on this Choice AU 1869-S double eagle. The design elements are slightly worn on their high points, and scattered abrasions are consistent with the grade. Each side displays straw-gold color. The 1869-S is a scarce issue in Mint State, but nice AU coins such as this are much more obtainable. NGC ID# 26A6, PCGS# 8956

1869-S Liberty Double Eagle, AU55

- 5427 1869-S AU55 PCGS. CAC.** Like most Type Two Liberty double eagles, the 1869-S is plentiful in most circulated grades and quite elusive in Mint State. This attractive Choice AU specimen is lightly worn and lightly abraded, with well-detailed design elements and frosty mint luster on both sides. The orange-gold surfaces show a few streaks of amber alloy on the reverse. NGC ID# 26A6, PCGS# 8956

- 5428 1872 AU53 PCGS.** Although available in circulated condition, the 1872 double eagle is scarce in Mint State. This AU coin balances quality and affordability. The strike is bold, and little high-point wear is present. The wheat-gold surfaces retain hints of luster in the protected regions of the fields. NGC ID# 26AD, PCGS# 8963

- 5429 1873 Open 3 MS62 PCGS.** A boldly struck, frosty example of this available Type Two issue, showing radiant yellow-gold luster and minimal abrasions. The Open 3 1873 double eagle is far more plentiful in Mint State than the earlier Closed 3 variant, although coins grading finer than MS62 are scarce. NGC ID# 26AL, PCGS# 8967

1874 Liberty Double Eagle, MS60
Popular Type Two Issue

- 5430 1874 MS60 PCGS.** The 1874 Liberty double eagle is one of the more collectible Type Two twenties in grades between VF and MS60, but high grade specimens are rare. This impressive Mint State example offers lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. The design elements are well-detailed and overall eye appeal is quite strong. NGC ID# 26AN, PCGS# 8970

1874-CC Twenty Dollar, AU Details
Some Luster Remains

- 5431 1874-CC — Cleaning — PCGS Genuine Secure. AU Details. Variety 2-A.** Some luster remains in the fields of this AU-level 1874-CC double eagle despite light cleaning. The yellow-gold surfaces are fairly smooth, and the design elements are well-detailed. The 1874-CC is a rarity in Mint State, making AU coins highly appealing to budget-conscious collectors. This piece is even more affordable.

- 5432 1874-S MS61 PCGS.** The 1874-S Type Two Liberty double eagle is seldom encountered in grades above MS61. Despite a large number of minor contact marks that determine the grade, this attractive Mint State example retains almost all of its original mint luster. NGC ID# 26AR, PCGS# 8972

**1875 Twenty Dollar, MS63+
Visually Impressive, Scarce This Fine**

- 5433 1875 MS63+ PCGS. CAC.** The 1875 is a moderately plentiful Type Two Philadelphia issue, but this Plus-designated MS63 coin is conditionally scarce, and finer pieces are rare. The strike is bold, and each side yields frosty, mint-fresh luster in lovely wheat-gold hues. A few trivial grazes here and there are all that limit the grade, although the eye appeal surpasses expectations. Population: 74 in 63 (2 in 63+), 3 finer. CAC: 4 in 63, 3 finer (4/16). NGC ID# 2547, PCGS# 8973

- 5434 1875-S MS61+ NGC.** Frosty wheat-gold luster and a bold strike give this Mint State 1875-S double eagle pleasing eye appeal, despite scattered abrasions that limit the grade. One of six Plus-graded coins in this grade at NGC (4/16). NGC ID# 26AU, PCGS# 8975

- 5435 1876 MS61 PCGS.** An attractive Mint State specimen from the last year of the Type Two design, this coin exhibits well-detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26AV, PCGS# 8976

- 5436 1876-CC VF30 NGC. Variety 4-A.** Die lines in the neck curls and the mintmark position identify the variety for this accessible Nevada double eagle. Light greenish-gold surfaces exhibit scattered wispy marks, and the motifs feature moderate friction from circulation. A pleasing CC twenty. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU Details

- 5437 1876-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A.** Doubly popular as both a Type Two design type and a Carson City issue, this is an affordable way to add this issue to a collection. The surfaces are subdued by cleaning, but are also remarkably free from abrasions. Strike details are above average for a Type Two twenty. Even reddish-yellow color throughout. NGC ID# 26AW, PCGS# 8977

**1877-CC Liberty Twenty, AU50 Details
Better Type Three Issue**

- 5438 1877-CC — Cleaned — ANACS. AU50 Details. Variety 1-A.** The well-detailed design elements of this pleasing Type Three double eagle show only light wear, and the orange-gold surfaces exhibit the expected number of minor abrasions for the grade. The luster is somewhat subdued, due to a light cleaning in the past. The 1877-CC is a better date, from a mintage of 42,565 pieces. NGC ID# 26AZ, PCGS# 8983

**1878 Twenty Dollar, MS62+
Elusive CAC Example**

- 5439 1878 MS62+ PCGS. CAC.** This Plus-graded 1878 double eagle displays sharp design elements and frosty yellow-gold luster. A scattering of light grazes on the obverse limits the grade but none are individually detracting. This early Type Three Philadelphia issue is collectible in this grade but is seldom seen finer. Population: 25 in 62+, 52 finer. CAC: 21 in 62, 8 finer (4/16). NGC ID# 26B3, PCGS# 8985

- 5440 1879-S MS60 PCGS.** Die doubling appears on TWENTY and PLURIBUS. The 1879-S is generally considered an available issue, but coins are scarcely encountered in Uncirculated condition. Glowing yellow-gold surfaces are covered in myriad abrasions and frosty luster. Razor-sharp detail is seen on the devices. NGC ID# 26B9, PCGS# 8991

**1880 Twenty Dollar, Choice AU
Low-Mintage Scarcity**

- 5441 1880 AU55 NGC.** During 1880, the Philadelphia Mint struck 3,166,400 half eagles and 1,644,840 eagles, but its commercial double eagle production was a scant 51,420 pieces. Most survivors are in XF and AU grades. The present Choice AU example displays ample pockets of luster. The straw-gold surfaces show scattered inoffensive marks. NGC ID# 26BA, PCGS# 8992

- 5442 1880-S MS60 PCGS.** Small Squat S. As usual for this San Francisco Type Three double eagle emission, the stars and hair curls exhibit pinpoint detail. Swirling luster over light yellow-gold surfaces with tinges of rose generates great eye appeal. Predictably baggy for the grade. NGC ID# 26BB, PCGS# 8993

**1882-CC Twenty, XF45
Affordable CC Type Coin**

- 5443 1882-CC XF45 PCGS. Variety 1-B.** The 1882-CC twenty is moderately scarce both as an overall and condition rarity. The mintage was 39,140 pieces and it is estimated that today somewhere in the range of 800-900 pieces are extant in all grades. This is a lightly handled example with significant traces of the original prooflike finish remaining in the fields. Lightly abraded, rather than the usual heavy marks found on most examples. Reddish accented yellow-gold color. NGC ID# 26BF, PCGS# 8997

- 5444 1883-S MS62+ PCGS. CAC.** The vivid orange-gold surfaces of this Plus-graded MS62 specimen display vibrant mint luster on both sides, with the expected number of minor contact marks for the grade. The design elements are sharply detailed and the overall presentation is quite pleasing. NGC ID# 26BJ, PCGS# 9000

**1884-CC Double Eagle, XF45
Pleasing Natural Coloration**

- 5445 1884-CC XF45 NGC. Variety 1-A.** Hints of luster in the fields illuminate original olive-gold patina on this Choice XF 1884-CC double eagle. The surfaces are remarkably smooth for the grade, and the eye appeal is proportionately high. The 1884-CC is fairly plentiful in the context of Carson City twenties, suitable for the collector seeking a single piece from this mint. NGC ID# 26BK, PCGS# 9001

- 5446 1884-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A.** Only the slightest trace of wear shows on the sharply detailed design elements of this Type Three double eagle, and the pleasing orange-gold surfaces are free of large or distracting abrasions. The luster is dimmed by a light cleaning in the past, but the overall presentation of this piece is quite attractive. NGC ID# 26BK, PCGS# 9001

- 5447 1890 MS62 PCGS.** With finer pieces scarcely seen, this MS62 1890 double eagle will appeal to a range of collectors. The strike is razor-sharp, and the orange-gold surfaces yield radiant cartwheel luster. Grade-limiting abrasions are trivial and scattered. PCGS has seen 51 numerically finer submissions (5/16). NGC ID# 26BX, PCGS# 9013

- 5448 1890-CC VF35 PCGS. CAC. Variety 1-B.** The mintmark "bridges" the words TWENTY DOLLARS for this variety, whereas variant 1-B shows the mintmark shifted to the right. Moderately worn apricot-gold surfaces have peach overtones and a degree of deep-hued encrustation near the devices. Scattered light abrasions. Ex: *U.S. Coin Signature (Heritage, 8/2013)*, lot 5240. NGC ID# 26BY, PCGS# 9014

**1896 Double Eagle, MS64+
High Technical and Visual Quality**

- 5449 1896 MS64+ NGC. CAC.** This near-Gem is undeniably high-end for the grade, and is on the cusp of joining the some of the finest known survivors from this Philadelphia issue (792,500 coins struck). Deep orange-gold color embraces surfaces that feature impeccably detailed motifs. The fields are smooth and frosty with few marks to report. NGC has seen merely nine finer submissions (4/16). NGC ID# 26CF, PCGS# 9029

**1897 Twenty Dollar, MS64+
Rarely Seen Finer**

- 5450 1897 MS64+ PCGS. Breen-7325, Repunched Date.** Frosty, vibrant yellow-gold luster delivers the bulk of the eye appeal — which is significant — on this high-end Choice 1897 double eagle. The strike is sharp, and only a few light grazes on the cheek prevent Gem classification. The 89 in the date is repunched west, adding technical interest to this already outstanding double eagle. PCGS has seen only seven finer representatives (4/16). NGC ID# 26CH, PCGS# 9031

**1897 Twenty Dollar, MS64+
Very Rare in Better Grades**

5451 1897 MS64+ PCGS. CAC. A cursory look at the PCGS population figures provides insight as to the rarity of the 1897 in better grades. While hundreds of 1897 double eagles have been certified at the Choice grade level, only nine of them have been awarded a Plus designation, and merely seven submissions are reported finer, all in MS65 (4/16). This impeccable near-Gem displays frosty luster over marvelous rose and green-gold surfaces. The hair curls, stars, and feathers are needle-sharp. Grade-limiting marks are well-hidden. NGC ID# 26CH, PCGS# 9031

5452 1897-S MS61 Prooflike NGC. The 1897-S was well-made, and circulation strikes usually come fully struck with excellent luster, but prooflike coins are rare. This MS61 Prooflike twenty could easily be mistaken for a proof. Remarkably glassy fields and razor-sharp devices account for the overt contrast on each side. Small abrasions are unimportant. Census: 20 in 61 Prooflike, 31 finer (4/16). NGC ID# 26CJ, PCGS# 79032

**1898-S Double Eagle, MS64+
Impressive Production Quality**

5453 1898-S MS64+ PCGS. CAC. Although Choice representatives of the 1898-S can be acquired with little searching, Gems are very scarce. This CAC-endorsed, Plus-designated near-Gem is unquestionably on the scarcer side. The issue's impressive production quality is on full display, with needle-sharp motifs and swirling luster over light butter-gold surfaces. Glimpses of rose color confirm the originality of this near-Gem double eagle. Minor grazes fail to impact the appeal. NGC ID# 26CL, PCGS# 9034

**1898-S Twenty Dollar, MS64+
Late-19th Century Type Coin**

5454 1898-S MS64+ PCGS. CAC. This late-19th century San Francisco double eagle ranks among the most available and best-produced Liberty Head twenty dollar gold issues. Consequently, the 1898-S has long been popular among type collectors. Elements of green and rose complement the frosty peach-gold surfaces of this strong MS64+ representative. Eye appeal is fantastic. NGC ID# 26CL, PCGS# 9034

**1898-S Double Eagle, MS64+
Semireflective Fields**

5455 1898-S MS64+ PCGS. CAC. The 1898-S is available in MS64 but becomes scarce and expensive in MS65. This Plus-graded Choice coin will appeal to numerous collectors for its quality/affordability combination. The strike is bold, and the yellow-gold surfaces yield frosty cartwheel luster. A few light grazes on Liberty's cheek are all that preclude a full Gem assessment. NGC ID# 26CL, PCGS# 9034

5456 1900-S MS63 NGC. CAC. Old Reverse with "duck tail" feathers on the back of the eagle's neck. Potent luster sweeps this crisply struck and lightly abraded San Francisco Liberty twenty. The sole mentionable mark is a rim nick below the final 0 in the date. Much nicer than usual for this plentiful but indifferently stored issue. NGC ID# 26CR, PCGS# 9038

5457 1904 MS64+ NGC. A high-end Choice example of this popular type issue, with well-detailed design elements and lightly marked peach-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65
Excellent Surface Quality**

- 5458 1904 MS65 NGC. CAC.** A satiny green-gold Gem example of this famous 20th century type-coin issue, showing bold design elements and unabraded surfaces. Even Liberty's cheek is free of mentionable abrasions. The 1904 is a common date through MS65, but CAC-endorsed coins such as this are in the minority.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar, MS65+
Uncommonly Smooth Surfaces**

- 5459 1904 MS65+ PCGS.** Orange toning accompanies design elements of this lustrous and well struck Liberty type coin. The 1904 will never be rare, even in nice Uncirculated grades, but the present piece exhibits undeniably superior quality for the issue, and will please the most demanding type collector. NGC ID# 26CY, PCGS# 9045
- 5460 1907 MS64 PCGS.** Glowing tangerine-gold luster gives this Choice 1907 Liberty double eagle excellent eye appeal. The strike is sharp, and only a few tiny marks in the left obverse field limit the grade. PCGS has seen only 18 finer examples of this final-year type coin issue (5/16). NGC ID# 26D7, PCGS# 9052
- 5461 1907 Liberty MS64 PCGS.** The final year of the Liberty Head double eagle. The near-Gem presented here displays a razor-sharp strike and highly lustrous apricot-gold surfaces. A scattering of luster grazes and minute contact marks define the grade. The 1907 Liberty Head twenty is extremely challenging to obtain in a higher grade, with just 18 finer pieces reported by PCGS (4/16).
Ex: Long Beach Signature (Heritage, 2/2007), lot 5088. NGC ID# 26D7, PCGS# 9052
- 5462 1907 MS64+ PCGS.** This high-end Choice specimen exhibits sharply detailed design elements and the pleasing peach-gold surfaces radiate vibrant mint luster from both sides. Only a few minor signs of contact are evident and eye appeal is outstanding. PCGS has graded 18 numerically finer examples (4/16). NGC ID# 26D7, PCGS# 9052

SAINT-GAUDENS DOUBLE EAGLES

- 5463 1907 Arabic Numerals MS64 PCGS.** A frosty yellow-gold example of this inaugural Arabic Numerals Saint-Gaudens twenty, showing near-Gem surface quality and a bold strike. The surfaces are original and display excellent eye appeal for the grade. NGC ID# 26F5, PCGS# 9141

5464 1907 Arabic Numerals MS64+ PCGS. CAC. The first regular-issue date in the series is popularly sought-after for type purposes. This well-struck Choice example is on the precipice of a full Gem assessment, recognized by PCGS and CAC for its high quality within the grade. Yellow-gold surfaces are awash in frosty luster and feature minimal abrasions. NGC ID# 26F5, PCGS# 9141

5465 1908-D No Motto MS64 PCGS. The relief elements are notably well-struck with full columns on the Capitol and crisp detail on the feathers and talons. Coppery-gold surfaces have an almost reflective quality and an overlay of satin luster. A mark on Liberty's chest is the only one of note. NGC ID# 26F7, PCGS# 9143

5466 1908-D No Motto MS64 PCGS. The No Motto twenties were generously struck at the Denver Mint in early 1908, yet many coins were exported and others went into storage at the Treasury, never to emerge. Those coins actually "put out" into circulation numbered considerably less than the official mintage and Gem pieces are very scarce. This near-Gem example is attractive and lustrous with rich-gold color and well-defined motifs. Marks are minimal for the assigned grade. NGC ID# 26F7, PCGS# 9143

**1908 Saint-Gaudens Double Eagle, MS64
First Year With Motto**

5467 1908 Motto MS64 PCGS. The 1908 Saint-Gaudens double eagle With Motto is less available than several other dates of the early series. While MS64 examples can be located with patience, higher grade pieces are rare. The present coin is an attractive Choice specimen, with sharply defined design elements, strong mint luster, and light orange-gold fields. NGC ID# BNAK, PCGS# 9147

5468 1908-D Motto MS62 NGC. The recently inaugurated Denver Mint coined 349,500 Saint-Gaudens double eagles after the motto IN GOD WE TRUST was reinstated on July 1, 1908. Radiant frost cartwheels around light rose-gold surfaces that show well-defined motifs and scattered marks. NGC ID# 26F9, PCGS# 9148

5469 1910 MS64 NGC. The availability of the 1910 through near-Gem is unsurprising given the mintage of 482,000 pieces, yet the certification totals decline markedly in MS65, where the issue becomes very scarce. This wheat-gold Choice twenty is strongly struck and minimally marked. Lovely aesthetic appeal. NGC ID# 26FF, PCGS# 9154

5470 1910 MS64 NGC. CAC. Glistening mint frost cascades over this delicate straw-gold Saint-Gaudens double eagle. Full fingers on the torch hand, complete visage, and only a touch of softness on the Capitol building characterize the strike. Lovely eye appeal and quality for the grade. NGC ID# 26FF, PCGS# 9154

5471 1910-D MS65 PCGS. Although plentiful in MS65, the 1910-D Saint-Gaudens double eagle becomes elusive in finer grades. This piece displays a bold strike and vibrant, frosty yellow-gold luster. A few small marks are not out of line for the grade. NGC ID# 26FG, PCGS# 9155

5472 1910-D MS65 PCGS. Lovely rose and lilac hues appear in the central regions of this radiant Gem 1910-D double eagle. The strike is bold, and the frosty luster is free of distracting abrasions. Finer examples of this issue are infrequently encountered. NGC ID# 26FG, PCGS# 9155

5473 1910-D MS65 PCGS. The frosty surfaces are smooth and lustrous on this Gem Denver twenty, one of 429,000 pieces struck. Only tiny high point marks are visible with a lens. The coin exudes eye appeal from the vibrant, yellow-gold surfaces. Finer pieces are scarce, with just 136 such pieces reported by PCGS (4/16). NGC ID# 26FG, PCGS# 9155

5474 1910-S MS64 PCGS. The 1910 San Francisco double eagles are elusive in grades finer than MS63. This brilliant, lustrous, and well-struck Choice Uncirculated example is a notch above the more frequently available coins, with the figure of Liberty sharply defined and relatively undisturbed by bagmarks. A few light abrasions do not lessen the eye appeal, which suggests an even finer grade. NGC ID# 26FH, PCGS# 9156

5475 1910-S MS64+ PCGS. Full strike detail on each side of this splendid near-Gem double eagle is undeniably one of its greatest attributes. Other desirable characteristics includes delicate lemon-gold color, glimmering luster, and notably few abrasions. The 1910-S enjoys a mintage of 2.1 million coins, and it becomes decidedly elusive in Gem condition. NGC ID# 26FH, PCGS# 9156

1911 Saint-Gaudens Twenty, MS64 Underrated Issue in High Grade

5476 1911 MS64 PCGS. From a smallish mintage of 197,250 pieces, the elusive nature of the 1911 Saint-Gaudens double eagle is underappreciated, outside of series specialists. This attractive Choice example offers sharply detailed design elements and well-preserved, lustrous orange-gold surfaces. PCGS has graded 58 numerically finer examples (4/16). NGC ID# 26FK, PCGS# 9157

5477 1911-D MS65 PCGS. A readily available Denver issue in even Gem or finer conditions, a total of 846,500 pieces were minted and apparently most were distributed, although the Denver Mint records are at times less complete than those of the San Francisco and Philadelphia mints. This pleasing Gem example displays glints of lemon-gold and hints of rose across the frosty, lustrous medium-gold coloration. NGC ID# 26FK, PCGS# 9158

1911-S Saint-Gaudens Double Eagle, MS65 Vivid Color and Luster

5478 1911-S MS65 PCGS. The 1911-S Saint-Gaudens double eagle is a very scarce issue in grades above MS65. This exceptional Gem exhibits sharply detailed design elements and especially vibrant mint luster throughout. The vivid orange-gold surfaces show only insignificant signs of contact and eye appeal is tremendous. PCGS has graded 36 numerically finer examples (4/16). NGC ID# 26FL, PCGS# 9159

1912 Saint-Gaudens Double Eagle, MS64 Stars Added to Obverse

5479 1912 MS64 PCGS. A minimally abraded example whose canary-gold surfaces exude thick mint sheen. Liberty's chest and raised knee show slight incompleteness of detail. Only the Philadelphia Mint struck twenty dollar pieces in 1912, which was also the first year of the 48-star obverse subtype. PCGS has graded 47 numerically finer examples (4/16). NGC ID# 26FM, PCGS# 9160

1912 Twenty Dollar, MS64 Bright Mint Luster

5480 1912 MS64 PCGS. This lower-mintage Saint-Gaudens issue is worth pursuing in near-Gem and finer grades. This is a bright, lustrous example with none of the matte texturing seen on most Saints from this decade. Even golden-orange color is seen across both sides and the strike details well (but not quite fully) brought up. NGC ID# 26FM, PCGS# 9160

5481 1913-D MS64 PCGS. Satiny luster glimmers over sun-gold surfaces that show hints of rose color, accounting for the universal eye appeal of this Choice Denver product. Well-struck with bagmarks strewn over each side. Scarcely seen finer. NGC ID# 26FP, PCGS# 9162

5482 1913-D MS64 PCGS. Only minor abrasions and bagmarks exist on this attractive mintmarked twenty, struck to the tune of 393,500 pieces at the Denver Mint. Attractive coloration includes lemon-gold base toning and vibrant sun-gold accents across both sides. Frosty mint luster adds to the Choice eye appeal. Sharply struck with near-Gem definition throughout. NGC ID# 26FP, PCGS# 9162

5483 1914 MS63 PCGS. Honey-gold color and glistening luster prevail over this Select twenty dollar gold piece. The strike shows mild incompleteness on the high points, but the fields are generally free from all but the smallest of ticks. Most grade-limiting abrasions are well-hidden within the design elements. From a tiny Philadelphia mintage of 95,200 coins. NGC ID# 26FS, PCGS# 9164

**1914-D Saint-Gaudens Double Eagle, MS65
Colorful and Lustrous**

5484 1914-D MS65 PCGS. From a mintage of 453,000 pieces, the 1914-D Saint-Gaudens double eagle is not too difficult to locate in MS65 condition, but finer examples are definitely elusive. This impressive Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded 69 numerically finer examples (4/16). NGC ID# 26FT, PCGS# 9165

5485 1914-S MS65 PCGS. The 1914-S twenty is an available date through MS65 but becomes scarce in finer grades. This sharp Gem displays satiny straw-gold luster without obvious abrasions. Each side emits a luminous glow that attracts the eye. NGC ID# 82KA, PCGS# 9166

5486 1914-S MS65 PCGS. Especially radiant, yellow-gold luster displays a frosty glow on each side of this Gem 1914-S Saint-Gaudens double eagle, while the strike is bold and there are no major abrasions. Finer representatives are scarce and proportionately more expensive to acquire. NGC ID# 82KA, PCGS# 9166

5487 1914-S MS65 PCGS. Satiny surfaces are beautifully preserved on this Gem 1914-S twenty dollar, illuminating rich straw-gold hues and boldly struck design elements. The 1914-S is infrequently seen finer than MS65, making the present coin high-end for the budget-conscious collector. NGC ID# 82KA, PCGS# 9166

5488 1914-S MS65 PCGS. The surfaces of this Gem 1914-S double eagle are remarkably free of bagmarks or abrasions. Frosty mint luster rolls across the finely textured surfaces, while the strike is notably sharp throughout both sides. Priced as a readily available coin through MS65, the 1914-S is very scarce any finer. PCGS reports just 118 pieces in a finer grade (4/16). NGC ID# 82KA, PCGS# 9166

5489 1915 MS63 NGC. Lustrous surfaces reveal alternating hues of khaki and rose-gold. This Select twenty features strong detail on the Capitol, and shallow abrasions are lightly peppered over each side. The 1915 claims a one of the smaller mintages in the series (152,050 coins struck). NGC ID# 26FV, PCGS# 9167

5490 1915-S MS65 PCGS. The surfaces are noticeably brighter and tend more toward the yellow-gold end of the color spectrum on this Gem 1915-S twenty. Satiny, as always, and sharply struck. Finer examples will prove elusive.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 2241. NGC ID# 26FW, PCGS# 9168

5491 1916-S MS64 PCGS. A visually impressive near-Gem with radiant mint luster and a sharp strike, this 1916-S appears as if it was minted yesterday, and not 100 years ago. The sun-gold surfaces flash green and orange highlights while the bagmarks are widely scattered and small. The eagle is especially bold. NGC ID# 34NJ, PCGS# 9169

**1920 Double Eagle, MS64
Only One Numerically Finer at PCGS**

5492 1920 MS64 PCGS. The 1920 double eagle is readily available in grades through near-Gem, but is virtually unobtainable any finer. This certainly does not diminish the desirability of the MS64 specimen that we present in this lot. It radiates dazzling luster from both sides, and its relatively smooth, peach-gold surfaces are minimally abraded. These positives are complemented by a powerful strike that has left excellent definition on the design elements. PCGS has graded only one numerically finer example (4/16). NGC ID# 26FY, PCGS# 9170

**1922 Twenty Dollar, Frosty Gem
Ideal Collectible Grade**

5493 1922 MS65 PCGS. The 1922 double eagle is an available date in the context of the series. Gems are popular among collectors, and finer pieces are major rarities. This bold MS65 example displays frosty luster over light yellow-gold surfaces that show faint traces of rose near the interiors. A few trivial ticks are in line with the grade. PCGS lists merely eight coins finer, all in MS66 (5/16). NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, MS65
Condition Rarity in Finer Grades**

5494 1922 MS65 PCGS. A frosty and lustrous Gem with brilliant butter-yellow surfaces and bold design definition. The 1922 is elusive when compared to the common date Philadelphia issues from 1924 to 1928. It is also a condition rarity that is infrequently seen any finer. PCGS has only certified eight higher grade examples (4/16).
Ex: Long Beach Signature (Heritage, 9/2009), lot 1952. NGC ID# 26G3, PCGS# 9173

1923 Saint-Gaudens Twenty, MS65
Very Rare in Higher Grades

5495 1923 MS65 PCGS. The 1923 Saint-Gaudens double eagle is an available date in lower Mint State grades, but examples in Gem condition are more elusive than generally realized. Improving on an MS65 specimen is almost impossible, as only three coins have been certified in higher numeric grades by PCGS and NGC combined (4/16). The present piece is a delightful Gem, with sharply defined devices, pleasing orange-gold surfaces, and vibrant mint luster. NGC ID# 26G5, PCGS# 9175

5496 1923-D MS65 PCGS. The 1923-D double eagles are invariably well-produced with outstanding eye appeal and frosty, sharply struck fields and devices. This Gem coin is no exception, with vibrant mellow-gold surfaces and only a few widely dispersed marks. A single nick on Liberty's forehead is noted, but the overall surface quality is suggestive of an even finer grade. NGC ID# 26G6, PCGS# 9176

5497 1924 MS66 PCGS. Among Saint-Gaudens double eagles, the 1924 and the 1928 issues are abundantly available and notably well-produced, making them the go-to dates for gold accumulations and high-grade type. The present coin is deeply frosty and beautifully struck with attractive straw-gold color and abiding mint luster. An indisputable Premium Gem, it is one of more than 14,000 pieces so-graded by PCGS and NGC combined, yet the two services report under 300 pieces in numerically finer grades (4/16). NGC ID# 26G7, PCGS# 9177

5498 1924-S — Altered Surfaces — PCGS Genuine. Unc Details. This 1924-S double eagle is boldly detailed with somewhat dull green-gold luster. A loupe reveals thin peripheral die cracks around much of each side, and eroded dies produce metal flowlines toward the borders. The surfaces have a faintly granular texture. NGC ID# 26G9, PCGS# 9179

5499 1925 MS65 PCGS. A five-fold reduction in the availability of the 1925 in grades finer than Gem makes the MS65 level an optimal collector grade. This example displays vibrant satiny luster and sharply struck motifs, with only inconspicuous bagmarks and small ticks over the gleaming gold surfaces. The eye appeal is excellent. NGC ID# 26GA, PCGS# 9180

5500 1926 MS66 PCGS. Only slightly less-available than the 1924 and 1928 issues, the 1926 Philadelphia twenties are equally well-produced and attractive. This smoothly lustrous example is a vibrant Premium Gem coin, with nearly mark-free surfaces and satin-smooth fields. Finer representatives of the 1926 are rare and expensive, with just five numerically finer coins at PCGS (4/16). NGC ID# 26GD, PCGS# 9183

5501 1928 MS65 PCGS. Gem examples abound for the 1928 double eagles, yet this example is particularly smooth and attractive with few intervening bagmarks. Wheat-gold color blankets both sides with strong cartwheel luster. The strike is uniformly sharp on both sides. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66
Few Seen Finer

5502 1893 Isabella Quarter MS66 PCGS. This brilliant, vibrantly lustrous Isabella quarter displays razor-sharp detail and largely untouched surfaces. The Isabella quarter was one of two commemoratives issued in 1893 for the World's Columbian Exposition in Chicago. The souvenir coins were originally sold at a price of four-times face value, which limited distribution to 24,214 pieces, including assay coins. NGC ID# BYJ9, PCGS# 9220

5503 1921 Alabama MS65+ PCGS. This Plus-graded Gem exhibits well-detailed design elements and especially vibrant mint luster, under attractive shades of golden-brown and lavender toning. The well-preserved surfaces add to the outstanding eye appeal. NGC ID# BYF2, PCGS# 9224

5504 1921 Alabama 2x2 MS65 NGC. CAC. The Alabama Centennial half dollar with the 2x2 notation in the right obverse field had a distribution of only 6,006 pieces, and survivors grading finer than MS65 are scarce. This Gem CAC coin displays a bold strike and frosty luster with a hint of light golden toning that deepens toward the peripheries. NGC ID# BYEZ, PCGS# 9225

5505 1937 Antietam MS67+ PCGS. CAC. This Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster on both sides. Delicate shades of pale gold toning add to the terrific eye appeal. Population: 17 in 67+, 20 finer (4/16). NGC ID# BYF4, PCGS# 9229

5506 1937-D Arkansas MS67 PCGS. A bold strike and satiny luster complement this champagne-toned Superb Gem 1937-D Arkansas half dollar. A couple of faint grazes on the girl's cheek are the only grade-limiting factors. Nonetheless, this issue is rare graded so fine. Population: 36 in 67 (6 in 67+), 2 finer (4/16). NGC ID# BYFC, PCGS# 9242

5507 1939-S Arkansas MS66+ PCGS. A low-distribution type coin (2,105 pieces) with satin surfaces and gentle golden toning along the obverse and reverse rims. The coin appears pristine other than a wispy handling mark that is noticed in the lower obverse field. PCGS lists only 14 finer representatives (3/16).
Ex: Long Beach Signature (Heritage, 2/2003), lot 8820; Baltimore Signature (Heritage, 7/2003), lot 9182; FUN Signature (Heritage, 1/2013), lot 13602. NGC ID# BYFL, PCGS# 9251

5508 1939-S Arkansas MS66 PCGS. CAC. Arkansas half dollars were struck from 1935 through 1939. Merely 2,105 S-mint halves were struck during that final year, and they scarcely survive so well-preserved. Each side is brilliant with swirling mint frost over surfaces that seem clean even for the high Premium Gem grade. CAC: 34 in 66, 6 finer (4/16). NGC ID# BYFL, PCGS# 9251

**1936-S Bay Bridge Half Dollar, MS67+
Rarely Seen Finer**

5509 1936-S Bay Bridge MS67+ PCGS. CAC. The obverse of the 1936-S Bay Bridge commemorative half dollar has many open surfaces that attract abrasions, making Superb Gem examples difficult to locate. This Plus-graded CAC coin is beautifully preserved and sharp with frosty luster. Mottled gold, mint, and champagne-gray toning encompasses each side, attesting to the originality of the surfaces. PCGS lists only 11 coins finer (4/16). NGC ID# BYFM, PCGS# 9254

5510 1935/34-D Boone MS67 NGC. The Daniel Boone Bicentennial half dollar was initially struck in 1934. One variety of the 1935 issue has a small "1934" date added to the reverse field. This D-mint Superb Gem boasts razor-sharp detail and satin luster. The fields show faint die preparation lines, suggesting this coin is an early strike. Amber-gold and mint-green hues appear around the peripheries, highlighting the brilliant, eye-catching interiors. A single tiny tick on Boon's nose prevents an even finer grade. Census: 58 in 67 (3 in 67+, 4 in 67★, 1 in 67+★), 7 finer (5/16). NGC ID# BYFU, PCGS# 9263

5511 1938 Boone MS67 PCGS. The 1938 Boone half dollar claims a small distribution of just 2,100 pieces. This spectacular Superb Gem offers sharply detailed design elements and vibrant, satiny mint luster throughout. The virtually pristine surfaces are highlighted by shades of pale gold toning. Population: 40 in 67 (5 in 67+), 1 finer (5/16). NGC ID# BYG6, PCGS# 9274

5512 1925-S California MS67 PCGS. CAC. Ex: Gutttag Family. A medley of lavender, yellow-gold, and sky-blue cascades over the obverse while orange-gold dominates the reverse. Intense luster, sharply struck design elements, and well cared for surfaces round out the eye appeal of this gorgeous California commemorative, appropriately recognized by CAC. NGC ID# BYGA, PCGS# 9281

5513 1892 Columbian MS66+ PCGS. CAC. A well-struck, Premium Gem example of the first commemorative half dollar issued by the U.S. Mint. This Plus-designated Premium Gem 1892 Columbian half displays satiny luster and a dusting of light golden toning that is slightly mottled on the reverse. The peripheries show deeper amber-gold hues, and the preservation is outstanding. PCGS has seen 37 finer submissions (5/16). NGC ID# BYGF, PCGS# 9296

5514 1892 Columbian MS66+ Prooflike NGC. CAC. A Plus-graded Premium Gem example of this first silver commemorative issue, with well-detailed design elements and reflective prooflike fields. The well-preserved surfaces display hints of sea-green and magenta toning. Census: 22 in 66 (2 in 66★) Prooflike, 1 finer (5/16). NGC ID# BYGE, PCGS# 89296

5515 1922 Grant No Star MS66+ PCGS. CAC. The silky-smooth surfaces of this high-end No Star Grant Memorial half dollar are beautifully preserved, with absolutely no disturbances visible on the obverse portrait. Areas of cherry-red and lilac accent soft lavender-gold toning over each side, while the only area of striking weakness is minutely visible on Grant's upper hair. PCGS has certified 54 numerically finer representatives (5/16). NGC ID# BYGP, PCGS# 9306

5516 1922 Grant No Star MS66+ PCGS. CAC. A well-struck No Star Grant Memorial half dollar, showing well-preserved satin surfaces and mostly champagne-colored toning; additional olive, russet, and amber overtones appear around the borders. Even though the No Star coin is the more available of the two Grant half dollar varieties, pieces grading finer than this high-end Premium Gem are scarce. NGC ID# BYGP, PCGS# 9306

**1922 Grant Half Dollar, MS65
Scarcer With Star Variant**

5517 1922 Grant With Star MS65 NGC. The With Star Grant Memorial half dollar is the more elusive of the two varieties and is scarce finer than MS65. This collectible Gem displays satiny luster with multicolor toning in the peripheral regions and light champagne in the centers. The high point of Grant's hair is slightly soft, as usual. There are no mentionable abrasions. NGC has seen 67 finer representatives, including possible resubmissions (4/16). NGC ID# BYPP, PCGS# 9307

5518 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc Details. This early, lower-mintage commemorative is highly sought after in all grades. This example shows slightly bright surfaces with pale golden toning over each side. NGC ID# BYGR, PCGS# 9309

5519 1928 Hawaiian MS64+ PCGS. A Plus-graded Choice example of this sought-after key issue, with sharply detailed design elements and vibrant mint luster throughout. The lightly marked surfaces show attractive highlights of golden-brown toning. Eye appeal is outstanding. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Lustrous Brilliant Surfaces**

5520 1928 Hawaiian MS65 NGC. The small mintage of 1928 Hawaiian commemorative half dollar was largely distributed to non-numismatists on the islands and high-grade specimens are difficult to locate in today's market. This attractive Gem exhibits sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides. Eye appeal is extraordinary. NGC ID# BYGR, PCGS# 9309

5521 1936 Long Island MS67 NGC. A melange of dappled rainbow hues provides color to each side, though the interior design areas remain largely brilliant and satiny. Immaculately preserved surfaces fail to reveal any significant imperfections under close inspection. Strongly struck and eye-appealing with only six finer coins at NGC (4/16). NGC ID# BYGX, PCGS# 9322

5522 1936 Long Island MS67 PCGS. CAC. 30th Anniversary Green Label Holder. This Superb Gem Long Island Tercentenary half dollar is boldly struck and displays remarkable, glowing mint luster. Deep crimson, forest-green, gold, sun-orange, and aquamarine toning encompasses each side, packing a powerful dose of eye appeal. Population: 76 in 67 (5 in 67+), 0 finer. CAC: 49 in 67, None finer (5/16). NGC ID# BYGX, PCGS# 9322

5523 1921 Missouri MS65 NGC. Satiny, brilliant luster illuminates Gem-quality surfaces on this 1921 Missouri Centennial half dollar, struck to mark the 100th anniversary of Missouri's statehood. The strike is bold. This is the Plain variety, which is a trifle more plentiful than its 2★4 counterpart in the highest grades. NGC ID# BYH2, PCGS# 9330

5524 1921 Missouri MS65 NGC. CAC. The glistening, frosty silver-white luster on this Gem CAC Missouri Centennial half dollar is immediately eye-catching, as the typical piece is satiny or subdued by toning. This piece is well-struck and yields only a few minor grazes that limit the grade. NGC has seen 38 finer submissions. CAC: 54 in 65, 7 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# BYH2, PCGS# 9330

1921 Missouri Centennial Half, MS66 None Finer at PCGS

5525 1921 Missouri MS66 PCGS. This Premium Gem Missouri Centennial half dollar is notably well-struck and lustrous, with grayish-silver toning over each side. There are no mentionable abrasions, and the satiny surfaces offer pleasing eye appeal. Among the finest certified at PCGS. Population: 49 in 66 (1 in 66+), 0 finer (4/16). NGC ID# BYH2, PCGS# 9330

5526 1923-S Monroe MS65+ PCGS. A large, albeit unknown percentage of the 274,077 Monroe half dollars distributed were simply released into circulation at face value. Gems are somewhat scarce. This MS65+ half dollar is typically defined and mostly brilliant with daubs of russet toning. Subdued, satin luster radiates from the well-preserved surfaces. NGC ID# BYH4, PCGS# 9333

1938 New Rochelle Half, MS67+ Exceptional Quality Even for This Grade

5527 1938 New Rochelle MS67+ PCGS. CAC. Bold amber-orange and peach interior toning with blue hues at the margins. While New Rochelle halves can be located with relative ease in higher grades, this piece is definitely a cut above. The surfaces are smooth and the eye appeal is gorgeous despite the usual striking softness on the rib of the iris.
Ex: Chicago Signature (Heritage, 8/2011), lot 5001. NGC ID# BYDX, PCGS# 9335

5528 1936 Norfolk MS68+ PCGS. A magnificent Plus-graded MS68 example, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces display brilliant centers that cede to shades of greenish-gold and magenta at the rims. PCGS has graded two numerically finer examples (5/16). NGC ID# BYH5, PCGS# 9337

5529 1926-S Oregon MS67+ NGC. CAC. Silver centers cede to marginal notes of amber and jade-green on each side of this Superb Gem well-struck example. The 1926-S Oregon Trail is among the earliest and by far the most accessible issue in high grade of this long-running commemorative series.
From The Soquel Creek Collection. NGC ID# BYH7, PCGS# 9341

5530 1933-D Oregon MS67+ NGC. CAC. The obverse legends are die tripled, as is always the case for this low-mintage issue. This is a well-struck and unabraded Superb Gem with medium cream-gray, lime-green, and tan-gold toning. Among the finest certified examples. Census: 52 in 67 (5 in 67+, 3 in 67★), 1 finer. CAC: 41 in 67, none finer (4/16).
From The Soquel Creek Collection. NGC ID# BYH9, PCGS# 9343

5531 1938 Oregon MS67+ PCGS. Ex: Gutttag Family. A pristine and satiny Superb Gem. Perfect except for a slight "shelf" on the back of the oxen, created when the coin was ejected from the die. Julius Gutttag was a leading New York City numismatist during the 1920s and 1930s. He played a role in distributing several commemorative issues, and unsold holdings from his estate were distributed early this decade.
Ex: FUN Signature (Heritage, 7/2012), lot 4547, which realized \$3,220.
From The Soquel Creek Collection. NGC ID# BYHH, PCGS# 9348

5532 1938-D Oregon MS68 NGC. Technical perfection is combined with exceptional eye appeal here on the same coin. Simply outstanding, subtle golden toning is seen at portions of the obverse, the reverse is untoned. Oregon half dollars are supposed to look nice, and generally are found in better condition than many other commemoratives, but this is truly a memorable coin. Census: 62 in 68 (1 in 68+, 34 in 68★, 2 in 68+★), 2 finer (4/16).
From The Soquel Creek Collection. NGC ID# BYHJ, PCGS# 9349

5533 1939 Oregon MS67 PCGS. CAC. 30th Anniversary Green Label Holder. A fully struck remarkably well-preserved example of this final Oregon Trail half dollar issue. The peripheries are tab-toned with deep burgundy and russet hues, while the interiors display lighter olive-gold and silvery-gray hues. Eye appeal is superb. PCGS lists only five numerically finer representatives. CAC: 45 in 67, 4 finer (5/16). NGC ID# BYHL, PCGS# 9352

5534 1939-S Oregon MS67+ PCGS Secure. CAC. A Plus-graded Superb Gem example of one of the most popular issues in the silver commemorative series, this spectacular specimen offers sharply detailed design elements and satiny mint luster, under shades of greenish-gold and lavender toning. PCGS has graded eight numerically finer examples (5/16). NGC ID# BYHN, PCGS# 9354

5535 1915-S/S Panama-Pacific, FS-501, MS65 PCGS. CAC. The upper serif of an errant mintmark is seen in the field to the right of the primary S. This Pan-Pac half dollar displays Gem-quality surfaces with unusually vibrant satin luster. Daubs of aquamarine and amber appear on the obverse, although the coin is otherwise pale champagne. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

5536 1915-S/S Panama-Pacific, FS-501, MS66 NGC. CAC. The mintmark is repunched west on this Premium Gem Panama-Pacific half dollar. As a type coin, this piece is well-struck and displays the usual satin luster. Both sides are cast in dusky champagne-gray and pale aquamarine toning. There are no mentionable contact marks.
From The Rev. Dr. James G. K. McClure Collection. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

5537 1915-S/S Panama-Pacific, FS-502, MS65 NGC. The serif of a previous mintmark is seen above the primary S on this Gem Panama-Pacific half dollar. The strike is well-executed, and the luster is characteristically satiny. A blush of light golden toning appears on each side. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

5538 1937 Roanoke MS67 NGC. CAC. Ice-blue, green, gold, and crimson coalesce over this magnificent Superb Gem Roanoke half dollar. Luminous luster and splashes of brilliance add to the appeal. Light chatter, visible only with magnification, is confined mainly to the dress. NGC shows 32 finer submissions (5/16). NGC ID# BYHW, PCGS# 9367

5539 1937 Roanoke MS67 NGC. CAC. The obverse has champagne-hued interiors that turn to vibrant shades of crimson-orange, green, and burgundy-red at the borders. Comparable toning occurs throughout the other side. This appropriately CAC-endorsed MS67 half dollar is strongly struck and exceptionally preserved. Rarely seen finer. NGC ID# BYHW, PCGS# 9367

5540 1937 Roanoke MS67+ NGC. CAC. Roanoke half dollars saw a distribution of 29,030 coins. Only a handful, however, can equal the preservation and eye appeal of this MS67+ example with CAC approval. Amber-orange, green, and tangerine peripheral hues and brilliant centers explain the top-notch visual quality. Frosty and sharply struck. NGC ID# BYHW, PCGS# 9367

5541 1937 Roanoke MS67+ NGC. CAC. Originality and technical quality make this a fantastic Roanoke commemorative representative. Fire-orange, crimson-red, and forest-green iridescence color the obverse border in a tab-toned pattern, while the reverse is wholly toned in lighter shades of the same. Thick, frosty mint luster swirls over this bold Superb Gem half. NGC has seen 32 higher grading events (5/16). NGC ID# BYHW, PCGS# 9367

5542 1937 Roanoke MS67+ PCGS. CAC. This high-end, champagne-colored Roanoke half dollar displays glowing, frosty luster with tab-toned golden, crimson, and forest-green peripheries on the reverse. The strike is sharp, and the preservation is seemingly flawless. PCGS lists 18 finer representatives (4/16). NGC ID# BYHW, PCGS# 9367

1937 Roanoke Half Dollar, MS68 None Certified Finer

5543 1937 Roanoke MS68 NGC. The average certified Roanoke half dollar grades a fraction shy of MS65, but examples remain collectible through MS67. This grade level is where the issue becomes conditionally rare. Largely brilliant, softly frosted surfaces showcase glimpses of pale sky-blue patina with faint gold around the obverse border. The relief elements are fully rendered, and there are no marks to report. Census: 32 in 68 (10 in 68 ★), 0 finer (5/16). NGC ID# BYHW, PCGS# 9367

1937 Roanoke Half Dollar, MS68 Vivid Peripheral Toning

5544 1937 Roanoke MS68 NGC. From a distribution of 29,030 pieces, neither NGC nor PCGS has certified a numerically finer 1937 Roanoke half dollar than the coin offered here (5/16). This incredible MS68 specimen exhibits razor-sharp definition on all design elements, with vibrant mint luster throughout. The impeccably preserved surfaces show brilliant centers that yield to vivid shades of sea-green and magenta at the peripheries. Census: 32 in 68 (10 in 68 ★), 0 finer (5/16). NGC ID# BYHW, PCGS# 9367

5545 1926 Sesquicentennial MS65 PCGS. CAC. The characteristics of John R. Sinnock's design are clearly evident on the Sesquicentennial half dollar — especially the Liberty Bell reverse, later utilized as inspiration for Sinnock's Franklin half dollar. This lustrous and sharp example displays pearlescent silver surfaces with pale-gold margins and flecks of deep russet toning across both sides. The conjoined portraits of George Washington and Calvin Coolidge are slightly grainy as always, yet the overall Gem quality of this coin is undeniable. CAC endorsed. PCGS lists just eight numerically finer example (4/16). NGC ID# BYJ4, PCGS# 9374

5546 1935 Spanish Trail MS66 NGC. An attractive Premium Gem example of this sought-after silver commemorative, with sharply detailed design elements and satiny mint luster, under shades of golden-brown and lavender-gray toning. NGC ID# BYJ5, PCGS# 9376

1925 Vancouver Half Dollar, MS67 Vivid Multicolor Toning

5547 1925 Vancouver MS67 PCGS Secure. CAC. Ex: Bruce Scher. From a distribution of less than 15,000 pieces, the 1925 Vancouver half dollar is very scarce at the MS67 level, and finer examples are very rare. This spectacular Superb Gem offers well-detailed design elements and virtually pristine lustrous surfaces, under vivid shades of greenish-gold, lavender-gray, and magenta toning. Population: 61 in 67 (8 in 67+), 1 finer. CAC: 26 in 67, 0 finer (4/16). NGC ID# BYJP, PCGS# 9399

**1946-S Booker T. Washington Half, MS67+
Beautifully Toned**

- 5548** 1946-S Booker T. Washington MS67+ PCGS. CAC. This boldly struck, frosty 1946-S Booker T. Washington half dollar glistens beneath a light and displays beautifully preserved surfaces. Sun-orange, forest-green, crimson, and lavender-gray hues blanket each side, delivering outstanding eye appeal. PCGS lists only three finer examples (4/16), although we doubt their eye appeal is much greater than that of this piece. CAC: 71 in 67, 4 finer (4/16). NGC ID# BYJU, PCGS# 9406

**1947 Booker T. Washington Half, MS67
Among the Finest Certified**

- 5549** 1947 Booker T. Washington MS67 NGC. A rare Superb Gem example of this second-year Booker T. Washington half dollar issue, showing brilliant, frosty luster and remarkable preservation. A smattering of microscopic impressions on the cheek are mint-made. The strike is sharp, and eye appeal is pleasing for the type. Census: 12 in 67, 0 finer (4/16). NGC ID# BYJW, PCGS# 9408
- 5550** 1947-D Booker T. Washington MS67 NGC. Tied numerically for finest at either service, this Superb Gem 1947-D Booker T. is lustrous, brilliant-white, and frosty with none of the bothersome portrait abrasions and handling marks that plague the issue. The strike is unfailingly sharp and the eye appeal is terrific. Census: 13 in 67 (2 in 67+, 2 in 67★), 0 finer (4/16). NGC ID# BYJW, PCGS# 9409
- 5551** 1949 Booker T. Washington MS67 NGC. CAC. This CAC-endorsed Superb Gem 1949 Booker T. Washington half dollar is among the finest certified and rare as such. The strike is bold, and the satiny surfaces are free of abrasions. Each side displays a hint of light champagne toning that is most noticeable near the rims. Census: 27 in 67 (1 in 67+, 1 in 67★), 0 finer. CAC: 19 in 67, 0 finer (5/16). NGC ID# BYK3, PCGS# 9416

**1951-D Washington-Carver Half, MS67
Condition Census**

- 5552** 1951-D Washington-Carver MS67 NGC. This Superb Gem 1951-D Washington-Carver half dollar is a major condition rarity. NGC has seen only five pieces in this grade and one finer, while the highest-grade coins at PCGS are only MS66+ (4/16). The strike is bold, and the satiny surfaces are brilliant. There are no major abrasions, and eye appeal is pleasing. NGC ID# BYKZ, PCGS# 9431

COMMEMORATIVE GOLD

- 5553** 1903 Louisiana Purchase Jefferson Gold Dollar MS66 NGC. Both the Jefferson and McKinley gold dollars were distributed to the extent of 17,500 coins, yet collectors saved slightly more of the former variant. Vibrant luster issues from sharply defined, medium yellow-gold surfaces. The details are distinct around each side. NGC ID# BYLD, PCGS# 7443

**1903 Jefferson Gold Dollar, MS67
Louisiana Purchase Exposition Memento**

- 5554** 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. Both Thomas Jefferson and William McKinley appeared on the commemorative gold dollars struck for the Louisiana Purchase Exposition, held in St. Louis in 1904. Neither issue is significantly more elusive than the other, although both varieties are scarce in Superb Gem condition. This MS67 Jefferson example displays a bold strike and nearly flawless yellow-gold luster. Eye appeal is superb. NGC ID# BYLD, PCGS# 7443
- 5555** 1903 Louisiana Purchase McKinley Gold Dollar MS65 NGC. A satiny, honey-gold Gem, this McKinley Louisiana Purchase gold dollar is sharply struck and free of obvious abrasions. A radial die crack sprouts from the lower reverse rim, cutting between the ST in ST. LOUIS. These coins were issued in conjunction with the Louisiana Purchase Exposition, held in St. Louis in 1904. NGC ID# BYLE, PCGS# 7444

- 5556 1903 Louisiana Purchase, McKinley Gold Dollar MS65 PCGS.** A razor-sharp, satiny Gem example of the McKinley Louisiana Purchase gold dollar, showing well-preserved surfaces and rich wheat-gold color. An affordable type coin that still displays outstanding technical quality. NGC ID# BYLE, PCGS# 7444
- 5557 1903 Louisiana Purchase McKinley Gold Dollar MS66 NGC.** Deep orange-gold marginal hues lighten to copper-gold at the centers, generating spectacular eye appeal in tandem with swirling luster over each side. Slight die fatigue is noted around the reverse border. The McKinley variant is slightly scarcer than the Jefferson gold dollars. NGC ID# BYLE, PCGS# 7444
- 5558 1903 Louisiana Purchase McKinley Gold Dollar MS66 NGC.** Sharp detail characterizes the obverse portrait and the reverse olive branch, although the dentils grow weak along the upper reverse border, opposite the high point of McKinley's shoulder. Yellow-gold surfaces are well-preserved and display satiny luster. NGC ID# BYLE, PCGS# 7444
- 5559 1904 Lewis and Clark Gold Dollar MS63 NGC.** This impressive Select Lewis and Clark gold dollar displays lightly marked yellow-gold surfaces with prooflike reflectivity in the fields and well-detailed design elements. An excellent type coin for the budget-conscious collector. NGC ID# BYLF, PCGS# 7447
- 5560 1905 Lewis and Clark Gold Dollar MS62 PCGS.** An attractive MS62 example of this distinctive, two-headed commemorative, with well-detailed design elements and lustrous orange-gold surfaces that show some minor, scattered contact marks. The 1905 Lewis and Clark gold dollar is more elusive than its 1904-dated counterpart. NGC ID# BYLG, PCGS# 7448
- 5561 1905 Lewis and Clark Gold Dollar MS62 NGC.** A collectible and yet visually pleasing example of the souvenir gold dollar struck in 1905 for the Lewis and Clark Centennial Exposition, held in Portland, Oregon that year. Light hairlines limit the grade, but the strike is sharp and the fields are reflective. NGC ID# BYLG, PCGS# 7448
- 5562 1905 Lewis and Clark Gold Dollar MS63 PCGS.** The second issue in this two-year commemorative set with a distribution of 10,000 coins, plus 41 assay examples. Luminous wheat-gold surfaces show a minimal number of ticks on each side. Typically struck. NGC ID# BYLG, PCGS# 7448
- 5563 1905 Lewis and Clark Gold Dollar MS63 NGC.** Lewis and Clark gold dollars are far scarcer than the Louisiana Purchase gold dollars that preceded them, and the average grade suggests most coins went to the general public rather than dedicated collectors. This yellow-gold Select coin has frosty luster over well-defined surfaces with a hint of semiprooflikeness. NGC ID# BYLG, PCGS# 7448
- 5564 1915-S Panama-Pacific Gold Dollar MS65+ NGC.** A sharp, well-preserved Panama-Pacific gold dollar with luminous honey-gold luster and excellent eye appeal. The Plus designation furthers the desirability of this coin, making it an ideal type-coin candidate. NGC ID# BYLH, PCGS# 7449
- 5565 1916 McKinley Gold Dollar MS66 PCGS.** Satiny luster gleams from well-preserved, fiery-orange surfaces that show a few slivers of lilac. The strike is sharp and eye appeal is excellent. Finer examples of this McKinley Memorial issue are infrequently available. NGC ID# BYLK, PCGS# 7454
- 5566 1916 McKinley Gold Dollar MS66 NGC.** Subtle, swirling peach-gold and amber colors enliven the subtly lustrous surfaces of this well-struck Premium Gem. This carefully preserved example exhibits only a few minuscule marks. Finer pieces are seldom seen. *Ex: Long Beach Signature (Heritage, 5/2007), lot 1980; Long Beach Signature (Heritage, 2/2013), lot 4644; Summer FUN Signature (Heritage, 7/2013), lot 4482.* NGC ID# BYLK, PCGS# 7454

1916 McKinley Memorial Gold Dollar
Stunning Superb Gem, None Finer at PCGS

- 5567 1916 McKinley Gold Dollar MS67 PCGS.** The surfaces on this exceptional McKinley are nothing short of stunning. Satiny luster flows across both sides, with orange accents over the attractive, wheat-gold fields and devices. A crisply struck, delightful Superb Gem — among the finest examples at PCGS with no numerically finer coins at that service. Population: 95 in 67 (2 in 67+), 0 finer (5/16). NGC ID# BYLK, PCGS# 7454
- 5568 1917 McKinley Gold Dollar MS65 PCGS.** The 1917 McKinley is much scarcer than the 1916 issue, which met with limited success when issued and the majority were melted. Now, the McKinley dollars are a necessity in a set of commemorative gold. This lustrous Gem example displays prooflikeness in the fields and frosty, sharply struck motifs. A well-preserved, light-gold example with only a few tiny ticks and strong eye appeal. NGC ID# BYLL, PCGS# 7455
- 5569 1917 McKinley Gold Dollar MS65+ NGC.** A high-end Gem representative from a distribution of 10,000 pieces, this coin offers well-detailed design elements and well-preserved orange-gold surfaces, with vibrant satiny mint luster on both sides. NGC ID# BYLL, PCGS# 7455
- 5570 1922 Grant Gold Dollar, No Star, MS64 NGC. CAC.** This No Star Grant Memorial gold dollar displays a bold strike and satiny yellow-gold luster. A few stray lines limit the grade but are invisible without a loupe and just the right angle of lighting. The CAC endorsement only furthers the eye appeal. *From The Rev. Dr. James G. K. McClure Collection.* NGC ID# BYLN, PCGS# 7458
- 5571 1922 Grant Gold Dollar, No Star, MS65 PCGS.** A lustrous lemon-gold Gem. Virtually immaculate, and the strike is intricate aside from the tree trunk near the window. Unlike the Grant half dollar, the Star and No Star Grant gold dollar varieties are of similar rarity. Housed in a green label holder. NGC ID# BYLN, PCGS# 7458
- 5572 1922 Grant Gold Dollar, No Star, MS65 NGC.** The small incused star was removed from the right obverse field partway through 1922, creating this second type. Rich green-gold surfaces show bold definition throughout this well-preserved Grant dollar. A faint alloy spot occurs above Grant's head. *Ex: Central States Signature (Heritage, 4/2014), lot 6039.* NGC ID# BYLN, PCGS# 7458
- 5573 1922 Grant Gold Dollar, With Star, MS62 NGC.** The popular With Star variant claims a distribution of 5,016 pieces. The lightly marked orange-gold surfaces of this pleasing MS62 example radiate vibrant mint luster and the design elements are well-detailed, with just a touch of the usual softness on the centers. NGC ID# BYPS, PCGS# 7459
- 5574 1922 Grant Gold Dollar, With Star, MS65 NGC.** Satiny, unabraded surfaces show medium yellow-gold luster save for a faint lavender spot in the right obverse field. The design elements are well-defined and eye appeal is pleasing. A radial die crack is just beginning from the rim near the second T in TRUST. NGC ID# BYPS, PCGS# 7459

**1922 Grant Gold Dollar, MS67
With Star, Exemplary Quality**

- 5575** 1922 Grant Gold Dollar, With Star, MS67 NGC. CAC. A boldly rendered, almost flawlessly preserved Superb Gem example of the With Star Grant Memorial gold dollar. The frosty yellow-gold surfaces glow beneath a light, and the CAC endorsement only confirms the outstanding quality. Eye appeal is remarkable. NGC has seen only 11 numerically finer examples, PCGS three; CAC: 82 in 67, 0 finer (4/16).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# BYPS, PCGS# 7459

- 5576** 1926 Sesquicentennial Quarter Eagle MS65 PCGS. This popular issue is one of only two gold quarter eagle commemoratives in the classic series, the other being the 1915 Pan-Pac two and a half. This radiant Gem boasts rich orange-gold color with blushes of lilac. Design detail and surface preservation are impressive. Scarcely found finer. NGC ID# 2FE9, PCGS# 7466

- 5577** 1926 Sesquicentennial Quarter Eagle MS65 PCGS. A bright, Gem-quality Sesquicentennial quarter eagle with frosty, vibrant luster and bold design elements. A few tiny ticks are seen on each side, none out of line for the grade. Finer examples of this final classic commemorative gold issue are infrequently available. NGC ID# 2FE9, PCGS# 7466

- 5578** 1926 Sesquicentennial Quarter Eagle MS65 PCGS. A notably attractive Gem Sesquicentennial quarter eagle, showing frosty luster that deepens in color toward the centers. The margins are bright yellow-gold, and the interiors take on a more sun-orange hue. There are no distracting abrasions, and finer coins are elusive. NGC ID# 2FE9, PCGS# 7466

- 5579** 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Frosty with original orange-gold luster and intricately detailed design elements. A few microscopic ticks are all that limit the grade. The Sesquicentennial quarter eagle had a distribution of 46,019 coins (including assay pieces), but representatives grading finer than the present coin are infrequently seen. NGC ID# 2FE9, PCGS# 7466

- 5580** 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Dazzling, frosty luster glows on each side of this Gem Sesquicentennial quarter eagle, illuminating the boldly rendered design elements. A few microscopic ticks are all that limit the grade. Finer examples of this final classic commemorative gold issue are elusive. NGC ID# 2FE9, PCGS# 7466

- 5581** 1926 Sesquicentennial Quarter Eagle MS65+ NGC. Wheat-gold on the obverse cedes to deeper orange-gold on the reverse of this attractive Plus-graded Gem, which shows a few minor luster grazes. Both sides are nicely struck for this issue. NGC ID# 2FE9, PCGS# 7466

TERRITORIAL GOLD

**C. Bechtler Five Dollar, XF Details
134 G, With Star, K-20**

- 5582** (1837-1842) C. Bechtler Five Dollar, 134 G, With Star — Cleaning — PCGS Genuine. XF Details. K-20, R.4. The usually encountered Bechtler variety is the K-4 or K-24 gold dollar. Five dollar examples are seen less often, although K-20 ranks among the more collectible varieties of that denomination. This straw-gold example is evenly struck and free from any planchet problems. The surfaces are microgranular and moderately abraded. A pinscratch near the S in DOLLARS is noted as an identifier. Listed on page 389 of the 2017 *Guide Book*. NGC ID# 2B9T, PCGS# 10097

- 5583** 1849 Moffat & Co. Five Dollar — Removed From Jewelry, Bent — NGC Details. AU. K-4a, R.4. An early entrant in the field of private gold coinage, Moffat & Company was one of the most reputable and enduring firms in the region; tapped to run the United States Assay Office in 1851, and later selling their facilities to house the first San Francisco Mint. This lightly worn specimen shows the dramatic K-4a die break on the reverse from E in FIVE to DO in DOL. The lustrous surfaces are moderately abraded, despite the noted damage. Listed on page 391 of the 2017 *Guide Book*.

S.S.C.A. RELIC GOLD MEDAL

**'1855 Kellogg Fifty Dollar' 2001 Relic Medal
Made from S.S.C.A. Gold Ingots, Gem Proof**

- 5584** 1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. The reverse is counterstamped "STRUCK AUGUST / 21 / 2001 - C.H.S." The proof mintage for that date is 84 pieces. This 2.5-ounce round relic medal contains gold derived from unsold melted-down ingots recovered from the wreck of the S.S. *Central America*. No box or other marketing material accompanies the lot. NGC ID# 32DS, PCGS# 10358

CALIFORNIA FRACTIONAL GOLD

- 5585** 1853 Liberty Round 50 Cents, BG-415, Low R.5, MS64 PCGS. A scarce Period One round half dollar variety made by M. Deriberpie in 1853. This piece is boldly struck and prooflike with yellow-gold color and minimal marks. Eye appeal is excellent for the grade. Infrequently seen this fine. Population: 7 in 64, 3 finer (5/16). NGC ID# 2BK3, PCGS# 10451

5586 Undated Liberty Octagonal 1 Dollar, BG-501, Low R.5 — Mount Removed — NGC Details. XF. The BG-501 was struck by Frontier, Deviercy & Co. and is the only octagonal gold dollar that does not show a date. This lightly worn specimen shows evidence of mount removal from 11 to 12 o'clock on the obverse rim. The lightly abraded orange-gold surfaces retain traces of original mint luster.
Ex: Eric P. Newman Numismatic Education Society.

5587 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS61 NGC. The 1853 BG-530 Liberty octagonal dollars were struck by Antoine Nouzillet in relatively large quantities, to alleviate the chronic shortage of small change in the California territory. The design elements are boldly rendered on this attractive Mint State specimen, and the lustrous orange-gold surfaces show only minor signs of contact.
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BLV, PCGS# 10507

5588 1859 Liberty Octagonal 25 Cents, BG-701, Low R.6, MS65 Prooflike NGC. Die State II, showing several thin, radial cracks from the right obverse border. BG-701 is a rare Period Two die marriage by Frontier, Deviercy & Co. This Prooflike Gem is the sole finest at NGC (5/16), showing bright yellow-gold surfaces. The reverse is bold, but the obverse is poorly defined with die polishing weakening the portrait. NGC ID# 28Y2, PCGS# 710528

**1872 Octagonal Washington Quarter, MS66
Tied for Finest at NGC, BG-722**

5589 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS66 NGC. Apparently, Frontier & Bellemere began using the bust of Washington on these coins in 1872 to avoid too close a resemblance to the U.S. gold dollar. This impressive Premium Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. Census: 6 in 66, 0 finer (5/16). NGC ID# 2BN4, PCGS# 10549

**1872 Octagonal Quarter, MS66
BG-722, Washington Portrait**

5590 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS66 PCGS. The obverse has a portrait of Washington facing left, the reverse shows 1/4 / DOLLAR / CAL surrounded by a wreath with no berries. In one of the few mistakes in the BG reference, it states this variety is not referenced by Baker, when in fact it is Baker-503. Sharply struck throughout, the surfaces show softly frosted mint luster rather than the prooflike finish usually seen on Cal fractional gold. Population: 32 in 66 (2 in 66+), 2 finer (4/16). NGC ID# 2BN4, PCGS# 10549

**1872 Washington Obverse Quarter, MS66+
BG-503, Octagonal**

5591 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS66+ PCGS. Surprisingly, a second example of this Washington obverse quarter dollar. The surfaces are unquestionably original and display rich reddish-gold color with the occasional tinge of lilac. While the piece above shows no trace of reflectivity in the fields, there is unquestioned mirroring on this example. Sharply defined on the obverse. NGC ID# 2BN4, PCGS# 10549

**1872/1 Indian Octagonal Quarter
BG-790, MS67 Prooflike
Finest Prooflike Certified**

5592 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS67 Prooflike NGC. A Christopher Mohrig design, this is a beautiful lemon-gold Superb Gem that boasts mirrored fields and mark-free surfaces. A tiny strike-through (as made) is left of the fraction bar. The usual die state with double clash marks near the profile and a vertical crack through the left-side stars. Census: 1 in 67 Prooflike, 0 finer (5/16). NGC ID# 2BRA, PCGS# 710617

5593 1875 Indian Octagonal 25 Cents, BG-797, Low R.4, MS66 PCGS. A mildly elusive Period Two octagonal quarter dollar made by Christopher Ferdinand Mohrig of San Francisco. The strike is sharp, and the bright yellow-gold surfaces display deeply mirrored fields and stark cameo contrast. Tied with two others as the finest at PCGS. NGC has seen a piece in MS66 Prooflike (4/16). NGC ID# 2BRH, PCGS# 10624

**1872 Round Washington Quarter, MS65
Popular BG-818 Variety**

5594 1872 Washington Round 25 Cents, BG-818, Low R.4, MS65 NGC. This scarce Period Two piece was produced by Frontier & Bellemere with the bust of Washington on the obverse, instead of the more often seen Liberty portrait, which some considered too close to the federal gold dollar in appearance. This well-detailed Gem is lustrous and well-preserved. Census: 5 in 65, 4 finer (5/16). NGC ID# 2BT9, PCGS# 10679

5595 1875 Indian Octagonal 50 Cents, BG-948, High R.5, MS65 PCGS. A scarce Christopher Mohrig-made Period Two octagonal half dollar. This Gem is brilliant and deeply mirrored, as is characteristic of the issue. PCGS has seen just three coins in this grade and none finer. NGC lists an MS65 Prooflike piece and an MS66 Deep Prooflike coin in this and finer levels (4/16). NGC ID# 2BXG, PCGS# 10806

5596 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS63 PCGS. A moderately elusive Period Two octagonal gold dollar, struck by San Francisco coiner Christopher Ferdinand Mohrig. The strike is slightly soft in the centers, but the fields are deeply mirrored. Seldom seen finer. Population: 15 in 63, 13 finer (5/16). NGC ID# 2C3V, PCGS# 10938

**1872 Indian Round Dollar, MS62
BG-1207, Scarce Denomination**

5597 1872 Indian Round 1 Dollar, BG-1207, R.4, MS62 NGC. An unabraded butter-gold representative with slightly distorted stars due to strike doubling. Only eight Period Two round dollar varieties are known. The obverse die of BG-1207 is shared with BG-1208, the sole variety that bears the disclaimer TOKEN. Christopher Mohrig, a San Francisco jeweler, was the maker. As of (4/16), NGC has certified 18 examples of BG-1207, eight at the MS62 level (including seven as MS62 Prooflike) and five in higher grades.
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2C46, PCGS# 10952

8690 1852 Liberty Round 50 Cents, BG-407, R.4, MS63 PCGS. PCGS Population (15/3). NGC Census: (3/1). NGC ID# 2BJT, PCGS# 10443

8691 1853 Liberty Round 50 Cents, BG-430, R.3, MS65 PCGS. PCGS Population (7/1). NGC Census: (2/0). NGC ID# 2BKM, PCGS# 10466

8692 1854 Liberty Octagonal 1 Dollar, BG-510, Low R.5, — Scratches — NGC Details. AU. Pale yellow-gold surfaces with two prominent scratches across the obverse. NGC Census: (0/13). PCGS Population (3/48). Ex: Eric P. Newman Numismatic Education Society.

8693 1853 Liberty Octagonal 1 Dollar, BG-519, Low R.4, AU58 PCGS. PCGS Population (27/49). NGC Census: (9/13). NGC ID# 2BLH, PCGS# 10496

8694 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, AU53 NGC. A prominent rim cud appears at the right side of the obverse on this pleasing piece that shows subdued yellow surfaces. NGC Census: (1/100). PCGS Population (28/279). Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BLV, PCGS# 10507

8695 1855 Liberty Octagonal 1 Dollar, BG-533, Low R.4, AU55 NGC. NGC Census: (1/19). PCGS Population (23/65). NGC ID# 2BLY, PCGS# 10510

8696 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS63 NGC. Brilliant and frosty mint luster appears on the yellow-gold surfaces of this beautiful fractional piece. NGC Census: (11/55). PCGS Population (45/94).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BMB, PCGS# 10529

8697 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS65 NGC. NGC Census: (5/5). PCGS Population (25/11). NGC ID# 2BMP, PCGS# 10540

8698 1873 Liberty Head Octagonal 25 Cents, BG-728, R.3, MS65 NGC. NGC Census: (7/20). PCGS Population (42/26). NGC ID# 2BNA, PCGS# 10555

8699 1865/4 Liberty Head Octagonal 25 Cents, BG-736, Low R.6, MS62 NGC. NGC Census: (1/0). PCGS Population (5/4). NGC ID# 2BNJ, PCGS# 10563

8700 1870 Liberty Head Octagonal 25 Cents, BG-762, Low R.4, MS62 NGC. A pleasing example with reflective light yellow-gold surfaces. NGC Census: (3/3). PCGS Population (37/19).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BPD, PCGS# 10589

8701 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS63 NGC. A lovely California fractional piece that exhibits brilliant yellow-gold surfaces with reflective fields and light cameo contrast. NGC Census: (13/41). PCGS Population (79/117).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BRB, PCGS# 10618

8702 1875 BG-797 MS65 Deep Mirror Prooflike NGC. NGC Census: (1/0). PCGS Population (0/0). NGC ID# 2BRH, PCGS# 910624

8703 1880 Indian Octagonal 25 Cents, BG-799Y, High R.4, MS62 NGC. Greenish-gold surfaces exhibit strong design definition and slightly mirrored fields. NGC Census: (3/13). PCGS Population (18/48).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BSE, PCGS# 10651

8704 1871 Liberty Round 25 Cents, BG-812, Low R.5, MS64 NGC. This lovely Choice Mint State example has splendid yellow-gold surfaces with full field reflectivity. NGC Census: (1/6). PCGS Population (15/13).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BT3, PCGS# 10673

8705 1871 Liberty Round 25 Cents, BG-812, Low R.5, MS64 NGC. The obverse of this Choice Mint State example has mirrored fields and light cameo contrast while the reverse exhibits frosty yellow-gold luster. NGC Census: (1/6). PCGS Population (15/13).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BT3, PCGS# 10673

8706 1871 Liberty Round 25 Cents, BG-838, R.2, AU55 NGC. This type issue has microscopic scratches on its subdued orange-gold surfaces. NGC Census: (2/90). PCGS Population (41/383).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BTZ, PCGS# 10699

8707 1876 Liberty Round 25 Cents, BG-854, Low R.5, AU58 NGC. Subdued greenish-gold surfaces exhibit lightly reflective fields and only trivial handling marks. NGC Census: (0/11). PCGS Population (2/41).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BUJ, PCGS# 10715

8708 1872/1 Indian Round 25 Cents, BG-870, R.3, MS61 NGC. The obverse exhibits brilliant yellow-gold luster while the reverse displays pale violet toning on the yellow surfaces. NGC Census: (2/38). PCGS Population (6/206).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BV3, PCGS# 10731

8709 1867 Liberty Round 50 Cents, BG-1007, High R.4, MS64 NGC. NGC Census: (0/5). PCGS Population (12/12). NGC ID# 2BYG, PCGS# 10836

8710 1870 Liberty Round 50 Cents, BG-1024, Low R.4, AU55 NGC. A distinctive example with heavy blue and violet patina on its yellow surfaces. NGC Census: (2/16). PCGS Population (16/112).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BZ5, PCGS# 10853

8711 1871 Liberty Round 50 Cents, BG-1027, R.3, AU55 NGC. An outstanding California fraction gold piece with brilliant yellow surfaces and considerable luster. NGC Census: (1/30). PCGS Population (26/151).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 2BZ8, PCGS# 10856

8712 1876/5 Indian Octagonal Dollar, BG-1129, R.4, — Holed — NGC Details. AU. The Indian head California fractional gold dollars are highly popular, and this piece will make a nice addition to a type or variety collection. Wisps of violet toning grace the high points of this yellow-gold example. NGC Census: (0/10). PCGS Population (0/92).
Ex: Eric P. Newman Numismatic Education Society.

MINT SETS

8764 1949 Double Mint Set. The outer mailing envelope is included, along with three cancelled stamps. The coins are richly and attractively toned. One 1949 nickel and one 1949-D nickel are absent. No 1949-S quarters were issued. (Total: 26 coins) NGC ID# 22EV, PCGS# 2768

8765 1954, 1955, and 1958 Double Mint Sets. The 1955 set includes the outer mailing envelope. The 1954-dated and 1958-D silver coins are lightly toned. The remaining silver coins exhibit medium to rich patina. (Total: 3 sets)

8766 1956 and 1958 Double Mint Sets. Both lots include the outer mailing envelope. No 1956-D half dollars were struck. The coins are lightly to extensively toned. (Total: 2 sets)

PROOF SET

8767 Three 1951 Proof Sets and One 1953 Proof Set. The five coins in each set remain in their soft-pack wrappers. Three of the sets are accompanied by their original cardboard boxes. (Total: 4 sets)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000, plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.
 - Auctions through 13 May 2016 have a minimum Buyer's Premium of \$14 per lot. Thereafter, minimum Buyer's Premium per lot is \$19, except for Movie Posters and Sports Collectibles lots wherein the minimum Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49.....	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99.....	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199.....	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499.....	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999.....	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999.....	\$100	\$1,000,000 - \$4,999,999....	\$100,000
\$2,000 - \$4,999.....	\$200	\$5,000,000 - \$9,999,999....	\$250,000
\$5,000 - \$9,999.....	\$500	>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment

Terms and Conditions of Auction

of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and

Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated

collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed auctioneers are: Samuel Foose – 0952360, Kathleen Guzman – 0762165, Michael J. Sadler – 1304630, Scott Peterson – 1306933, Andrea Voss – 1320558, Ed Beardsley – 1183220, Clinton Swett – 1407750, and Nicholas Dawes – 1304724, who will conduct the sale on behalf of Heritage Auctioneers & Galleries, Inc. NYC #41513036 ("Auctioneer").

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auctioneer may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance, or reserve, or guarantee. Auctioneer has made advances to various consignors in this sale. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates, and its employees may bid on their lots or other lots for their own account in accordance with the laws of New York, and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-7-2016
